

AGENDA FOR THE

CITY OF PINOLE PLANNING COMMISSION REGULAR MEETING

**Monday, August 25, 2014
7:00 P.M.**

City Council Chambers, 2131 Pear Street, Pinole, CA 94564

In compliance with the Americans with Disabilities Act of 1990, if you need special assistance to participate in a City meeting or you need a copy of the agenda, or the agenda packet in an appropriate alternative format, please contact the Development Services Department at (510) 724-9014. Notification of at least 48 hours prior to the meeting or time when services are needed will assist the City staff in assuring that reasonable arrangements can be made to provide accessibility to the meeting or service.

Assistant listening devices are available at this meeting. Ask staff if you desire to use this device.

CONSENT CALENDAR:

All matters listed under the Consent Calendar are considered to be routine and non-controversial. These items will be enacted by one motion and without discussion. If, however, any interested party or Commissioner(s) wishes to discuss a consent item, it will be removed from the Consent Calendar and taken up in order after the last item under New Business.

PROCEDURE FOR CONSIDERING AN AGENDA ITEM:

At the beginning of an item, the Chair will read the description of that item as stated on the Agenda. The City Staff will then give a brief presentation of the proposed project. The Commission may then ask Staff questions about the item.

For those items listed as Public Hearings, the Chair will open the public hearing and ask the applicant if they wish to make a presentation. Those persons in favor of the project will then be given an opportunity to speak followed by those who are opposed to the project. The applicant will then be given an opportunity for rebuttal.

The Public Hearing will then be closed and the Commission may discuss the item amongst themselves and ask questions of Staff. The Commission will then vote to approve, deny, approve in a modified form, or continue the matter to a later date for a decision. The Chair will announce the Commission's decision and advise the audience of the appeal procedure.

Note: No Public Hearings will begin after 11:00 p.m. Items still remaining on the agenda after 11:00 p.m. will be held over to the next meeting.

CITIZEN PARTICIPATION:

Persons wishing to speak on an item listed on the Agenda may do so when the Chair asks for comments in favor of or in opposition to the item under consideration. After all of those persons wishing to speak have done so, the hearing will be closed and the matter will be discussed amongst the Commission prior to rendering a decision.

Prior to speaking on an item, you must fill out one of the "gold" cards (available at the speaker's podium) and hand it to the Secretary. If a number of persons wish to speak on an item, the Chair may limit each speaker to a set time period in which to address the Commission.

Any person may appeal an action of the Planning Commission or of the Planning Manager by filing an appeal with the City Clerk, in writing, within ten (10) days of such action. Following a Public Hearing, the City Council may act to confirm, modify or reverse the action of the Planning Commission or Planning Manager. The cost to appeal a decision is \$803.

Note: If you challenge a decision of the Commission regarding a project in court, you may be limited to raising only those issues you or someone else raised at the public hearing or in writing delivered to the City of Pinole at, or prior to, the public hearing.

A. CALL TO ORDER

B. PLEDGE OF ALLEGIANCE AND ROLL CALL

C. CITIZENS TO BE HEARD:

The public may address the Planning Commission on items that are within its jurisdiction and not otherwise listed on the agenda. Planning Commissioners may discuss the matter brought to their attention, but by State law (Ralph M. Brown Act), action must be deferred to a future meeting. Time allowed: five (5) minutes each.

D. CONSENT CALENDAR:

1. Planning Commission Meeting Minutes from June 23, 2014

E. PUBLIC HEARINGS:

None.

F. OLD BUSINESS:

1. Review of Preliminary Draft 2015-2023 General Plan Housing Element Document

G. NEW BUSINESS:

None.

H. CITY PLANNER'S/COMMISSIONER'S REPORT:

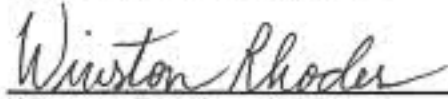

I. COMMUNICATIONS:

J. NEXT MEETING:

Planning Commission Regular Meeting, Monday September 22, 2014 at 7:00PM

K. ADJOURNMENT

POSTED: August 21, 2014

A handwritten signature in cursive script, reading "Winston Rhodes", is written over a horizontal line.

Winston Rhodes, AICP
Planning Manager

**DRAFT
MINUTES OF THE
PINOLE PLANNING COMMISSION**

June 23, 2014

A. CALL TO ORDER: 7:13 P.M.

B. PLEDGE OF ALLEGIANCE AND ROLL CALL:

Commissioners Present: Bender, Kurrent, Martinez-Rubin, McGoldrick, Toms,
and Chair Brooks

Commissioners Absent: None

Staff Present: Winston Rhodes, Planning Manager

C. CITIZENS TO BE HEARD:

There were no citizens to be heard.

D. CONSENT CALENDAR:

1. Planning Commission Meeting Minutes from April 28, 2014

Commissioner Kurrent requested a correction to the middle of Page 6 where he
had incorrectly been identified as Councilmember Kurrent.

MOTION to adopt the Consent Calendar, as amended.

MOTION: Kurrent

SECONDED: Toms

APPROVED: 6-0

E. PUBLIC HEARINGS:

**1. Conditional Use Permit 14-03: Wynn's Seafood and Barbeque
Restaurant On-Premises Alcohol Sales**

Request: Consideration of a use permit request to sell beer and wine
within an existing approximately 2,200 square foot restaurant
located within a vacant commercial space within the Appian 80
Shopping Center.

Applicant: Harry Wynn
Wynn's Seafood and Barbeque Restaurant

1 2607 Shamrock Drive
2 San Pablo, CA 94806
3

4 **Location:** 1569 Tara Hills Drive; APN 402-282-002
5

6 **Project Planner:** Winston Rhodes
7

8 Planning Manager Winston Rhodes presented the staff report dated June 23, 2014
9 for the request to sell beer and wine with meals for on-site consumption within an
10 existing restaurant located within a vacant commercial space at 1569 Tara Hills
11 Drive in the Appian 80 Shopping Center. The applicant had requested a Type 41
12 Alcohol Sales License from the State Alcoholic Beverage Control (ABC) Board,
13 which license type required that the premises function as a bonafide eating
14 establishment, must include kitchen facilities, and must prepare meals for on-site
15 consumption. With that type of license, minors would be allowed in the facility
16 which would operate from 8:00 A.M. to 12:00 A.M., seven days a week.
17

18 Mr. Rhodes recommended the adoption of the resolution to approve the use permit
19 request to approve on-premises beer and wine sales with conditions.
20

21 PUBLIC HEARING OPENED
22

23 PROPONENT:
24

25 HARRY WYNN, the applicant, explained in response to comments from the
26 Commission that the dance floor had previously existed as part of the former use,
27 there was a counter for seating and for ordering food, and the music to be provided
28 would not be live music, although in the future the hall could be rented out for
29 birthdays or wedding receptions and the area could be used for music. He added
30 that there would be a buffet on Sundays and music would be played during that
31 time. He emphasized that beer and wine only would be served. He added that
32 food would be family type home cooking.
33

34 OPPONENTS: None
35

36 PUBLIC HEARING CLOSED
37

38 Commissioner Kurrent was concerned about the potential for live music at the
39 restaurant and the potential for a bar/nightclub atmosphere. He supported a
40 condition of approval that in the event of live music during normal operations minors
41 would not be allowed into the establishment.
42

43 Commissioner Toms explained that was ABC's role, the Type 41 license was
44 already restrictive, and the dance floor/raised areas were pre-existing conditions.
45

46 Mr. Rhodes explained that a Type 48 license would be required for a bar or

nightclub. He also clarified that the noise level of the music to be played would likely be set at levels that allowed for customers to converse, and that in terms of children present during wedding receptions and birthdays, those events would be family gatherings which would likely include children. He added that staff recommended Condition 13 specifically referred to noise, nuisance, traffic, and parking, among others and if there were complaints staff would follow up and work with the owner to address any concerns.

Commissioner Martinez-Rubin verified that Condition 13 did not restrict the applicant from the use of live entertainment, which she supported.

Commissioner McGoldrick requested amendments to the title of Resolution 14-04 to eliminate "for," and to Finding No. 1 to add "dining" after beer and wine, and to eliminate the word "with."

Mr. Rhodes clarified that live music was not restricted except in the case of noise complaints; window signs would also be allowed consistent with the City's Zoning Code requirements for window coverage; and any temporary signs were allowed only up to 60 days a year.

MOTION to adopt Resolution 14-04 approving a use permit request (CUP 14-03) which permits on-premises beer and wine sales in conjunction with a new restaurant with project conditions, with corrections to the title and correction to Finding No. 1, as noted.

MOTION: Toms SECONDED: Martinez-Rubin APPROVED: 6-0

2. Conditional Use Permit 14-04: JP's Kajukenbo Karate Use Permit

Request: Consideration of a use permit request to open an approximately 1,150 square foot karate training facility located within a vacant space within an existing commercial building.

Applicant: Jason R. Pigg
 JP's Kajukenbo Karate
 3107 Avis Way
 Pinole, CA 94564

Location: 701 Belmont Avenue, Suite B; APN 403-070-034

Project Planner: Winston Rhodes

Mr. Rhodes presented the staff report dated June 23, 2014 for the request to open a karate training facility located within a vacant space within an existing commercial building at 701 Belmont Avenue, Suite B. He recommended the adoption of the resolution to conditionally approve the request.

1
2 PUBLIC HEARING OPENED
3

4 PROPONENTS:
5

6 JASON PIGG, Pinole, explained that it had always been his dream to open up a
7 karate training facility and he looked forward to teaching the children and
8 residents from the surrounding area confidence, self-control, discipline, respect,
9 and self-defense.

10
11 Commissioner Martinez-Rubin noted the applicant's intent that participants and
12 staff be mindful and respectful of adjacent uses with respect to noise and
13 parking.

14
15 Commissioner Toms urged staggered classes to avoid parking conflicts, and if
16 problems with parking were to occur she suggested working with the City
17 Engineer to stripe the front of Belmont Avenue as a drop-off/pick-up area, as a
18 possibility.

19
20 Mr. Pigg explained that his proposed classes would commence after the close of
21 the adjacent businesses.

22
23 GARION JACKSON, Pinole, supported the use permit approval to be able to
24 learn more karate.

25
26 DAVID LONGACRE, Pinole, also spoke in support of the use permit and
27 suggested the studio would be successful and be an asset to the community.

28
29 OPPONENTS: None
30

31 Commissioner Kurrent expressed concern with Condition 11 and the requirement
32 that patrons park at least 50 feet away from the entrance, and suggested the
33 condition be modified to read: *All karate training facility employees shall be*
34 *required to park in the least convenient available spaces to maximize efficient*
35 *available parking for students and individuals driving students to the facility, and*
36 *for customers of adjacent businesses.*

37
38 Commissioner McGoldrick requested the correction of the subject address under
39 the first WHEREAS of Resolution 14-05.

40
41 **MOTION** to adopt Resolution 14-05 approving the conditional use permit request to
42 allow the operation of a karate training facility within Suite B at 701 Belmont Avenue
43 with project conditions, with the amendment to Condition 11, and with the correction
44 of the address under the first WHEREAS.

45
46 **MOTION: McGoldrick SECONDED: Toms APPROVED: 6-0**

1
2 **F. OLD BUSINESS:** None

3
4 **G. NEW BUSINESS:**

5 **1. Selection of Two Housing Element Review Subcommittee Members**

6
7 Mr. Rhodes suggested the subcommittee would only need to meet three to four
8 times over the calendar year.

9
10 By consensus, Commissioners Kurrent and Toms were selected as members of
11 the Housing Element Review Subcommittee.

12
13 **H. CITY PLANNER'S / COMMISSIONERS' REPORT:**

14
15 Mr. Rhodes reported that there were some major staffing changes and a major
16 permit software update that would affect operations in the coming months and no
17 new projects that require Commission review that will be ready for consideration
18 in July, and suggested that the July meeting be cancelled.

19
20 The Commission requested an updated version of the Planning Commission
21 roster and suggested it should be provided after the selection of a seventh
22 Planning Commissioner to replace former Commissioner Paul Sekins.

23
24 **I. COMMUNICATIONS:** None

25
26 **J. NEXT MEETING:**

27
28 The next meeting of the Planning Commission will be held on Monday, August
29 25, 2014 at 7:00 P.M.

30
31 **K. ADJOURNMENT:** 8:40 P.M.

Memorandum

TO: PLANNING COMMISSION MEMBERS

FROM: WINSTON RHODES, AICP, PLANNING MANAGER

SUBJECT: REVIEW OF PRELIMINARY DRAFT 2015-2023 GENERAL PLAN HOUSING ELEMENT DOCUMENT

DATE: AUGUST 25, 2014

BACKGROUND

The Housing Element is one of seven required elements of a City's General Plan. Unlike the other mandatory General Plan elements, the Housing Element must be updated by a state mandated deadline, and is subject to detailed statutory requirements and mandatory review by the State Department of Housing and Community Development (HCD). The City's existing General Plan Housing Element was adopted on July 6, 2010 and was found to be in compliance with State law on August 2, 2010.

The State deadline for approving and submitting the City's Housing Element Update for State review is January 31, 2015. The Housing Element Update planning period will be from January 31, 2015 – January 31, 2023. This 8-year timeframe is a change from the previous shorter (5 to 7-year) planning periods for prior Housing Elements. San Francisco Bay Area cities that do not adopt the housing element within 120 days of the due date must revise and adopt the housing element every four years until timely adoption is achieved for two consecutive revisions.

The Housing Element reflects the potential for new housing development on land designated for such development in the General Plan. The Housing Element must be consistent with the overall vision for the community established in the General Plan and all General Plan elements must be internally consistent.

The Housing Element addresses housing development, rehabilitation, and conservation. It sets forth actions the City will undertake to assist residents to maintain their homes and to help ensure that there is an adequate supply of safe, affordable housing for existing and future residents. The Housing Element also addresses the special housing needs of

individuals requiring assistance, such as elderly residents, persons with disabilities, large families, female heads of households, and persons in need of emergency shelter.

Housing element law requires local governments to adequately plan to meet their existing and projected housing needs including their share of the regional housing need. Housing Element law is the State's primary market-based strategy to increase housing supply and choice. The law recognizes that in order for the private sector to adequately address housing needs and demand, local governments must adopt land-use plans and development regulations that provide opportunities for, and do not unduly constrain, housing development.

DISCUSSION

In May 2014 the City prepared a Housing Issues Report (see Attachment A) that summarizes public input received from a community housing needs survey and housing stakeholder interviews conducted earlier this year. The Housing Issues Report also discusses demographic changes between 2000 and 2010 that relate to housing needs. The Housing Issues Report included potential housing programs the City could pursue to help address these needs with limited potential housing funds.

On July 15, 2014 the City Council reviewed the Housing Issues Report and the recommendations of the City Council Finance Subcommittee regarding which programs should be prioritized with limited potential housing funds. The City Council identified three funding priorities to reflect within the Housing Element Update. These prioritized programs include:

- Working to preserve the 113 existing affordable units at risk of converting to market-rate housing by 2017;
- Providing rehabilitation assistance to homeowners to improve housing conditions, including accessibility improvement for senior households and/or households where individuals have physical disabilities; and
- Acquiring and rehabilitating foreclosed/distressed properties to turn them into affordable housing.

These prioritized programs are reflected in the attached preliminary draft Housing Element (see Attachment B). On August 12th of this month, the Planning Commission Housing Element Update Subcommittee met to review the preliminary draft Housing Element. The Subcommittee had several edits that are summarized below but overall felt comfortable with the contents and clarity of this preliminary draft document.

Page 6.0-4: Delete reference to Measure J in lines 7 and 8 of paragraph 1.

Page 6.0-30: Add a note to Table 6.19 that clarifies that “ -- ” indicates that data was not available to prevent confusion.

Page 6.0-37: Delete the word “paying” from the last line of paragraph 2.

Page 6.0-53: Add information about the number of foreclosed homes within Pinole to the third full paragraph on this page.

Page 6.0-60: Verify if there are any changes in Table 6.36 from the existing Zoning Code and Three Corridors Specific Plan that what was approved in 2010.

The draft Table 6.36 includes two deviations from existing requirements that apply to the Very High Density Residential Zoning District located generally along both sides of San Pablo Avenue immediately west of Madrone Avenue to Roble Avenue on the north side of San Pablo Avenue and from Adams Court on the west to 5th Avenue on the east on the south side of San Pablo Avenue. Current requirements do not allow single family detached or single family attached housing in this area in order to make this land available to meet future multiple-family housing needs and help activate underutilized commercial development nearby. Staff recommends no change to the currently allowable range of uses in the Very High Density Residential zoning district.

Page 6.0-88: Add a discussion of the Redevelopment Successor Agency and Education Revenue Augmentation Funds (ERAF) to the Financial Resources discussion.

Page 6.0-97: Add potential ERAF that the City anticipates as a funding source for Action H.2.3 and Action H.2.4.

Page 6.0-103: Add potential ERAF that the City anticipates as a funding source for Action H.4.4.11.

Page 6.0-105: Consider adding Education Revenue Augmentation Funds (ERAF) to the glossary.

State Review Process

Cities are required to forward draft housing elements to HCD at least 60 days prior to adoption. HCD has 60 days to review the draft Housing Element Update document and

provide written findings to the City. The City is required to consider the findings made by HCD and either change the draft Housing Element to substantially comply with State law or adopt the Housing Element with written findings explaining the reasons why the City believes the draft element substantially complies with State law despite the findings of the department. Promptly following adoption of the Housing Element Update, the City must submit a copy of the adopted document to HCD. HCD has an additional 90 days to review the adopted Housing Element Update and report its findings to the City.

RECOMMENDATION

Provide direction on any changes to the preliminary draft Housing Element document and authorize staff to circulate the draft Housing Element with Planning Commission edits for mandatory public review, including review by HCD.

NEXT STEPS

If authorized by the Planning Commission, the preliminary draft will be modified and circulated for the mandatory public review. The table below provides the timeframe for upcoming steps needed to meet the 2014 Housing Element Update requirements for the City of Pinole.

Project Completion Step	Timeframe
Finalize Draft Housing Element	August 2014
Mandatory 60-Day HCD/Public Review of Draft Housing Element	September – October 2014
Prepare Public Hearing Draft Housing Element and Hold Planning Commission Workshop	November 2014
Planning Commission and City Council Action	December and January 2015
State HCD Review of Adopted Housing Element	January 2015

- A. Housing Issues Report
- B. Preliminary Draft 2015-2023 Housing Element

City of Pinole Housing Issues Report

A. Purpose of Issues Report

The need for adequate housing will intensify in the San Francisco Bay Area, while state and federal resources remain severely limited. Preparation and adoption of the City of Pinole General Plan 2015-2023 Housing Element provides decision-makers a timely opportunity to anticipate future needs in the City and to identify priorities resulting from a new profile of age groups and the potential funding sources. This Issues Report introduces the changing needs in the City and highlights opportunities to address them.

B. What Is the Housing Element and Why Are We Updating It Now?

The State of California identifies the provision of decent and affordable housing for every Californian as a statewide goal. To that end, every jurisdiction in California must prepare a Housing Element that identifies and addresses the housing needs in its community. The Housing Element must be updated every eight years on a schedule set by state law. The Housing Element for the City of Pinole will cover the planning period of January 31, 2015 through January 31, 2023. The deadline for adoption of the updated Housing Element is January 31, 2015.

1. Housing Element Requirements

Pursuant to State Housing Element law (Section 65580) of the Government Code, the Housing Element must contain local commitments to:

- Provide sites with appropriate zoning and development standards and with services and facilities to accommodate the jurisdiction's Regional Housing Needs Assessment (RHNA) for each income level.
- Assist in the development of adequate housing to meet the needs of low and moderate income households.
- Address and, where appropriate and legally possible, remove governmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities.
- Conserve and improve the condition of the existing affordable housing stock.
- Promote housing opportunities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability.
- Preserve the affordability of assisted housing developments for lower income households.

The Housing Element is an integral component of Pinole's General Plan and one of the two General Plan elements that must be reviewed for compliance with State law by a State agency.¹

¹ The State General Plan law mandates seven elements: Land Use; Circulation; Housing; Conservation; Open Space; Noise; and Safety. The Housing Element and Safety Element are the only two elements that must be reviewed by a State agency for compliance with State law.

The State Department of Housing and Community Development (HCD) is responsible for reviewing the Housing Element for compliance.

2. Regional Housing Needs Allocation (RHNA)

The RHNA is a key component of the Housing Element requirement. RHNA represents the City's share of the region's overall housing needs, as assigned by the Association of Bay Area Governments (ABAG). The RHNA is divided into four income categories as follows:

	Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
RHNA	80	48	43	126	297
% of Total	26.9%	16.2%	14.5%	42.4%	100.0%

The RHNA is a planning goal, not a production obligation. The City is only required to demonstrate where, under the City's land use policy and zoning, adequate sites would be available to accommodate the RHNA.

C. Initial Public Outreach Efforts

Members of the Pinole community, especially those who live in the City or those who own residential properties in the City, help identify and clarify local housing needs and opportunities from their particular standpoints. The City of Pinole website hosted an electronic survey for residents who are renters, residents who are homeowners, and property owners of rental property. Hard copies of the survey were also available at City Hall, the Safety Building, the Youth Center, the Senior Center, and the Pinole Library. The survey was available from February 8 to March 31, 2014. Results of the survey provide one picture of housing issues in the City. Telephone interviews gathered more detailed comments from a variety of people with specific professional interest in the community, including service providers for seniors and people with disabilities, real estate professionals, and affordable housing developers. The results both of the online survey and of the telephone interviews are summarized below.

1. Summary of Survey Results

a. Who Responded?

You are:	Response Percent	Response Count
A renter in Pinole	14.8%	9
A homeowner in Pinole	82.0%	50
An owner of rental properties in Pinole	3.3%	2

b. Renters

How well is the property you rent being maintained?	Response Percent	Response Count
Very well maintained. Property maintenance and repair needs are addressed quickly.	0.0%	0
Well maintained. Property maintenance and repair needs are addressed.	62.5%	5
Not well maintained. Property maintenance and repair needs sometimes are not performed.	37.5%	3
Poorly maintained. Property maintenance and repair needs usually are not performed.	0.0%	0

c. Owners

About how much do you spend annually on property maintenance, repair, or improvement work?	Response Percent	Response Count
Under \$1,000	11.4%	5
\$1,000 - \$5,000	59.1%	26
\$5,001 - \$10,000	27.3%	12
Over \$10,000	2.3%	1

What, if any, major housing repair or improvement work is planned over the next five years (check all that apply)?	Response Percent	Response Count
Interior Remodel (e.g. bathroom or kitchen remodel)	44.1%	15
Roof Replacement	41.2%	14
Water Heater / Furnace Replacement	26.5%	9
Solar Panel Installation	26.5%	9
Exterior Remodel (e.g. window or siding replacement)	23.5%	8
Home Expansion	5.9%	2
Other (please list)		7

The other repairs identified by respondents include: fence, windows and insulation, sewer line, and other kitchen/bathroom repairs.

d. Overall Housing Needs

Ranking of housing challenges (from greatest need to least need):	Ranking
Housing Condition and Property Maintenance	1
Neighborhood Physical Condition (such as streetlights, sidewalks, etc.)	2
High Housing Cost	3
Supply of New Housing For Sale	4
Supply of New Housing to Rent	5

Other housing challenges identified include: property maintenance (blight and trees), parking, a limited inventory of homes for sale, school district, and high property taxes.

Groups with greatest housing needs (from most in need to least in need):	Ranking
Seniors	1
Young adults	2
Persons with Disabilities	3
Large Households (five or more members)	4

Other groups identified include: married couples with children and singles (including widowed and divorced).

Ranking of adequacy of housing supply (from least adequate to most adequate):	Ranking
Housing for the Homeless	1
Senior housing	2
Housing for persons with disabilities	3
Rental apartments	4
Townhomes and condominiums	5
Single family homes	6

Ranking of housing programs and activities (from most important to least important):	Ranking
Housing Rehabilitation Assistance for Homeowners	1
Housing for Seniors	2
First Time Homebuyer Assistance	3
Code Enforcement	4
Rental Housing Rehabilitation	5
Accessible Units for Persons with Disabilities	6
Affordable Housing Development	7
Housing for the Homeless	8
Housing Discrimination and Tenant / Landlord Dispute Resolution	9

2. Summary of Key Comments from Telephone Interviews

A variety of professionals who are involved either directly with housing or indirectly as service providers participated in telephone interviews that inform this report. All of them have responsibilities in Pinole specifically or within the East Bay area.

a. Service Providers for People with Disabilities and Seniors

The following agencies participated in the telephone interviews:

- Eden Council for Hope and Opportunity (ECHO Housing)
- Disabled People's Recreation Center
- Cole Vocational Services
- Pinole Senior Center

Persons with Disabilities: According to the 2008-2012 American Community Survey, 14 percent of all Pinole residents have one or more disabilities. The majority of residents with disabilities were between the ages of 18 and 64 (53 percent) and 45 percent were seniors. Data obtained from the State Department of Developmental Services indicate that approximately 123 Pinole residents were being assisted at the Regional Center of the East Bay, as of January 2014. Among the adults with disabilities (18-64 years of age), cognitive and ambulatory difficulties were most prevalent. Within the senior disabled population, ambulatory and independent living difficulties were the most prevalent.

Service providers for people in Pinole with disabilities emphasized that many of their clients are unable to find suitable affordable rental housing, especially lower-income housing for seniors, and that clients often face issues with reasonable accommodation. Those with serious disabilities benefit greatly from apartments with supportive services, including staff to monitor the condition of residents and to provide not only assistance to the residents themselves but also services to support residents' family members. It is important, one provider emphasized, that various agencies coordinate their respective program efforts and that those working among people with disabilities be sensitive to their needs, with no attempt to take advantage of those they are assisting.

Seniors: The housing needs of seniors often change when they are past the age of 70 years. Though many would prefer to stay in their homes, without a spouse to share the costs and chores, managing a house becomes more difficult. Often seniors move from their homes to be closer to family members, especially their children. Of those at the Pinole Senior Center, roughly one-half have family members living in the area, making housing alternatives within the City more attractive. However, for some, senior-only facilities carry a stigma they resist. Convenient access to health care, shopping, appropriate recreation and social settings becomes increasingly important as mobility is limited.

b. Real Estate Professionals

Representatives from the following real estate agencies participated in the telephone interviews:

- Coldwell Banker Real Estate, Pinole Branch
- Security Pacific Real Estate Brokerage, Richmond Branch

Pinole Advantages: Pinole is a community with many advantages for homebuyers, according to four real estate professionals who list homes and assist potential buyers in the area:

- The City has a supply of single-family homes at comparatively affordable prices, while also offering a reasonable commute distance, especially to employment in Richmond and the Oakland area.
- As an incorporated city, Pinole provides public services of higher quality than the services in unincorporated county communities.
- Single-family parcels are somewhat larger than sites in some neighboring communities, and the "city is open at the edges."
- Shopping amenities are now an attraction, especially those that have been added along Fitzgerald Drive or Pinole Valley Road such as Trader Joe's.
- The WestCAT bus system provides direct access to BART for workers who would prefer to commute by rail.

- Weather in Pinole is both cooler than the heat to the east and warmer than the dampness right on the Bay.

Potential Buyers: There are three typical groups of buyers for homes in Pinole:

- Many of the potential homebuyers are people in the late 20s through late 30s. Prices between \$300,000 and \$400,000 are comparatively affordable for many first-time buyers. (The median price of a single-family home in Pinole was \$375,000 during March 2014.)
- A much smaller group of buyers includes those moving up from their first homes.
- Investors have been purchasing single-family houses in Pinole to hold and rent, because through last year some considered the properties undervalued (estimated at 60 percent of 2005 values) in the recovery from late last decade.

Seniors, however, appear to have few options for remaining in Pinole if they choose to leave their homes, and there is movement to Central Valley communities for lower prices, health care, and access to families.

Issues: Certain issues do discourage potential buyers from locating in Pinole, especially young families with children.

- All of the real estate professionals who discussed the opportunities in Pinole also spoke about perceptions of the West Contra Costa Unified School District (WCCUSD). The quality of education, or at least the perception of education, varies in different parts of the WCCUSD service area. Certain schools in the district are considered superior, and a number of families have relocated, often paying higher prices for housing, near those schools. The pending rebuilding of Pinole Valley High School may improve the public perception of WCCUSD in Pinole.
- For potential homebuyers near the moderate-income range, financing has been more difficult than it was a decade ago.

c. **Developers of Affordable Housing**

Two representatives of the following housing development companies discussed Pinole as a potential location for new affordable housing projects, either for families or for seniors.

- Domus Development
- EAH Housing

Factors that Influence Development Decisions: Based on conversations with developers, the following are some considerations when selecting localities/sites for development:

- **Site Selection:** Both developers emphasized the selection of sites where a potential project might compete successfully for state or federal funding. Because state and federal funding programs have been reduced, competitive opportunities are more crucial than in earlier years. In the new fiscal environment, transit access brings much greater potential for competitive funding. Shopping destinations and other amenities that support reduced use of automobiles must accompany access to transit. Frequent, accessible bus service, especially when it connects with rail, is necessary for the project that competes successfully to receive state or federal funding in some key programs.

- **Layering of Funding:** Development of affordable housing projects now requires funding from multiple programs. Following dissolution of the redevelopment agencies, use of federal tax credits has become more crucial and is a common component of the total funding for successful projects.
- **Lot Size and Site Control:** Affordable projects with onsite management in the west Contra Costa County area typically require at least 50 to 60 units. The availability of city-owned parcels facilitates development but is not necessary.
- **Active City Participation:** Affordable housing developers seek cities that will take an active role. In some cases, the developer is prepared to see itself as a “partner” to the city, a role that was common prior to the dissolution of the redevelopment agencies but still remains possible now. As partner, the developer becomes the intermediary for development of the city’s priorities and looks to the city for direction on design and other aspects of the projects. In other situations, the developer will acquire the site and proceed through the review and approval process, with less active support from the city. However, in both cases the probability of success is greater when the city can streamline the process by educating constituents about the value of the project, utilize appropriate CEQA exemptions, and support use of state density bonus law provisions, including significant development incentives.

Opportunities: Pinole holds opportunities for affordable housing development, because there are sites within the City that offer both transit access and other amenities. The City’s specific competitive strengths: Its Bay Area location, direct transportation access along Interstate 80, its charm, the mix of people, and proximity to job centers. Though the city tends to lack strong neighborhood centers and walkability, recent efforts indicate progress toward developing both attributes.

Constraints: Mixed-use development may occur in some newly zoned parcels, but mixed-use projects with affordable units are unlikely, unless the City can itself provide funding for the cost of the non-residential floor area. The income stream from the non-residential component of most mixed-use projects is highly uncertain, so financing usually depends solely on the residential units, not on the non-residential area. In addition, construction for ground-floor non-residential uses tends to increase costs significantly. However, for seniors, projects that include a suite of supportive services, as well as affordability, serve a necessary role in meeting residents’ needs.

D. Implications of Demographic Changes - the New Age Profile

The demographics of a community to a large extent determines its housing needs. During the upcoming Housing Element planning period, the primary demographic issue will be unprecedented change in the age group profile. The changing pattern in Pinole will be somewhat more pronounced than the changes that will characterize California as a whole. Changes in the age profile between Census 2000 and Census 2010 foretell many of the changes Pinole residents will see during the Housing Element planning period out to 2023.

Between 2000 and 2010, Pinole’s total population dropped slightly, by 3.4 percent from 19,039 residents in 2000 to 18,390 in 2010. However, the overall age profile shifted. Specifically, the number of residents in the younger age groups decreased while the number of older residents increased in equally significant rates:

- Young Children (0-14 years): Dropped 23.4 percent
- Young Adults (20-29 years): Rose 18.5 percent
- Adults (35-44 years): Dropped 33.0 percent
- Adults (55-64 years): Rose 40.0 percent
- Seniors (62+ years): Rose 20.9 percent
- Seniors (65+ years): Rose 16 percent

Growth in the number of adults between 55 and 64 years of age highlights the rapid, large, and sustained increase that Baby Boomers (born 1946-1964) will bring to the senior population 65 years of age and older. Overall, the median age in Pinole rose by nearly four years, from 38.7 years of age in 2000 to 42.6 in 2010.

The following figure shows the distribution of different age cohorts as a percentage of the total population in 2000 and 2010. As shown, in 2000, those aged 55 and above comprised 23.1 percent of the total population. By 2010, 30.5 percent of the City's residents were aged 55 and above. In contrast, residents aged 19 or younger comprised 27.6 percent of the City's population in 2000 but only 23.4 percent of the 2010 population.

Percent of Population by Age Group (2000 and 2010)

Pinole's aging population will alter the mix of housing the City needs, if it is to accommodate its aging population and to prepare for further change in the decade after 2020. The housing needs of three groups are especially important: young families, seniors, and people with disabilities.

1. Fewer Young Families in the City

There are several reasons why young families can consider Pinole an attractive location to live. However, the actual numbers of children and of adults at parenting age dropped during the decade between 2000 and 2010. Specifically, the number of family households with children under the age of 18 decreased 20 percent. In part, this change reflected a pattern in the general population, which was evident in Contra Costa County as well as in Pinole. But the numbers of children, especially younger children, and adults at parenting age dropped more sharply in Pinole than in the County as a whole.

- In Contra Costa County the population of children 0-14 years of age declined from 22.3 to 20.4 percent of the total between 2000 and 2010. For Pinole, the percentage of children declined from 20.4 percent to 16.2 percent of the City's total population.

- For the age group that is most likely to have children at home, the population total fell by one third. Between 2000 and 2010, the number of adults ages 35-44 dropped from 3,298 to 2,209.

The sharp decrease in the number of families with younger children likely has several causes, including:

- Cost of housing and the difficulty of financing for younger adults who face problems getting established financially;
- Comparatively small numbers of homes available for sale during and immediately following the recession;
- Economic uncertainties for those who desire to purchase a home;
- Considerations of housing cost in relation to access to employment;
- Perceptions of public schools in the West Contra Costa Unified School District, including some schools in Pinole specifically.

2. More Seniors and Housing Options to Age in Place

Almost one third (31 percent) of all households in Pinole included one senior or more, age 65 or older, in 2010. Increases in the number of seniors will likely accelerate during the next decade. As with the number of young families, the changing share of seniors reflects a widespread pattern that is more pronounced in Pinole.

