

Purchase of General use Vehicles

Council Meeting 04/02/2024
Council Agenda item # 12.A

Purchase of General use Vehicles

- Public Works oversees purchase and maintenance of the fleet vehicles for City Departments except for the Police Department.
- The City currently has a fleet of five sedans that are used by Public Works, Community Development, and Community Services and are more than 20 years old.
- City needs to purchase new vehicles to replace the aging fleet.

Transitioning to Electric Vehicles

• Pros

- Meet zero-emission goals of the state, support general plan and new Climate Action and Adaptation Plan
- Lower Fuel costs and lower maintenance cost
- Contribute to a healthier and cleaner air

• Cons

- City currently does not have any dedicated electric vehicle charging infrastructure.
- How the vehicles are used may present an issue with battery. Vehicles sitting idle for long periods may affect battery life.

Vehicle Considerations

- Limited purchasing options:
 - Fleet options for Electric Vehicles are not available.
- Will have to buy from existing retail inventory
- General Motors has ended production of Chevy Bolt models.