- The percentage of Pinole seniors exceeded the percentage for Contra Costa County in 2010: Pinole - 19.4 percent of population was 62 or older, 15.5 percent was 65 or older; Contra Costa County - 15.7 percent of population was 62 or older, 12.4 percent was 65 or older.
- A higher percentage of rental units in Pinole (17.5 percent) were home to householders 65 or older than in Contra Costa County as a whole (12.6 percent).
- The number of people 65 and older will grow very quickly during the planning period. In Pinole the 2010 population of those 55-64 years of age was almost as large as the number of all those 65 and older combined. In 2010, 2,868 Pinole residents were 65 or older; 2,736 residents were 55-64 years of age.

Living on retirement incomes will affect this large share of Pinole's population in several ways:

- Lower incomes will limit mobility for some, including the options either of moving to senior facilities that provide assistance for those with age-associated physical and mental disabilities or to rental housing, which requires less maintenance by the occupant than owner-occupied single-family homes.
- Seniors will need home improvements to accommodate physical disabilities but may not have adequate income to pay for installation.
- Transportation options will be restricted by financial and physical limitations.

The senior population that remains in single-family homes as owner-occupants will set the stage during the next eight years for a turn-over of housing ownership after 2020. As older Baby Boomer homeowners reach age 70 and beyond, they will be increasingly likely to sell their

homes. As a result, homes will become available after 2020 in much greater numbers. In fact, the inventory for sale is likely to exceed the number of potential buyers. As a result, the quality of a neighborhood and the City's community life will become considerably more important for determining value in the new "buyers' market." The sale of seniors' homes will have a major effect on the economic and demographic characteristics of the City during the decade following 2020.

In the meantime, attracting young families to Pinole as homebuyers may be unusually difficult. The number of potential buyers is limited by the size of the Gen X cohort, now in their late 30s and 40s, and the financial difficulties facing many of those in the next generation, now in their 20s and early 30s.

3. Persons with Disabilities (Including Seniors)

Approximately 14 percent of the City residents have one or more disabilities, and 45 percent of these disabled residents are seniors. Among the disabled population, residents are most frequently affected by independent living difficulties (57 percent), ambulatory difficulties (47 percent), and cognitive difficulties (45 percent). Specifically, 65 percent of the City's senior and disabled residents are impacted by ambulatory difficulties.

Almost 80 percent of the City's housing stock is comprised of single-family homes, and 90 percent of the City housing stock was constructed prior to 1990 - prior to the passage of the American with Disabilities Act (ADA). This means that most homes in Pinole were not subject to the requirements of ADA and are not accessible to persons with disabilities.

E. Affordable Housing Units at Risk of Converting to Market Rate

A large share of Pinole's publicly assisted affordable housing will be at risk during the next four years. Pinole's inventory of housing includes 434 units of assisted rental housing, with restrictions limiting their use to people at moderate-income, low-income, or very low-income levels.

Of this total, 113 units (all funded with Redevelopment Agency assistance) are subject to agreements that will expire sometime before the end of 2017, during the planning period of the 2015-2023 Housing Element. The affordability agreements on two projects (with two low-income units) will expire during 2014. The agreements on another three projects (including six moderate-income units, one low-income unit and one very low-income unit) will expire during 2015. And, finally, agreements at an additional four locations (with 80 moderate-income units and 23 very low-income units) will expire in 2017.

F. Funding Resources

1. Available Funds

With the dissolution of Redevelopment, the City has limited funds available for affordable housing. In the foreseeable future, the following noncompetitive funding resources are available to the City:

- ERAF: \$4.2 million is owed between July 2014 and May 2018. Approximately \$3.5 million could become available in FY 14/15.

- **Community Development Block Grants (CDBG):** The City is part of the regional housing consortium for CDBG funds where the funds are administered by Contra Costa County and applied for on a competitive basis. The consortium receives approximately \$3.0 million in CDBG funds annually for a consortium that covers 14 cities and the unincorporated County areas.

2. Funding programs

In the absence of Redevelopment Agency funding, alternatives will be necessary if strategic priorities are to be funded. Several competitive programs may be appropriate to the City:

- State Infill Infrastructure Grant (IIG) Program
- Federal Low Income Housing Tax Credits (LIHTC, at 9 percent)
- ABAG Priority Development Areas
- State Local Housing Trust Fund Program

a. HCD Infill Infrastructure Grant Program (IIG)

Purpose: Assist in the new construction and rehabilitation of infrastructure that supports higher-density affordable and mixed-income housing in locations designated as infill.

Eligible Uses: New construction, rehabilitation, and acquisition of infrastructure required as a condition of or approved in connection with approval of an infill project. Eligible applicants include non-profit and for profit developers and as a joint applicant with the developer, a locality or housing authority.

Applicability to Pinole: One developer interviewed for this issues report identified the Infill Infrastructure Grant program as one of the most viable funding sources of affordable housing development to Pinole. HCD awarded Round 3 of the IIG earlier this year. Unused funding from Round 3 may be available for a Round 4 later in 2014, if legislature authorizes Round 4. Additional money is also considered a possibility. Projects located within one half mile of a transit station (including a bus hub) or a major transit stop would be more competitive.

b. Low Income Housing Tax Credits (LIHTC)

Purpose: Provide dollar-for-dollar tax credit for affordable housing investments. LIHTC accounts for the majority - approximately 90 percent - of all affordable rental housing created in the United States today.

Eligible Uses: Projects that rent-restrict at least 20 percent of the units as affordable to households with incomes up to 50 percent of Area Median Income (AMI), or projects that rent-restrict at least 40 percent of the units as affordable to household with incomes up to 60 percent of the AMI.

Applicability to Pinole: The LIHTC program is often used in conjunction with a TOD grant as additional points are awarded to the TOD project (when evaluating the competitive applications). Senior projects and projects for special needs populations (such as persons with disabilities) also receive additional points.

c. ABAG/One Bay Area Grant (OBAG) Program

Purpose: The \$320 million OneBayArea Grant (OBAG) Program is a funding approach that better integrates the region's federal transportation program with California's climate law (Senate Bill 375, Steinberg, 2008) and the Sustainable Communities Strategy. Funding is targeted toward achieving local land-use and housing policies. For Cycle 2 (FY 2012-2013 through FY 2015-2016), approximately \$2.75 million was allocated for Contra Costa County jurisdictions out of \$20 million for Local PDA Planning in all counties. No more funding would be available until after FY 2015-2016.

Eligible Uses: Eligible projects are transportation improvements to support the development of the Priority Development Areas (PDAs).

Applicability to Pinole: San Pablo Avenue, portions of Pinole Valley Road, and Appian Way are within the City of Pinole PDAs.

d. HCD Local Housing Trust Fund

Purpose: To provide a dollar-for-dollar matching grants to local housing trust funds that are funded on an ongoing basis (for at least five years) from private contributions or public sources that are not otherwise restricted in use for housing programs.

Eligible Uses: Loans for construction of rental housing projects with units restricted for at least 55 years to households earning less than 60 percent of area median income, and for downpayment assistance to qualified first-time homebuyers.

Applicability to Pinole: One of the requirements for the matching fund is that an application for a new housing trust fund would not be considered by HCD unless HCD has received adequate documentation that the applicant has adopted a legally binding commitment to deposit matching funds into the new trust. The City owns one property (PALC property) that if sold, could generate money for deposit into a housing trust fund. Matching funds from sources other than impact fees on residential development will receive priority for allocation. But the minimum matching requirement is \$500,000 for a new trust fund.

To sustain the housing trust fund over time, the City could also consider new funding sources. Potential sources of funding used by other local jurisdictions include:

- | | |
|--------------------------------------|---------------------------------------|
| • General Funds | • Real Estate Transfer Taxes |
| • Impact Fees | • Real Estate Document Recording Fees |
| • Hotel Occupancy Taxes | • Sales Taxes |
| • Condominium Conversion Fees | • Inclusionary In-Lieu Fees |
| • Government General Obligation Bond | • Permit Fees |

HCD recently issued the Notice of Funding Availability (NOFA) for the Local Housing Trust Fund for \$8.1 million. HCD will begin accepting application for the funds beginning May 21, 2014. Discussions with HCD staff indicate that HCD expects the \$8.2 million to be oversubscribed and fully awarded by the end of May. It is not yet know if and when future rounds of funding would be available.

G. Policy Priority Options

Based on the demographic and market trends discussed above, the limited availability of housing funds, the City will need to consider prioritizing the use of available funds and staff resources. Options for focusing resources that would be appropriate for Pinole are discussed below:²

1. Housing Types

a. Senior Apartments/Assisted Living

Rental apartments and assisted living facilities offer seniors an alternative to maintaining ownership housing and the maintenance expenses. Especially for seniors living on Social Security and small pensions, alternatives without home maintenance and improvement costs will permit a move to housing that is more manageable financially. There is a shortage of rental housing, however, whether for seniors or for younger households, so rents for well-managed units tend to rise beyond the means of many seniors.

For some seniors, housing facilities that provide regular meals and daily assistance with living activities, including hygiene, is necessary. The routines that were readily maintained in earlier life become more challenging, and some seniors require assistance when disabilities develop if they are to stay reasonably healthy.

b. Family Apartments

About 30 percent of the households in Pinole live with an income that is less than 80 percent of the County median. Frequently, the result is that families pay a disproportionate share of their income for housing, with the result that other basic needs are not adequately addressed. In other case, units are overcrowded.

2. New Construction of Housing

New construction of affordable housing expands the City's affordable housing stock and offers long-term affordability controls based on the funding sources. These units typically remain affordable for at least 30 to 55 years, if not longer. New construction of affordable housing is costly, however. Multiple layers of funding, including local contributions, are required to make a project financially feasible.

Many factors go into determine the gap financing needed, such as whether tax credits are available, land costs, infrastructure improvements needed, etc. According to Domus, in general, the cost to subsidize a new senior unit is between \$50,000 and \$75,000 if 9 percent tax credits are used. The subsidy required for a family unit is closer to \$100,000. If bonds or 4 percent tax credits are used, the average per-unit subsidy is approximately \$150,000 to \$175,000.

² The cost estimates provided in this report are generalizations intended only to establish an order of magnitude. These estimates by no means represent the exact levels of subsidies. Market conditions, project locations, amenities, and building conditions, among other factors, influence the subsidies required.

3. Acquisition/Rehabilitation of Existing Rental Housing

Another option to creating long-term affordable housing is by acquiring existing apartments and converting them to affordable units. This option is usually more cost-effective, although the costs may also vary significantly depending on the condition of the buildings. An older development may require rehabilitation but would command a lower market price.

For example, a 53-unit apartment (built in 1965) in Pinole was sold in 2011 for \$4.25 million (approximately \$80,000 per unit). If this project were to be converted to affordable housing, the level of subsidy required would be less given that ongoing rent income would be able to support a portion of the mortgage.

4. Acquisition/Rehabilitation of Foreclosed Homes

Another option for converting existing market-rate housing to affordable housing is to purchase foreclosed properties and resell them to low and moderate income first-time homebuyers. Foreclosed homes in Pinole have a wide price range, from approximately \$100,000 to over \$500,000, with a median price of \$302,814.³ The upfront costs for such program would be high for the City to purchase the units and make necessary repairs and improvements before reselling the units to low and moderate income first-time homebuyers. The City would get a significant portion of the purchase price back when the units are sold. Overall subsidy would be similar to implementing a first-time homebuyer program (discussed below).

5. Housing Rehabilitation Loans

Close to 90 percent of the City's housing stock was constructed more than 30 years ago, suggesting a significant portion of the housing would require rehabilitation and upgrading over time. Some owners fail to maintain their residential properties for a variety of reasons. In many cases, owners desire to make the major investments (e.g., for replacing a roof or painting the exterior) that are sometimes necessary but do not have the financial resources. Programs to assist with those investments create opportunities for owners, especially the owners of single-family homes, to avoid major deterioration of their properties.

According to the survey, most homeowners anticipate major repairs such as roof replacement and kitchen/bathroom upgrades in the next five years. Residents of Pinole currently can apply to the Contra Costa County for a housing rehabilitation loan of up to \$50,000. Two types of loans are available, based on income: 1) 3 percent interest with monthly payment for 15 years; or 2) 0 percent interest with no monthly payment and reviewed every 15 years for extension. However, funding for this program is limited. The County only plans to provide 25 loans in FY 2014-2015 for the entire County (excluding Pittsburg and Richmond).

If the City were to operate its own loan program, the administration costs should be taken into consideration. Usually a 20 percent markup is considered reasonable for loan documents, eligibility verification, inspection, and monitoring, etc. The City may consider structuring the loan programs similar to Contra Costa County, with the 0 percent interest option reserved for senior households that require rehabilitation works beyond emergency repairs (discussed below).

³ <http://www.homes.com/for-sale/pinole-ca/foreclosures/?orderby=price asc>, accessed May 12, 2014.

6. Seniors - Emergency Repairs, Accessibility Improvements

Seniors in single-family homes often face not only the costs of maintenance and repairs but also the need for accessibility improvements to allow them to remain in their homes. Ramps, appropriate bathroom facilities, and new household fixtures may be necessary for some seniors, if they are to carry on basic daily activities, including personal hygiene. For seniors, a small grant may be more appropriate than loans. With limited incomes, many seniors are uncomfortable with the idea of incurring additional debts.

Most communities that provide grants limit the assistance to seniors and persons with disabilities. A typical grant amount is up to \$10,000 for emergency repairs and ADA/accessibility improvements. Grants are usually easier to administer, compared with loans.

7. Homeownership Assistance

Households at the upper end of the moderate-income level (i.e., closer 100 to 120 percent of the County median income) are generally able to afford the monthly mortgage to purchase a home in the City. However, many have difficulty getting financing or coming up with the downpayment assistance. Therefore, most homebuyer assistance programs target first-time homebuyers.

Prior to the dissolution of redevelopment, many communities across the State provided homebuyer assistance programs because redevelopment funds can reach households with moderate incomes (up to 120 percent Area Median Income). Federal programs limit assistance to lower income households (up to 80 percent AMI), which require a deeper level of subsidies. As a result, many communities have since suspended their homebuyer assistance programs. For a median priced home in Pinole of \$330,000, a low income household would still require a silent second loan of \$80,000, assuming they can come up with a 10 percent downpayment of \$33,000. Many first-time homebuyer programs provide assistance between \$50,000 and \$150,000.

The overall administration costs associated with first-time homebuyer programs are also significant, considering legal and escrow fees, preparation of loan documents, and ongoing implementation/monitoring of resale provisions and equity sharing, etc.

8. Preservation of Affordable Units At-Risk of Converting to Market Rate

Over the next ten years, 113 units will be at risk of becoming unrestricted due to the expiration of the affordability covenants. (In fact these units are at risk over the next four years). City staff is exploring options for preserving affordability with new or renewed agreements and subsidies to extend affordability of at least a portion of the units. Often, a lump sum subsidy may be used to incentivize renewal of affordability covenants.

The level of subsidies depends largely on the targeted income groups, the differences between market rents and rent limits under the City's BMR program, and the length of affordability control desired. For very low and low income households, based on current rent limits and market rents in Pinole, an average annual subsidy of up to \$5,000 per unit may be required. The present value of this kind of subsidy over a 30-year period is approximately \$100,000.

9. Transportation Improvements - Housing Near Transportation

Affordability is an issue not only of the cost of housing itself but also of the transportation costs associated with the housing location. For many seniors especially, alternatives to a personal automobile make the difference between meeting daily needs and remaining isolated. For projects competing for State affordable housing funds and LIHTC, locations with ready access to transit and to the amenities that serve daily needs are critical, whether those projects are designed for seniors or for younger residents.

HOUSING

EXECUTIVE SUMMARY

The purpose of the Housing Element is to ensure that a quality, safe, and affordable supply of housing is available for current and future residents of Pinole. In pursuing this goal, the Element focuses on achieving a balance between maintaining the existing character of Pinole and providing housing for low- and moderate-income households and those with special needs.

The Housing Element is a part of the Pinole General Plan. It is the only Element that must be updated every eight years and is subject to review and certification by the State of California through its Department of Housing and Community Development (HCD). The preceding Pinole Housing Element (fourth cycle update) was adopted in 2010, and covered the period through January 31, 2015. This updated Element (fifth cycle update), in accordance with the schedule set by the State, covers a period beginning on January 31, 2015 and ending on January 31, 2023. Housing production targets, however, are measured on a slightly different timeframe of 2014 through 2022, reflecting the planning period of the Regional Housing Needs Allocation (RHNA).

The Element must show that the City can accommodate its fair share of the Bay Area Region's housing need over the current planning period. Pinole's fair share for the 2014-2022 planning period, as determined by the Association of Bay Area Governments (ABAG), is 297 units, 128 of which must be affordable to lower income households.¹

As established by State law, the major components of the Housing Element are: 1) an assessment of Pinole's housing needs; 2) an analysis of constraints and opportunities; 3) an evaluation of housing accomplishments; and 4) a Housing Plan that establishes specific goals, policies, and programs for meeting needs and objectives. The following are highlights from each of those components.

HOUSING NEEDS

- Pinole's population and household composition remain largely unchanged over the past decade. The most significant changes are the increase in Pinole's senior population and the decrease in young families with children.
- There is a significant concentration of low income households among seniors and renters.
- Pinole continues to serve as a bedroom community for larger employment venues throughout the San Francisco Bay Area Region.
- The Housing Element addresses State requirements to allow emergency shelters by right in at least one zoning district.
- The Housing Element plans for the replacement of assisted housing units at risk of conversion to market rate.

¹ Fair share planning period is aligned with the growth forecast for the Regional Transportation Plan and is often slightly different than the Housing Element planning period.

HOUSING

HOUSING CONSTRAINTS

- Market forces, such as the availability of land and associated land values, availability of financing, and development costs, constrain the production of housing.
- The slow recovery from the economic downturn and mortgage crisis has led to additional constraints in the housing market.
- The City's available resources are greatly reduced as a result of the economic downturn and dissolution of the City's Redevelopment Agency.
- As a whole, the City's development standards, practices and fees are comparable to those of other cities and are not a significant constraint to housing development.

HOUSING OPPORTUNITIES

- Opportunities for residential development in the Three Corridors Specific Plan provide for adequate capacity to meet the City's RHNA.
- The City's infrastructure has adequate capacity to handle the amount of growth anticipated during the planning period.

HOUSING ACCOMPLISHMENTS

- Due to the depressed housing market, housing construction in Pinole came to a standstill and overall, 72 units were constructed during the RHNA period of 2007-2014, including three units affordable to lower income households and ten units affordable to moderate income households.
- Between 2009 and 2013, seven first-time homebuyers were assisted. However, with the dissolution of redevelopment, the City no longer has funding to sustain the First-Time Homebuyer Program.

HOUSING GOALS

- The City should monitor housing accomplishments in order to respond effectively to housing needs.
- The City should strive to protect the character and heritage of Pinole through conserving existing housing and encouraging high quality new construction.
- The City should ensure that there are adequate services and facilities to meet the needs of Pinole's current and future population.
- The City should strive to provide or facilitate a mix of housing types and prices that meet the City's housing needs.
- The City should support energy-efficient design and building practices in order to reduce housing utility expenses, minimize adverse environmental impacts, and provide for sustainability.

Although the Housing Element tends to focus on the affordability and availability of housing for low- and moderate-income households and other special needs groups, the Element also

HOUSING

strives to address the housing needs and related policy issues for the entire community. Accordingly, this Element focuses on protecting the existing character of Pinole through high quality design, strategies such as mixed-use, infill and second unit development, and reliance on parcels that were already designated for residential land uses. Through this Housing Element, Pinole has planned to accommodate its RHNA primarily with opportunity sites in the Three Corridors Specific Plan.

HOUSING

VISION STATEMENT

The City will work to ensure that a quality, safe and affordable supply of housing is available for current and future residents.

Pinole will focus on achieving a balance between maintaining its existing housing supply and community character along with providing housing to serve the needs of lower- and moderate-income households and those with special needs.

INTRODUCTION

The Housing Element helps meet the requirements for Measure J, the Contra Costa County voter-approved Transportation Improvement and Growth Management Program. Measure J establishes a process engaging all jurisdictions to cooperatively manage the impacts of growth in Contra Costa County. The Growth Management Element of the Pinole General Plan, also a Measure J requirement, ties the level of service for fire, police, traffic, water, sewer and parks to the development potential allowed under the Land Use and Economic Development Element. The intent is to plan for adequate services and facilities to accommodate the residential development potential necessary to achieve the objectives of the Housing Element. The City's previous Housing Element (2009-2014) was adopted in 2010 and was certified by the California Department of Housing and Community Development (HCD) as complying with State law. This fifth cycle update of the Housing Element covers the planning period of January 31, 2015 through January 31, 2023.

The primary obstacle to providing more affordable housing to very low-income and low-income households is the availability of funding to provide units at prices affordable at those income levels, particularly in light of the fact that Pinole is nearly built out and few parcels are available to accommodate multi-family housing, which is the most cost-effective means of providing affordable housing for lower-income households. Programs in the Housing Element, such as the City's inclusionary requirements (Below Market-Rate Housing), aim to establish opportunities to encourage redevelopment and provide for housing opportunities for all economic segments of the community.

The Housing Element's approach to housing issues in Pinole is expressed in three ways. The first is in the form of goals sought by the community. The second, and more specific approach of the Housing Element, are the policy statements. Third, are implementation actions, through which quantified objectives, or short-range targets to achieve the goals, are established. The implementation actions are the most dynamic part of the Housing Element and are comprised of specific tasks that the City or other identified entities will undertake to help implement policies and move closer to the community's housing goals over time. Where appropriate under each policy is a notation identifying related program actions. The Housing Plan (Section 6) describes these actions in more detail and lists program target dates, as required by State law.

HOUSING

HOUSING ELEMENT REQUIREMENTS

Overview of State Law Requirements

Every jurisdiction in California must have a General Plan. The General Plan serves as the 'constitution' for development in the City. It is a long-range planning document that describes goals, policies and programs to guide development decision-making. Once the General Plan is adopted, all development-related decisions must be consistent with the Plan. If a development proposal is not consistent with the General Plan, it must be revised or the Plan itself must be amended. The current Pinole General Plan was adopted in 2010, and the 2009-2014 Housing Element was adopted as part of that larger General Plan Update at the same time. Along with the General Plan Update, the City of Pinole also adopted the Three Corridors Specific Plan in 2010. This Specific Plan established San Pablo Avenue, Pinole Valley Road, and Appian Way as Priority Development Areas (PDAs) through FOCUS, a regional development and conservation strategy that promotes more compact land use patterns for the Bay Area. PDAs are locally identified, infill development opportunity areas where there is local commitment to developing more housing along with facilities and services to meet the day-to-day needs of residents in a pedestrian-friendly environment served by transit.

Every community's General Plan must, by law, contain seven 'elements' that address defined sets of issues. The State-mandated elements of the General Plan include Land Use, Circulation, Housing, Conservation, Open Space, Noise, and Safety. In Contra Costa County, all jurisdictions are also required to have a Growth Management Element.

State law establishes general requirements for all portions of the General Plan. However, for the Housing Element, the State requirements are specific and extensive. Jurisdictions must annually review its progress in implementing the General Plan and revise all elements on a regular basis to ensure that they reflect community sentiments and satisfy legal requirements. State law requires that housing elements be reviewed and updated at least every eight years following a State-initiated regional housing needs allocation process.

The mandatory process of updating Housing Element is initiated by the State through the "Regional Housing Needs Allocation" (RHNA) process. The State of California's Housing and Community Development Department (HCD) works with regional Councils of Government (COGs) to determine the amount of housing needed within the region. The Association of Bay Area Governments (ABAG) is the San Francisco Bay Area region's COG. The determination of housing need is based on existing need and estimated population growth. Need is determined for households in all income categories: extremely low-, very low-, low-, moderate-, and above moderate incomes.

Once the total regional need is determined, ABAG works with local governments and others to allocate the total need to individual cities and counties. Local governments are then required to plan where and how the allocated housing units can be accommodated within their communities. The most recent RHNA was adopted by ABAG on July 19, 2012 covering the 2014-2022 planning period. This Housing Element outlines how Pinole plans to accommodate its "fair share" of this need.

HOUSING

State law specifically details the information housing elements must contain: (1) “an assessment of housing needs and an inventory of resources and constraints relevant to meeting these needs;” (2) “a statement of the community’s goals, quantified objectives, and policies relative to the maintenance, preservation, improvement, and development of housing;” and, (3) “a program which sets forth a schedule of actions during the planning period...to implement the policies and achieve the goals and objectives.” For each action or program, the Housing Plan must identify the agency responsible, the time frame for implementation, and the number of units planned to be constructed, rehabilitated or conserved, or number of households that will be assisted, as a result of the program.

Most importantly, State law requires that the Housing Element must: (1) identify adequate sites with appropriate zoning densities and development standards, and infrastructure to meet the community’s need for housing (including its need for extremely low , very low , and low income households, mobile homes, housing for persons with disabilities (including developmental disabilities), farm worker housing and homeless shelters); and (2) “address, and where appropriate and legally possible, remove governmental constraints” to housing development.

A community’s General Plan must be internally consistent. This means that the Housing Element, although subject to special requirements and a different schedule of updates, must function as an integral part of the overall General Plan, with consistency between it and the other General Plan elements.

Recent changes in State law requires that the General Plan Land Use and Safety Elements be updated along with the Housing Element update to address flood hazards and management, as well as the provision of services to disadvantaged unincorporated communities that are either an island within the City limits or with the City’s sphere of influence. The City’s General Plan was adopted in 2010. The Health and Safety Element addresses flood hazards and management. There are no disadvantaged communities in the City’s sphere of influence.²

STATE REVIEW

State law requires that every new or updated housing element be submitted to HCD for review to ensure compliance with the State’s minimum requirements. This “certification” process is unique among the General Plan elements.

Housing Element updates or amendments are submitted twice to HCD for review and comment: once during development of the Housing Element or subsequent amendment (in draft form), and again after adoption of the Housing Element or amendment by the local jurisdiction. The first review period requires 60 days and must take place prior to adoption by the Pinole City Council. During the first review, HCD submits comments back to the City regarding compliance of the element with State law requirements and HCD guidelines. Modifications to the Draft Housing Element in response to these comments are then made prior to adoption of the

² Disadvantaged communities are defined as unincorporated communities that contain at least 10 housing units and have a median income that is 80 percent or less than the statewide median household income. According to the U.S. Census the statewide median income was \$57,708. Eighty percent of the statewide median income was \$46,166. According to the State of California Department of Water Resources’ mapping tool of disadvantaged communities, no disadvantaged communities are located within the City of Pinole or in its sphere of influence.

HOUSING

Housing Element by the City Council. The second review requires 90 days and takes place *after* adoption. It is after the review of the adopted element that written findings regarding compliance are submitted to the City. Throughout the process, the City works with staff at HCD to ensure the draft Element meets State requirements and serves the needs of current and future residents.

DATA SOURCES

Various sources of information were used to prepare the Housing Element. The US Census on Population and Housing remains the most comprehensive source of data available on population and housing trends, and was widely used throughout the element. Additional data sources consulted include:

- Demographic and housing data provided by ABAG, the State Department of Finance (DOF), and the Census Bureau;
- Housing market information, such as home sales, rents, and vacancies from the Contra Costa Association of Realtors, DQNews, Craigslist, Zillow, and Home Mortgage Disclosure Act (HMDA);
- Building permit and zoning information from the City of Pinole Development Services Department;
- Special needs housing and services data, including homeless services, from Contra Costa County;
- Housing needs survey administered to residents and landlords; and
- Telephone interviews with housing professionals and service providers.

Where available, updated figures for 2013 as reported by the State Department of Finance were utilized. Other statistics draw from the most recent figures reported by the U.S. Census Bureau, including the 2010 Census and the American Community Surveys (ACS). Future projections are based on data provided by ABAG. Where available, this data is supplemented with current market data and local secondary sources of information.

EVALUATION AND PUBLIC PARTICIPATION

The City began the Housing Element update process with an evaluation of the effectiveness of its existing Housing Element, which was adopted by the City and certified by HCD in 2010. The overarching conclusion of this evaluation was that the City's ability in expanding housing opportunities in the community has been seriously compromised by the housing market crisis and subsequent economic recession, along with the dissolution of redevelopment (see Section 5, Housing Accomplishments).

The City recognizes the importance of engaging the community and organizations and service providers representing the entire City, including lower income households, in developing, adopting, and implementing an effective housing element. As a result, the City worked to engage the community through the drafting and adopting of this Housing Element. In preparation of the draft version of this document, opportunities were provided for local residents

HOUSING

and agencies to help formulate the City's housing goals, policies, and programs. In order to broaden outreach and gather additional information about housing needs and trends, the City developed a Housing Needs Survey. Prior to the development of the draft housing element, the City prepared a brief survey in order to allow residents and landlords to provide input on housing needs within the community. This survey was circulated in Winter 2014. The survey was available in English and Spanish and posted on the City's website and distributed at other community locations. Responses from the surveys were reviewed and considered in formulating both the Housing Needs Assessment and in developing housing goals and objectives included in this Element. A summary of the survey results is included as part of the Housing Issues Report (see Appendix A).

Telephone interviews were also conducted with housing professionals and service providers to obtain better understanding of the current housing market conditions and the housing needs of special populations such as the seniors and persons with disabilities. The following agencies participated in the interviews:

- Eden Council for Hope and Opportunity
- Disabled People's Recreation Center
- Cole Vocational Services
- Pinole Senior Center
- Coldwell Banker Real Estate (Pinole Branch)
- Security Pacific Real Estate Brokerage (Richmond Branch)
- Domus Development
- EAH Housing

A summary of the interviews is included as part of the Housing Issues Report (see Appendix A).

The community was regularly notified of the status of the update process through the City's website where a dedicated housing element update page was updated frequently and included draft documents, an updated timeline including meeting dates, and staff contact information: www.pinolehousingelement.com.

On May 28, 2014, the City Council Finance Subcommittee reviewed the Housing Issues Report and discussed funding priority for a range of housing issues and program options. Publicly noticed meetings were also conducted prior to submitting the Draft Housing Element for HCD review. On July 15, 2014, the Housing Issues Report was presented before the City Council.

RELATIONSHIP TO OTHER GENERAL PLAN ELEMENTS

There is a high degree of interrelationship among the various elements of the Pinole General Plan. For example, the Land Use Element provides for the types, density/intensity, design, and distribution of residential land uses, whereas the Housing Element addresses the manner in which existing housing will be conserved and new housing opportunities will be provided where the Land Use Element permits development.

HOUSING

The City recently adopted a comprehensive General Plan update as well as the Three Corridors Specific Plan in 2010. The City will ensure consistency between the Housing Element and the other General Plan elements as well as consistency between the General Plan, Specific Plan, and Zoning Ordinance. Whenever other elements of the General Plan are amended in the future, the City will review the Housing Element to ensure consistency between the elements. The Safety and Conservation Elements of the General Plan include an analysis and policies regarding flood hazard and management information. The City will ensure that updates to these Elements achieve internal consistency with the Housing Element as well. In addition, as outlined in HIA-4 the City will conduct an internal consistency review as part of the annual General Plan implementation report.

HOUSING

HOUSING NEEDS ASSESSMENT

The Housing Needs Assessment presents and analyzes Pinole's demographic, socioeconomic, housing characteristics, and related market data to determine the nature and extent of housing needs for current and future residents.

This assessment recognizes that as a result of Pinole's location within the nine-county San Francisco Bay area, the City is influenced by its regional position. The Bay Area's economy, diverse neighborhoods and communities, vast open spaces, and moderate climate have contributed to Pinole's rapid growth over the past few decades. In addition, trends and patterns of regional growth, transportation improvements, and development have placed constraints on Pinole's ability to support the additional housing and infrastructure necessary to sustain substantial further growth.

The data sources used to compile the Housing Needs Assessment include the 2000 and 2010 Census, the 2011 American Community Survey (ACS) conducted by the U.S. Census Bureau, data from various state and federal agencies, including:

- California Employment Development Department
- California Department of Finance
- California Department of Social Services
- California Department of Developmental Services
- U.S. Department of Housing and Urban Development.

Where available, this data is supplemented with current market data and local secondary sources of information.

Where possible, 2013 figures as reported by the State Department of Finance are cited to provide current population and housing data. In most other cases, the data reported in this Element comes from the 2010 Census and ACS. Anecdotal and other information sources are used to supplement this information. Projections cited in this Element come from ABAG. Notable projections in population, housing, and employment are shown below in **Table 6.1** and detailed in the following sections as they relate to Pinole's future housing needs.

HOUSING

Table 6.1
Bay Area, Contra Costa and Pinole Planning Area Projections

Bay Area Regional Total	2010	2020	2030	2040

Source: Association of Bay Area Governments (ABAG) – Projections, July 2013.

POPULATION CHARACTERISTICS

Population characteristics, such as size, age, race/ethnicity, and employment influence the amount and type of housing needed within a community.

Population

Although the population in Contra Costa County continues to increase (from 948,816 in 2000 to 1,049,025 in 2010), Pinole's population actually decreased during this time period. According to the 2000 Census, Pinole's population was 19,039. The 2010 Census places Pinole's current population at 18,390. The change in population represents a decrease of more than three percent over the past ten years. As shown in **Table 6.2**, population growth in neighboring jurisdictions was also limited. The most significant growth between 2000 and 2010 occurred in nearby Hercules (23 percent increase). ABAG projects moderate population growth in Pinole and surrounding communities through 2020.

HOUSING

Table 6.2
Population Trends:1990 - 2010

Jurisdiction	Population				% Change		
	1990	2000	2010	2020	1990-2000	2000-2010	2010-2020

Source: 1990, 2000, and 2010 U.S. Census; and Association of Bay Area Governments (ABAG) – Projections, July 2013.

Age

Pinole's current and future housing needs are determined in part by the age characteristics of its residents, as each age group typically has distinct housing needs and preferences. For instance, a higher proportion of young adults generally indicate a need for rental units and first-time homebuyer or first move-up opportunities, including condominiums, town homes, and smaller single-family homes. Middle age residents are usually at the peak of their earning power and typically occupy larger homes. Senior residents in Pinole are generally homeowners who have resided in their single-family homes for an extended period of time. As these seniors continue to age, programs will need to address the ability of seniors on fixed incomes to make repairs and accommodations necessary to remain in their homes as well as the cost and availability of move-down and specialized residential developments, such as senior apartments and assisted living facilities.

Table 6.3 shows the age distribution of Pinole residents and how it has changed since 1990. While Pinole remains a family-oriented community, as evidenced by the large number of residents in the 35 to 54 and 0 to 19 age categories, its senior population (55+) increased more than any other age group. Historically, Pinole has had a lower percentage of seniors than the County as a whole, but this is no longer the case. From 2000 to 2010, Pinole's senior population increased by approximately 27 percent to 5,584 persons, or 30 percent of the population. In comparison, the County's senior population increased 35 percent to 259,196 persons but accounting for only 25 percent of the population. Continued growth of the senior population in Pinole is further evidenced by low vacancy rates at local senior housing facilities and increasing use of the Pinole Senior Center.

The housing needs of seniors often change when they are past the age of 70 years. Though many would prefer to stay in their homes, without a spouse to share the costs and chores, managing a house becomes more difficult. Often seniors move from their homes to be closer to family members, especially their children. Of those at the Pinole Senior Center, roughly one-half have family members living in the area, making housing alternatives within the City more attractive. However, senior housing options in Pinole are limited.

HOUSING

Source: 1990, 2000, and 2010 U.S. Census

Race

The racial and ethnic composition of Pinole has diversified in recent decades. As **Table 6.4** demonstrates, White residents continued to comprise the largest racial group in 2010. However, the share of the White population decreased 26 percent between 2000 and 2010, while the population of all other groups except American Indian and “Other” races increased. The City’s Hispanic population experienced the steadiest and most significant growth, increasing by over 50 percent every decade since 1990. Such changes may have implications for Pinole’s future housing needs, as different racial and ethnic groups often have different household characteristics, income levels, and cultural practices. For example, Asian and Hispanic families tend to live with extended family members and therefore require larger units to accommodate the multi-generation living. As Pinole’s population continues to diversify, different types of housing may be needed.

Table 6.4
Race and Ethnicity: 1990 - 2010

Racial/Ethnic Groups	1990		2000		2010		% Change	
	Persons	%	Persons	%	Persons	%	1990-2000	2000-2010

Source: 1990, 2000, and 2010 U.S. Census

1. The significant increase in the “Other” category between 1990 and 2000 is likely a result of the change in the 2000 Census that allowed persons to identify themselves as members of more than one racial group

HOUSING

Employment

Employment has an important impact on housing needs. Availability of jobs and income levels determine the type and size of housing a household can afford. Employment growth in a particular region also typically results in an increase in housing demand, particularly in areas like Pinole that function for many as a “bedroom community” where most people live but work elsewhere. Pinole’s central location within the San Francisco Bay Area places residents in close proximity to a large number of employment centers in Contra Costa and Alameda Counties as well as in San Francisco. Based on available economic information, historic development patterns and the built-out nature of Pinole, the City anticipates:

- Slow growth in coming decades.
- Future job growth that will be concentrated in service sectors, consistent with the need for additional development of office and retail space.
- Long-term prospects for the residential market will improve as the market recovers and due to the proximity of Pinole to major employment centers, while the rental market prospects remain modest.

Contra Costa County has one of the largest job growth rates among Bay Area counties, with job base growth driven in large part by the need to provide services for a growing population. Additionally, white-collar jobs throughout the county have increased due to the decentralization of office-related employment from the region’s top employment centers, including San Francisco. Because many residents of Pinole work outside the City, regional employment trends are a relevant indicator of employment trends affecting Pinole. This trend is expected to continue into the future. Despite the recent economic downturn, ABAG projects that by 2030, approximately 811,300 jobs will be created in the Bay Area; 88,800 of which are expected to be in Contra Costa County.

Residents in Pinole are employed throughout the region, including some of the largest employment centers in Contra Costa and Alameda Counties. The following tables (**Table 6.5**, **Table 6.6**, and **Table 6.7**) display the largest employers in Contra Costa and Alameda Counties, as well as the City of Pinole, as published by the Employment Development Department. The City’s proximity to both counties makes them attractive sources of employment for Pinole residents. The Chevron Corporation has the largest number of employees and is located approximately 30 miles from Pinole, with a large refinery complex located in Richmond, which is within ten miles of Pinole. **Table 6.7** shows the top ten employers in Pinole by number of employees in 2013. As shown, the largest employer in the City was the West Contra Costa Unified School District, while six out of the top ten employers were retail industry businesses.

Table 6.8 displays the fastest growing occupations in the Oakland-Fremont-Hayward Metropolitan Division (MD), according to the Employment Development Department. The income groups are categorized according to the State income limits for Contra Costa County. The fastest growing occupations in this region are in the combined food preparation and serving workers category, including fast food. This occupation falls into the extremely low income category (based on a four-person household income). Especially of concern to the City is the fact that five of the ten fastest growing occupations in the region fall into this extremely low income category. A sixth occupation falls into the very low income category. This suggests that the jobs that will be available through 2020 are likely not going to provide adequate income for households to afford market-rate housing, indicating a need for affordable housing throughout the Oakland-Fremont-Hayward MD.

¹ Based on a four-person households income

Based on the 2007-2011 ACS, a total of 9,466 Pinole residents were in the labor force, with an estimated unemployment rate of 9.3 percent. Current Employment Development Department data indicates that Pinole's actual rate of unemployment has improved to 4.4 percent as of December 2013. The unemployment rate in the City is less than the rate for Contra Costa County as a whole (6.4 percent) during the same time period.

As part of the newly adopted Three Corridors Specific Plan, the City established an Economic Development Strategy to take advantage of the flexible land use standards for the Specific Plan Area and to identify opportunity sites for catalytic development. Throughout the Specific Plan corridors, and particularly on identified opportunity sites, the City will promote projects that:

- Are economically viable (e.g., generate benefits that are adequate to offset costs);
- Have the potential to develop in the near term;
- Have the potential to stimulate other development;
- Provide diverse housing opportunities;

HOUSING

- Strengthen Old Town as a vibrant commercial center;
- Enhance both regional and livable community objectives of supporting transit, pedestrian, and bicycle travel to destinations within the City and connecting to regional alternative transportation options; and
- Take advantage of preferred commercial locations that are near, and have convenient access to, the highway, are located on arterial roads that experience high traffic volumes, and that benefit from other factors that will support successful commercial (both office and retail) development.

HOUSEHOLD CHARACTERISTICS

The distribution of household type, income level, and cost burden are key factors in determining the type of housing needed by residents of Pinole. This section details the various household characteristics determining housing needs.

Household Type

A “household” is defined by the U.S. Census as any person or group of people occupying a housing unit; for Census purposes, those not living in households are classified as living in group quarters (i.e., nursing homes, dormitories, and similar institutions). Accordingly, a household can be anything from a single person living alone, to a family related by marriage or blood, or a group of unrelated persons sharing living quarters. Households are further categorized as “family households” and “nonfamily households” depending on the relationship between the householder and the other individuals residing in the housing unit. Persons living in retirement or convalescent homes and other group living quarters are not considered households. Household characteristics are important indicators of the type and size of housing needed in a community.

According to the 2010 Census, 18,322 of Pinole’s 18,390 residents are members of a household (68 persons reside in group quarters). Households in Pinole have an average of 2.70 persons, slightly less than the countywide average of 2.77 persons per household. As shown in **Table 6.9**, the majority of the 6,775 households in Pinole continue to be family households, despite a decrease from 75 percent in 2000 to 72 percent in 2010. The majority of these family households are married couples without children, followed by married couples with children under 18 years of age. However, the percentage of non-family households increased from 25 to 28 percent between 2000 and 2010.

Household Income

For the purpose of evaluating housing affordability, housing need, and eligibility for housing assistance, income levels are defined by guidelines adopted each year by the California Department of Housing and Community Development (HCD). For Contra Costa County, the median income for a family of four in 2014 was \$93,500. HCD has defined the following income categories for Contra Costa County based on the median income for a household of *four persons*:

Table 6.10
Contra Costa County Income Ranges: 2014

Income Category	% of Median Income
	Applicable Income Range (based on a four-person household)
Extremely low income	30% and below (\$0 to \$28,050)
Very low income	31% to 50% of median income (\$26,051 to \$46,750)
Low income	51% to 80% of median income (\$46,751 to \$67,600)
Moderate income	81% to 120% of median income (\$67,601 to \$93,500)
Above moderate income	120% or more of median income (\$93,501 or more)

Source: California Department of Housing and Community Development, 2014

Table 6.11 shows the maximum annual income level for each income group adjusted for household size in Contra Costa County. The maximum annual income data is then utilized to calculate the maximum affordable housing payments for different households (varying by income level) and their eligibility for federal housing assistance.

HOUSING

Ability to Pay

Table 6.12 displays the monthly income limits by household size for each of the five income groups (based on HCD's annually set income limits). The monthly income limits are used to calculate maximum affordable monthly rents as well as the maximum affordable purchase prices for homes. For example, a 2-person household earning a combined annual income of \$25,000 is considered an extremely low-income household. This household can afford a maximum monthly rent of \$388 or purchase a home for a maximum of \$57,718. The rental and sales price figures represent an affordable housing amount (30 percent of monthly income).

HOUSING

Housing Cost and Affordability

The analysis of housing affordability requires consideration of trends in household income in comparison to trends in housing prices and rents in order to quantify the incidence of overpayment for housing costs—the “affordability gap”—between local wages and salaries and the cost of local housing.

The cost of housing is directly related to the extent of housing problems faced by lower- and moderate-income households in a community. If housing costs are high relative to household income, correspondingly the incidence of housing cost burden and overcrowding will be high. The following sections summarize the cost and affordability of housing to Pinole residents.

Sales Cost

According to DataQuick, a company that collects real estate data nationwide, median home prices in Pinole and the majority of nearby communities were well below the countywide median sales price of \$392,500 (**Table 6.13**). The City’s median home sales price for all of 2013 was \$315,000, approximately 25 percent less than the County’s median price.

Nevertheless, the City’s median sales price in 2013 represented an increase of approximately 28 percent from the previous year, a much larger increase than the two percent that occurred between 2011 and 2012 (**Table 6.13**). Most neighboring communities experienced similar increases in home prices, with the largest change occurring in San Pablo (36 percent increase). Home prices in the County as a whole increased by approximately 33 percent between 2012 and 2013.

Table 6.13
Median Home Sales Prices: 2011 - 2013

Jurisdiction	2011	2012	2013	% Change 2011-2012	% Change 2012-2013
El Cerrito	\$450,000	\$439,000	\$564,500	-2%	29%
Hercules	\$270,000	\$285,000	\$350,000	6%	23%
Martinez	\$255,000	\$285,000	\$351,000	12%	23%
Pinole	\$243,000	\$247,000	\$315,000	2%	28%
Richmond	\$135,000	\$160,000	\$210,000	19%	31%
San Pablo	\$155,000	\$166,000	\$225,000	7%	36%
Contra Costa County	\$255,000	\$295,000	\$392,500	16%	33%

Source: DQNews.com, accessed February 3, 2014

According to the online real estate database Zillow, during February 2014, the City of Pinole had 10 single-family homes listed for sale, ranging in price from \$224,900 to \$499,000. There were also two condominiums listed for sale ranging in price from \$199,000 to \$229,000. The majority of the units listed for sale were three- and two-bedroom units (**Table 6.14**).

HOUSING

Table 6.14
Residential Listing Prices: February 2014

Type	Number Available	Low	High
Single-family Homes	10	\$139,000	\$1,200,000
5 Bedrooms	1	\$499,000	\$499,000
4 Bedrooms	1	\$399,900	\$399,900
3 Bedrooms	6	\$199,999	\$429,000
2 Bedrooms	2	\$224,900	\$299,900
Condominiums	2	\$199,000	\$229,000

Source: Sales Survey on Zillow.com, February 2014

Based on the income limits established by HCD, a typical household with an income equivalent to that of the Area Median Income (AMI) for a family of four in Contra Costa County (\$93,500) could afford a maximum purchase price of \$439,558. This assumes the buyer is paying 10 percent down, has a four-percent interest rate, and has no other debt payments. It is assumed that a household of four would purchase a three-bedroom home in the City, the highest listed price of which was \$429,000 in 2013, indicating that housing is currently affordable to median-income households.

Vacancy Rates

Vacancy rates are a useful indicator of the housing market's overall health and ability to accommodate new residents within the existing housing stock. A certain number of vacant units are needed to moderate the cost of housing, allow sufficient choice for residents, and provide an incentive for unit upkeep and repair. Specifically, vacancy rates of approximately two percent for ownership housing and five to six percent for rental housing are generally considered optimal by housing professionals to balance demand and supply for housing.

Table 6.15 summarizes vacancy rates by tenure for Pinole, according to the 2000 and 2010 Census. The overall vacancy rate in Pinole was 5.4 percent in 2010, a significant increase from an overall vacancy rate of 1.2 percent in 2000. Specifically, the vacancy rate for ownership housing was 1.5 percent in 2010, while the rental vacancy rate was 8.0 percent. In 2000, the vacancy rate for ownership housing was 0.4 percent and the rental vacancy rate was 1.6 percent.

HOUSING

Table 6.15

Rental Housing

According to the 2010 Census, 72 percent of housing units in Pinole are owner-occupied and 28 percent are renter-occupied. The City of Pinole has a rental vacancy rate of approximately eight percent, which is above the healthy range of five to six percent. The 2007-2011 ACS, however, reported a rental vacancy rate of 19.9 percent.

HOUSING

Table 6.16 shows the results of a rental survey completed from January to March 2014 to identify locally available rental units. The monthly median rent was \$1,900 for single-family homes and \$1,600 for units in multi-family structures. Although three-bedroom homes had the greatest number of listings for single-family home rentals, there was only one 3-bedroom apartment available for rent at the time of the survey. Two-bedroom apartments had the greatest availability among multi-family units available for rent. A total of 11 condominium/townhomes were listed, which overall had slightly higher average and median rental prices than apartment units and lower rates than single-family homes. Overall, rent in the City ranged in price from \$850 for one-bedroom apartment unit to \$2,500 for a single-family home. The overall median listed rental price for all units was \$1,600.

This rental survey was completed over a two-month period and included information gathered through multiple online rental listings. This analysis is a "snapshot" in time, which gives a sample of housing rental costs and is not representative of the entire rental housing market.

Overpayment (Cost Burden)

A household is considered to be overpaying for housing or cost-burdened if it spends more than 30 percent of its gross income on housing, including utilities, taxes, and insurance. Because household incomes and sizes vary, the price that is considered "affordable" for each household also varies. For example, a large family with one income is able to afford a different type of housing than a dual-income household with no children.

The Comprehensive Housing Affordability Strategy (CHAS) was developed by the Department of Housing and Urban Development (HUD) to assist jurisdictions in preparing the Consolidated Plans for the use of housing and community development funds. CHAS has special tabulations based on the 2006-2010 ACS. According to this data (Table 6.17), there were 640 owner-households and 459 renter-households in Pinole earning less than 50 percent of the Area Median Income (AMI) in 2010. Of these, 235 owner-households and 330 renter-households fell into the extremely low income category (incomes less than 30 percent of AMI).

Table 6.17 displays the number of residents in Pinole overpaying for ownership units and rental units. The table demonstrates to what extent households are overpaying for housing cost by their income category and whether or not they were overpaying (housing cost burden exceeding 30 percent of household income) or severely cost-burdened (housing cost burden exceeding 50 percent of household income). About 41 percent of all households were overpaying for housing in 2010. Of those households overpaying for housing, 19 percent were severely cost-burdened.

HOUSING

In general, housing cost burden was more prevalent among renter-households than owner-households (46 percent versus 39 percent).

Table 6.17
Housing Assistance Needs of Lower Income Households: 2006 - 2010

Household by Type, Income, and Housing Problem	Renters				Owners			Total Households

Note: Data presented in this table are based on special tabulations from sample Census data. The number of households in each category usually deviates slightly from the 100% total due to the need to extrapolate sample data out to total households. Interpretations of these data should focus on the proportion of households in need of assistance rather than on precise numbers.

Source: HUD Comprehensive Housing Affordability Strategy (CHAS), 2006-2010 ACS data.

Overcrowding

As a result of unaffordable housing costs, many lower income households rent smaller apartments or live with friends or relatives to make housing more affordable. This may lead to overcrowding conditions in housing units, which are defined by the Department of Housing and Urban Development (HUD) as more than one person per room (excluding bathrooms, kitchens, and hallways). Units with more than 1.50 persons per room are considered severely overcrowded. Other factors leading to overcrowding may include very low rental vacancy rates, and increases in the average house hold size.

HOUSING

Overcrowding is a concern because it can lead to health and safety issues. According to the 2011 ACS, four percent of households in Pinole were living in overcrowded conditions, down from six percent of households in both 1990 and 2000 (**Table 6.18**). As with housing cost burden, overcrowding was also more prevalent among renter-occupied households than owner-households in 2011. However, severe overcrowding appeared to affect owner-households more than renter-households. Approximately one percent of owner-households were severely overcrowded, while no renter-occupied households were severely overcrowded in 2011.

Table 6.18

SPECIAL NEEDS GROUPS

Due to special needs or circumstances related to income, family or household characteristics, age, and disability, certain groups have historically had greater difficulties finding quality affordable housing. They also often have a higher prevalence of special circumstances leading to housing problems such as lower incomes, higher housing cost burdens, and overcrowding. State law therefore requires that the housing needs of these groups, in particular senior households, single-parent households, persons with physical, mental and developmental disabilities, large families, farm workers, and homeless individuals, be evaluated.

To meet the community's special housing needs, Pinole must be creative and look to new ways of increasing the supply, diversity, and affordability of specialized housing stock. As there is a range of services and considerations for housing designed to meet special needs, beginning with independent living (owning or renting), to assisted living (licensed facilities), supportive housing, transitional housing, and finally emergency shelter, the City must encourage and balance these specialized housing types. In addition, the vast majority of special needs housing is service enriched with the goal of offering services to help individuals with special needs maintain independent living whenever possible. **Table 6.19** summarizes the special needs groups in the City.

HOUSING

Table 6.19
Special Needs Groups

Seniors

In 2010, seniors ages 65 and older comprised approximately 15 percent of the population. In addition, there were 1,738 senior-headed households in the City. Of these senior-headed households, the majority were home owners (81 percent). Many senior households are considered lower income. As shown earlier in **Table 6.17**, nearly 73 percent of the seniors living in rental units and 26 percent of seniors living in owner-occupied units fell into the low income category. Senior households are also more likely to experience one or more housing problems. Nearly 90 percent of senior-headed renter-households experienced a housing cost burden, while 30 percent of senior homeowners overpaid for housing. This indicates that there is a high need in the community for affordable housing for seniors, particularly senior renters.

Senior households have special housing needs primarily due to three major concerns: physical disabilities/limitations, income, and health care. Various programs and specialized housing types can address the needs of seniors. These may include supportive services, rental subsidies, shared housing, and housing rehabilitation assistance.

Typical housing types that meet the needs of seniors include smaller attached or detached housing for independent living (both market rate and below market rate); second units; shared housing; age-restricted subsidized rental developments; congregate care facilities; licensed facilities; and skilled nursing homes.

HOUSING

The increased need for senior housing may have the following implications:

- Senior projects will compete with non-age-restricted family and worker housing for Pinole's limited supply of land;
- Many seniors can become "trapped" in large houses due to upkeep expenditures and house payment increases that would result from moving into a smaller housing unit;
- The housing stock may deteriorate, as senior households on fixed incomes have limited resources for home improvements to maintain or rehabilitate older housing; and

Resources

The Contra Costa County Advisory Council on Aging has adopted Best Practice Development Guidelines for Multi-Family Senior Housing projects. These guidelines provide a framework to help guide the planning, design, and review of new senior housing developments in the County, and serve as a tool for local community groups, architects, planners, and developers.

There are three senior housing projects in Pinole: Pinole Grove Senior Housing, a 70-unit senior facility offering residents one- and two-bedroom apartments; Bay Park Retirement Apartments offering studio, one- and two-bedroom independent living suites; and the Pinole Senior Village (also known as the Pinole Assisted Living Facility) with 41 assisted living apartments in The Terraces. The Gardens, which is a separate community within the Pinole Senior Village, is a secured community with 31 studio apartments designed especially for seniors with memory loss and Alzheimer's. Both Pinole Grove Senior Housing and Pinole Senior Village offer units affordable to moderate and lower income seniors secured by affordability covenants.

Social and supportive services for seniors are available in Contra Costa County through various agencies and organizations. These include the County Area Agency on Aging, Older Adults Clinics, the Alzheimer's Disease Research Center, Health Insurance Counseling and Advocacy Program, Meals-On-Wheels, and John Muir Senior Services Program. In addition, Pinole has an extremely active Senior Center dedicated to providing seniors with a full range of activities and services to support seniors' physical, emotional, and social growth and education. In addition (as shown later in **Table 6.21**), there are ten elderly residential care facilities available to serve seniors in the City. These facilities have a combined capacity of 218 beds.

Single Parent Households

As a result of their relatively lower incomes and higher living expenses, single-parent households are more likely to have difficulty finding affordable, decent, and safe housing. These households often require special consideration when seeking affordable housing that provides services to help balance the demands of work and home life. Female-headed single-parent households with children in particular tend to have lower incomes, thus limiting housing options availability to this group.

According to 2010 Census data, there were 579 single-parent households in Pinole (representing nine percent of all households), the majority of which were female-headed (448 households representing seven percent of all households). Between 2000 and 2010, the number of single-parent households in Pinole decreased slightly. The total number of single-

HOUSING

parent households in the City decreased by approximately eight percent and the number of female-headed single-parent households decreased by about four percent. According to ACS data, 27 percent of female-headed single-parent households and 16 percent of male-headed single-parent households were living below the poverty level in 2011. Single-parent households need affordable housing proximate to day care, recreation programs, schools, and services. Despite fair housing laws, discrimination against children may make it more difficult for this group to find adequate housing.

A 2012 Child Care Needs Assessment jointly commissioned by the Contra Costa County Office of Education and the Contra Costa County Local Planning Council for Child Care and Development found that a shortage of child care opportunities exists throughout the County as well as in Pinole. In recent years, child care supply in the County has increased overall. Currently, 88 percent of child care demand is being met in Contra Costa County, an improvement from the 73 percent of demand being met in 2006. Despite these improvements, the County still has an unmet need of approximately 3,544 spaces for infant care, 525 spaces for preschool age child care, and 3,373 spaces for school age child care.

Resources

Limited household income constrains the ability of these households to afford adequate housing and provide for childcare, health care, and other necessities. While the City has no specific program targeted to assist single-parent households, the City's efforts in expanding affordable housing opportunities will help meet the needs of single-parent households.

Finding adequate and affordable childcare is a pressing issue for many families with children. The Pinole Youth Center offers a variety of classes and activities, including an after school care and transportation program. In addition, the County's Community Services Bureau offers an array of support and education services to support families. Among the services offered are comprehensive childcare services made available to eligible families at no cost. Single-parent households with limited incomes in Pinole can also benefit from rental, utility, and food assistance offered by various organizations, including Bay Area Rescue Mission, Season of Sharing, Shelter, Inc., Food Bank of Contra Costa and Solano, and The Salvation Army.

In addition, the Zoning Ordinance includes provisions for home day care with the intent to make it easier for small day care providers to run businesses out of their home in order to increase the supply of quality, affordable day care services in proximity to where households live and work. In residential zoning districts, home day care centers of not more than 12 children are permitted by right. In addition, the Zoning Ordinance includes a provision that allows for a home day care of more than twelve but less than 20 children at one time through the Conditional Use Permit process.

Persons with Disabilities

Physical, mental, and/or developmental disabilities may prevent a person from working, restrict one's mobility, or make it difficult to care for oneself. Thus, disabled persons often have special housing needs related to potential earning capacity, the lack of accessible affordable housing, and higher than average health care costs associated with their disability. Some individuals

HOUSING

may also suffer from disabilities that require around the clock care or living in a supportive or institutional setting.

According to the 2008-2012 ACS, there were approximately 2,253 persons over the age of five in Pinole with disabilities, representing approximately 14 percent of all residents. The majority of residents with disabilities were between the ages of 18 and 64 (53 percent) and 45 percent were seniors. Within the senior disabled population, ambulatory and independent living difficulties were the most prevalent (**Table 6.20**).

Table 6.20
Disability Status of Persons Over Age 5: 2012

Disability Type	% of Disabilities Tallied			
	Age 5 to 17	Age 18 to 64	Age 65+	Total
With Hearing Difficulty	0%	15%	36%	25%
With Vision Difficulty	0%	7%	18%	12%
With Cognitive Difficulty	38%	56%	33%	45%
With Ambulatory Difficulty	0%	33%	65%	47%
With Self-Care Difficulty	100%	22%	37%	30%

Total Persons with Disabilities	26	1,207	1,020	2,253

Note:

1. Persons under 5 years of age are not included in this table.

2. Persons may have multiple disabilities.

Source: U.S. Bureau of the Census, American Community Survey (ACS), 2008-2012.

Persons with Developmental Disabilities

A recent change in State law requires that the Housing Element discuss the housing needs of persons with developmental disabilities. As defined by the Section 4512 of the Welfare and Institutions Code, "developmental disability" means "a disability that originates before an individual attains age 18 years, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual. As defined by the Director of Developmental Services, in consultation with the Superintendent of Public Instruction, this term shall include mental retardation, cerebral palsy, epilepsy, and autism. This term shall also include disabling conditions found to be closely related to mental retardation or to require treatment similar to that required for individuals with mental retardation, but shall not include other handicapping conditions that are solely physical in nature." This definition also reflects the individual's need for a combination and sequence of special, interdisciplinary, or generic services, individualized supports, or other forms of assistance that are of lifelong or extended duration and are individually planned and coordinated.

The Census does not record developmental disabilities. However, according to the U.S. Administration on Developmental Disabilities, an accepted estimate of the percentage of the population that can be defined as developmentally disabled is 1.5 percent. This equates to 276

HOUSING

persons in the City of Pinole with developmental disabilities, based on the 2010 Census population.

According to the State's Department of Developmental Services, as of January 2014, approximately 123 Pinole residents with developmental disabilities were being assisted at the Regional Center of the East Bay. Most of these individuals were residing in a private home with their parent or guardian and 37 of these persons with developmental disabilities were under the age of 18.

Many developmentally disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

Resources

As the population ages, the provision of accessible housing will become increasingly necessary. Persons with disabilities typically live on fixed incomes and need a wide range of housing types, depending on the type and severity of their disability as well as personal preference and lifestyle. Housing designed "barrier-free," with accessibility modifications, on-site services, mixed income diversity, proximity to services and transit, and group living opportunities represents a range of considerations and accommodations that are important in serving this need group. Incorporating barrier-free design in all new multifamily housing is especially important to provide the widest range of choices. A number of community care facilities exist in Pinole to serve individuals with disabilities. **Table 6.21** summarizes the services available at licensed facilities in Pinole.

Additional considerations related to housing for physically disabled people should be considered in conjunction with infrastructure and public improvements. These include: (1) flat sites where curb cuts and building access can be provided (site design); and (2) handicapped dwelling conversion (or adaptability) in new construction.

Social and supportive services for persons with disabilities are available in Contra Costa County through various agencies and organizations, including the Contra Costa ARC, Asian Community Mental Health Services, Building Blocks for Kids, Down Syndrome Connection, East Bay Community Foundation, Families First, and We Care. For children with special needs, the County Community Services Bureau offers assistance services through its Head Start and Early Head Start programs. The County also has a Developmental Disabilities Council to promote the growth of available services to residents and also offers a resource listing to persons in need.

HOUSING

Table 6.21
Licensed Community Care Facilities: February 2014

Type of Facility	Number of Facilities in Pinole	Capacity (beds)
Small Family Home ¹	1	6
Group Home ²	1	6
Adult Day Care ³	2	105
Adult Residential ⁴	3	18
Elderly Residential ⁵	10	200
Total	17	335

Notes:

1. Small family homes provide care to children in licensee's own home.
2. Group homes provide specialized treatment for persons under the age 18.
3. Adult day care facilities provide care for adults with various disabilities or disorders.
4. Adult Residential Facilities provide 24-hour non-medical care for adults ages 18 through 59.
5. Elderly residential facilities provide care for persons age 60 and above.

Source: State of California Department of Social Services, Community Care Licensing Division, Facility Search Form, accessed February 2014.

Large Households

Large households are defined as those consisting of five or more members. Large households are considered a special needs group because it may be difficult for these households to secure adequately sized, affordable housing. In order to balance affordable housing along with other financial responsibilities, large households tend to reside in smaller dwelling units, which may lead to overcrowding.

In 2010, approximately 12 percent (833) of Pinole's 6,775 households were considered large households. Of those large households, 71 percent (595) lived in owner-occupied units, while 29 percent (238) lived in rental housing. Large households tend to have more difficulty purchasing housing due to the financial constraints of supporting a larger household and because adequately sized (large) housing units are rarely affordable. The situation is further complicated by the reality that rental units with three or more bedrooms are not common, and large affordable rental units are even less common. This can lead to overcrowded housing conditions.

Resources

The City continues to work towards ensuring that appropriate and affordable housing is available for large families. In 2008, the former Redevelopment Agency acquired two homes in the Maiden Lane development and recorded affordability covenants on the properties. At four and five bedrooms each, the units are appropriately sized for larger families and in 2009 were sold as affordable ownership housing units with restrictions that ensure they remain affordable for families at the moderate income level for at least the next 45 years. The Bayside Apartment community also has 14 three-bedroom units available for lower income families in the City. The Section 8 Housing Choice Vouchers program, managed by the Housing Authority of the County of Contra Costa, also extends assistance to large households with overcrowding and cost burden issues.

HOUSING

Agricultural (Farm) Workers

State law requires that housing elements evaluate the needs of agricultural (farm) worker housing in the local jurisdiction. Traditionally, agricultural workers are defined as persons whose primary incomes are earned through permanent or seasonal agricultural labor. Based on current ABAG projections, jobs in the agricultural and natural resources industries represent less than one percent of all jobs in the Bay Area. Furthermore, the number of available jobs in these industries is projected to decrease by approximately eight percent over the next 25 years.⁴ The 2007-2011 ACS found that 24 Pinole residents were employed in the agriculture, forestry, fishing and hunting, and mining industry.

Resources

Very few Pinole residents are employed in the agricultural industry and many of these individuals are likely employed in specialized wholesale and horticulture businesses. In addition, the City does not permit agricultural uses in any of its zones. Therefore, there are no localized needs for seasonal or other types of farm worker housing in the City.

Residents Living Below the Poverty Level

Families with incomes below the poverty level, specifically those with extremely low and very low incomes, are at greatest risk of becoming homeless and often require assistance in meeting their rent and mortgage obligations so as to not become homeless. The 2007-2011 ACS found that approximately eight percent of all Pinole residents were living below the poverty level. In addition, about eight percent of families with children were living in poverty. These households could benefit greatly from assistance with housing subsidies, utility and other living expense subsidies, and other supportive services.

Resources

Persons living with incomes below the poverty level can benefit from programs and services that provide assistance to lower income households in general, such as the Housing Choice Voucher program, which offers rental assistance to residents. These households can also benefit from services offered by providers located in neighboring communities. Assistance is often provided in cases of financial emergencies by providing services such as food vouchers, gasoline vouchers, bus tokens, rental assistance, utility payments, and referrals to other services. Agencies offering such services include the Catholic Charities of the East Bay, Season of Sharing, Shelter, Inc., Food Bank of Contra Costa and Solano, and The Salvation Army. **Table 6.22** details a complete listing of providers and the services they offer, including providers of emergency and transitional housing.

Homeless Individuals and Families

Homeless individuals and families have perhaps the most immediate housing need of any special needs group. They also have one of the most difficult sets of housing needs to meet, due to both the diversity and complexity of the factors that lead to their homelessness, and the community opposition to the siting of housing that serves homeless clients.

⁴ OneBayArea, *Forecast of Jobs, Population, & Housing*, July 2013

HOUSING

The County Health Services Department develops plans and programs to assist homeless individuals throughout Contra Costa County. In 2004, the County adopted the “Ending Homelessness in Ten Years: A County-Wide Plan for the Communities of Contra Costa County” (Ten Year Plan). Through the Plan, the County adopted a strategy which works to immediately house homeless individuals and families as opposed to moving them through a series of temporary housing solutions. In addition, the County Homeless Continuum of Care Advisory Board (CoCB) developed a Five Year Plan, which is a good source of information on homelessness and available programs.

The Ten Year Plan estimated 15,000 people in Contra Costa County experience at least one night of homelessness annually, and that on any given night 4,800 people are living on the streets or in temporary accommodations, such as an emergency shelter. In addition, many others are at risk of becoming homeless, such as the nearly 17,000 extremely low-income households in the county who are paying overpaying for housing.

It is difficult to determine an exact count of homeless individuals in any one jurisdiction due to the sometimes transient nature of homeless people. A January 2013 Contra Costa Health Services Department homeless count found 20 unsheltered homeless people in Pinole. This number, however, understates the extent of homelessness in Pinole as it does not account for individuals in shelters or other temporary housing. Information from the Pinole Police Department in March 2014 indicates that officers have regular contact with less than a half dozen homeless individuals living in Pinole. Typically, officers who come in contact with homeless persons in the City offer referral assistance and periodically transport them to the Bay Area Rescue Mission in nearby Richmond.

As elsewhere in the nation, homelessness is usually the end result of multiple factors that converge in a person's life. The combination of loss of employment, inability to find a job because of the need for retraining, and the high housing costs in this county lead to some individuals and families losing their housing. For others, the loss of housing is due to chronic health problems, physical disabilities, mental health disabilities, or drug and alcohol addictions along with an inability to access the services and long-term support needed to address these conditions.

The CoCB Plan identified three primary causes of homelessness, including a shortage of affordable housing, lack of access to support services, and low incomes. Together with the Contra Costa Office of Homeless Programs, the CoCB held a series of community meetings between October and January 2001 to identify unmet service and housing needs and obtain feedback about ongoing programs. Many of the needs identified at that time are still relevant today. The needs for all segments of the homeless population included the following:

- *Affordable Housing:* Rental units in the County are not affordable to people with extremely low incomes, such as those who depend on General Assistance, Temporary Assistance to Needy Families, or Social Security income. Over 2,000 households are on the waiting list for Section 8 vouchers administered by the Contra Costa County Housing Authority. In addition, many households cannot save the money required to move into an apartment (i.e., first and last months' rent plus security deposit).

HOUSING

- *Employment at a Living Wage:* The high cost of housing makes it difficult to find housing that is affordable for those performing minimum wage jobs.
- *Dignity:* Participants expressed their desire to be treated with respect when accessing services.
- *Transportation:* Lack of transportation makes it difficult for people to get to jobs as well as services.
- *Early Intervention: Timely Prevention and Emergency Services:* Providers stressed the importance of identifying people at risk of homelessness early and then providing services to them immediately.
- *Community Education, Involvement and Advocacy:* Providers and community members felt that community education is an important way to increase the public's understanding of homelessness and build support for programs that prevent and alleviate homelessness.

Resources

Although homelessness exists in Pinole, in most cases, local homeless individuals rely on regional programs and services, which are available in close proximity to Pinole. The following **Table 6.22** includes facilities and services for a variety of homeless persons in west county jurisdictions with close proximity to Pinole.

To help meet the special needs of the homeless, the Contra Costa Crisis Center operates a 24-hour homeless hotline that connects homeless individuals and families to resources available in the County. Through the Center, homeless persons are given emergency motel vouchers, provided free voice mail boxes, and referred to local service programs, including housing assistance, job training, substance abuse treatment, counseling, and emergency food, health care, and other vital services.

In an effort to support homeless services despite limited funding availability, Pinole provides financial support to facilities and service providers in the area, particularly the Greater Richmond Interfaith Program (GRIP). The City will continue to prioritize its limited resources to support affordable housing solutions affordable to those with extremely-low, very-low, and low incomes, particularly those whom may experience homelessness or be at risk of losing access to permanent housing.

Emergency shelters are defined by the California Health and Safety Code Section 50801 as "housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay." The City recently amended the Zoning Code to permit the development of emergency shelters by right in the Office Industrial Mixed Use (OIMU) zone.

HOUSING

HOUSING STOCK CHARACTERISTICS

As of 2013, the City of Pinole and Contra Costa County have housing stocks that are similar in composition, though the County does have a slightly higher proportion of multi-family units. As shown in **Table 6.23**, Department of Finance figures from January 1, 2013, show that 79 percent of homes in Pinole are single-family homes. This figure is slightly higher than the County, where 74 percent of all homes are single-family units.

Table 6.23
Number and Type of Housing Dwelling Units

Housing Type	City of Pinole		Contra Costa County

Housing age is an important indicator of housing condition within a community as housing is subject to gradual deterioration over time. As a general rule in the housing industry, structures older than 30 years begin to show signs of deterioration and require reinvestment to maintain their quality. Unless properly maintained, homes older than 50 years often require major renovations to remain in good condition. If not properly and regularly maintained, housing can deteriorate and discourage reinvestment, thereby depressing neighboring property values and impacting the quality of life in a neighborhood. Maintaining and improving housing quality is an important goal for the City.

Table 6.24 displays the age of Pinole's occupied housing stock by tenure, as of 2011. Nearly three quarters of Pinole's housing stock (71 percent) was built prior to 1980 and is at least 30 years old. Housing rehabilitation needs in the community will, therefore, become increasingly important during the upcoming planning period.

HOUSING

Table 6.24
Age of Housing

Year Structure Built	Percentage of Total
Built 2000 or Later	3%
Built 1990 to 1999	7%
Built 1980 to 1989	19%
Built 1970 to 1979	21%
Built 1960 to 1969	26%
Built 1950 to 1959	15%
Built 1940 to 1949	4%
Built 1939 or earlier	5%
Total	100%

Housing Conditions Survey

In order to better assess current housing conditions, the City undertook a windshield housing survey in August 2009, taking inventory of 6,186 of Pinole's 7,032 units. This 2009 survey assesses the conditions of housing within the incorporated area of the City of Pinole. According to the survey results, the majority of units were in either sound condition or in need of minor repairs.

City staff used the following set of definitions to categorize housing conditions:

- **Sound** – A unit that appears new or well maintained and structurally intact. The foundation should appear structurally undamaged and there should be straight roof lines. Siding, windows, and doors should be in good repair with good exterior paint condition. Minor problems such as small areas of peeling paint and/or other maintenance items are allowable under this category. Costs for necessary repairs to the structure are less than \$10,000.
- **Minor** – A unit that shows signs of deferred maintenance or which needs repair or replacement of only one major component, such as a roof. Costs for necessary repairs to the structure range from \$10,000 through \$25,000.
- **Moderate** – A unit in need of replacement of one or more major components and other repairs, such as roof replacement, painting, and window repairs. Costs for necessary repairs to the structure range from \$25,000 to \$50,000.
- **Substantial** – A unit that requires replacement of several major systems and possibly other repairs (e.g., complete foundation work, roof structure replacement and re-roofing, as well as painting and window replacement). Costs for necessary repairs to the structure range from \$50,000 to \$75,000.
- **Dilapidated** – A unit suffering from excessive neglect, where the building appears structurally unsound and maintenance is non-existent, may not be fit for human habitation in its current condition and may be considered for demolition. For these units,

HOUSING

major rehabilitation will be required. Costs for necessary repairs to the structure are greater than \$75,000.

Table 6.25
Pinole Housing Conditions

Condition	Percentage
Sound	68.6%
Minor	16.0%
Moderate	13.0%
Substantial	1.5%
Dilapidated	0.9%
Total	100%

*Pinole Community Development
Department 2009 Housing Conditions
Survey*

Table 6.25 summarizes the overall condition of all homes surveyed in the City. Approximately 85 percent of the homes were found to be in sound condition or in need of minor repairs. Roughly 13 percent of the homes surveyed were found to be in moderate condition. Approximately 1.5 percent of the homes surveyed fell into the substantial category. These homes require many repairs and replacements that often include structural needs (i.e., roofs or foundations). Less than one percent were found to be dilapidated properties.

Housing Tenure

According to the 2010 Census, and as shown in **Table 6.26**, about 72 percent of the occupied housing units in Pinole were owner-occupied and 28 percent were renter-occupied. Contra Costa County as a whole had a slightly lower proportion of owner-occupied units (67 percent), while 33 percent of the County's homes were renter-occupied.

Table 6.26
Housing Tenure

Tenure of Units	City of Pinole		Contra Costa County	
	Number	Percentage	Number	Percentage
Owner-Occupied	4,861	72%	251,904	67%
Renter-Occupied	1,914	28%	123,460	33%
Total Occupied*	6,775	100%	375,364	100%

*Note: * = Units reflect total occupied units.

Assisted Units at Risk of Conversion

Assisted housing developments at risk of conversion are affordable, multifamily rental housing projects receiving government assistance under federal, state, and/or local programs that are eligible to change to market-rate projects due to termination of rent subsidies or expiration of

HOUSING

other use restrictions. A list of all affordable units with covenanted affordability restrictions in place is included in **Table 6.27**. Due to the potential impact of the loss of these units on a community's ability to provide affordable housing, Housing Element law requires all jurisdictions to include an analysis of all low income housing units which may be lost as a result of the expiration of some type of affordability restrictions within the planning period (2015–2025). The law requires that the analysis cover a ten-year period.

According to HUD, there are no HUD-assisted rental properties in the City of Pinole that may be at risk of opting out of programs that keep them affordable to very low and low income households over the Housing Element at-risk analysis period. However, a number of affordability covenants and deed restrictions used by the former Pinole Redevelopment Agency to maintain the affordability of city-assisted affordable housing may be at risk of conversion. Redevelopment housing funds were used in the renovation of a number of multi-family housing complexes in Pinole. The affordability covenants recorded against the property in return for the subsidy work to ensure that these units are available to moderate and lower income households in the long term.

A number of the former Agency's affordability covenants recorded before the Legislature's 2001 revision of minimum thresholds for affordability were adopted are now nearing their expiration dates. **Table 6.27** summarizes the affordable units at risk of conversion over the 2015 to 2025 Housing Element at-risk analysis period. All of the assisted units identified as at risk of conversion are units which have received funding from the former Pinole Redevelopment Agency.

HOUSING

At-Risk Affordable Rental Housing: 2015-2025

The following projects with affordable units are considered at risk of converting to market-rate housing between 2015 and 2025.

885 Fifth Avenue is a four-unit housing complex in Pinole. In exchange for assistance through the former Redevelopment Agency's Multi Family Residential Rehabilitation Program, the development has set aside one two-bedroom unit as affordable for a low income household. The affordability restriction on the unit is set to expire in 2014.

1965 San Pablo Avenue is a five-unit housing complex in Pinole. In exchange for assistance through the former Redevelopment Agency's Multi Family Residential Rehabilitation Program, the development has set aside one unit as affordable for a low income household. The affordability restriction on the unit is set to expire in 2014.

2548 San Pablo Avenue is a mixed-use project in a converted Queen Anne Victorian in Old Town Pinole with four apartment units. In exchange for assistance from the former Redevelopment Agency, the development has made all four units affordable to households at the moderate income level through the life of the Redevelopment Agency (currently 2017).

815 San Pablo Avenue is a mixed-use project featuring two studio apartments and two two-bedroom apartment units. In exchange for construction loan financing from the former Redevelopment Agency, two of the units are required to remain affordable for moderate income households through 2017.

1520 San Pablo Avenue is a fourplex with affordability restrictions in place that require one unit to be made affordable at the low income level and three units to be made affordable at the moderate income level. The affordability requirements, put in place in exchange for upgrades completed through the former Redevelopment Agency's Multiple Family Residential Rehabilitation Program, are set to expire in 2015.

950 Appian Way is a triplex with affordability requirements in place. In exchange for assistance through the former Redevelopment Agency's Multiple Family Residential Rehabilitation Program, covenants require one very low income unit, one low income unit, and one moderate income unit at the property. The affordability covenants are set to expire in 2015.

2529 San Pablo Avenue is a mixed-use development with two housing units. Affordability requirements are in place for one unit to remain affordable at the moderate income level through 2015, in exchange for assistance from the former Redevelopment Agency in the rehabilitation of the building to its current use.

2395 San Pablo Avenue is a mixed-use development featuring four units of housing above the Pear Street Bistro in Old Town Pinole. As a result assistance from the former Redevelopment Agency in the construction of the building, one unit is under covenant to remain affordable at the very low income level and three units are under covenant to remain affordable at the moderate income level. These affordability covenants are set to expire in 2017.

530 Sunnyview Drive is a 148-unit Bayside Apartment complex in Pinole. In exchange for a Redevelopment Agency loan for rehabilitation, affordability covenants are in place requiring 71

HOUSING

units be made affordable at the moderate income level and 22 units be made affordable at the very low income level. The affordability covenants are set to expire in 2017.

Preservation and Replacement Resources

To maintain the existing affordable housing stock, the City must either preserve the existing affordable units or replenish the affordable housing inventory with new units. Depending on the circumstances of at-risk projects, a number of options may be pursued to preserve or replace the units. Preservation options may include: 1) transfer the project to non-profit ownership; 2) provide rental assistance to tenants using non-federal funding sources; 3) purchase of affordability covenants, and 4) construct new replacement units. With regard to replacement, the most direct option is the development of new assisted multi-family housing units.

Transfer of Ownership

Transferring ownership of an at-risk project to a non-profit housing provider is generally one of the most cost effective means of ensuring that the at-risk units remain affordable for the long-term. By transferring property ownership to a non-profit, affordability restrictions can be secured for 55 years and the project would become eligible for a greater range of governmental assistance. A partial list of some potential non-profit entities with which the City might partner are listed below.

- ACLC Dewey Housing, Inc.
- Allied Housing
- BRIDGE Housing Corporation
- C. Sandige and Associates
- Christian Church Homes (CCH)
- Community Housing Developers, Inc. (CHD)
- Community Housing Development Corporation (CHDC)
- Community Housing Opportunities Corporation (CHOC)
- Contra Costa Department of Conservation and Development
- East Bay Asian Local Development Corporation (EBALDC)
- Eden Housing, Inc.
- Eskaton Properties, Inc.
- Foundation for Affordable Housing, Inc. (FFAH)
- Northern California Land Trust, Inc. (NCLT)
- Oakland Community Housing, Inc. (OCHI)
- Pacific Community Services, Inc. (PCSI)
- Phoenix Programs Inc.
- Resources for Community Development (RCD)
- Neighborhood Housing Services of Richmond, Inc.
- Retirement Housing Foundation
- Rubicon Programs, Inc.
- Rural California Housing Corporation (RCHC)
- Satellite Affordable Housing Associates

HOUSING

Transferring property ownership to a non-profit housing organization to secure long-term low income restrictions is an option best suited for units in a complex of a certain size. As a whole, this is not a viable option for the replacement of many of these units which are part of small housing and mixed-use developments. In addition, this option is complicated by the fact that it is not possible to acquire only the affordable unit(s) in each project, thus all 178 units in the various developments would have to be acquired in whole. It is not likely that all property owners would agree to sell, nor is it likely that a qualified non-profit housing organization would be interested in taking on a number of separate, small housing projects. Thus, this is not the best strategy for preserving all at-risk units. However, it may be a viable option for preserving (and possibly expanding) affordability at 530 Sunnyside Drive (Bayside Apartments) in the event that the 148 unit complex could be acquired by a qualified non-profit. The estimated market value of both the for-profit units at risk and total units at Bayside Apartments is provided in **Table 6.28**.

Current market value for the at-risk and total units is estimated on the basis of the units' potential annual income, and operating and maintenance expenses. As indicated, the estimated market value of the stock of affordable housing at Bayside Apartments is \$17.5 million. While the estimated value of all units at Bayside Apartments is estimated at \$27.7 million. These estimates are provided for the purpose of comparison and understanding the magnitude of costs involved and does not represent the precise market value of this project. The actual market value at time of sale would depend on market and property conditions, lease-out/turnover rates, among other factors.

Table 6.28
Market Value of Units at 530 Sunnyside Drive (Bayside Apartments)

Unit Information	At-Risk Units	Total Units
Two-Bedroom Units	79	126
Three-Bedroom Units	14	22
Annual Operating Cost	\$377,019	\$606,879
Gross Annual Income	\$1,772,905	\$2,819,402
Net Annual Income	\$1,395,886	\$2,212,523
Market Value	\$17,448,578	\$27,656,543

Market value is estimated with the following assumptions:

1. Average market rent based on Fair Market Rents (FY 2014) established by HUD two-bedroom unit = \$1,578, and three-bedroom unit = \$2,204.
2. Average size is assumed to be: 864 square feet for a two-bedroom/one-bathroom apartment, 964 square feet for a two-bedroom/two-bathroom apartment, and 1,109 square feet for a three-bedroom/two-bathroom apartment.
3. Annual income is calculated on a vacancy rate = 5%.
4. Annual operating expenses per square foot = \$4.50.
5. Market value = Annual net project income*multiplication factor.
6. Multiplication factor for a building in good condition is 12.5.

HOUSING

Rental Assistance

Rental subsidies using non-federal (State, local, or other) funding sources can be used to maintain affordability of at-risk units. These rent subsidies could be structured to mirror the federal Section 8 program through HUD, which pays the difference between what tenants can pay (30 percent of household income) and what HUD estimates to be the Fair Market Rent of the unit. The feasibility of this option is highly dependent on the availability of funding sources necessary to make subsidies available as well as the willingness of property owners to accept rental vouchers. Given the uncertainty of the current economic climate, there is no certainty that this type of funding would be available between 2015 and 2025.

An estimate of the total amount needed to subsidize the rent for the tenants to remain in the at-risk projects is shown in **Table 6.29**. Currently, market rate rents in Pinole are generally affordable at the moderate income level; therefore, the 85 at-risk moderate income units do not require additional subsidies to maintain their affordability. Given the unit mix of the 28 at-risk units affordable at the very low and low income levels, the total cost of subsidizing the rents for these units is estimated at \$267,000 annually. For a ten-year affordability covenant, a total subsidy of more than \$2.7 million would be needed.

HOUSING

Table 6.29
Rental Subsidies Required

Unit Size/Household Size	Number of Units	Fair Market Rent ¹	Household Annual Income	Affordable Housing Cost ⁵	Monthly per Unit Subsidy ⁶	Total Monthly Subsidy
Very Low Income (50% AMI)²						
0 Bedroom/ 1 person household	1	\$1,035	\$32,750	\$491	\$544	\$544
1 Bedroom/ 2 person household	1	\$1,255	\$37,400	\$561	\$694	\$694
2 Bedroom/ 3 person household	22	\$1,578	\$42,100	\$631	\$947	\$20,834
Low Income (80% AMI)³						
2 Bedroom/ 3 person household	4	\$1,578	\$60,850	\$1,521	\$57	\$228
Moderate Income (120% AMI)⁴						
0 Bedroom/ 1 person household	2	\$1,035	\$78,550	\$1,964	\$0	--
1 Bedroom/ 2 person household	7	\$1,255	\$89,750	\$2,244	\$0	--
2 Bedroom/ 3 person household	62	\$1,578	\$101,000	\$2,525	\$0	--
3 Bedroom/ 4 person household	14	\$2,204	\$112,200	\$2,805	\$0	--
Total Monthly	28⁷	\$22,300				
Total Annual Subsidy		\$267,600				

Notes:

1. Fair Market Rent (FMR) is determined by HUD. These calculations use the 2014 HUD FMR for Contra Costa County.
 2. Rents are restricted to 50% AMI for these units, which puts residents in the Very Low Income Category, set by the California Department of Housing and Community Development (HCD), 2014.
 3. Rents are restricted to 80% AMI for these units, which puts residents in the Low Income Category, set by the California Department of Housing and Community Development (HCD), 2014.
 4. Rents are restricted to 120% AMI for these units, which puts residents in the Moderate Low Income Category, set by the California Department of Housing and Community Development (HCD), 2014.
 5. The affordable housing cost is calculated based on 30% of the AMI, minus utilities for rentals.
 6. The monthly subsidy covers the gap between the FMR and the affordable housing cost.
 7. This total excludes the 85 at-risk units affordable at the moderate-income level.
- Source: Veronica Tam and Associates, 2014.

Purchase Affordability Covenants

This option would be achieved by providing an incentive package to property owners to maintain a project as affordable housing. Incentives could include funding for improvements and writing down the interest rate on a remaining loan balance in exchange for securing guaranteed affordable units. The feasibility of this depends upon whether the complex is too highly leveraged as well as upon the availability of funds to invest large sums.

This option would require working with each property owner to determine necessary improvements to the site and other means through which the City could contribute to the health

HOUSING

of the project while securing long-term affordability. This option gives some flexibility for both parties to come to terms on a mutually beneficial agreement.

Construction of Replacement Units

The construction of new low-income housing units is a means of replacing the at-risk units should they be converted to market-rate units. The cost of developing housing depends on a variety of factors, including density, size of the units (i.e., number of bedrooms), location, land costs, and type of construction. There has been no recent construction of multi-family rental housing in Pinole from which to derive accurate construction costs for rental residential units. The feasibility of this option depends on having community support, adequately sized parcels for development and developers interested in producing affordable rental housing.

Based on general assumptions for average construction costs, it would cost approximately \$14.7 million to construct 113 affordable replacement units, excluding land costs and other soft costs (such as architecture and engineering)(Table 6.30). Including these costs, the total costs to develop replacement units would be significantly higher. This analysis, however, likely understates the true cost of replacing the units, as it would be quite difficult to assemble an appropriate combination of subsidies to develop a similar project with the same mix of unit sizes and affordability levels. In addition to cost, the feasibility of this option would depend on finding a qualified developer to take on a project of this size as affordable housing developers tend to need to develop larger projects in order to make the project financially feasible.

Table 6.30
Estimated New Construction Costs

	(A)	(B)	(C)	(D)
Unit Size	Total Units	Estimated Average Unit Size (sq. ft.)	Estimated Gross Building Size	Estimated Gross Building Costs
0 Bedroom	3	500	1,800	\$218,858
1 Bedroom	8	625	6,000	\$729,525
2 Bedroom	88	897	94,723	\$11,517,157
3 Bedroom	14	1,109	18,631	\$2,265,321
Total	113		121,154	\$14,730,861
Average Per Unit Cost:				\$130,362

Notes:

(C) = (A) x (B) x 1.20 (i.e. 20% inflation to account for hallways and other common areas).

(D) = (C) x \$97.27 (per square foot construction costs) x 1.25 (i.e. 25% inflation to account for parking and landscaping costs).

HOUSING

Financial Resources for the Preservation of At-Risk Units

Federal Resources

Community Development Block Grant Program (CDBG). CDBG is the largest federal housing-related program for affordable housing. It is a “pass-through” program that allows local governments to use federal funds to alleviate poverty and blight. CDBG funds are used for a variety of housing efforts including activities aimed at reducing costs for private development (helping fund site acquisition, improvement, and other soft costs); housing acquisition and rehabilitation through short and long-term loans, grants or loan guarantees; direct payment of rent or mortgage and housing counseling services; and fair housing activities. CDBG funds are best used in combination with other subsidy sources or to provide pre-development funding to initiate housing development. The City of Pinole is under the jurisdiction of the Contra Costa Urban County and receives CDBG funds through the Urban County. Generally these funds are used to help support implementation of the Contra Costa Homeless Continuum of Care Plan, providing programs and services for homeless individuals and families, people at-risk of homelessness, and other special needs groups.

HOME Investment Partnership Act. HOME, like CDBG, is a formula-based block grant program. HOME funds must be spent only on housing and are intended to provide incentives for the acquisition, construction and rehabilitation of affordable rental and home ownership. HOME requires local governments to provide matching funds, though the matching ratio depends on the specific uses to which HOME funds are to be applied. The federal-to-local matching ratio for tenant assistance is currently four-to-one, while the match for rental construction is two-to-one. HOME funds in West Contra Costa are channeled through the Contra Costa County HOME Investment Partnership program.

Section 8 Assistance. Although this long-standing federal assistance program is not expected to increase in size or scope, it remains an important program for helping to fill the gap between household income and housing costs. Section 8 assistance in Pinole is administered by the Contra Costa County Housing Authority.

Low Income Housing Tax Credits (LIHTC). The LIHTC program is a large federal and state housing subsidy program that provides substantial financing for the development of affordable housing. It provides tax credits to the private sector for the construction or acquisition and rehabilitation of very affordable rental housing. These tax credits are crucial to the success of affordable housing developers, who sell credits directly to corporations and private investors or receive the equity from one of a number of investment entities now making tax credits available.

To be eligible for a tax credit, 20 percent of the units in a housing development must rent to very low income households earning less than 50 percent of area median incomes, or 40 percent of the units must rent for incomes under 60 percent of the median. California law also requires that developments retain these levels of affordability for at least 55 years.

Both federal and state tax credit programs are administered by the State Treasurer's Office through the California Tax Credit Allocation Committee (CTCAC), which allocates the available credits to projects statewide. TCAC administers two LIHTC programs: the nine percent (for projects with no federal subsidy) and the four percent credit programs (for projects with federal

HOUSING

subsidies and more than 50 percent of financing through tax-exempt bonds). The nine percent credit program, which has limited funds and is highly competitive, awards credits based on a combination of formula and competition so that those meeting the highest housing priorities have first access to credits. The four percent program has no funding limit but is available only with projects that have an allocation of Mortgage Revenue Bonds. It also has limited funds, but is less competitive than the nine percent program. Funds raised from the sale of four percent credits typically cover 20-30 percent of project costs. Generally the maximum credit allocation is the amount needed to fill the financing shortfall, and the amount needed is determined at least thrice: at the time of application, at the time of allocation, and when placed-in-service.

To be successful, tax credit projects require an additional subsidy which can include no or low-cost land, local government contributions, or density bonuses and other concessions. While the utilization of the tax credits depends primarily on the project's developer, local government must work with the developer to identify other strategies and subsidy sources that are appropriate with tax credits and provide the additional subsidies usually required to make them work. Collaboration between the developer and the local government often with the help of a professional specializing in tax credits and other financial tools is the key to a successful tax credits program.

Other Federal Funding Sources. Other programs that are offered through federal agencies include Housing for Persons with AIDS (HOPWA), the Emergency Shelter Grant (ESG), the Elderly Housing Program (Section 202), the Housing for the Disabled Program (Section 811), and a variety of FHA administered rental programs. Like Section 8, most of these programs are not projected to increase in size or scope in the foreseeable future.

State Resources

The California Debt Limit Allocation Committee (CDLAC). CDLAC, an agency within the Treasurer's Office, is responsible for overseeing private bond issuances.

The California Tax Credit Allocation Committee (CTCAC). CTCAC, also an agency within the Treasurer's Office, is responsible for allocating federal and state tax credits that are crucial to the construction and rehabilitation of affordable housing developments. See the discussion of Low Income Housing Tax Credits on the preceding page.

California Housing Finance Agency (CHFA). CHFA offers a variety of programs to fund new construction and resale of single-family housing for first-time homebuyers. The 501(c)(3) Preservation Mortgage Program, for example, allows the mortgage to be used as acquisition financing for projects that employ tax-exempt bonds and tax credits. CHFA also provides permanent financing for new apartments and subsidizes certain projects through its Housing Assistance Trust, a flexible source of state funds that can offer deferred loans to cover negative cash flows in projects where at least half of the units are for low-income households.

Department of California Housing and Community Development (HCD). HCD is responsible for administering federal funds for non-entitlement jurisdictions and for various State programs funded through housing bonds. In the past decade there have been no new housing bonds.

HOUSING

However, with passage of the Multifamily Housing Assistance Program, a substantial source of funds will be made available to assist in the construction of new rental housing.

HCD's Clearinghouse for Affordable Housing and Community Development Finance is an excellent source of information on over 200 housing programs offered by the federal and state government, private lenders and foundation grants. It can be accessed on-line at <http://www.hcd.ca.gov/clearinghouse>. The database specifies applicants and counties served by each program. It can be searched by types of assistance (which includes construction/rehabilitation loans, down-payment assistance, rental subsidies or predevelopment/interim finance); and activities funded (which includes acquisition, preservation of affordable housing, new-for sale housing, purchase assistance, rehabilitation of apartments, group homes and transitional housing amongst others).

The City will continue to monitor rents of at-risk affordable units and be prepared to work with the owners to examine the options for preserving affordability outlined above. It is likely that for the two units at-risk of conversion in 2014 (885 Fifth Avenue and 1965 San Pablo Avenue), the best option for maintaining the same number of affordable units will be to capture replacement units through a new project, which can be structured to provide additional affordable units. For the units at-risk of conversion between 2015 and 2017, the preservation and replacement strategy should pursue both the purchase of affordability covenants and construction of replacement units. Where feasible, the City should aim to place affordable units under management familiar with affordable housing requirements.

In this new era of financial uncertainty, loss of affordable units through the foreclosure process is now a potential threat that previously seemed unlikely. The City continues to monitor housing units in various states of foreclosure as well as all units in the affordable housing portfolio, to ensure that existing affordability covenants are protected.

REGIONAL HOUSING NEEDS

Future Need

Future housing needs refer to Pinole's "fair share" of the projected future housing need in the region in which it is located. For Pinole and other Bay Area jurisdictions, the regional housing need is determined by the Association of Bay Area Governments (ABAG), based upon an overall regional housing need number established by the State. In accordance with state law, ABAG has determined the fair share of the regional housing need that must be planned for by each Bay Area jurisdiction during the 2014 to 2022 planning period, slightly off set from the timeframe of the Housing Element.

State law also requires that the allocation of regional housing needs consider the need for housing across all income levels and "seek to reduce the concentration of lower income households in cities or counties which already have disproportionately high proportions of low income housing." That need is divided into the five income categories of housing affordability based on HCD's Area Median Income limits:

HOUSING

- Extremely Low Income: Below 30 percent AMI
- Very Low Income: 30-50 percent AMI
- Low Income: 50-80 percent AMI
- Moderate Income: 80-120 percent AMI
- Above Moderate Income: 120 percent AMI and above

Table 6.31 summarizes the regional housing needs by income level for Pinole. In addition, **Table 6.32** summarizes future regional needs for all jurisdictions in Contra Costa County. Pinole's allocation for the 2014-2022 period is 297 total units, including: 80 (27 percent) units affordable to very low income households; 48 (16 percent) units affordable to low income households; 43 (14 Percent) units affordable to moderate income households; and 126 (42 percent) units affordable to above moderate income households. Through this Housing Element, the City is required to demonstrate the availability of adequate sites to accommodate these projected new units. This requirement is further discussed in Section 4: Housing Opportunities.

Table 6.31
Pinole Regional Housing Needs (2014-2022)

Extremely Low ¹	Very Low	Low	Moderate	Above Moderate	Total
40	40	48	43	126	297
27%		16%	14%	42%	100%

Note: ¹ Assumes 50 percent of unit allocation will be for extremely low income households.

HOUSING

HOUSING CONSTRAINTS

The provision of adequate and affordable housing opportunities is an important goal of the City. However, a variety of factors can constrain the development, maintenance, and improvement of housing. This section describes these constraints, including private market forces, governmental codes and regulations, as well as the physical and natural environment, and analyzes the impact on the production and preservation of housing.

MARKET CONSTRAINTS

Land costs, construction costs, and market financing contribute to the cost of housing development and can potentially hinder the production of new housing. Median home prices and the local and regional real estate market also influence the availability and affordability of housing. Although constraints such as these are largely driven by market forces, the local jurisdiction may have some leverage in instituting policies and programs that minimize the effects of these constraints. This section analyzes constraints brought about by market forces as well as the activities that the City may undertake to mitigate their effects.

Vacant Land

Vacant land within the City of Pinole is limited. The value of potential residential land has become a substantial factor in the cost of providing housing. There is only a small quantity of vacant land and much of it is burdened with development constraints and may not be well-suited for development. Redevelopment of existing underdeveloped land may be possible, but is also a costly undertaking. Other contributors to the cost of land are allowable densities, location, site constraints, availability of community services, attractiveness of the neighborhood and any restrictions on development.

Development Costs

Construction costs in Pinole currently range between \$205 and \$240 per square foot.⁵ Actual construction costs will vary significantly based upon the quality of the materials used, the size of the unit and the lot, the location, as well as the number and quality of amenities incorporated in the design. Construction costs for an average multiple family unit are generally about 20 to 25 percent less per square foot.

A reduction in the number of amenities and quality of building materials (above a minimum threshold to ensure compliance with building codes and health and safety regulations), could result in lower prices. In addition, options such as prefabricated factory-built housing could provide for lower priced housing through reduced construction and labor costs. Construction costs are also related to the number of units built at one time; as the number increases, costs generally decrease as builders benefit from economies of scale. Developments in Pinole will likely not benefit from economies of scale due to the generally small size of parcels available for development.

⁵ Estimates based on International Code Council Building Valuation Data tables, using the rate of increase for residential construction between Feb 2009 and Feb 2014

HOUSING

Home Financing

The availability of financing directly impacts a person's ability to purchase or improve a home. During the early to mid-2000s, lenders provided an increasing number of subprime loans, and, in response to high housing costs, many lenders provided mortgages of up to 95 percent of the value of the home, rather than the traditionally allowed 80 percent. In 2006 and 2007, borrowers began to default on those loans. In 2008, lenders significantly tightened their lending standards. In 2014, lending standards remain tight. Underwriting criteria continue to be stringent and borrowers typically must have at least 20 percent of the purchase price for a down payment and must have a high credit score to obtain competitive financing. Although it is currently difficult for all but the most credit worthy borrowers to secure a mortgage loan, funds are available and mortgage rates remain low.

Table 6.33 shows the disposition of home loan applications for homes in Pinole in 2007 and 2012. As shown, 2007 had a significant larger number of loan applications for home purchase and refinancing, but with lower approval rates than in 2012. Use of government-backed financing in 2007 was limited. However, in 2012, government-backed financing (such as FHA) had almost the same level of success as conventional financing. Home improvement financing is limited. Only 61 households applied for home improvement loans in 2012, with less than half being approved.

Table 6.33
Disposition of Home Loans (2007 and 2012)

Loan Type	Total Applicants		Percent Approved		Percent Denied		Percent Other	
	2007	2012	2007	2012	2007	2012	2007	2012
Government-Backed Purchase	4	345	50.0%	73.0%	25.0%	15.1%	25.0%	11.9%
Conventional Purchase	1,265	428	60.6%	68.9%	27.8%	17.3%	11.6%	13.8%
Refinance	3,983	2,251	51.9%	64.8%	31.3%	17.9%	16.8%	17.2%
Home Improvement	559	61	55.5%	44.3%	29.2%	41.0%	15.4%	14.8%
Total	5,811	3,085	54.1%	65.9%	30.4%	18.0%	15.5%	16.1%

Source: www.lendingpatterns.com, 2014.

Federal, state, and local housing programs, particularly first-time homebuyer programs and similar mortgage assistance programs, can be a useful tool for providing help with down payment and closing costs, which can be significant obstacles to home ownership for lower income and minority groups. In 2008, Pinole revised the down payment assistance program offered through the former Redevelopment Agency and contracted with a consultant specializing in affordable housing to administer the program. Additionally, the consultant provided prospective buyers with information about assistance outside the Agency's program and educated buyers about the home purchase and ownership process. The Program had some success in helping eligible households achieve homeownership, until the Agency was dissolved and the funding was eliminated by State law in 2012.

HOUSING

Construction of a number of entitled developments in Pinole was delayed during the economic downturn, including mixed-use projects in Old Town Pinole and in the Specific Plan corridors. This was due in part to increased difficulty in obtaining construction financing as well as developers' desire to wait until both the housing and commercial markets had begun to recover.

GOVERNMENTAL CONSTRAINTS

The City of Pinole is empowered with the authority to regulate the location, timing, density, and type of residential development that occurs within the City. This authority is asserted in several ways, including land use controls, site improvement requirements, fees and exactions, permit processing procedures, and other factors that may influence the development, maintenance, and improvement of housing. While intended to protect the interests of residents, property owners and businesses, local regulations can result in potential barriers to the production of housing. Like all local jurisdictions, the City of Pinole has a number of procedures, fees, and regulations it requires any developer to follow. Additionally, like any agency, the City is also constrained by resource availability and other factors beyond its control. Below is a summary of key issues:

Resource Availability

The City of Pinole receives funding for its operations and special projects from a variety of sources, a number of which took hard hits during the recession beginning in 2007. Funding continues to be scarce. Revenue from sales tax decreased dramatically after the 2007-2008 fiscal year and had increased to 99 percent of the 2007-2008 level during the 2012-2013 fiscal year, a five-year period that saw an increase of 8 percent in the Consumer Price Index⁶. State law dissolution of the Redevelopment Agency removed tax increment as a source of funding for affordable housing. Collectively, the reduction in revenues, along with takeaways during the previous years in order to help balance the State budget, have hampered the City's ability to complete anticipated projects. As a result, the City's ability to fund housing projects is severely limited and will continue to be until other levels of government cease utilizing local government as a funding source for their financial shortfalls.

Land Use Controls

The City of Pinole sets forth policies to guide new development and the use of land within the city limits through its General Plan. These policies, in conjunction with the Three Corridors Specific Plan and Zoning Ordinance, control the amount and distribution of land allocated for different uses with the City and how this land can be developed.

The General Plan specifically identifies four residential land use designations, two single family and two multiple family, that are summarized in **Table 6.34**. Together these designations provide for a range of development densities from less than one dwelling unit per acre up to 50 dwelling units per acre. Mixed Use and Planned Development zoning have also been used to accommodate residential use throughout Pinole.

⁶ City of Pinole Comprehensive Financial Report for the Fiscal Year Ended June 30, 2013, p. 97

HOUSING

In 2010, the City completed a comprehensive Zoning Ordinance Update along with a Specific Plan for its commercial corridors, including San Pablo Avenue, Pinole Valley Road, and Appian Way. Wherever possible, these documents aim to improve the clarity with which land use regulations are conveyed. Additionally, these planning documents include a revised set of land use categories with altered permitted densities. These adopted densities are included in the analysis of Opportunity Sites discussed in Section 4 of this Element.

Table 6.34
Adopted Residential Land Use Categories

General Plan Land Use	Zoning Consistent	Density (du/acre)	Residential Types
Low Density	LDR	0.21-1/acre	Single family dwellings in areas adjacent to open space or rural area
Suburban	R-1	1.1-10/ acre	Single family dwellings in typical subdivided areas
Medium Density	R-2	10.1-20/ acre	Two and three-story family dwellings with on-site open space areas
High Density	R-3	20.1-35/acre	Two and three-story dwellings near arterials, transit or commercial areas
Very High Density	R-4	35.1-50/acre	Higher density housing and apartments and condominiums

Source: City of Pinole General Plan, Three Corridors Specific Plan, and Zoning Ordinance

Development Standards

The City's Zoning Ordinance implements the development policies set forth in the General Plan by providing greater specificity on development standards such as densities, height, parking and setbacks. As with other cities, Pinole's development standards and requirements are intended to protect the long-term health, safety and welfare of the community while implementing the goals and policies of the General Plan. **Table 6.35** summarizes the most pertinent of these standards for single and multiple family residential zoning districts.

The Zoning Ordinance also dictates what types of housing may be located in the City, and in what locations. As shown in **Table 6.35**, Pinole's zoning standards for the residential zoning districts provide for a diversity of housing types to meet the needs of all economic and special need segments of the community. The Pinole Zoning Ordinance (Section 17.48) also establishes parking standards for various types of housing and other uses in the community. These standards, shown in **Table 6.35**, are typical of other communities in the Bay Area, but can pose a problem in areas where there is the opportunity for infill development. An attempt was made to reduce this constraint on mixed-use office/commercial residential projects through the introduction of reduced parking requirements for such projects. Parking requirements for mixed-use development projects (i.e., commercial/residential) are calculated using a formula that acknowledges the parking overlap between the two uses. These types of projects typically require 25 percent less parking than single use developments. In addition, for any infill project, the City can allow shared parking so long as the parking is within 300 feet of the project. Furthermore, to encourage the development of second units, the City allows uncovered or tandem parking for all second units.

HOUSING

Table 6.35
Residential Development Standards

	Low Density Residential LDR	Suburban Residential R-1	Medium and High Density R-2	R-3	Very High Density R-4
Lot Area (sq ft) Per Unit	43,560	6,000	3,000	1,500	N/A
Improved Open Space on Lot (sq ft)	--	--	30% Minimum	30% Minimum	30% Minimum
Front Setback (ft)	20	20	0	0	0
Side Setback (ft)	10	5	5	5	5
Rear Setback (ft)	20	20	15	15	15
Maximum Height (ft)	35	35	35	35	50
On-site Parking (spaces per unit)*	Studio:1 1-4 beds:2 5+ beds:3	Studio:1 1-4 beds:2 5+ beds:3	Studio:1 1 bed:1 2+ beds:2	Studio:1 1 bed:1 2+ beds:2	Studio:1 1 bed:1 2+ beds:2

*Mixed use developments (i.e. developments combining residential land uses with commercial or industrial land uses) have a reduced parking requirement due to parking use overlaps. Additionally, R-2, R-3, and R-4 zones additionally require 0.3 spaces per dwelling unit for visitor parking.

Source: City of Pinole General Plan and Zoning Ordinance.

Table 6.36 describes housing types by permitted uses in the residential zoning districts. The City has also adopted Residential Design Guidelines to aid in development review process by communicating City expectations prior to application submission.

Table 6.36
Housing Types Permitted by Residential Zoning District

	Low Density Residential LDR	Suburban Residential R-1	Medium Density Residential R-2	High Density Residential R-3	Very High Density Residential R-4
Single Family Detached	P	P	P	P	P

HOUSING

Various housing types are also allowed in zones that are not primarily residential, including zoning districts in the Three Corridors Specific Plan. Table 6.37 shows housing types by permitted uses in the zoning districts that are not primarily residential. The Three Corridors Specific Plan includes: Residential Mixed Use (RMA), Commercial Mixed Use (CMU), and Office Industrial Mixed Use (OIMU), among other zoning districts. Table 6.37 also describes housing types that are allowed in the Rural (R) zoning district.

Table 6.37
Housing Types Permitted in Other Zoning Districts

	Rural R	Residential Mixed Use RMU	Commercial Mixed Use CMU	Office Professional Mixed Use OPMU	Office Industrial Mixed Use OIMU
Single Family Detached	P	P	N	N	N
Single family Attached	N	P	P	P	N
Multiple Family (3+)	N	P	P	N	N

Residential Care Facility (7+ beds)	N	N	N	N	N

Note: P = Permitted; CP = Conditionally Permitted; N=Not Allowed
Source: City of Pinole Zoning Code

As with many suburban communities, Pinole provides additional flexibility in density, unit size, parking, and open space requirements through its Specific Plan zoning. Specifically, Specific Plan zoning (Section 17.26 of the Pinole Municipal Code) allows flexibility to modify development standards for: (1) siting; (2) mixed land use; (3) mixed housing types; (4) minimum building setbacks and lot size; and (5) maximum building height.

Traffic capacity has become a limiting factor throughout Contra Costa County and in many other parts of the Bay Area. However, Pinole, as part of the Measure J initiative and West County Traffic Model, has developed specific standards for traffic level of service and standards for the provision of other facilities and services.

In general, Pinole's zoning and development standards are comparable to many other communities in the Bay Area and, therefore, do not pose an unnecessary constraint to housing or burden to developers.

HOUSING

Site Improvements

Site improvements are an important component of new development and include the infrastructure needed to serve the development. On-and off-site improvements are required by the City as conditions of approval to provide sewer and water service to a project site, transportation improvements, and other infrastructure. For an average project, improvements typically include curbs, gutters, and sidewalks along project frontage. More expensive improvements can become necessary when the project creates significant traffic impacts or the site includes special environmental resources, mitigation of slide hazards, inadequate downstream drainage, or other special conditions.

Specific standards are set forth in Chapter 16.20, General Regulations and Design, and Chapter 16.24, Improvements, in the City of Pinole Municipal Code. These requirements are based on standards set forth in the Contra Costa County Standard Plans. These standards establish minimum street widths and rights-of-ways, and curb, gutter, sidewalk, and grading requirements. **Table 6.38** summarizes these roadway design standards.

Table 6.38
Roadway Design Standards

Roadway Type	Right-of-Way	Curb to Curb	Sidewalk Area
Major Streets	80'	64'	8'
Secondary Streets	60'	40'	8'
Minor Streets	50'	38'	8'
One-Way Streets	32'	20'	8'

Source: Pinole Public Works Department, City of Pinole Municipal Code Chapters 16.20-16.24

Pinole's requirements are fairly standard when compared with other cities in Contra Costa County. Therefore, although it is likely that the costs for the construction of on-site and off-site improvements do have an impact on housing supply and affordability, the requirements are not excessive compared with nearby jurisdictions and are necessary to provide safe transportation access and utility system connections.

Permit Processing

Permitted Uses are those uses allowed without discretionary review, except for design review, in designated areas, as long as the project complies with all development standards, including the City's residential design guidelines. Ministerial review and approval may be granted for home additions or remodeling to accommodate the needs of persons with disabilities, provided building code and basic health and safety needs are met. This ministerial design review and plan check process expedites processing times. Design Review and Conditional Use Permits (CUP) are approved by the Planning Commission. Typical findings of the CUP include determining that the project is consistent with the General Plan, the use is compatible with surrounding uses, address basic public health and safety issues, and provide regulatory guidelines for issues such as construction, landscaping, parking, and similar requirements.

The time required to process a project varies greatly from one project to another and is directly related to application completeness, the size and complexity of the proposal, the type of

HOUSING

environmental review required, and the number of actions or approvals needed to complete the process. **Table 6.39** outlines the typical processing time for applications in the entitlement process. Knowledge of what entitlements are necessary before completing a project is necessary in order to grasp the length of time necessary to complete the planning process.

City staff conducts preliminary reviews in order to assist project sponsors at no cost to the applicant prior to application submittal. This allows staff and the prospective applicant to identify important project issues early in the development review process. Further, the City has also prepared residential design review guidelines to clarify City expectations for proposed new residential development in order to assist applicants prior to application submittal. Small residential modifications and additions are only subject to ministerial review and involve short processing time; these approvals may be issued within two weeks. A small residential construction project consistent with the General Plan and zoning designation involving a design review request is normally processed between six to eight weeks from the date of application completeness. The most complicated projects involving multiple entitlements can take longer especially if a project site includes environmental constraints resulting in significant environmental impacts. Whenever possible, the City processes all project applications concurrently in order to maximize the efficiency of processing, and save both time and cost for both the City and the developer.

Currently, every new residential project within the City is required to complete the Design Review process, either by staff administrative review or by review with a Planning Commission hearing. **Table 6.39** shows the typical permit process for multi-family and single-family development that is consistent with the City's General Plan and Zoning Ordinance and Residential Design Guidelines. The major differences between the two are the Design Review process and the type of discretionary approvals that may be required; multi-family projects in the R-3 and R-4 zones meeting the requirements set forth in the Zoning Ordinance do not require a use permit and are subject only to application completeness review, environmental review, and design review; all single-family subdivisions require tentative and final map approvals. A project that is not consistent with the City's zoning and land use regulations could require additional approvals, such as a Rezoning, General Plan Amendment, or a Variance when warranted.

The average length of time for discretionary approvals is four months for a multi-family development and five to six months for a single family subdivision. A General Plan Amendment or Rezoning could add another 30 to 60 days to the process as each require City Council approval. By their nature, larger, more complex projects impose a lengthier review process, largely due to the environmental review process. The amount of time required to complete environmental review of a project depends greatly on the size, scope, and location of the project, the environmental issues under review, and the extent of public comment received.

HOUSING

Table 6.39
Typical Permit Processing Time by Project Type*

Single Family			Multi-family		Subdivision	
Planning Application Received						
	Completeness Review	Up to 30 days	Completeness Review	Up to 30 days	Completeness Review	Up to 30 days
	Ministerial Approval (home addition)	Up to 30 days				
	Environmental Review	1 week	Environmental Review	1-12 months	Environmental Review	1-12 months
	Administrative Design Review	1 week				
Planning Commission Noticing & Hearing						
			Design Review	20-30 days	Preliminary Development Plan	6-8 weeks
			Use Permit (only if necessary)		Design Review	
					Subdivision Map	
					Final Development Plan	
City Council Hearing						
					Final Subdivision Map (consent)	20-30 days
Building Permit Process						
	Plan Check	4-6 weeks	Plan Check	4-6 weeks	Plan Check	4-6 weeks
Estimated Total Processing Time	3-4 months		4 months – 1+ year		6 months – 1+ year	

* Note: Times listed are averages based on typical submittals. Actual processing times vary greatly based on the complexity of the project and the quality and completeness of the submittal. In some instances, the Building Plan Check and the Design Review applications may be processed concurrently. Time may also be saved when a residential project is proposed so as to be consistent with an already adopted Specific Plan.

Because processing time can act as a constraint to the development of housing, procedures have been implemented to expedite processing through plan review and Planning Commission hearings. For example, City Staff encourages pre-application meetings with property owners and developers. These meetings give City Staff the opportunity to explain the permitting process, discuss submittal requirements and design standards, and complete a preliminary plan review. Staff also encourages early communication between developers and neighborhood groups on specific development applications. These procedures have been extremely successful in identifying key project issues and appropriate project modifications prior to plan

HOUSING

submittal. This reduces the amount of time it takes for both plan review and the Planning Commission hearing process.

In order to facilitate development, the City of Pinole has successfully worked to streamline the project approval process. Previously, the development review process in Pinole was made up of two connected approval processes: the Design Review Board Hearing and the Planning Commission Hearing. The Design Review Board, which was advisory to the Planning Commission and focused on architectural character and design review, was disbanded in 2008 and this function became part of the Planning Commission responsibilities. The Planning Commission is now the sole body that conducts design review based on standards set forth in the Zoning Ordinance and General Plan. Eliminating the Design Review Board has reduced permit processing times for applications. In addition, the City adopted Residential Design Review Guidelines in 2007. The design guidelines describe the City's design expectations for residential project submittals and are provided to applicants prior to application submittal or early in the submittal process to expedite review and save application processing costs for applicants.

The City continues to expedite the process for developers while ensuring a thorough review process. The Specific Plan for the City's three major transportation corridors—San Pablo Avenue, Appian Way, and Pinole Valley Road—together with the comprehensive Zoning Ordinance update provides developers with a better idea about the types of development the City is seeking and identifies opportunity sites where development is strongly encouraged. The environmental review for the Specific Plan (Program EIR) adopted in 2010 serves to streamline future site specific environmental reviews for many of the infill development areas included in the Specific Plan. The City also adopted a Green Building Ordinance in 2012 to promote the use of renewable energy, improve air and water quality, and to conserve water and other natural resources.

Development Fees

Costs associated with the permit process may act as a constraint to the development of affordable housing. Line item permit costs are related to City-controlled fees such as processing, inspection and installation services, as well as non-City fees such as school impact fees and utility connection fees. Fees can vary depending on site conditions, location and the type and design of development, the need for environmental review, the quality of project submittals, and local resident review. **Table 6.40** and

HOUSING

Table 6.41 demonstrate typical charges for development of new multiple and single-family residential developments.

A balance between increased fees and encouragement of suitable housing development is a key issue for the City. In the case of affordable housing, the Redevelopment Agency can use its Housing Set Aside funds to help offset the cost of City-controlled fees.

HOUSING

Table 6.40
Estimate of Development Fees for 10-Unit Multi-Family Development

Planning Fees		Per Development	Fee Amount
Design Review Fees (New Commercial, > 5,000 sf)	Flat		\$4,217.00
		Subtotal	\$4,217.00
Plan Check, Permit & Inspection Fees		Per Unit	Fee Amount
Building Permit Fee	Based on valuation of \$184,226/unit.	\$4,403.00	\$44,030.00
Building Plan Check Fee	65% of bldng permit fee	2,861.95.	28,621.90

Open Space Contributions

Open space contributions are standard conditions of approval for larger projects to assure the long-term livability, health, safety and welfare of the project and neighborhood. Planned Development (PD) zoning has been used to preserve open space while allowing increased density on the developed portion of the property. As implemented in past approvals, this requirement does not usually pose a constraint to housing and often acts as a way for a project to gain neighborhood acceptance.

HOUSING

Inclusionary Housing Requirements

Pinole's Zoning Ordinance (Chapter 17.32) stipulates that, for all rental or ownership developments of four or more units, 15 percent of the total units must be constructed and offered for sale or rent as affordable housing units. Of those units, no less than 40 percent (or 6 percent of the total) must be made available to very low-income households.

This requirement is effective in increasing the supply of affordable housing but can act as a constraint in the development of market rate housing projects and in particular smaller, infill projects. Without redevelopment funds, inclusionary housing is one of the few mechanisms for the City to provide affordable housing opportunities. The City will continue to explore incentives such as lower cost financing, construction of off-site units and other improvements, or housing in-lieu fees to facilitate affordable housing development in the community.

Uniform Building Code and Enforcement

Pinole uses several uniform codes, including the 2013 California Building Code (CBC), the 2013 California Electrical Code (CEC), the 2013 California Plumbing Code (CPC), the 2013 California Mechanical Code (CMC), and the 2013 California Fire Code, as the basis for its building standards and code enforcement procedures. Each of these codes establishes standards and requires inspections at various stages of construction to ensure code compliance.

Enforcement of these building codes and standards does not constrain the production or improvement of housing in the City. Rather, code enforcement efforts help to maintain the condition of the City's current housing stock and remove blight throughout the City.

Governmental Constraints on Housing for Persons with Disabilities

As noted in the Special Needs Section of the Housing Needs Assessment, persons with disabilities often have specialized housing needs. These may be related to accessibility of dwelling units; access to transportation, employment, and commercial services; and alternative living arrangements that include on-site or nearby supportive services. This section analyzes potential and actual governmental constraints on the development of housing for persons with disabilities, including developmental disabilities, and demonstrates the City's effort to remove such constraints.

Pinole's Zoning Code now includes specific provisions (17.12.050) to facilitate reasonable accommodation for individuals with disabilities. When a request for reasonable accommodation is filed with the Community Development Director, it will be reviewed and considered as a ministerial action unless determined otherwise by the Community Development Director. A request for reasonable accommodation shall be considered ministerial in nature when it is related to a physical improvement that cannot be constructed to conform to the city's setbacks or design standards. Typical improvements considered to be "ministerial" in nature would include ramps, walls, handrails, or other physical improvements necessary to accommodate a person's disability. The Community Development Director shall issue a written determination of his or her action within thirty days of the date of receipt. If the Community Development Director determines that the request is non-ministerial, he or she will refer it to the Planning Commission, which will hold a public hearing to consider the request.

HOUSING

Efforts to Remove Regulatory Constraints for Persons with Disabilities

The State has removed any City discretion for review of small group homes for persons with disabilities (six or fewer residents). The City does not impose additional zoning, building code, or permitting procedures other than those allowed by state law. There are no City initiated constraints on housing for persons with disabilities caused or controlled by the City.

The City reviews all proposed development applications for ADA compliance and, through the plan check process, works to ensure that all ADA standards are met. The City ensures that new housing developments comply with California building standards (Title 24 of the California Code of Regulations) and federal requirements for accessibility. The City meets the requirements of the Uniform Building Code, the Americans with Disabilities Act, and the California Community Care Facilities Act.

Zoning and Other Land Use Regulations

As defined in 17.98 of the Municipal Code, the City's Zoning Ordinance provides a broadened definition of family as a household that includes occupancy standards specific to unrelated adults residing as a single housekeeping unit, as is common in small group homes for persons with disabilities. In addition, the Zoning Ordinance allows for reduced parking requirements for housing for persons with disabilities (17.48.060). With the exception of monitoring compliance with building code requirements, which are also governed by the state, the City has no authority to approve or deny group homes of six or fewer people. The City does not restrict occupancy of unrelated individuals in group homes, and, in permitted zones, permits housing for special needs groups without regard to distances between such uses or the total number of uses in the City.

Governmental Constraints on Emergency Shelters and Transitional Housing

California Health and Safety Code Section 50801 defines emergency shelters as "housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay."

Pursuant to recent changes in State law (SB 2), jurisdictions with an unmet need for emergency shelters are now required to identify a zone(s) where emergency shelters will be allowed as a permitted use without a conditional use permit. The identified zone must have sufficient capacity to accommodate the shelter need, and, at a minimum, provide capacity for at least one year-round shelter. Permit processing, development, and management standards for emergency shelters must be objective and facilitate their development.

As discussed in the homeless section of the Housing Element Needs Assessment (Section 2), the City of Pinole Police Department estimates the City's visible homeless population at around six individuals. However, a homeless count conducted by the Contra Costa Health Services Department on January 30, 2013 found 20 unsheltered homeless people in Pinole. While there are a number of homeless shelters and services proximate to the City (see **Table 6.22** for a complete listing), there is currently no emergency shelter in Pinole to address the needs of homeless adults and families.

HOUSING

Pursuant to SB 2, the City of Pinole permits emergency shelters by right in the Three Corridors Specific Plan Office Industrial Mixed Use Zone. The zone encompasses Pinole's primary manufacturing and light industrial uses, which tend not to be "heavy" in nature. This area allows for the following types of uses: manufacturing and industrial uses, particularly "green industry," including automobile and truck repair, auto sales, building materials, nurseries, contractor's storage yards, wholesaling, warehousing, light manufacturing, and research and development industries as well as limited office, retail, and residential uses.

The Office Industrial Mixed Use Zone is located along the north side San Pablo Avenue and stretches from just west of Sunnyview Drive to just east of Belmont Way. Parcels within this zone are serviced by transit (bus service) and are centrally located between the Old Town and regional shopping areas proximate to Interstate-80. Elementary, junior, and high schools are located within two miles of this area.

The Zoning Ordinance permits emergency shelters by right in the Office Industrial Mixed Use Zone subject to the same development and management standards as other permitted uses in the zone. In addition, the following requirements regulate future emergency shelters to enhance compatibility (Chapter 17.62):

- Shelter programs shall be situated more than 200 feet from any other similar program, a public park, a public or private K-12 school, or an indoor or outdoor recreational facility primarily designed to serve persons under eighteen years of age. A shelter with more than ten persons shall be situated within one-half mile of a transit corridor or existing bus route;
- A maximum of 30 beds shall be available in the facility, unless a conditional use permit is approved for a greater number;
- The size of an emergency shelter shall be in character with the surrounding neighborhood;
- Off-street parking shall be provided at the rate of one space per three beds plus one space per employee, and may only be required based on demonstrated need, provided that the same parking requirements are applied for other residential or commercial uses in the same zone;
- The emergency shelter shall have an interior, onsite waiting and client intake area that is a minimum of 200 square feet. The emergency shelter shall include a landscaped exterior waiting area that is a minimum of 100 square feet;
- Emergency shelters shall provide on-site management and support staff at all times during shelter use;
- Emergency shelters must have on-site security during the hours that the shelter is in operation;
- The program shall provide accommodations appropriate for a minimum stay of 28 days and a maximum of 180 days per client/family;
- Exterior lighting shall be consistent with Zoning Code requirements;

HOUSING

- Appropriate state and/or federal licensing shall be required for a drug or alcohol abuse counseling program;
- The program shall identify a transportation system that will provide clients with a reasonable level of mobility.

Transitional housing facilities for ten or fewer residents may be located in any portion of the city zoned for residential development, subject to the same development and management standards as other permitted uses in the zone. Facilities for more than ten residents are not allowed in the Low Density Residential (LDR) or Rural (R) Zoning Districts. In the Medium Density (R-2), High Density (R-3), Residential Mixed Use (RMU) and Commercial Mixed Use (CMU) Zoning Districts, a conditional use permit is required for facilities having more than ten residents (Zoning Code Chapter 17.20). The maximum number of beds in zones that allow transitional housing shall be thirty, unless a conditional use permit is approved. In addition, the following requirements regulate future transitional housing facilities to enhance compatibility (Zoning Code Chapter 17.62):

- Transitional housing facilities of more than ten persons shall be situated within one-half mile of a transit corridor or existing bus route;
- The size of a transitional housing facility shall be in character with the surrounding neighborhood;
- The transitional housing facility shall have on-site parking provided at the rate of one space per three beds plus one place per employee, based on demonstrated need, provided that the same requirements applied are those for residential or commercial uses within the same zone;
- Exterior lighting shall be consistent with Zoning Code requirements;
- If a transitional facility is proposed for location in an area either zoned or developed as a residential area, all intake and screening shall be conducted off-site;
- If a program includes a drug or alcohol abuse counseling component, appropriate state and/or federal licensing shall be required;
- The program shall provide accommodations appropriate for a minimum of 28 days and a maximum of 180 days per client/family;
- The program shall identify a transportation system that will provide its clients with a reasonable level of mobility;
- Transitional housing facilities shall provide on-site management and support staff at all times during shelter use.

HOUSING

HOUSING OPPORTUNITIES

ABILITY TO MEET THE REGIONAL HOUSING NEEDS ALLOCATION (RHNA)

The RHNA planning period for the fifth Housing Element cycle is from 2014 through 2022. The RHNA for Pinole for this cycle includes 297 housing units. Housing units with building permits that were issued after January 1, 2014, may be counted towards satisfying Pinole's current regional housing need numbers.

To show the development capacity to meet the RHNA of 297 units, a detailed analysis of sites suitable for residential development was conducted. This section provides information about the sites identified in this Housing Element. In addition to credits from units that have been built and approved and existing vacant sites currently zoned for residential development, the City has identified housing opportunity sites located within the districts covered by the Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way, which was adopted in 2010. These sites are located along the City's main commercial and transportation corridors and are good candidates for higher density mixed use and residential infill development. Together, the identified vacant and housing opportunity sites can yield nearly 500 new housing units, meeting and exceeding the City's RHNA.

HOUSING UNITS CONSTRUCTED OR APPROVED

As shown in **Table 6.42**, no units have been built in the City since January 2014. Three market rate units are proposed.

Table 6.42
RHNA by Income Level

Project	Extremely Low/ Very Low	Low	Moderate	Above Moderate	Total
RHNA	80	48	43	126	297

Note: Pursuant to State law, the very low income category can be split equally into very low income and extremely low income.

AVAILABILITY OF SITES FOR HOUSING

The City has developed an inventory of vacant and non-vacant sites that are suitable for future residential development. This land inventory was developed using a number of sources, including the City's GIS database, Assessor's data, and field surveys completed by City Staff. The analysis includes a listing of individual sites by general plan designation and zone as well as site size, infrastructure capacity, constraints, and a conservative estimate of development capacity. Vacant land available for residential development is primarily located on individual parcels designated for single family development throughout the City; housing opportunity sites are located along the City's commercial corridors of San Pablo Avenue, Pinole Valley Road, and Appian Way.

Currently in Pinole there are a total of 31.84 vacant acres zoned for residential use with an estimated dwelling unit potential of 71 units (**Table 6.43**). The majority of the vacant sites are

HOUSING

designated Single Family Suburban Rural or Single Family Low Density in the Land Use Element and are infill lots of one acre or less. Pinole's supply of residentially zoned sites is not adequate to meet the remaining Regional Housing Needs Allocation (RHNA) of 297 units: 80 units for extremely low/very low households, 48 units for low households, 43 units for moderate households, and 126 units for above moderate households. Although housing starts are down in the Bay Area, and projections indicate that they will remain depressed into the near future, the City does need to continue to plan for housing development to meet its RHNA targets.

Due to the City's small supply developable vacant land zoned for residential use, the primary opportunities are sites designated for mixed and multiple family use in the Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way. These sites will accommodate a greater number of units per acre and are generally better suited for affordable housing. Pinole's past mixed-use projects, having met with great success and community wide acceptance, create a favorable environment that would encourage future development of similar type projects. Mixed-use development is further encouraged in the draft Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way. This planning document, adopted in 2010, identifies opportunity sites for infill mixed use development along the City's commercial corridors in close proximity to transit and other amenities.

To minimize any potential barriers that may have existed due to Zoning Ordinance standards for parcels on which densities of at least 25 units per acre were allowed, the City completed a comprehensive General Plan update and Zoning Ordinance Update in 2010. These efforts ensured consistency between the General Plan and Zoning designations.

Adoption in 2010 of the Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way increased densities on sites to comply with the standards set forth in Government Code Section 65583.2(c)(3)(B) that designate a minimum density of 20 units per acre for housing for lower income households in a suburban jurisdiction such as Pinole. Potential actions to allocate sites to meet State requirements for lower income sites are also addressed in this section.

Sites designated for potential housing development in the Housing Sites Inventory (**Table 6.44**), are analyzed based on their development potential. Along with site size, location, General Plan designation, zoning, and current use, the analysis includes an additional constraints category. Site constraints range from little or none to major constraints that may severely reduce development potential at a site. The constraints categories consider the following in their analysis:

Site Constraints: A severely constrained subject site may feature extensive constraints that must be addressed in order to develop housing. These may include topographic issues such as steep hillsides, sensitive environmental or biological resources, slope stability concerns, Brownfield contamination concerns, and/or requiring consolidation of more than two parcels under different ownership to assemble the site as proposed. A less constrained site may display many of the same issues to a lesser degree. Typical minor constraints that must be addressed in order to develop or redevelop site for housing may include demolition of existing underutilized or deteriorating structures,

HOUSING

and/or consolidation of two or less parcels under different ownership to assemble the site.

Little or No Constraints: A site that features little or no constraints generally has few issues impeding its development. Such sites are typically vacant and relatively flat with no known contamination, ready utility and roadway access, and single site ownership.

The following Housing Sites Inventory includes a site identification number which corresponds to the maps in Figures 1A and 1B, with APN, size, zoning and general plan designation, existing use, potential housing capacity, and potential site constraints.

24	402-021-012	5.85	LDR	1-10	R1	Min lot size	6	Vacant	No	Little/No		

⁷ Note: Density for R1, LDR vacant sites is based on minimum lot size. The minimum site area is 6,000 square feet for a single-family dwelling on a Suburban Residential R-1 Zoned lot. The minimum lot area is 43,560 square feet for Low Density Residential (LDR). Sites 29, 30, and 31 are smaller than the min. lot size, but are typical of the neighborhoods in which they are located and, with Planning approval, could accommodate a single family residence.

⁸ Zoning designations and dwelling unit capacities under Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way. Very High Density Residential (VHDR) zones allow up to 100% of site acreage to be developed as residential with 35.1 dwelling units per acre (DUAC). Site Unit Potential for VHDR computed as 35 DUAC for 100% of site area. Commercial Mixed Use (CMU) zones allow up to 50% of site acreage to be developed as residential with 20.1 to 35 dwelling units per acre (DUAC) Site Unit Potential for CMU computed as 20.1 DUAC for 50% of site area. Residential Mixed Use (RMU) zones allow up to 100% of site acreage to be developed as residential with 20.1 to 35 dwelling units per acre (DUAC). Site Unit Potential for RMU computed as 20.1 DUAC for 100% of site area. RMU unit potential does not count towards meeting RHNA at the very low- and low-income levels. High Density Residential (HDR) zones allow up to 100% of site acreage to be developed as residential with 20.1 to 35 dwelling units per acre (DUAC). Site Unit Potential for HDR computed as 20.1 DUAC for 100% of site area. Office Professional Mixed Use (OPMU) allow up to 50% of site acreage to be developed as residential with 20.1 to 30 dwelling units per acre (DUAC). Site Unit Potential for OPMU computed as 20 DUAC for 50% of site area.

HOUSING

Additional Sites Analysis

In addition to vacant sites that are designated for residential development, the inventory identifies a number of sites included in the Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way. To show the potential for residential development to meet the remaining RHNA, a site by site inventory and analysis of the most suitable sites for development in Pinole was conducted (Table 6.44 above). This section provides detailed information about the Corridor Specific Plan Housing Opportunity sites identified in this Housing Element (Table 6.44).

Consistent with the goals and policies identified in this Housing Element, the Corridor Specific Plan is tailored to foster livable pedestrian and transit-oriented corridors. These sites were identified as suitable based on location, expressed interest in redevelopment by property owners and developers, intensity of existing development, access to utilities, and public services as well as the condition of the existing buildings and uses. The density of the identified sites is designed to facilitate the development of housing affordable to lower-income households.

Corridor Specific Plan Opportunity Sites

All of the sites identified in the inventory of sites are located within one of the City's three commercial corridors and are included in the Corridor Specific Plan. The Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way, which was adopted in 2010, provides for the expansion of housing options in Pinole by encouraging compact, pedestrian and transit-oriented mixed use and high density residential development along the commercial corridors.

Appian Way Proposed Corridor Specific Plan Opportunity Sites

- **Site 33:** Site 33 is located within the Appian Way Corridor at the intersection of Appian Way and Tara Hills Drive near the Appian Way interchange along Interstate 80. The site is home to a commercial shopping center featuring grocery and pharmacy anchor tenants as well as a number of neighborhood serving commercial uses, including banking, retail, and food establishments. The center was developed in the 1960s and consistent with development patterns popular at that time, features extensive surface parking, and some of the buildings onsite are beginning to show signs of age. A few portions of the site remain undeveloped. Given the location and the current development intensity at the site, the City estimates a potential for at least 125 new residential units at this site. Although the site is comprised of fifteen separate parcels, the majority of the property is under a single ownership.
- **Site 34:** Site 34 is located within the Appian Way Corridor at Canyon Drive. The site was developed for medical use in 1962 and is the former home of Doctors Hospital. The site is currently without a tenant. Surface parking covers approximately one third of the site. The Corridor Specific Plan anticipates the site for commercial and residential mixed use development with an estimated capacity for at least 113 new residential units at the site.

HOUSING

Pinole Valley Road Proposed Corridor Specific Plan Opportunity Sites

- **Site 35:** Site 35 is located within the Pinole Valley Road Corridor along Pinole Valley Road near the Pinole Valley High School. The site is just south of the recently revitalized Pinole Valley Shopping Center and directly across from a small commercial center. The site is currently home to a church. With only two small structures on the parcel, site coverage is approximately five percent. The site backs to three story attached residential development, making this a good candidate site for higher density mixed use development. The City estimates a conservative residential development capacity of at least 35 new housing units at the site.

San Pablo Avenue Proposed Corridor Specific Plan Opportunity Sites

- **Site 38:** Site 38 is located along the San Pablo Avenue Corridor, just west of Old Town Pinole. The site is designated for Very High Density Residential development in the Corridor Specific Plan. Each of the six parcels that make up the site is currently under separate ownership and the site features a wide range of uses. These uses are detailed by parcel in Table 38 and include an office building, vacant and storage lots, and single family homes in various states of repair. The site's location along San Pablo Avenue makes it a prime candidate for redevelopment, and the lot consolidation incentives described in this Housing Element may be utilized to assist in the process. The site provides development opportunity for at least 146 new residential units.

Table 6.45 summarizes the combined development potential of the vacant land zoned for residential development alongside the development potential of the Specific Plan sites proposed to be rezoned for high density residential and mixed use with the adoption of the draft Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way. Taken together, these sites have more than adequate development potential to accommodate housing to meet the RHNA needs. The 196-unit development capacity surplus further demonstrates the City's commitment to provide adequate sites for residential development, and a commitment to plan for future residential development; allocating a surplus of sites will help encourage development should market or private developer conditions make development of one or more of the identified sites infeasible by 2022.

HOUSING

Specific Plan Residential Capacity¹	108		38	273	419
Surplus Capacity					196

1. All Corridor Specific Plan Housing Opportunity Sites are zoned to allow densities of 20 or more dwelling units per acre, and, therefore, can meet the needs of all affordability groups as prescribed by State law. Therefore, the units are distributed across the income levels based on the remaining need, with the excess allocated to "above moderate."

Figure 1A (map of Pinole north of Interstate 80) and **1B** (map of Pinole south of Interstate 80) map the locations of the Vacant Residential and proposed Residential Opportunity Sites; specific sites may be referenced via the number in the "Site Identifier" for each site.

Housing Sites South of Interstate-80**

HOUSING

CURRENT HOUSING PROJECTS

The City currently has two active planning applications for residential projects yet to be approved. As mentioned elsewhere in this Element, the economic downturn and credit crisis has significantly impacted housing development projects.

INFRASTRUCTURE

All vacant or underutilized land currently available for development in the City of Pinole has the infrastructure necessary for development.

Water Sewer Gas Electric & Phone Service

East Bay Municipal Utility District (EBMUD) provides water service and the Pinole Sewer District and West County Wastewater Sewer District provide sewage services to the City. Currently there is adequate capacity available within EBMUD and both sewer districts to handle all future development within the Pinole Planning Area. The installed lines that provide gas distribution, electric circuit and telephone service are also adequate to handle all future development within the Pinole Planning Area.

Solid Waste

Richmond Sanitary Service provides solid waste disposal. Although West Contra Costa County landfill recently reached its capacity level, the Keller Canyon landfill will continue to meet the needs of the current residents of Pinole as well as any anticipated future growth during the current planning period.

Public Schools

Schools within the Pinole Planning Area previously served part of the Hercules' school population, and thus Pinole schools were operating above capacity for all grade levels. To help alleviate this situation, an elementary and combined middle and high school were constructed in Hercules. The opening of these schools provided for additional capacity in the Pinole schools that will allow for growth resulting from future development in the Pinole Planning Area.

Fire Protection

The City of Pinole provides fire protection for all but a small portion of the Pinole Planning Area located in the vicinity of EBMUD's reservoir off Rancho Road. The City's two fire stations currently allow for a 5-minute response time to any location in the City.

Police Protection

The number of sworn personnel is 27 and is within the accepted 1 per 1,000 population. With the development of the remaining land within the City, the demand for personnel will increase. The cost of providing additional personnel could affect the cost of new housing in the form of increased fees or special assessments.

HOUSING

FINANCIAL RESOURCES

There are a wide variety of resources provided through federal, state and local programs to support affordable housing development and related programs and services. While the number and variety of programs is considerable, it is essential to note that *the availability of funding through these programs is inadequate compared to the need that exists*. As a result, there is considerable competition for the program funds that are available, and development projects will need to draw upon multiple resources to be financially feasible. Local government resources, which have historically played a less important role in supporting housing development, now play a fairly significant role by making local developments more competitive for federal and state financing.

When developments are able to demonstrate a financial commitment and contribution from local sources—especially if coupled with regulatory support through policies such as fast track processing, fee subsidies, and/or density bonuses—they are better able to leverage funding from other “outside” sources. Additionally, all funding sources require separate reporting and data collection. When multiple funding sources are used, as is most often the case, additional burdens are placed on developers to track the information required and report on a timely basis.

Federal Resources

Federal housing assistance takes many forms. The single largest (and often least recognized) federal program is the mortgage interest tax deduction. This federal assistance was primarily used to maintain and operate the existing supply of affordable housing. Outlays for new construction were considerably lower.

California localities receive federal subsidies for affordable housing through a number of programs. Federal programs often change in terms of program details, application procedures, and amount of subsidy dollars available. For detailed descriptions, current subsidy levels, and up-to-date application procedures, refer to program literature available on-line from the US Department of Housing and Urban Development (<http://www.hud.gov>).

State Resources

State agencies play an important role in providing housing assistance by allocating federal housing funds and/or making loans available to affordable housing developments. The three principal agencies involved are the State Treasurer's Office, the California Housing Finance Agency (CalHFA), and the California Department of Housing and Community Development (HCD).

Programs for housing assistance change frequently and detailed descriptions of programs, application procedures and amounts of subsidy available are provided by the concerned agencies.

Local Resources

As noted in the introduction to this section, local government resources have historically played a less important role in supporting housing development, but local funding has become more crucial if projects are to be competitive for limited federal and state financing. When

HOUSING

developments are able to demonstrate a financial commitment and contribution from local sources, they are better able to leverage funding from other outside sources.

OPPORTUNITIES FOR ENERGY CONSERVATION

Since the deregulation of energy companies in 1998, the price of energy has skyrocketed, making energy costs an often substantial portion of housing costs. Effective energy conservation measures built into or added to existing housing can help residents manage their housing costs over time and keep lower income households affordably housed.

Homes built after 1975 use about half as much energy as homes built before then as a result of stricter California energy conservation standards. Minimizing energy used for space and water heating as well as air conditioning can significantly increase the affordability of housing. Most residential structures can be retrofitted with conservation measures that provide nearly the energy savings achieved in recent new construction. Many can also be retrofitted with passive design measures, such as the addition of a solarium or south-facing windows in conjunction with a heat storage mass.

Conservation can also be achieved through a number of cost-effective energy saving programs offered through local energy providers (PG&E), the State of California, and the federal government. For example, PG&E offers the "Energy Partners" program that provides income-qualified customers an energy audit and free energy education, weatherization measures and energy-efficient appliances to reduce gas and electric usage. In addition, State and federal appliance standards now require manufacturers to produce and sell appliances according to specified energy-consumption performance criteria, and the Energy Crisis Intervention Program, funded by the State Department of Economic Opportunity, helps low income residents pay delinquent energy bills to avoid interruption of service.

The City itself has promoted energy conservation by making information regarding energy conservation available to the public. In addition, the guidelines for the Agency's Residential Rehabilitation Program were changed to allow funding to be used for energy conservation improvements. The City is also exploring and encouraging energy efficiency through goal 5 of this Housing Element, Energy-Efficiency, Conservation, and Sustainable Residential Development and related Housing Implementation Programs HIA-25 through HIP-26. Finally, the City is already encouraging energy conservation in new and existing buildings through:

- (1) Application of State residential building standards that establish energy performance criteria for new residential buildings (Title 24 of the California Administrative Code); and
- (2) Appropriate land use policies and development standards that reduce energy consumption, such as promoting more compact, walkable neighborhoods with housing close to transit, jobs, community facilities and shopping; encouraging infill development; planning and zoning for multi-use and higher density development; permitting common walls and cluster development; and promoting passive and active solar design elements and systems in new and rehabilitated housing.

HOUSING

Through these and other conservation measures the City seeks to help minimize the percentage of household income that must be dedicated to energy costs as well as the use of nonrenewable resources.

Section 5: Housing Accomplishments

The City of Pinole's current Housing Element was adopted in 2010. The 2009-2014 Housing Element goals were identified as follows:

- **MONITOR HOUSING NEEDS:** Work together with interested parties to achieve the City's housing goals and monitor accomplishments in order to respond to housing needs effectively over time.
- **PROTECT EXISTING CHARACTER AND HERITAGE:** Protect and enhance the integrity and distinctive character and heritage of Pinole by encouraging the development of high quality, well-designed housing and conserving existing housing.
- **PROVIDE ADEQUATE SERVICES AND FACILITIES:** Provide adequate services and facilities to meet the needs of the City's current and future population.
- **HOUSING NEED:** Within the context of retaining existing community character and providing adequate services and facilities, maintain the current social diversity that exists in Pinole by providing a mix of housing types and prices that meet the City's fair share of regional housing needs and its specific housing needs as identified in the Housing Element.
- **ENERGY-EFFICIENCY, CONSERVATION, AND SUSTAINABLE RESIDENTIAL DEVELOPMENT:** Support energy-efficient design and building practices in order to reduce housing utility expenses, minimize adverse environmental impacts, and provide for sustainability.

Each of these goals featured a series of policies and identified implementation plans that outlined how the goals would be accomplished. The progress achieved through the implementation programs provides evidence that the goals and policies of the element have been effective in addressing Pinole's housing needs and have provided a foundation for several community-based housing activities. In addition, having the housing element in place provided the City additional leverage to capture funding from outside sources to further its housing goals.

PROGRAM ACCOMPLISHMENTS: PRODUCTION OF HOUSING & AFFORDABLE HOUSING

A total of 72 housing units were created in Pinole between 2007 and 2014. Of these, 13 units were sold or covenanted and rented as affordable to very low, low, or moderate income households. These units represent the City's commitment to ensuring that at least 15 percent of the units in each development of four or more units are affordable with covenants restricting and ensuring their affordability.

Until February 2012, the City's Redevelopment Agency played a critical role in the production of Pinole's affordable units, providing various financial incentives to both private and non-profit

HOUSING

developers. These incentives included loans, grants, short-term financing, public-private partnerships and land write-downs.

EVALUATION & EFFECTIVENESS OF ELEMENT

The review and evaluation of the previous Housing Element found that the 2009-2014 goals continue to remain appropriate. These goals carry forward in this Housing Element. **Appendix B** includes a complete evaluation of the 2009-2014 Housing Element Implementation Programs. As outlined in **Appendix B**, the progress made through the 2009-2014 Housing Element Implementation Programs was found to be effective to the extent possible with tightly constrained funding resources, and remaining tasks continue to be relevant goals that the City will continue to work toward meeting. In addition, the evaluation identifies areas that could be better addressed through new policies and programs, which are incorporated in Section 6, Quantified Housing Objectives and Housing Plan, of this Element. Therefore, the majority of policies and implementation programs are carried forward in the updated Housing Element.

HOUSING

QUANTIFIED HOUSING OBJECTIVES & HOUSING PLAN

QUANTIFIED HOUSING OBJECTIVES

This Housing Element includes quantified objectives for the number of units that can reasonably be expected to be rehabilitated, conserved or constructed during the next eight years. The quantified objectives expected to be met through Housing Element programs are estimated based on past program performance, construction trends, land availability and anticipated future program funding. These objectives reflect current economic conditions and funding constraints. Assumptions for specific programs are summarized in the Housing Programs section under each program.

Table 6.46
Summary of Quantified Objectives (2015-2023)

	Extremely Low	Very Low	Low	Moderate	Above Moderate	Total
Units to be Constructed ¹	2	5	5	20	48	80
Units to be Rehabilitated	10	10	10	20	--	50
Units to be Conserved	--	24	4	85	--	113

1. Estimated new construction objectives are based on past trends.

HOUSING PLAN

The primary challenge of the Housing Element is to properly manage local housing needs while ensuring that new housing will “fit-in” with the character, quality, environmental constraints, and resources of the community. Questions to help with this assessment include:

- **What Kind of Housing Do We Need?** What types of housing fit with our workforce housing needs, household characteristics, and a ability to pay for housing?
- **Where Can We Appropriately Put New Housing?** Where in our city can additional residential units be accommodated, especially for lower and moderate income households, housing for persons with special needs?
- **How Can We Effectively Work Together?** What can local governments do – in collaboration with community organizations, other agencies, non-profits, and for-profit developers – to encourage the construction of needed workforce and special needs housing?
- **How Can We Effectively Help Special Needs Groups?** What can be done to assist those households with special needs such as the elderly, homeless, persons with disabilities, and others?

This section sets forth a framework for implementing the Housing Element. There are many external factors affecting housing needs in Pinole and the City’s ability to meet that need. Balanced with these housing needs is the challenge of (1) meeting our allocation of regional housing needs; (2) finding appropriate sites for housing when there is a limited amount of developable land in Pinole that is suitable for housing, especially for multiple family housing; (3) ensuring a “fit” of new housing with our long-standing commitment to maintain community

HOUSING

character and environmental quality; and, (4) working with limited funding resources to facilitate the provision of affordable housing.

In recognition of the aforementioned conditions and challenges, this Housing Element includes goals, policies, and implementing programs that identify the housing goals the City will try to achieve, both alone and in partnership with other agencies, and how the City will work to achieve them.

GOALS, POLICIES, AND ACTIONS

GOAL H.1 MONITOR HOUSING NEEDS.

Work together with interested parties to achieve the City's housing goals and monitor accomplishments in order to respond to housing needs effectively over time.

POLICY H.1.1 MAINTAIN ACTIVE CITY LEADERSHIP. Provide an active leadership role in helping attain the objectives of the City's Housing Element by following through on the actions prescribed in the Housing Element in a timely manner and monitoring progress annually.

POLICY H.1.2 ASSURE PUBLIC PARTICIPATION. Encourage and support early public participation in the development and review of City housing policy from all economic segments of the community, including encouraging neighborhood level planning and working with community group and other interest groups. Encourage developers of any major project to have neighborhood meetings with residents early in the process to undertake early problem solving and facilitate more informed, faster and constructive development review.

POLICY H.1.3 COORDINATE WITH WEST COUNTY JURISDICTIONS. Work cooperatively to plan for the satisfaction of regional housing needs, including the development of affordable housing units for all economic segments.

ACTION H.1.1 CONDUCT AN ANNUAL HOUSING ELEMENT REVIEW. Provide for annual review of the Housing Element, with opportunities for public input and discussion, in conjunction with State requirements for a written review by April 1 of each year (per Government Code Section 65583(3)). As part of the Annual Housing Element Review, the City will conduct a General Plan internal consistency review.

TARGET: Ongoing (annually)

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Departmental budget

ACTION H.1.2 EXPLORE HOUSING DEVELOPMENT PARTNERSHIPS. The City shall seek out opportunities to work with other public agencies by identifying housing grant funding opportunities to encourage and implement improvements and expansion of housing supply, and work with developers by creating a

HOUSING

developer interest list and periodically assessing development needs to encourage new residential development to provide affordable housing.

TARGET: Ongoing

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Departmental budget

ACTION H.1.3.

PERIODICALLY REVIEW RESIDENTIAL DEVELOPMENT REQUIREMENTS.

Monitor development standards to ensure their appropriateness in fostering residential and mixed use development.

- For key housing opportunity sites, provide development standards and design objectives to streamline the development review process for projects that are consistent with applicable Specific Plans and the General Plan.
- Provision of clear guidelines and incentives for the development of housing in conformance with current state laws and to identify specific ways to streamline processing for subsequent development proposals.

TARGET: Ongoing (as necessary)

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Departmental budget

GOAL H.2

PROTECT EXISTING CHARACTER AND HERITAGE.

Protect and enhance the integrity and distinctive character and heritage of Pinole encouraging the development of high-quality, well-designed housing and conserving existing housing.

POLICY H.2.1

PROTECT NEIGHBORHOOD INTEGRITY THROUGH DESIGN.

Enhance neighborhood identity and sense of community by designing new housing to have a sensitive transition of scale and compatibility in form with the surrounding neighborhood.

POLICY H.2.2

ENCOURAGE SENSITIVITY TO NATURAL FEATURES.

Define and implement design controls for development which respond to the community's preservation, image, and open space goals. Continue review of residential development, especially in areas of seismic, geologic, slope stability, flooding concern or proximity to underground pipelines, to address safety concerns related to natural features.

POLICY H.2.3

PROMOTE HIGH QUALITY DESIGN.

Provide stable, safe, and attractive neighborhoods through high quality architecture, site planning, and amenities that: (1) reduce the perception of bulk; (2) recognize existing street patterns; (3) enhance the sense of place; (4) minimize the visual impact of parking and garages; and (5) use quality building materials.

POLICY H.2.4

MAINTAIN EXISTING HOUSING AND NEIGHBORHOOD AMENITIES.

Maintain Pinole's lifestyle characteristics by encouraging the maintenance of existing

HOUSING

housing stock, and in particular housing with historic value, and preserving the amenities of existing neighborhoods.

POLICY H.2.5

SUPPORT SENIORS AND INDIVIDUALS WITH SPECIAL NEEDS. Develop programs to assist lower income seniors and disabled individuals to live independently, age in place, and maintain their homes.

ACTION H.2.1

APPLY DESIGN REVIEW GUIDELINES. Apply the Zoning Ordinance Residential Design Guidelines to new residential projects in order to evaluate projects in the context of existing neighborhoods and continue to maintain an objective process that clearly communicates community expectations in the Design Review process.

TARGET: Ongoing

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Departmental budget

ACTION H.2.2

ADEQUATE SITES TO MEET REGIONAL FAIR SHARE OF HOUSING GROWTH. The City shall provide for a variety of housing types with densities ranging from one to seven units per acre in low-density residential areas and up to fifty dwelling units per acre in very high density residential and mixed use areas along portions of the City's transportation corridors included in the proposed Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way, with the incorporation of density bonuses available consistent with State law.

In support of this Housing Element, the City developed a parcel-specific inventory of sites suitable for future residential development, including vacant sites currently designated under the City's General Plan and housing opportunity sites designated in the City's Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way (Section 4: Housing Opportunities, **Table 6.44**).

The sites designated in the Corridor Specific Plan areas are for higher-density residential and mixed-use development, located along transit routes, and are proximate to key commercial and transportation centers. The residential sites analysis included in Section 4 of this Housing Element demonstrates the City's ability to meet its RHNA allocation. The combination of these sites identified in **Table 6.44** as suitable for future residential development provide the following number of acres per zoning district:

HOUSING

Zoning	Acres	Sites Included
Suburban Rural (SR)	11.72	13, 14, 15, 16
R1	18.4	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 17, 18, 19, 20, 22, 23, 24, 25, 27, 29, 30, 31, 32
Mixed Use (MU)	0.7	12, 21
High Density Residential (HDR)	4.27	33, 35
Very High Density Residential (VHDR)	4.14	38
Residential Mixed Use (RMU)	3.6	34
Commercial Mixed Use (CMU)	16.84	33, 34

These zoning categories have been identified as suitable for future residential development based on the development standards in place or proposed for the district and their ability to facilitate the development of housing to meet the needs of Pinole's current and future residents. This mix of single-family and high density residential as well as mixed use along the City's main commercial and transportation corridors will encourage the development of housing to for households at all income levels. The zoning designations identified here permit residential uses by right at the densities described in **Table 6.44**. Development standards for the RMU, CMU, and OPMU zones require a minimum of 20 dwelling units per acre, and the VHDR zone requires a minimum of 35 units per acre. As demonstrated in **Table 6.44**, more than half of the regional housing need for lower income households can be accommodated on sites designated for residential use only.

The City will undertake the following to ensure adequate sites are identified and utilized to provide opportunities for future housing development:

- Continue to provide appropriate land use designations consistent with regional housing needs for mixed use and infill development near transit and other amenities.
- Monitor development and other changes on sites in the inventory to ensure the City has remaining capacity consistent with its share of the regional housing need.
- Maintain an updated inventory of available sites for housing development to provide for developers in conjunction with information about other development incentives for affordable units.

HOUSING

TARGET: Ongoing. Consistent with past trends and considering the funding constraints, the City's overall construction target is 80 units (2 extremely low, 5 very low, 5 low, 20 moderate, and 48 above moderate).

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Departmental budget

ACTION H.2.3

REHABILITATION ASSISTANCE. The City will improve public awareness of rehabilitation loan subsidy programs offered by the County and other agencies. Specific actions should include: (a) pamphlets on the programs available at City Hall; and (b) providing public information through articles in the local newspaper and with cable TV public service announcements. In addition, the City will annually explore funding availability at the local, State, and federal levels and pursue funding programs as appropriate with the goal of reinstating the City's Rehabilitation Program.

TARGET: Ongoing, with annual assessment of funding opportunities to reinstate the City's Rehabilitation Program. The City's overall target for rehabilitation assistance is 50 units (10 extremely low, 10 very low, 10 low, and 20 moderate), inclusive of the target for Action H.2.4 below.

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Contra Costa County; State and Federal funding programs as available

ACTION H.2.4

ACQUISITION/REHABILITATION OF BLIGHTED OR DISTRESSED PROPERTIES. As in other parts of the State, many households in Pinole have been impacted by the recession and depressed housing market, resulting in increases in distressed properties and foreclosure activities. Furthermore, with the dissolution of redevelopment, the City no longer has the funding available to address blighted properties in the community. The City will continue to pursue opportunities to partner with nonprofit housing developers to acquire and rehabilitate blighted or distressed properties, with the objective of making these units available to low income households as affordable housing.

TARGET: Ongoing, with annual assessment of funding/partnering opportunities. The City's overall target for rehabilitation assistance is 50 units (10 extremely low, 10 very low, 10 low, and 20 moderate), inclusive of the target for Action H.2.3 above.

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Contra Costa County; State and Federal funding programs as available

HOUSING

GOAL H.3

PROVIDE ADEQUATE SERVICES AND FACILITIES.

Provide adequate services and facilities to meet the needs of the City's current and future population.

POLICY H.3.1

PLAN FOR PUBLIC FACILITY AND SERVICE NEEDS. Future development shall be planned based on public facility and service capacity, community-wide needs, sound citywide and neighborhood planning and public improvement programming.

POLICY H.3.2

IDENTIFY ECONOMIC IMPACTS. Promote the development of new housing that is in harmony with the natural environment and justified economically from the standpoint of the City's ability to provide services.

POLICY H.3.3

ENCOURAGE SELF-SUPPORTING DEVELOPMENT. Define and implement a strategy that encourages future development to be self-supporting in the services, capital improvements and amenities it requires.

POLICY H.3.4

ENCOURAGE NEW PEDESTRIAN-ORIENTED DEVELOPMENT. Encourage new development and redevelopment that place residences in close proximity to a variety of services and facilities.

POLICY H.3.4

PROVIDE ADEQUATE TRANSPORTATION FACILITIES AND SERVICES. Provide adequate transportation alternatives which improve accessibility of residential neighborhoods to the community and beyond, while maintaining neighborhood integrity. The following are specific policies to reduce traffic on residential streets and improve available transportation alternatives:

- Encourage a variety of transportation modes to serve existing neighborhoods.
- Plan new commercial development around the use of certain arterial corridors and in close proximity to new residential development.
- Foster pedestrian oriented neighborhoods.
- Maintain and improve AC Transit and WestCat services, including the implementation of BART Express Service.

POLICY H.3.5

PROVIDE OTHER NEEDED SERVICES. Provide convenient recreational, civic, and commercial facilities to support the residential qualities of Pinole, including:

- Maintain the existing code enforcement program.
- Ensure that all new residential development contributes its fair share for the ongoing provision of required public services and amenities, including public safety and community facilities.
- Use redevelopment to stimulate additional commercial development in order to strengthen the City's ability to provide public services.

HOUSING

- The City should continue to operate in the most efficient and cost-effective ways to provide services.
- Provide specific residential recreational and park standards in an updated Open Space Element.
- The City shall support and encourage the development of adequate childcare facilities to serve the needs of working families.

ACTION H.3.1

FEE STRUCTURE EVALUATION. Periodically review the City's current development impact fees to ensure that new development contributes its fair share of the costs for the provision of services and facilities.

TARGET: Ongoing

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Department budget

GOAL H.4

HOUSING NEED.

Within the context of retaining existing community character and providing adequate services and facilities, maintain the current social diversity that exists in Pinole by providing a mix of housing types and prices that meet the City's Fair Share of Regional Housing Need and its specific housing needs as identified in the Housing element.

POLICY H.4.1

PROVIDE A CHOICE OF HOUSING. Provide a mix of sizes and housing types to meet the needs of Pinole's diverse population. Specific examples include traditional single family homes, second units, mixed use developments, infill development, accessible housing, and transitional and emergency housing. Opportunities must be available for lower, moderate, and above-moderate income households reflecting available job opportunities in close proximity to Pinole. Available housing choices should also strive to minimize transportation needs.

POLICY H.4.2

PROVIDE EQUAL HOUSING OPPORTUNITIES. Encourage the provision of adequate housing for all persons regardless of income, age, sex, race, or ethnic background, consistent with the Fair Housing Act.

POLICY H.4.3

PRESERVE EXISTING AFFORDABLE HOUSING. Monitor and maintain the supply of existing affordable housing to ensure that it remains affordable.

POLICY H.4.4

SUPPORT THE DEVELOPMENT OF AFFORDABLE HOUSING. Maintain appropriate land use regulations and other development tools to encourage development of affordable housing opportunities throughout the City.

ACTION H.4.1

GENERAL PLAN LAND USES. Evaluate General Plan land use designations and plan programs annually to ensure they are consistent with the City's overall goals and review the entire General Plan within eight years.

TARGET: Annually

HOUSING

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING: Department budget

ACTION H.4.2

HOUSING CONSTRUCTION. Construct or encourage the construction of housing units throughout the City through use of the following mechanisms:

- **Mixed Use Housing Incentives.** Encourage mixed residential-commercial uses in areas consistent with the Land Use Plan, and in particular along portions of the San Pablo Avenue, Pinole Valley Road, and Appian Way corridors to increase housing opportunities through the following and other means, if appropriate: (1) increased densities; (2) prioritized development project review and processing; and (3) flexibility in parking and development standards.
- **Rental Housing Site Assembly and Development.** City shall contact affordable housing builders and provide information about sites to facilitate development of affordable rental housing. Based on development interest, the City shall explore possible assistance including priority processing.
- **Affordable Housing Incentives.** Support the use of the following incentives for well-designed rental and ownership projects that provide a minimum of 15 percent of total units affordable to low and moderate income households for 45 and 55 years respectively:
 - a. *Density bonuses.* Provide density bonuses consistent with the State Density Bonus Law (Government Code Section 65915).
 - b. *Flexibility in development standards.* Allow flexibility in applying development standards (e.g., parking, floor area, setback, height standards).
 - c. *Prioritized Development Review.* Affordable housing development should receive the highest priority and efforts should be made by staff and decision-makers to: 1) provide technical assistance to potential affordable housing developers; 2) consider project funding and timing needs in the processing of applications; and 3) provide the fastest turnaround time possible in determining application completeness.
- **Require Affordable Housing in Market Rate Residential Projects.** Require 15 percent of the units located in new residential developments be affordable, and of those units, 40 percent must be affordable to very low income households. The City's intent is the construction of units on-site. If this is not practical, the City will consider other alternatives of equal value, such as in-lieu fees, construction of units off-site, donation of a portion of the property for future non-profit housing development, etc.

HOUSING

- **Housing for Extremely Low Income Households.** Based on funding availability, the City shall explore development assistance for multifamily and supportive housing to meet the needs of extremely low income households. The City shall continue to contact extremely low income housing service providers within West Contra Costa County to determine the best way to facilitate development of housing for this income group. The City will annually contact developers to assist in development where feasible by prioritizing available funding, assisting and supporting new applications, providing priority processing, considering fee deferrals or subsidies and design modifications, and facilitating site acquisition.

TARGET: Ongoing to provide for the construction or approval of at least 279 units between 2014 and 2023

RESPONSIBLE AGENCY: Pinole Development Services Department, and for-profit housing developers

FUNDING SOURCE: Local, State, and Federal funds as available

ACTION 4.4.3

PARCEL CONSOLIDATION. The City will play an active role in facilitating lot consolidation, particularly as it relates to parcels listed in the Sites Inventory in Section 4 of this Housing Element. The lot consolidation procedure will be included in the City's Municipal Code and be made available to the public and discussed with developers during the preliminary review process. Lot consolidation requests made in order to facilitate development of affordable housing will be processed administratively. Incentives offered for lot consolidation will include allowing higher densities for larger parcels once consolidated, flexibility in development standards, and expedited processing.

TARGET: Ongoing, with the lot consolidation procedure to be included in the Municipal Code within one year of the adoption of this Housing Element.

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING SOURCE: Departmental budget

ACTION 4.4.4

SECOND UNIT ORDINANCE. The City will provide information to the public on the ordinance at City Hall and on its website. In addition, the City will review the Second Dwelling Unit Ordinance in regard to development requirements to encourage the development of well-designed secondary housing units in established residential areas.

TARGET: Construction of 16 new second units between 2014 and 2023

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING SOURCE: Departmental budget

ACTION 4.4.5

HOME BUYER PROGRAMS. Continue to promote homebuyer assistance programs available through the County and State, such as the Mortgage Credit Certificate (MCC) program and California Housing Finance

HOUSING

Agency's Downpayment Assistance Program. Specific actions should include: (a) pamphlets on the programs available at City Hall; and (b) providing public information through articles in the local newspaper and with cable TV public service announcements. The City will continue to explore funding opportunities to reinstate the City's Homebuyer Program.

TARGET: Annual evaluation of funding available and pursue funding opportunities as available

RESPONSIBLE ENTITY: Pinole Development Services Department; Lending Institutions

FUNDING SOURCE: Local, State, and Federal funding programs as available

ACTION 4.4.6

Below Market Rate (BMR) Regulations. Implement and monitor rental (55 years) and resale (45 years) restrictions for low and moderate income units assisted or constructed by the former Redevelopment Agency to assure that these units remain at an affordable price level as they are occupied, and transferred.

TARGET: Ongoing.

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING SOURCE: Departmental budget

ACTION 4.4.7

TECHNICAL ASSISTANCE TO HOUSING DEVELOPERS. The City will provide technical assistance to developers to encourage provision of affordable housing that are consistent with City goals. Assistance could include provision of information about available funding sources, pre-application planning meetings, expedited development review and processing, and facilitation of neighborhood meetings.

TARGET: Ongoing

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING SOURCE: Departmental budget

ACTION 4.4.8

ACCESSIBLE UNITS FOR THE PHYSICALLY DISABLED. The City will facilitate programs and projects that meet Federal, State and local requirements to provide accessibility for the physically disabled in residential units and will promote affordable accessible housing for the physically disabled. The City will encourage accessible units in all new projects; additionally, where outside funding is involved, the City will ensure compliance with funding agency requirements for units accessible to the physically disabled. The City will provide technical assistance to assure proposed units meet Building Code requirements. The City will implement the adopted ordinance establishing Reasonable Accommodation procedures to accommodate the needs of persons with disabilities

TARGET: Five percent of the units built or approved between 2014 and 2023 should be adaptable for the physically disabled

HOUSING

RESPONSIBLE ENTITY: Pinole Development Services Department;
Building Division

FUNDING SOURCE: Departmental budget

ACTION 4.4.9

HOUSING FOR THE HOMELESS. The City amended the Zoning Ordinance to provide emergency shelters and transitional housing for the homeless. The City will continue to monitor the effectiveness and appropriateness of the adopted provisions in facilitating housing for the homeless.

TARGET: Annually review effectiveness and appropriateness of zoning provisions for housing for the homeless

RESPONSIBLE ENTITY: Development Services Department

FUNDING SOURCE: Departmental budget

ACTION 4.4.10

PREVENTION OF HOUSING DISCRIMINATION. The City will take actions to prevent discrimination in the housing market and provide information on fair housing laws. Staff will distribute fair housing pamphlets provided by fair housing organizations at the public information counter at City Hall and at the Pinole Senior Center as well as on the City's website. Staff will continue to refer all fair housing complaints to Housing Rights Incorporated, a local fair housing advocacy firm or other groups that provide comparable service.

TARGET: Ongoing.

RESPONSIBLE ENTITY: Pinole Development Services Department.

FUNDING SOURCE: Departmental budget

ACTION 4.4.11

CONSERVATION OF AFFORDABLE HOUSING UNITS. Pinole's supply of affordable housing units is largely made of multi-family units with affordability covenants in place that ensure affordability at a specific income level for a set period of time following the provision of financial assistance to the project, generally through the former Pinole Redevelopment Agency. A number of the covenants were recorded prior to changes in State law that took effect in 2001 requiring minimum thresholds for affordability and are now nearing their expiration dates. The City will take appropriate steps to ensure that the units with covenants close to expiration are conserved or replaced and will remain affordable to moderate and lower income households. Specific units at risk are detailed in Table 6.27.

TARGET: Through 2017: 24 very low income units; 4 low income units; and 85 moderate income units.

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING SOURCE: CDBG; HOME; State and Federal funds as available

ACTION 4.4.12

EXPLORE OPTIONS FOR SENIOR ASSISTANCE PROGRAMS. Explore program revisions and potential new programs aimed at providing assistance to seniors that would allow them to live independently and age in their

HOUSING

homes. The potential assistance program(s) may be an offshoot of or include revisions to the existing Residential Rehabilitation Loan Program, which provides grants and low-interest loans to qualifying households. Specifically, identify funding and initiate a program to provide grants to senior homeowners for home improvements to increase accessibility for daily activities.

TARGET: Pursue funding in 2015 with the goal of initiating program in 2016.

RESPONSIBLE ENTITY: Pinole Development Services Department

FUNDING SOURCE: CDBG; HOME; State and Federal funds as available

GOAL H.5

ENERGY-EFFICIENCY, CONSERVATION, AND SUSTAINABLE RESIDENTIAL DEVELOPMENT.

Support energy-efficient design and building practices in order to reduce housing utility expenses, minimize adverse environmental impacts, and provide for sustainability.

POLICY H.5.1

REDUCE ENERGY CONSUMPTION. Reduce energy and water consumption in residential buildings by balancing energy-efficient design and water conservation features with cost-effective construction.

ACTION H.5.1.1

ENERGY & WATER CONSERVATION. Support and publicize energy and water conservation programs, such as PG&E's SmartAC, ClimateSmart, and Energy Partners Program, which provide assistance for energy conservation improvements as well as EBMUD Residential Conservation Rebates and Programs. In cooperation with PG&E, EBMUD, and other utility providers, the City will promote citizen awareness of energy conservation programs in concert with rehabilitation loan programs. Further, the City will continue to implement water efficient landscaping requirements for new residential development.

TARGET: Ongoing

RESPONSIBLE ENTITY: Pinole Development Services Department; PG&E; Building Division

FUNDING SOURCE: Department budget; PG&E

HOUSING

GLOSSARY

ABOVE MODERATE INCOME HOUSEHOLDS: Households earning over 120 percent of the median household income for the County as published annually by the State Department of Housing and Community Development. As of February 2014, a family of four in Contra Costa County earning more than \$112,200 per year was considered above moderate income.

ACCESSIBLE HOUSING: Units accessible and adaptable to the needs of the physically disabled.

AFFORDABLE HOUSING: Housing capable of being purchased or rented by a household with extremely low, very low, low, or moderate income, based on a household's ability to make monthly payments necessary to obtain housing. Housing is considered affordable when a household pays less than 30 percent of its gross monthly income (GMI) for housing including utilities. Although housing may be affordable to households earning moderate or lower income, affordable housing as referred to in this Housing Element must have covenants or other restrictions in place to ensure its continued affordability.

EMERGENCY SHELTER: Housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay.

EXTREMELY LOW INCOME: Households earning less than 30 percent of the median household income for the County as published annually by the State Department of Housing and Community Development. As of February 2014, a family of four in Contra Costa County earning less than \$28,050 was considered extremely low income.

FAMILY HOUSEHOLD: For Census purposes, a family household includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those individuals are not included as part of the householder's family in census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.

GROUP QUARTERS: For Census purposes, the group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized: (1) the institutionalized population, which includes people under formally authorized, supervised care or custody in institutions such as correctional facilities, nursing homes, and juvenile institutions and (2) the non-institutionalized population, which includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes.

HOUSEHOLD: For Census purposes, a household includes all the persons who occupy a housing unit. People not living in households are classified as living in group quarters.

HOUSING UNIT: A house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters, or if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live separately from

HOUSING

any other individuals in the building and which have direct access from outside the building or through a common hall. For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible.

HOUSEHOLDER: For Census purposes, one person in each household is designated as the householder. In most cases, the householder is the person, or one of the people, in whose name the home is owned or rented. Households are classified by type according to the sex of the householder and the presence of relatives. Two types of householders are distinguished: family householders and nonfamily householders. A family householder is a householder living with one or more individuals related to him or her by birth, marriage, or adoption. The householder and all of the people in the household related to him or her are family members. A nonfamily householder is a household living alone or with nonrelatives only.

HOUSEHOLD INCOME: Income is defined as wages, salaries, pensions, social security benefits, and other forms of cash received by a household. Non-cash items, such as Medicare and other medical insurance benefits, are not included as income.

HOUSEHOLD SIZE: For Census purposes, household size is based on the number of people in occupied housing units. All people occupying the housing unit are counted, including the householder, and lodgers, roomers, boarders, and so forth.

HOUSING AFFORDABILITY: The generally accepted measure for determining whether a person can afford housing means spending no more than 30 to 35 percent of one's gross household income on housing costs, which includes utilities, principal and interest.

LOW INCOME HOUSEHOLDS: Households earning 50 to 80 percent of the median household income for the County as published annually by the State Department of Housing and Community Development. As of February 2014, a family of four in Contra Costa County earning between \$46,751 and \$67,600 per year was considered low income.

MEDIAN HOUSEHOLD INCOME: The middle point at which half of the households earn more and half earn less. Income limits are updated annually by the U.S. Department of Housing and Urban Development (HUD) for Contra Costa County. For many State and local programs, State Department of Housing and Community Development income regulations must be used. HCD income regulations are similar to those used by HUD. As of February 2014, the median household income for a family of four in Contra Costa County was \$93,500.

MODERATE INCOME HOUSEHOLDS: Households earning 80 to 120 percent of the median household income for the County as published annually by the State Department of Housing and Community Development. As of February 2014 a family of four in Contra Costa County earning between \$67,601 and \$112,200 per year was considered moderate income.

NONFAMILY HOUSEHOLD: Householder living alone or with nonrelatives only.

PERSONS PER HOUSEHOLD: The statistical average number of persons in a household.

HOUSING

REGIONAL HOUSING NEEDS: A quantification by a Council of Government (COG), such as the Association of Bay Area Governments (ABAG), or by HCD of existing and projected housing need, by household income group, for all localities within a region.

SENIOR HOUSING: Defined by California Housing Element law as projects developed for, and put to use as, housing for senior citizens. This Housing Element defines senior citizens as persons at least 55 years of age.

SUPPORTIVE HOUSING: Housing with no limit on length of stay, that is occupied by the target population, and that is linked to an onsite or offsite service that assists the supportive housing resident in retaining the housing, improving his or her health status, and maximizing his or her ability to live and, when possible, work in the community (Government Code Section 65582 (f)). "Target population" means persons with low incomes who have one or more disabilities, including mental illness, HIV or AIDS, substance abuse, or other chronic health condition, or individuals eligible for services provided pursuant to the Lanterman Developmental Disabilities Services Act (Division 4.5 (commencing with Section 4500) of the Welfare and Institutions Code) and may include, among other populations, adults, emancipated minors, families with children, elderly persons, young adults aging out of the foster care system, individuals exiting from institutional settings, veterans, and homeless people (Government Code Section 65582 (g)).

TRANSITIONAL HOUSING: Buildings configured as rental housing developments, but operated under program requirements that require the termination of assistance and recirculating of the assisted unit to another eligible program recipient at a predetermined future point in time that shall be no less than six months from the beginning of the assistance (Government Code Section 65582 (h)).

VERY LOW INCOME HOUSEHOLDS: Households earning less than 50 percent of the median household income for the County as published annually by the State Department of Housing and Community Development. As of February 2014, a family of four in Contra Costa County earning less than \$46,750 per year was considered very low income.

HOUSING

APPENDIX A. SUMMARY OF PUBLIC PARTICIPATION

HOUSING SURVEY

The City conducted a housing survey to solicit input on housing needs and program options. A total of 67 persons responded to the survey – 10 renters; 55 homeowners; and two rental property owners. A summary of the survey results is provided below.

How long have you lived in Pinole?		
Answer Options	Response Percent	Response Count
Less than 5 years.	55.6%	5
5 -10 years	33.3%	3
More than 10 years	11.1%	1
Answered Question		9

Please check all that apply to you:		
Answer Options	Response Percent	Response Count
I am a Senior (65 years or over)	22.2%	2
I am disabled	0.0%	0
I live in a large household (five or more persons living in your home)	11.1%	1
Not applicable to me.	66.7%	6
Answered Question		9

How well is the property you rent being maintained?		
Answer Options	Response Percent	Response Count
Very well maintained. Property maintenance and repair needs are addressed quickly.	0.0%	0
Well maintained. Property maintenance and repair needs are addressed.	55.6%	5
Not well maintained. Property maintenance and repair needs sometimes are not performed.	44.4%	4
Poorly maintained. Property maintenance and repair needs usually are not performed.	0.0%	0
Answered Question		9

HOUSING

About how much do you spend annually on property maintenance, repair, or improvement work?		
Answer Options	Response Percent	Response Count
Under \$1,000	10.2%	5
\$1,000 - \$5,000	61.2%	30
\$5,001 - \$10,000	26.5%	13
Over \$10,000	2.0%	1
Answered Question		49

What, if any, major housing repair or improvement work is planned over the next five years (check all that apply)?		
Answer Options	Response Percent	Response Count
Roof Replacement	41.0%	16
Water Heater / Furnace Replacement	25.6%	10
Interior Remodel (e.g. bathroom or kitchen remodel)	48.7%	19
Exterior Remodel (e.g. window or siding replacement)	20.5%	8
Solar Panel Installation	25.6%	10
Home Expansion	10.3%	4

TELEPHONE INTERVIEWS

A variety of professionals who are involved either directly with housing or indirectly as service providers participated in telephone interviews that inform this report. All of them have responsibilities in Pinole specifically or within the East Bay area.

Serving Seniors and Persons with Disabilities

- Eden Council for Hope and Opportunity (ECHO Housing)
- Disabled People's Recreation Center
- Cole Vocational Services
- Pinole Senior Center

Real Estate Professionals

- Coldwell Banker Real Estate, Pinole Branch
- Security Pacific Real Estate Brokerage, Richmond Branch

Developers of Affordable Housing

- Domus Development
- EAH Housing

Comments received during these interviews are summarized in the Housing Issues Report (Appendix D).

HOUSING

PUBLIC MEETINGS

The City conducted a number of public meetings to discuss housing needs and funding priorities as part of the Housing Element development process:

- **May 28, 2014 - Finance Subcommittee:** The City conducted a meeting before the Finance Subcommittee, comprising of City Council members, City Manager, Finance Director and Community Development Director. The Subcommittee reviewed the Housing Issues Report and discussed housing funding priorities. The Subcommittee recommended prioritizing funding, if available, for the preservation of affordable units at-risk of converting to market rate units and housing rehabilitation assistance.
- **July 15, 2014 – City Council:** The City conducted a City Council meeting to review housing funding priorities as recommended by the City Council Finance Subcommittee. The City Council identified three housing funding priorities when or if funds become available for the preservation of affordable units at risk of conversion to market rate units, housing rehabilitation assistance to seniors and disabled households, and rehabilitation of distressed properties.

HOUSING

APPENDIX B. REVIEW OF PAST ACCOMPLISHMENTS

The fourth cycle of the Housing Element update for the City of Pinole covers a planning period from July 1, 2009 through June 30, 2014. SB 375 however, extended this planning timeframe for the Housing Element through January 31, 2015 in order to align regional housing planning with the regional transportation plan. The Regional Housing Needs Allocation (RHNA) planning period differs slightly from the Housing Element planning period and began on January 1, 2007. Therefore, when evaluating progress in implementing the Housing Element, most programs are evaluated for the duration of the Housing Element (since July 1, 2009) or since adoption of the Housing Element on July 9, 2010. When assessing the City's progress toward meeting its RHNA, units constructed since January 1, 2007 are credited.

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
GOAL H.1 MONITOR HOUSING NEEDS		
Work together with interested parties to achieve the City's housing goals and monitor accomplishments in order to respond to housing needs effectively over time.		
Action H.1.1 Conduct an Annual Housing Element Review Provide for annual review of the Housing Element, with opportunities for public input and discussion, in conjunction with State requirements for a written review by April 1 of each year (per Government Code Section 65583(3)). As part of the Annual Housing Element Review, the City will conduct a General Plan internal consistency review. <i>Target: Ongoing (annually).</i>	The City adopted the 2007-2014 Housing Element on July 9, 2010. The Annual Element Progress Report was filed with the Department of Housing and Community Development and the State Department of Finance each year as required by State law.	This action will continue in the updated Housing Element.
Action H.1.2 Explore Housing Development Partnerships The City will seek out opportunities to work with other public agencies by identifying housing grant funding opportunities to encourage and implement improvements and expansion of housing supply and work with developers by creating a developer interest list and periodically assessing development needs to encourage new residential development to provide affordable housing. <i>Target: Ongoing.</i>	Due to the depressed housing market, few development proposals were received during the planning timeframe of this Housing Element. However the City met with several developers during the period regarding future housing development submittals. The City received an application for the conversion of an existing vacant commercial building to six (6) multi-family units and worked with the property owner on the development of a mixed income project requiring a design review request.	This continued to be an appropriate action. As part of the 2015-2023 Housing Element update, the City outreached to developers to gain an understanding of opportunities and constraints relating to housing development in Pinole.

HOUSING

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
<p>Action H.1.3 Periodically Review Residential Development Requirements</p> <p>Consider designating sites meeting appropriate criteria for higher density housing. Planning should utilize the following when monitoring the effectiveness of established development standards to help address housing needs:</p> <ul style="list-style-type: none"> • Use of Specific Plans to expedite processing for infill and affordable housing developments. • For key housing opportunity sites, provide development standards and design objectives to streamline the development review process for projects that are consistent with applicable Specific Plan and the General Plan. • Identify the mix of uses, minimum density standards, density bonuses, or a percentage of affordable units. • Provision of clear guidelines and incentives for the development of housing in conformance with current state laws and to identify specific ways to streamline process for subsequent development proposals. <p><i>Target Ongoing (as necessary).</i></p>	<p>New residential development standards were adopted in 2010 through the Comprehensive General Plan Update, Zoning Code Update, and Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way. Existing Residential Design Criteria and Guidelines, adopted in 2007, remain in place with the updates. The City adjusted development review requirements for additions and new single-family home projects. The City amended the requirements to allow administrative review of projects that are consistent with adopted design review guidelines.</p> <p>The Corridor Specific Plan includes land use designations for new housing sites as well as higher residential densities, up to 35 units per acre in the Residential Mixed Use (RMU) District. It also provides for Expedited Design Review for projects that are consistent with the Specific Plan and are identified as Priority Projects or projects that demonstrate a high level of sustainability.</p> <p>The 2010 General Plan Community Character Element includes Action 1.2.1 for an enhanced, expedited staff level design review process for development projects within primary circulation corridors.</p>	<p>This action is modified to monitor development standards to ensure their continued appropriateness in fostering residential and mixed use development in the community.</p>
<p>Action H.1.4 Zoning Ordinance Update</p> <p>Update the Pinole Zoning Ordinance to be consistent with the General Plan to ensure consistency with the elements of the updated General Plan, including this Housing Element.</p> <p><i>Target: Within one year of adoption of this Housing Element.</i></p>	<p>The City adopted the updated General Plan and Zoning Code in October 2010 and November 2010 respectively.</p>	<p>This action is completed and removed from the Housing Element as a separate action. HIA-3 affirms the City's continued commitment to monitor its development standards.</p>

HOUSING

**Table App B-1
Evaluation and Review of Housing Programs**

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
GOAL H.2 PROTECT EXISTING CHARACTER AND HERITAGE		
Protect and enhance the integrity and distinctive character and heritage of Pinole by encouraging the development of high-quality, well-designed housing and conserving existing housing.		
<p>Action H.2.1 Apply Design Review Guidelines</p> <p>Apply the Zoning Ordinance Residential Design Guidelines to new residential projects in order to evaluate projects in the context of existing neighborhoods and continue to maintain an objective process that clearly communicates community expectations in the Design Review process.</p> <p><i>Target: Ongoing.</i></p>	<p>The City continues to implement the Residential Design Guidelines that were adopted originally in 2007 and are now included in the updated Zoning Code. The City received two applications for development of single-family homes during 2010-2012. Both applications were reviewed under the Guidelines. The City received no other applications for residential development.</p>	<p>Providing quality housing is important to the community. This action is continued in the 2015-2023 Housing Element.</p>
<p>Action H.2.2 Adequate Sites to Meet Regional Fair Share of Housing Growth</p> <p>The City shall provide for a variety of housing types with densities ranging from one to seven units in low-density residential areas and up to fifty dwelling units per acre in very high-density residential and mixed-use areas along portions of the City's transportation corridors included in the proposed Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way, with the incorporation of density bonuses available consistent with State law.</p> <p>In support of this Housing Element, the City developed a parcel-specific inventory of sites suitable for future residential development, including vacant sites currently designated under the City's General Plan and housing opportunity sites designated in the City's proposed Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way.</p> <p>The sites designated in the Corridor Specific Plan areas are for higher-density residential and mixed-use development, located along transit routes, and are proximate to key commercial and transportation centers. The residential</p>	<p>The City adopted the Three Corridors Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way in November 2010.</p> <p>Adoption in November 2010 of the updated General Plan, Zoning Code and Three Corridors Specific Plan completed the rezoning as designated in Table 37 (Vacant Sites) of the 2007-2014 Housing Element.</p> <p>The Three Corridor Specific Plan was adopted in November 2010. The City continues to utilize this and other planning documents to encourage, facilitate, and process housing development requests.</p> <p>Adoption of the General Plan Update, Three Corridors Specific Plan, and Zoning Ordinance Update in November 2010 refined land use designations and included provisions to align them with regional housing needs for mixed use and infill development. This effort included the rezoning of a number of Specific Plan sites also identified in the Housing Element to accommodate high density residential and mixed use development. The City will continue to monitor local and regional housing needs and provide appropriate land designations to meet current needs.</p>	<p>This action is modified in the 2015-2023 Housing Element to focus on maintenance of adequate inventory of sites.</p>

HOUSING

<p>sites analysis included in Section 4 of this Housing Element demonstrates the City's ability to meet its RHNA allocation. The combination of these sites provides the following number of acres per zoning district:</p> <ul style="list-style-type: none"> • Suburban Rural (SR) – 11.72 acres • Mixed Use (MU) – 20.6 acres • High Density Residential (HDR) – 0.7 acres • Very High Density Residential (VHDR) – 4.14 acres • Residential Mixed Use (RMU) – 3.6 acres • Commercial Mixed Use (CMU) – 19.07 acres • Office Professional Mixed Use (OPMU) – 2.23 acres <p>Proposed standards for the RMU, CMU, and OPMU zones require a minimum of 20 dwelling units per acre, and the VHDR zone requires a minimum of 35 units per acre.</p> <p>The City will undertake the following to ensure adequate sites are identified and utilized to provide opportunities for future housing development.</p> <ul style="list-style-type: none"> • Adopt the proposed Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way within one year following the adoption of the Housing Element. • Rezone at least the minimum number of acres necessary to accommodate the remaining Regional Housing Needs Allocation. This is anticipated to be accomplished through the adoption of the Corridor Specific Plan and will be completed within one year of adopting this Housing Element. The sites that will be utilized to meet the RHNA are identified and analyzed in Table 38. 	<p>The City continues to compile and update a detailed site-specific inventory of housing sites to facilitate future development.</p>	

HOUSING

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
<ul style="list-style-type: none"> Implement the Corridor Specific Plan and other Planning and Land Use documents that further the City's ability to encourage the development of housing at all levels of affordability. Continue to provide appropriate land use designations consistent with regional housing needs for mixed use and infill development near transit and other amenities. Maintain an updated inventory of available sites for housing development to provide for developers in conjunction with information about other development incentives for affordable units. <p><i>Target: Ongoing; see specific actions outline above.</i></p>		
<p>Action H.2.3 Rehabilitation Loan Programs</p> <p>Continue to support rehabilitation loan subsidy programs. The City will improve citizen awareness of rehabilitation loan subsidy programs offered by the Agency and the County. Specific actions should include: (a) housing pamphlets on the programs available at City Hall; (b) contact with neighborhood groups and associations; (c) posting of notices in specific neighborhoods, as needed; (d) providing special presentations to community groups periodically; and (e) providing public information through articles in the local newspaper and with cable TV public rehabilitation loans for specific areas.</p> <p>The Program Administrator should work closely with Contra Costa County to promote similar residential rehabilitation assistance programs such as the Neighborhood Preservation Program.</p> <p>Targets for these programs include:</p> <ul style="list-style-type: none"> Residential Rehabilitation Loan Program: 5 extremely low income units, 10 very low income units, 10 low income units, and 10 moderate 	<p>The City historically has offered both ownership and rental/multifamily rehabilitation loans for improvements to the existing housing stock utilizing the City's redevelopment housing set-aside funds.</p> <p>Residential Rehabilitation Loan Program: Between July 1, 2009 and December 31, 2013, this program provided more than \$19,500 in loans and grants for rehabilitation of four homes in the City.</p> <p>Rental Rehabilitation Program: The City assisted Bridge Housing to refinance the existing Pinole Grove apartment development at 800 John Street by forgiving \$500,000 in interest due. This assistance helped make it possible for the property owner to refinance the project and rehabilitate the units. The City issued a building permit for the rehabilitation of 69 units including 34 very low-income and 35 moderate-income units in 2011. The rehabilitation work was completed in 2012.</p> <p>Staff continues to publicize the Rehabilitation Loan Programs and currently provides information about the Program as prescribed in Action H.2.3.</p>	<p>Due to the State's elimination of redevelopment and the City's current financial circumstances, local funding for these programs is no longer available. As demand and financial resources allow, the City is committed to continuing to support the rehabilitation of rental and ownership housing, particularly as those opportunities can be utilized to secure affordable housing units.</p> <p>This action is modified in the 2015-2023 Housing Element to reflect the elimination of redevelopment and the need to utilize/ pursue alternative funding sources.</p>

HOUSING

development impact fees to ensure that new development contributes its fair share of the costs for the provision of services and facilities.	were unchanged.	
<i>Target: Ongoing.</i>		
GOAL H.4 HOUSING NEED		
Within the context of retaining existing community character and providing adequate services and facilities, maintain the current social diversity that exists in Pinole by providing a mix of housing types and prices that meet the City's Fair Share of Regional Housing Need and its specific housing needs as identified in the Housing Element.		
Action H.4.1 General Plan Land Uses Incorporate the policies of the Corridor Specific Plan for San Pablo Avenue, Pinole Valley Road, and Appian Way into the General Plan. Evaluate General Plan land use designations and plan programs annually to ensure they are consistent with the City's overall goals and review the entire General Plan within five years. <i>Target: Within one year following the adoption of the Housing Element and at least every five years following.</i>	The General Plan and Three Corridors Specific Plan were adopted in October 2010 and November 2010, respectively. The policies contained in each are consistent. Staff implemented the updated policies and completed actions within the Housing Element, which was adopted before the other General Plan Elements and the Specific Plan. Staff regularly evaluates the policies to ensure ongoing internal consistency.	This action is included in the 2015-2023 Housing Element as part of Action H.1.1 and Action H.2.2. As General Plan elements are updated, the City will review the overall General Plan for internal consistency.
Action H.4.2 Housing Construction Construct or encourage the construction of housing units throughout the City through use of the following mechanisms: <ul style="list-style-type: none"> • Mixed Use Housing Incentives. • Redevelopment Agency Powers. • Rental Housing Site Assembly and Development. • Affordable Housing Incentives. • Require Affordable Housing in Market Rate Residential Projects Located in the Redevelopment Area. • Housing for Extremely Low Income Households. <i>Target: Ongoing to provide for the construction or approval of at least 323 units between 2007 and 2014.</i>	The Housing Element outlines a number of specific mechanisms designed to encourage housing construction, including measures that depended on the tools available through redevelopment prior to its elimination by the State. Current available incentives have been reduced due to lack of available funding; however, the City's commitment to housing construction remains, and incentives will be made available to encourage housing development as funding permits. It should be noted that the General Plan and Corridor Specific Plan, both adopted in 2010, provide development standards that increased flexibility and development potential for residential development sites that were identified in Table 38 of the 2009-2014 Housing Element. These incentives include reduced parking requirements and increased maximum	Expanding the supply and types of housing is an important housing goal. This action is included in the 2015-2023 Housing Element.

HOUSING

Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
	<p>building heights. Proposed residential projects that are consistent with the City's Three Corridors Specific Plan are also eligible for expedited environmental review. Extended construction hours may also be available to expedite construction time.</p> <p>Between January 1, 2007 and December 31, 2013, 72 housing units have been constructed in the City, with the following income distribution:</p> <ul style="list-style-type: none"> - 2 very low income units - 1 low income units - 10 moderate income units - 59 above moderate income units <p>The City's progress toward meeting its RHNA is further detailed in a separate table.</p>	
<p>Action H.4.3 Parcel Consolidation</p> <p>The City will play an active role in facilitating lot consolidation, particularly as it relates to parcels listed in the Site Inventory in Section 4 of this Housing Element. The lot consolidation procedure will be included in the City's Municipal Code and be made available to the public and discussed with developers during the preliminary review process. Lot consolidation requests made in order to facilitate development of affordable housing will be processed administratively. Incentives offered for lot consolidation will include allowing higher densities for larger parcels once consolidated, flexibility in development standards, and expedited processing.</p> <p><i>Target: Ongoing, with the lot consolidation procedure to be included in the Municipal Code within one year of the adoption of this Housing Element.</i></p>	<p>The updated Zoning Code, adopted in November 2010, includes provisions for integrated development of two or more adjacent parcels through with specific plan zoning (17.43).</p> <p>No applications for lot consolidation were received during 2010-2013 since adoption of the Zoning Code update. The City did have discussions with several different owner/developers about this process during the reporting period.</p>	<p>The City will continue to facilitate lot consolidation of key housing opportunity sites based on owner/developer interest. This action is included in the 2015-2023 Housing Element.</p>
<p>Action H.4.4 Second Unit Ordinance</p> <p>The City will provide information on the ordinance at City Hall and on its website. In addition, the City will review the Second</p>	<p>New Second Dwelling Units standards were incorporated in the updated Zoning Code, adopted in November 2010.</p> <p>Information about the Second Unit Ordinance is currently available at City</p>	<p>Second units remain an alternative approach to providing affordable housing in the community and helping meet the City's RHNA. This action</p>

HOUSING

Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
<p>Dwelling Unit Ordinance in regard to development requirements to encourage the development of well-designed secondary housing units in established residential areas.</p> <p><i>Target: Construction of 15 new second units between 2007 and 2014.</i></p>	<p>Hall and on the City's website.</p> <p>In 2007, 17 second units were constructed at the Serita by De Nova Homes Development, six of which are required by covenant to be rented at a price affordable to moderate-income households. No other second units were constructed during 2007-2014.</p>	<p>is included in the 2015-2023 Housing Element.</p>
<p>Action H.4.5 Homebuyer Programs</p> <p>Continue to support the Agency's First Time Homebuyer Program. Specific actions should include: (a) pamphlets on the programs available at City Hall; (b) contact with neighborhood groups and associations; (c) posting of notices in specific neighborhoods, as needed; (d) providing special presentations to community groups periodically; and (e) providing public information through articles in the local newspaper and with cable TV public service announcements.</p> <p><i>Target: 15 units between 2007 and 2014.</i></p>	<p>The First Time Homebuyer Program policies were updated in 2008. Notable policy changes include: funding loans for homes located anywhere in the City; providing funding tiers based on household income; shortened deferral policies; and more stringent borrower eligibility criteria (debt-to-income ratio, minimum credit score).</p> <p>Brochures and program information are available at City Hall and on the City's website. The program is also publicized in the Community Guide and information and presentations are provided to interested community organizations as requested. However, due to the elimination of redevelopment, this program has been suspended.</p> <p>Between July 1, 2009 and December 2013, seven First Time Homebuyer loans were issued.</p>	<p>Due to the State's elimination of redevelopment and the City's current financial circumstances, local funding for this program is no longer available. As demand and financial resources allow, the City is committed to continuing to provide homebuyer assistance.</p> <p>This action is modified in the 2015-2023 Housing Element to reflect the elimination of redevelopment and the need to utilize/ pursue alternative funding sources.</p>
<p>Action H.4.6 Below Market Rate (BMR) Regulations</p> <p>Implement and monitor rental (55 years) and resale (45 years) restrictions for low- and moderate-income units assisted or constructed by the Redevelopment Agency to assure that these units remain at an affordable price level as they are developed, occupied, and transferred.</p> <p><i>Target: Ongoing.</i></p>	<p>The City of Pinole has deed restrictions in place for all units counted as part of its Below Market Rate portfolio. A new policy for the sale of Below Market Rate (BMR) units was adopted in 2008. The policy requires that ownership BMR units have resale restrictions in place that guarantee affordability for 55 years. Rental affordability covenants are recorded for a minimum of 55 years.</p> <p>The current portfolio includes 560 rental units with affordability controls in place and five BMR ownership units with resale restrictions.</p> <p>The Redevelopment Agency and now the City of Pinole Successor Agency has deed restrictions in place for all units counted as part of its below market rate</p>	<p>This action is included in the 2015-2023 Housing Element but is modified to reflect the elimination of the Redevelopment Agency.</p>

HOUSING

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
	portfolio in 2013. The City continues to annually monitor the affordability of all BMR rental units through an annual certification process.	
<p>Action H.4.7 Technical Assistance to Housing Developers</p> <p>The City and its Redevelopment Agency will provide technical assistance to developers to encourage provision of affordable housing that are consistent with City goals. Assistance could include provision of information about available funding sources, pre-application planning meetings, expedited development review and processing, and facilitation of neighborhood meetings.</p> <p><i>Target: Ongoing.</i></p>	<p>The City remains committed to providing technical assistance to encourage affordable housing consistent with City housing goals. Planning staff works with developers to ensure that they understand their obligations to provide affordable housing and how the City Agency can help facilitate the process.</p> <p>The City has held several meeting with affordable housing builder, EAH Housing, regarding the possibility of a future affordable housing development at 600 Roble Avenue and/or within the City's Old Town area. However, no application has been submitted.</p>	<p>This action is updated and included in the 2015-2023 Housing Element.</p>
<p>Action H.4.8 Accessible Units for the Physically Disabled</p> <p>The City will facilitate programs and projects that meet Federal, State and local requirements to provide accessibility for the physically disabled in residential units and will promote affordable accessible housing for the physically disabled. The City will encourage accessible units in all new projects; additionally, where outside funding is involved, the City will ensure compliance with funding agency requirements for units accessible to the physically disabled. The City will provide technical assistance to assure proposed units meet Building Code requirements.</p> <p><i>Target: 5% of the units built or approved between 2007 and 2014 should be adaptable for the physically disabled.</i></p>	<p>The City continues to enforce all local, state, and federal accessibility requirements during the ongoing development review process.</p> <p>Modifications to the Zoning Code adopted in July 2009 and incorporated in the 2010 update of the Zoning Code allow for administrative review of ramps and other improvements designed to accommodate individuals with disabilities.</p> <p>The City is committed to assisting in the development of new projects that provide accessible housing for the disabled or issuing building permits for projects that improve the accessibility of existing housing units for the physically disabled. In 2013, the City did not receive any new development request for housing for the physically disabled population or for accessibility modifications to existing residential units to improve accessibility. The City continues to inspect Pinole Vista Apartments which is rehabilitating 52 existing units and adding improvements to accommodate physically disabled individuals on the property.</p>	<p>The City will continue to expand housing opportunities for persons with disabilities. This action is combined with Action H.4.9 and included in the 2015-2023 Housing Element.</p>
<p>Action H.4.9 Adopt and Implement Reasonable Accommodation Procedures</p>	<p>The 2010 updated Zoning Code includes provisions for Reasonable Accommodation at 17.12.050. For requests that the Community</p>	<p>The City will continue to expand housing opportunities for persons with disabilities. This</p>

HOUSING

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
<p>The City will adopt formal procedures for providing reasonable accommodation for housing for persons with disabilities in accordance with fair housing and disability law through the Zoning Ordinance Update. The Reasonable Accommodation procedures will allow for building modifications to accommodate the needs of persons with disabilities to be reviewed administratively by City Staff. Once adopted, Community Development Department Staff will implement the Ordinance.</p> <p><i>Target: Adopt Ordinance within 12 months of adoption of Housing Element; Implementation will be ongoing.</i></p>	<p>Development Director considers to be ministerial, he or she shall issue a written determination within thirty days of receiving a completed application. Non-ministerial requests are forwarded to the Planning Commission for a noticed public hearing with findings that are specific to requests for reasonable accommodation.</p>	<p>action is combined with Action H.4.8 and included in the 2015-2023 Housing Element.</p>
<p>Action H.4.10 Homeless Assistance</p> <p>Annually contribute a portion of Redevelopment funds to non-profit agencies involved in providing housing for the homeless.</p> <p><i>Target: Ongoing.</i></p>	<p>The City's fiscal crisis and State elimination of the City's Redevelopment Agency necessitated scaling back on a significant number of expenditures including homeless assistance.</p>	<p>Without a consistent funding source, the City is unable to commit to contributing to homeless assistance. This action is removed from the 2015-2023 Housing Element. However, the City will continue to facilitate affordable housing development that can benefit those who are at-risk of becoming homeless and those transitioning from homelessness to permanent independent living.</p>
<p>Action H.4.11 Housing for the Homeless</p> <p>As part of the Government Constraints analysis for this Housing Element (2007-2014), the following revisions to the City's Zoning Ordinance were identified to better facilitate the provision of housing to address the needs of homeless and extremely low income households:</p> <p>Add transitional and supportive housing within the Code's definition section and list as permitted uses subject only to those restrictions that apply to residential or commercial uses in the same zone.</p> <p>Include emergency shelters as a permitted</p>	<p>The 2010 update of the Zoning Ordinance includes provisions for emergency shelters and transitional housing at 17.62. Transitional facilities for ten or fewer residents may be located in any portion of the city zoned for residential development. Emergency shelters are permitted by right in the Corridor Specific Plan Office Industrial Mixed Use (OIMU) Zone subject to adopted development and performance standards.</p>	<p>This action is modified and included in the Housing Element to include a monitoring component.</p>

HOUSING

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
<p>use not requiring discretionary action in the proposed Office/Industrial Mixed Use Zone within the San Pablo Avenue Specific Plan Sub-Area.</p> <p>Emergency shelters will be subject to the same development and management standards as other permitted uses in the Specific Plan Service Sub-Area, as summarized in the Housing Constraints section of the Housing Element. As stated in the Housing Constraints evaluation, the City will develop written, objective standards for emergency shelters to regulate (with provisions) as permitted under SB 2.</p> <p><i>Target: Within twelve months of adoption of the Housing Element</i></p>		
<p>Action H.4.12 Prevention of Housing Discrimination</p> <p>The City will take actions to prevent discrimination in the housing market and provide information on fair housing laws. Staff will distribute fair housing pamphlets provided by fair housing organizations at the public information counter at City Hall and at the Pinole Senior Center as well as on the City's website. Staff will continue to refer all fair housing complaints to Housing Rights Incorporated, a local fair housing advocacy firm or other groups that provide comparable service.</p> <p><i>Target: Ongoing.</i></p>	<p>The Community Development Department continues to implement the policy and to field questions and provide information about affordable housing and fair housing.</p> <p>Historically, the City receives few fair housing complaints on an annual basis and no complaints were received in 2013. All housing complaints are referred to local fair housing advocacy firms to provide case assistance and legal advice.</p>	<p>The City will continue to promote fair housing in the community. This action is included in the 2015-2023 Housing Element.</p>
<p>Action H.4.13 Develop Multi-Family Sites at Medium and High Densities</p> <p>The City will strive to protect the supply and availability of multifamily housing sites for affordable housing by requiring minimum densities through the Zoning Ordinance Update.</p> <p><i>Target: Ongoing.</i></p>	<p>The 2010 updated General Plan and Zoning Ordinance includes minimum densities for residential development on sites that permit housing. For example, the maximum density in the residential High Density Zoning District (R-3) is 35 units per acre, with a minimum density of 20.1 units per acre. The maximum density in the Very High Density Zoning District (R-4) is 50 units per acre, with a minimum density of 35.1 units per acre. The maximum density in the Medium Density Zoning District is (R-2) 20 units per acre, with a minimum density of 10.1 units per acre.</p>	<p>This action is completed and a monitoring component is incorporated into Action H.4.1 and Action H.4.2 to facilitate housing development in meeting the City's RHNA.</p>

HOUSING

Table App B-1
Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
<p>Action H.4.14 Conservation of Affordable Housing Units</p> <p>Pinole's supply of affordable housing units is largely made of multifamily units with affordability covenants in place that ensure affordability at a specific income level for a set period of time following the provision of financial assistance to the project, generally through the Pinole Redevelopment Agency. A number of covenants were recorded prior to changes to State law that took effect in 2001 requiring minimum thresholds for affordability and are now nearing their expiration dates. The City will take appropriate steps to ensure that the units with covenants close to expiration are conserved or replaced and will remain affordable to moderate and lower-income households. (Note: The specific units at risk of conversion are detailed in Table 6.25 of the 2007-2014 Housing Element.)</p> <p><i>Target: Through 2014: 2 low-income units; between 2015 and 2019: 85 moderate-rate units, 2 low-income units, and 24 very low-income units.</i></p>	<p>The City will update the status of restricted units in 2014 as part of the update to the Housing Element.</p> <p>During the 2015-2023 a total of 113 affordable units at nine properties are at risk of converting to market-rate housing.</p> <p>During the reporting period staff met with several existing property owners and developers to initiate discussion about either extending existing affordability controls that are due to expire or purchasing new affordability controls on existing market rate units to conserve existing affordable housing opportunities within the City.</p>	<p>This action is included in the 2015-2023 Housing Element to reflect an updated inventory of affordable housing and units at risk of converting to market-rate housing.</p>
<p>Action H.4.15 Explore Options for Senior Assistance Programs</p> <p>Explore program revisions and potential new programs aimed at providing assistance to seniors that would allow them to live independently and age in their homes. The potential assistance program(s) may be an offshoot of or include revisions to the existing Residential Rehabilitation Loan Program, which provides grants and low-interest loans to qualifying households.</p> <p><i>Target: 2011.</i></p>	<p>Due to the City's financial circumstances and the State's elimination of the City's Redevelopment Agency, local funding for a residential rehabilitation loan program is not available. The City did issue and inspect more than 300 residential rehabilitation projects during the reporting period. The City also administratively reviews residential modifications intended to improve access for seniors and/or physically disabled individuals.</p> <p>The Residential Rehabilitation Program can assist income-eligible seniors when funds are available. The City will continue to explore funding sources.</p>	<p>This action is included in the 2015-2023 Housing Element. In addition, through Action H.1.2 and Action H.4.2, the City will encourage the development of senior housing.</p>

HOUSING

Evaluation and Review of Housing Programs

2007-2014 Implementation Program	Accomplishments	Continued Appropriateness
GOAL H.5 ENERGY-EFFICIENCY, CONSERVATION, AND SUSTAINABLE RESIDENTIAL DEVELOPMENT		
Support energy-efficient design and building practices in order to reduce housing utility expenses, minimize adverse environmental impacts, and provide for sustainability.		
Action H.5.1 Energy & Water Conservation Support and publicize energy and water conservation programs, such as PG&E's SmartAC, ClimateSmart, and Energy Partners Programs, which provide assistance for energy conservation improvements as well as EBMUD Residential Conservation Rebates and Programs. In cooperation with PG&E, EBMUD, and other utility providers, the City will promote citizen awareness of energy conservation programs in concert with rehabilitation loan programs. Further, the City will implement water efficient landscaping requirements for new residential development. <i>Target: 15 very low and low-income units provided energy conservation improvements under the Residential Rehabilitation Program between 2007 and 2014.</i>	Information about state and regional water and energy conservation is available at City Hall and on the City's website. The City issued building permits and conducted final building inspections for 65 residential solar energy installation projects during the reporting period. The City also refers members of the public to the EBMUD and PG&E web sites for detailed information about water and energy conservation programs provided by these utility service providers.	This action is included in the 2015-2023 Housing Element.
Action H.5.2 Energy Efficiency Investigate sliding-scale building permit fees with rebates and/or expedite permit review for high-performance green buildings and higher fees for conventional residential construction. <i>Target: 2011.</i>	The updated Zoning Code, adopted in 2010, includes provisions for development standard flexibility when projects exceed minimum building standards approved by the California Building Standards Commission and the City of Pinole. The City has approved limited use of grey water systems to enhance water conservation when requested. No incentive requests were received during the reporting period.	This action is removed from the Housing Element.
Action H.5.3 Green Building Ordinance Develop a Green Building Ordinance to promote use of renewable energy, improve air and water quality, and conserve water and other natural resources. <i>Target: 2011.</i>	The City adopted the California Green Building requirements in 2012 to foster green building in new construction within the City.	This action is completed and is not included in the 2015-2023 Housing Element.

HOUSING

APPENDIX C. HOUSING OPPORTUNITY SITE OWNERSHIP

The following table provides ownership information as of July 2014 for the Housing Opportunity Sites identified for potential rezoning in the Housing Opportunities section of this Housing Element. Please see Table 6.43 and Table 6.44 for additional information about identified Housing Opportunity Sites. The Map Reference Numbers correspond to the parcels identified in Figures 1A and 1B.

Map Ref. No.	APN	Location	Owner

APPENDIX D. HOUSING ISSUES REPORT

The full Housing Issues Report is appended on the following pages.

City of Pinole Housing Issues Report

A. Purpose of Issues Report

The need for adequate housing will intensify in the San Francisco Bay Area, while state and federal resources remain severely limited. Preparation and adoption of the City of Pinole General Plan 2015-2023 Housing Element provides decision-makers a timely opportunity to anticipate future needs in the City and to identify priorities resulting from a new profile of age groups and the potential funding sources. This Issues Report introduces the changing needs in the City and highlights opportunities to address them.

B. What Is the Housing Element and Why Are We Updating It Now?

The State of California identifies the provision of decent and affordable housing for every Californian as a statewide goal. To that end, every jurisdiction in California must prepare a Housing Element that identifies and addresses the housing needs in its community. The Housing Element must be updated every eight years on a schedule set by state law. The Housing Element for the City of Pinole will cover the planning period of January 31, 2015 through January 31, 2023. The deadline for adoption of the updated Housing Element is January 31, 2015.

1. Housing Element Requirements

Pursuant to State Housing Element law (Section 65580) of the Government Code, the Housing Element must contain local commitments to:

- Provide sites with appropriate zoning and development standards and with services and facilities to accommodate the jurisdiction's Regional Housing Needs Assessment (RHNA) for each income level.
- Assist in the development of adequate housing to meet the needs of low and moderate income households.
- Address and, where appropriate and legally possible, remove governmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities.
- Conserve and improve the condition of the existing affordable housing stock.
- Promote housing opportunities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability.
- Preserve the affordability of assisted housing developments for lower income households.

The Housing Element is an integral component of Pinole's General Plan and one of the two General Plan elements that must be reviewed for compliance with State law by a State agency.¹

¹ The State General Plan law mandates seven elements: Land Use; Circulation; Housing; Conservation; Open Space; Noise; and Safety. The Housing Element and Safety Element are the only two elements that must be reviewed by a State agency for compliance with State law.

The State Department of Housing and Community Development (HCD) is responsible for reviewing the Housing Element for compliance.

2. Regional Housing Needs Allocation (RHNA)

The RHNA is a key component of the Housing Element requirement. RHNA represents the City's share of the region's overall housing needs, as assigned by the Association of Bay Area Governments (ABAG). The RHNA is divided into four income categories as follows:

	Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
RHNA	80	48	43	126	297
% of Total	26.9%	16.2%	14.5%	42.4%	100.0%

The RHNA is a planning goal, not a production obligation. The City is only required to demonstrate where, under the City's land use policy and zoning, adequate sites would be available to accommodate the RHNA.

C. Initial Public Outreach Efforts

Members of the Pinole community, especially those who live in the City or those who own residential properties in the City, help identify and clarify local housing needs and opportunities from their particular standpoints. The City of Pinole website hosted an electronic survey for residents who are renters, residents who are homeowners, and property owners of rental property. Hard copies of the survey were also available at City Hall, the Safety Building, the Youth Center, the Senior Center, and the Pinole Library. The survey was available from February 8 to June 30, 2014. Results of the survey provide one picture of housing issues in the City. Telephone interviews gathered more detailed comments from a variety of people with specific professional interest in the community, including service providers for seniors and people with disabilities, real estate professionals, and affordable housing developers. The results both of the online survey and of the telephone interviews are summarized below.

1. Summary of Survey Results

a. Who Responded?

You are:	Response Percent	Response Count
A renter in Pinole	14.8%	9
A homeowner in Pinole	82.0%	50
An owner of rental properties in Pinole	3.3%	2

b. Renters

How well is the property you rent being maintained?	Response Percent	Response Count
Very well maintained. Property maintenance and repair needs are addressed quickly.	0.0%	0
Well maintained. Property maintenance and repair needs are addressed.	62.5%	5
Not well maintained. Property maintenance and repair needs sometimes are not performed.	37.5%	3
Poorly maintained. Property maintenance and repair needs usually are not performed.	0.0%	0

c. Owners

About how much do you spend annually on property maintenance, repair, or improvement work?	Response Percent	Response Count
Under \$1,000	11.4%	5
\$1,000 - \$5,000	59.1%	26
\$5,001 - \$10,000	27.3%	12
Over \$10,000	2.3%	1

What, if any, major housing repair or improvement work is planned over the next five years (check all that apply)?	Response Percent	Response Count
Interior Remodel (e.g. bathroom or kitchen remodel)	44.1%	15
Roof Replacement	41.2%	14
Water Heater / Furnace Replacement	26.5%	9
Solar Panel Installation	26.5%	9
Exterior Remodel (e.g. window or siding replacement)	23.5%	8
Home Expansion	5.9%	2
Other (please list)		7

The other repairs identified by respondents include: fence, windows and insulation, sewer line, and other kitchen/bathroom repairs.

d. Overall Housing Needs

Ranking of housing challenges (from greatest need to least need):	Ranking
Housing Condition and Property Maintenance	1
Neighborhood Physical Condition (such as streetlights, sidewalks, etc.)	2
High Housing Cost	3
Supply of New Housing For Sale	4
Supply of New Housing to Rent	5

Other housing challenges identified include: property maintenance (blight and trees), parking, a limited inventory of homes for sale, school district, and high property taxes.

Groups with greatest housing needs (from most in need to least in need):	Ranking
Seniors	1
Young adults	2
Persons with Disabilities	3
Large Households (five or more members)	4

Other groups identified include: married couples with children and singles (including widowed and divorced).

Ranking of adequacy of housing supply (from least adequate to most adequate):	Ranking
Housing for the Homeless	1
Senior housing	2
Housing for persons with disabilities	3
Rental apartments	4
Townhomes and condominiums	5
Single family homes	6

Ranking of housing programs and activities (from most important to least important):	Ranking
Housing Rehabilitation Assistance for Homeowners	1
Housing for Seniors	2
First Time Homebuyer Assistance	3
Code Enforcement	4
Rental Housing Rehabilitation	5
Accessible Units for Persons with Disabilities	6
Affordable Housing Development	7
Housing for the Homeless	8
Housing Discrimination and Tenant / Landlord Dispute Resolution	9

2. Summary of Key Comments from Telephone Interviews

A variety of professionals who are involved either directly with housing or indirectly as service providers participated in telephone interviews that inform this report. All of them have responsibilities in Pinole specifically or within the East Bay area.

a. Service Providers for People with Disabilities and Seniors

The following agencies participated in the telephone interviews:

- Eden Council for Hope and Opportunity (ECHO Housing)
- Disabled People's Recreation Center
- Cole Vocational Services
- Pinole Senior Center

Persons with Disabilities: According to the 2008-2012 American Community Survey, 14 percent of all Pinole residents have one or more disabilities. The majority of residents with disabilities were between the ages of 18 and 64 (53 percent) and 45 percent were seniors. Data obtained from the State Department of Developmental Services indicate that approximately 123 Pinole residents were being assisted at the Regional Center of the East Bay, as of January 2014. Among the adults with disabilities (18-64 years of age), cognitive and ambulatory difficulties were most prevalent. Within the senior disabled population, ambulatory and independent living difficulties were the most prevalent.

Service providers for people in Pinole with disabilities emphasized that many of their clients are unable to find suitable affordable rental housing, especially lower-income housing for seniors, and that clients often face issues with reasonable accommodation. Those with serious disabilities benefit greatly from apartments with supportive services, including staff to monitor the condition of residents and to provide not only assistance to the residents themselves but also services to support residents' family members. It is important, one provider emphasized, that various agencies coordinate their respective program efforts and that those working among people with disabilities be sensitive to their needs, with no attempt to take advantage of those they are assisting.

Seniors: The housing needs of seniors often change when they are past the age of 70 years. Though many would prefer to stay in their homes, without a spouse to share the costs and chores, managing a house becomes more difficult. Often seniors move from their homes to be closer to family members, especially their children. Of those at the Pinole Senior Center, roughly one-half have family members living in the area, making housing alternatives within the City more attractive. However, for some, senior-only facilities carry a stigma they resist. Convenient access to health care, shopping, appropriate recreation and social settings becomes increasingly important as mobility is limited.

b. Real Estate Professionals

Representatives from the following real estate agencies participated in the telephone interviews:

- Coldwell Banker Real Estate, Pinole Branch
- Security Pacific Real Estate Brokerage, Richmond Branch

Pinole Advantages: Pinole is a community with many advantages for homebuyers, according to four real estate professionals who list homes and assist potential buyers in the area:

- The City has a supply of single-family homes at comparatively affordable prices, while also offering a reasonable commute distance, especially to employment in Richmond and the Oakland area.
- As an incorporated city, Pinole provides public services of higher quality than the services in unincorporated county communities.
- Single-family parcels are somewhat larger than sites in some neighboring communities, and the "city is open at the edges."
- Shopping amenities are now an attraction, especially those that have been added along Fitzgerald Drive or Pinole Valley Road such as Trader Joe's.
- The WestCAT bus system provides direct access to BART for workers who would prefer to commute by rail.

- Weather in Pinole is both cooler than the heat to the east and warmer than the dampness right on the Bay.

Potential Buyers: There are three typical groups of buyers for homes in Pinole:

- Many of the potential homebuyers are people in the late 20s through late 30s. Prices between \$300,000 and \$400,000 are comparatively affordable for many first-time buyers. (The median price of a single-family home in Pinole was \$375,000 during March 2014.)
- A much smaller group of buyers includes those moving up from their first homes.
- Investors have been purchasing single-family houses in Pinole to hold and rent, because through last year some considered the properties undervalued (estimated at 60 percent of 2005 values) in the recovery from late last decade.

Seniors, however, appear to have few options for remaining in Pinole if they choose to leave their homes, and there is movement to Central Valley communities for lower prices, health care, and access to families.

Issues: Certain issues do discourage potential buyers from locating in Pinole, especially young families with children.

- All of the real estate professionals who discussed the opportunities in Pinole also spoke about perceptions of the West Contra Costa Unified School District (WCCUSD). The quality of education, or at least the perception of education, varies in different parts of the WCCUSD service area. Certain schools in the district are considered superior, and a number of families have relocated, often paying higher prices for housing, near those schools. The pending rebuilding of Pinole Valley High School may improve the public perception of WCCUSD in Pinole.
- For potential homebuyers near the moderate-income range, financing has been more difficult than it was a decade ago.

c. **Developers of Affordable Housing**

Two representatives of the following housing development companies discussed Pinole as a potential location for new affordable housing projects, either for families or for seniors.

- Domus Development
- EAH Housing

Factors that Influence Development Decisions: Based on conversations with developers, the following are some considerations when selecting localities/sites for development:

- **Site Selection:** Both developers emphasized the selection of sites where a potential project might compete successfully for state or federal funding. Because state and federal funding programs have been reduced, competitive opportunities are more crucial than in earlier years. In the new fiscal environment, transit access brings much greater potential for competitive funding. Shopping destinations and other amenities that support reduced use of automobiles must accompany access to transit. Frequent, accessible bus service, especially when it connects with rail, is necessary for the project that competes successfully to receive state or federal funding in some key programs.

- **Layering of Funding:** Development of affordable housing projects now requires funding from multiple programs. Following dissolution of the redevelopment agencies, use of federal tax credits has become more crucial and is a common component of the total funding for successful projects.
- **Lot Size and Site Control:** Affordable projects with onsite management in the west Contra Costa County area typically require at least 50 to 60 units. The availability of city-owned parcels facilitates development but is not necessary.
- **Active City Participation:** Affordable housing developers seek cities that will take an active role. In some cases, the developer is prepared to see itself as a “partner” to the city, a role that was common prior to the dissolution of the redevelopment agencies but still remains possible now. As partner, the developer becomes the intermediary for development of the city’s priorities and looks to the city for direction on design and other aspects of the projects. In other situations, the developer will acquire the site and proceed through the review and approval process, with less active support from the city. However, in both cases the probability of success is greater when the city can streamline the process by educating constituents about the value of the project, utilize appropriate CEQA exemptions, and support use of state density bonus law provisions, including significant development incentives.

Opportunities: Pinole holds opportunities for affordable housing development, because there are sites within the City that offer both transit access and other amenities. The City’s specific competitive strengths: Its Bay Area location, direct transportation access along Interstate 80, its charm, the mix of people, and proximity to job centers. Though the city tends to lack strong neighborhood centers and walkability, recent efforts indicate progress toward developing both attributes.

Constraints: Mixed-use development may occur in some newly zoned parcels, but mixed-use projects with affordable units are unlikely, unless the City can itself provide funding for the cost of the non-residential floor area. The income stream from the non-residential component of most mixed-use projects is highly uncertain, so financing usually depends solely on the residential units, not on the non-residential area. In addition, construction for ground-floor non-residential uses tends to increase costs significantly. However, for seniors, projects that include a suite of supportive services, as well as affordability, serve a necessary role in meeting residents’ needs.

D. Implications of Demographic Changes - the New Age Profile

The demographics of a community to a large extent determines its housing needs. During the upcoming Housing Element planning period, the primary demographic issue will be unprecedented change in the age group profile. The changing pattern in Pinole will be somewhat more pronounced than the changes that will characterize California as a whole. Changes in the age profile between Census 2000 and Census 2010 foretell many of the changes Pinole residents will see during the Housing Element planning period out to 2023.

Between 2000 and 2010, Pinole’s total population dropped slightly, by 3.4 percent from 19,039 residents in 2000 to 18,390 in 2010. However, the overall age profile shifted. Specifically, the number of residents in the younger age groups decreased while the number of older residents increased in equally significant rates:

- Young Children (0-14 years): Dropped 23.4 percent
- Young Adults (20-29 years): Rose 18.5 percent
- Adults (35-44 years): Dropped 33.0 percent
- Adults (55-64 years): Rose 40.0 percent
- Seniors (62+ years): Rose 20.9 percent
- Seniors (65+ years): Rose 16 percent

Growth in the number of adults between 55 and 64 years of age highlights the rapid, large, and sustained increase that Baby Boomers (born 1946-1964) will bring to the senior population 65 years of age and older. Overall, the median age in Pinole rose by nearly four years, from 38.7 years of age in 2000 to 42.6 in 2010.

The following figure shows the distribution of different age cohorts as a percentage of the total population in 2000 and 2010. As shown, in 2000, those aged 55 and above comprised 23.1 percent of the total population. By 2010, 30.5 percent of the City's residents were aged 55 and above. In contrast, residents aged 19 or younger comprised 27.6 percent of the City's population in 2000 but only 23.4 percent of the 2010 population.

Percent of Population by Age Group (2000 and 2010)

Pinole's aging population will alter the mix of housing the City needs, if it is to accommodate its aging population and to prepare for further change in the decade after 2020. The housing needs of three groups are especially important: young families, seniors, and people with disabilities.

1. Fewer Young Families in the City

There are several reasons why young families can consider Pinole an attractive location to live. However, the actual numbers of children and of adults at parenting age dropped during the decade between 2000 and 2010. Specifically, the number of family households with children under the age of 18 decreased 20 percent. In part, this change reflected a pattern in the general population, which was evident in Contra Costa County as well as in Pinole. But the numbers of children, especially younger children, and adults at parenting age dropped more sharply in Pinole than in the County as a whole.

- In Contra Costa County the population of children 0-14 years of age declined from 22.3 to 20.4 percent of the total between 2000 and 2010. For Pinole, the percentage of children declined from 20.4 percent to 16.2 percent of the City's total population.

- For the age group that is most likely to have children at home, the population total fell by one third. Between 2000 and 2010, the number of adults ages 35-44 dropped from 3,298 to 2,209.

The sharp decrease in the number of families with younger children likely has several causes, including:

- Cost of housing and the difficulty of financing for younger adults who face problems getting established financially;
- Comparatively small numbers of homes available for sale during and immediately following the recession;
- Economic uncertainties for those who desire to purchase a home;
- Considerations of housing cost in relation to access to employment;
- Perceptions of public schools in the West Contra Costa Unified School District, including some schools in Pinole specifically.

2. More Seniors and Housing Options to Age in Place

Almost one third (31 percent) of all households in Pinole included one senior or more, age 65 or older, in 2010. Increases in the number of seniors will likely accelerate during the next decade. As with the number of young families, the changing share of seniors reflects a widespread pattern that is more pronounced in Pinole.

- The percentage of Pinole seniors exceeded the percentage for Contra Costa County in 2010: Pinole - 19.4 percent of population was 62 or older, 15.5 percent was 65 or older; Contra Costa County - 15.7 percent of population was 62 or older, 12.4 percent was 65 or older.
- A higher percentage of rental units in Pinole (17.5 percent) were home to householders 65 or older than in Contra Costa County as a whole (12.6 percent).
- The number of people 65 and older will grow very quickly during the planning period. In Pinole the 2010 population of those 55-64 years of age was almost as large as the number of all those 65 and older combined. In 2010, 2,868 Pinole residents were 65 or older; 2,736 residents were 55-64 years of age.

Living on retirement incomes will affect this large share of Pinole's population in several ways:

- Lower incomes will limit mobility for some, including the options either of moving to senior facilities that provide assistance for those with age-associated physical and mental disabilities or to rental housing, which requires less maintenance by the occupant than owner-occupied single-family homes.
- Seniors will need home improvements to accommodate physical disabilities but may not have adequate income to pay for installation.
- Transportation options will be restricted by financial and physical limitations.

The senior population that remains in single-family homes as owner-occupants will set the stage during the next eight years for a turn-over of housing ownership after 2020. As older Baby Boomer homeowners reach age 70 and beyond, they will be increasingly likely to sell their

homes. As a result, homes will become available after 2020 in much greater numbers. In fact, the inventory for sale is likely to exceed the number of potential buyers. As a result, the quality of a neighborhood and the City's community life will become considerably more important for determining value in the new "buyers' market." The sale of seniors' homes will have a major effect on the economic and demographic characteristics of the City during the decade following 2020.

In the meantime, attracting young families to Pinole as homebuyers may be unusually difficult. The number of potential buyers is limited by the size of the Gen X cohort, now in their late 30s and 40s, and the financial difficulties facing many of those in the next generation, now in their 20s and early 30s.

3. Persons with Disabilities (Including Seniors)

Approximately 14 percent of the City residents have one or more disabilities, and 45 percent of these disabled residents are seniors. Among the disabled population, residents are most frequently affected by independent living difficulties (57 percent), ambulatory difficulties (47 percent), and cognitive difficulties (45 percent). Specifically, 65 percent of the City's senior and disabled residents are impacted by ambulatory difficulties.

Almost 80 percent of the City's housing stock is comprised of single-family homes, and 90 percent of the City housing stock was constructed prior to 1990 - prior to the passage of the American with Disabilities Act (ADA). This means that most homes in Pinole were not subject to the requirements of ADA and are not accessible to persons with disabilities.

E. Affordable Housing Units at Risk of Converting to Market Rate

A large share of Pinole's publicly assisted affordable housing will be at risk during the next four years. Pinole's inventory of housing includes 434 units of assisted rental housing, with restrictions limiting their use to people at moderate-income, low-income, or very low-income levels.

Of this total, 113 units (all funded with Redevelopment Agency assistance) are subject to agreements that will expire sometime before the end of 2017, during the planning period of the 2015-2023 Housing Element. The affordability agreements on two projects (with two low-income units) will expire during 2014. The agreements on another three projects (including six moderate-income units, one low-income unit and one very low-income unit) will expire during 2015. And, finally, agreements at an additional four locations (with 80 moderate-income units and 23 very low-income units) will expire in 2017.

F. Funding Resources

1. Available Funds

With the dissolution of Redevelopment, the City has limited funds available for affordable housing. In the foreseeable future, the following noncompetitive funding resources are available to the City:

- ERAF: The amount of ERAF funds, if any, that may be available to the City is yet to be determined.

- Community Development Block Grants (CDBG): The City is part of the regional housing consortium for CDBG funds where the funds are administered by Contra Costa County and applied for on a competitive basis. The consortium receives approximately \$3.0 million in CDBG funds annually for a consortium that covers 14 cities and the unincorporated County areas.

2. Funding programs

In the absence of Redevelopment Agency funding, alternatives will be necessary if strategic priorities are to be funded. Several competitive programs may be appropriate to the City:

- State Infill Infrastructure Grant (IIG) Program
- Federal Low Income Housing Tax Credits (LIHTC, at 9 percent)
- ABAG Priority Development Areas
- State Local Housing Trust Fund Program

a. HCD Infill Infrastructure Grant Program (IIG)

Purpose: Assist in the new construction and rehabilitation of infrastructure that supports higher-density affordable and mixed-income housing in locations designated as infill.

Eligible Uses: New construction, rehabilitation, and acquisition of infrastructure required as a condition of or approved in connection with approval of an infill project. Eligible applicants include non-profit and for profit developers and as a joint applicant with the developer, a locality or housing authority.

Applicability to Pinole: One developer interviewed for this issues report identified the Infill Infrastructure Grant program as one of the most viable funding sources of affordable housing development to Pinole. HCD awarded Round 3 of the IIG earlier this year. Unused funding from Round 3 may be available for a Round 4 later in 2014, if legislature authorizes Round 4. Additional money is also considered a possibility. Projects located within one half mile of a transit station (including a bus hub) or a major transit stop would be more competitive.

b. Low Income Housing Tax Credits (LIHTC)

Purpose: Provide dollar-for-dollar tax credit for affordable housing investments. LIHTC accounts for the majority - approximately 90 percent - of all affordable rental housing created in the United States today.

Eligible Uses: Projects that rent-restrict at least 20 percent of the units as affordable to households with incomes up to 50 percent of Area Median Income (AMI), or projects that rent-restrict at least 40 percent of the units as affordable to household with incomes up to 60 percent of the AMI.

Applicability to Pinole: The LIHTC program is often used in conjunction with a TOD grant as additional points are awarded to the TOD project (when evaluating the competitive applications). Senior projects and projects for special needs populations (such as persons with disabilities) also receive additional points.

c. ABAG/One Bay Area Grant (OBAG) Program

Purpose: The \$320 million OneBayArea Grant (OBAG) Program is a funding approach that better integrates the region's federal transportation program with California's climate law (Senate Bill 375, Steinberg, 2008) and the Sustainable Communities Strategy. Funding is targeted toward achieving local land-use and housing policies. For Cycle 2 (FY 2012-2013 through FY 2015-2016), approximately \$2.75 million was allocated for Contra Costa County jurisdictions out of \$20 million for Local PDA Planning in all counties. No more funding would be available until after FY 2015-2016.

Eligible Uses: Eligible projects are transportation improvements to support the development of the Priority Development Areas (PDAs).

Applicability to Pinole: San Pablo Avenue, portions of Pinole Valley Road, and Appian Way are within the City of Pinole PDAs.

d. HCD Local Housing Trust Fund

Purpose: To provide a dollar-for-dollar matching grants to local housing trust funds that are funded on an ongoing basis (for at least five years) from private contributions or public sources that are not otherwise restricted in use for housing programs.

Eligible Uses: Loans for construction of rental housing projects with units restricted for at least 55 years to households earning less than 60 percent of area median income, and for downpayment assistance to qualified first-time homebuyers.

Applicability to Pinole: One of the requirements for the matching fund is that an application for a new housing trust fund would not be considered by HCD unless HCD has received adequate documentation that the applicant has adopted a legally binding commitment to deposit matching funds into the new trust. The City owns one property (PALC property) that if sold, could generate money for deposit into a housing trust fund. Matching funds from sources other than impact fees on residential development will receive priority for allocation. But the minimum matching requirement is \$500,000 for a new trust fund.

To sustain the housing trust fund over time, the City could also consider new funding sources. Potential sources of funding used by other local jurisdictions include:

- | | |
|--------------------------------------|---------------------------------------|
| • General Funds | • Real Estate Transfer Taxes |
| • Impact Fees | • Real Estate Document Recording Fees |
| • Hotel Occupancy Taxes | • Sales Taxes |
| • Condominium Conversion Fees | • Inclusionary In-Lieu Fees |
| • Government General Obligation Bond | • Permit Fees |

HCD recently issued the Notice of Funding Availability (NOFA) for the Local Housing Trust Fund for \$8.1 million. HCD will begin accepting application for the funds beginning May 21, 2014. Discussions with HCD staff indicate that HCD expects the \$8.2 million to be oversubscribed and fully awarded by the end of May. It is not yet know if and when future rounds of funding would be available.

G. Policy Priority Options

Based on the demographic and market trends discussed above, the limited availability of housing funds, the City will need to consider prioritizing the use of available funds and staff resources. Options for focusing resources that would be appropriate for Pinole are discussed below.²

1. Housing Types

a. Senior Apartments/Assisted Living

Rental apartments and assisted living facilities offer seniors an alternative to maintaining ownership housing and the maintenance expenses. Especially for seniors living on Social Security and small pensions, alternatives without home maintenance and improvement costs will permit a move to housing that is more manageable financially. There is a shortage of rental housing, however, whether for seniors or for younger households, so rents for well-managed units tend to rise beyond the means of many seniors.

For some seniors, housing facilities that provide regular meals and daily assistance with living activities, including hygiene, is necessary. The routines that were readily maintained in earlier life become more challenging, and some seniors require assistance when disabilities develop if they are to stay reasonably healthy.

b. Family Apartments

About 30 percent of the households in Pinole live with an income that is less than 80 percent of the County median. Frequently, the result is that families pay a disproportionate share of their income for housing, with the result that other basic needs are not adequately addressed. In other case, units are overcrowded.

2. New Construction of Housing

New construction of affordable housing expands the City's affordable housing stock and offers long-term affordability controls based on the funding sources. These units typically remain affordable for at least 30 to 55 years, if not longer. New construction of affordable housing is costly, however. Multiple layers of funding, including local contributions, are required to make a project financially feasible.

Many factors go into determine the gap financing needed, such as whether tax credits are available, land costs, infrastructure improvements needed, etc. According to Domus, in general, the cost to subsidize a new senior unit is between \$50,000 and \$75,000 if 9 percent tax credits are used. The subsidy required for a family unit is closer to \$100,000. If bonds or 4 percent tax credits are used, the average per-unit subsidy is approximately \$150,000 to \$175,000.

² The cost estimates provided in this report are generalizations intended only to establish an order of magnitude. These estimates by no means represent the exact levels of subsidies. Market conditions, project locations, amenities, and building conditions, among other factors, influence the subsidies required.

3. Acquisition/Rehabilitation of Existing Rental Housing

Another option to creating long-term affordable housing is by acquiring existing apartments and converting them to affordable units. This option is usually more cost-effective, although the costs may also vary significantly depending on the condition of the buildings. An older development may require rehabilitation but would command a lower market price.

For example, a 53-unit apartment (built in 1965) in Pinole was sold in 2011 for \$4.25 million (approximately \$80,000 per unit). If this project were to be converted to affordable housing, the level of subsidy required would be less given that ongoing rent income would be able to support a portion of the mortgage.

4. Acquisition/Rehabilitation of Foreclosed Homes

Another option for converting existing market-rate housing to affordable housing is to purchase foreclosed properties and resell them to low and moderate income first-time homebuyers. Foreclosed homes in Pinole have a wide price range, from approximately \$100,000 to over \$500,000, with a median price of \$302,814.³ The upfront costs for such program would be high for the City to purchase the units and make necessary repairs and improvements before reselling the units to low and moderate income first-time homebuyers. The City would get a significant portion of the purchase price back when the units are sold. Overall subsidy would be similar to implementing a first-time homebuyer program (discussed below).

5. Housing Rehabilitation Loans

Close to 90 percent of the City's housing stock was constructed more than 30 years ago, suggesting a significant portion of the housing would require rehabilitation and upgrading over time. Some owners fail to maintain their residential properties for a variety of reasons. In many cases, owners desire to make the major investments (e.g., for replacing a roof or painting the exterior) that are sometimes necessary but do not have the financial resources. Programs to assist with those investments create opportunities for owners, especially the owners of single-family homes, to avoid major deterioration of their properties.

According to the survey, most homeowners anticipate major repairs such as roof replacement and kitchen/bathroom upgrades in the next five years. Residents of Pinole currently can apply to the Contra Costa County for a housing rehabilitation loan of up to \$50,000. Two types of loans are available, based on income: 1) 3 percent interest with monthly payment for 15 years; or 2) 0 percent interest with no monthly payment and reviewed every 15 years for extension. However, funding for this program is limited. The County only plans to provide 25 loans in FY 2014-2015 for the entire County (excluding Pittsburg and Richmond).

If the City were to operate its own loan program, the administration costs should be taken into consideration. Usually a 20 percent markup is considered reasonable for loan documents, eligibility verification, inspection, and monitoring, etc. The City may consider structuring the loan programs similar to Contra Costa County, with the 0 percent interest option reserved for senior households that require rehabilitation works beyond emergency repairs (discussed below).

6. Seniors - Emergency Repairs, Accessibility Improvements

Seniors in single-family homes often face not only the costs of maintenance and repairs but also the need for accessibility improvements to allow them to remain in their homes. Ramps, appropriate bathroom facilities, and new household fixtures may be necessary for some seniors, if they are to carry on basic daily activities, including personal hygiene. For seniors, a small grant may be more appropriate than loans. With limited incomes, many seniors are uncomfortable with the idea of incurring additional debts.

Most communities that provide grants limit the assistance to seniors and persons with disabilities. A typical grant amount is up to \$10,000 for emergency repairs and ADA/accessibility improvements. Grants are usually easier to administer, compared with loans.

7. Homeownership Assistance

Households at the upper end of the moderate-income level (i.e., closer 100 to 120 percent of the County median income) are generally able to afford the monthly mortgage to purchase a home in the City. However, many have difficulty getting financing or coming up with the downpayment assistance. Therefore, most homebuyer assistance programs target first-time homebuyers.

Prior to the dissolution of redevelopment, many communities across the State provided homebuyer assistance programs because redevelopment funds can reach households with moderate incomes (up to 120 percent Area Median Income). Federal programs limit assistance to lower income households (up to 80 percent AMI), which require a deeper level of subsidies. As a result, many communities have since suspended their homebuyer assistance programs. For a median priced home in Pinole of \$330,000, a low income household would still require a silent second loan of \$80,000, assuming they can come up with a 10 percent downpayment of \$33,000. Many first-time homebuyer programs provide assistance between \$50,000 and \$150,000.

The overall administration costs associated with first-time homebuyer programs are also significant, considering legal and escrow fees, preparation of loan documents, and ongoing implementation/monitoring of resale provisions and equity sharing, etc.

8. Preservation of Affordable Units At-Risk of Converting to Market Rate

Over the next ten years, 113 units will be at risk of becoming unrestricted due to the expiration of the affordability covenants. (In fact these units are at risk over the next four years). City staff is exploring options for preserving affordability with new or renewed agreements and subsidies to extend affordability of at least a portion of the units. Often, a lump sum subsidy may be used to incentivize renewal of affordability covenants.

The level of subsidies depends largely on the targeted income groups, the differences between market rents and rent limits under the City's BMR program, and the length of affordability control desired. For very low and low income households, based on current rent limits and market rents in Pinole, an average annual subsidy of up to \$5,000 per unit may be required. The present value of this kind of subsidy over a 30-year period is approximately \$100,000.

9. Transportation Improvements - Housing Near Transportation

Affordability is an issue not only of the cost of housing itself but also of the transportation costs associated with the housing location. For many seniors especially, alternatives to a personal automobile make the difference between meeting daily needs and remaining isolated. For projects competing for State affordable housing funds and LIHTC, locations with ready access to transit and to the amenities that serve daily needs are critical, whether those projects are designed for seniors or for younger residents.

Option	Household Type	Financial Impact				Housing Needs			
		Low	Moderate	High	Generate Program Income?	Implementation Cost	Expand Supply of Affordable Housing	Enhance Affordability	Enhance Quality
