Pembroke Pines, Florida 33084

Subject: Phase I Environmental Site Assessment
830 San Pablo Avenue
Pinole, California 94564
AEI Project No. 467803

Dear John Diemer:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (804) 971-0037 or ndriskill@aeiconsultants.com.

Sincerely,

A handwritten signature in blue ink that reads "Nikki Driskill". The signature is written in a cursive, flowing style.

Nikki Driskill
Senior Business Development Manager
AEI Consultants

PROJECT SUMMARY

830 San Pablo Avenue, Pinole, Contra Costa County, California 94564
AEI Project No. 467803

REPORT VIABILITY

Report Viability Dates per ASTM E1527-21

Site Visit	August 30, 2022
Regulatory Database Review	August 15, 2022
Interview(s)	Property Owner: N/A Key Site Manager: August 30, 2022
EP Declaration	September 2, 2022
Lien Search (if conducted by AEI)	N/A
Report Viability per ASTM E1527-21	February 11, 2023

The dates listed are required for Users who are using the report in connection with CERCLA liability protections. The User may have their own criteria when the report is being used for business risk purposes, and not CERCLA liability protections.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by GRP Shores, LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 830 San Pablo Avenue, Pinole, Contra Costa County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	830 San Pablo Avenue, Pinole, Contra Costa County, California 94564
Property ID (APN or Block/Lot)	402-230-022, 402-230-020, 402-230-018, 402-230-017, 402-230-016, 402-230-015016, and 402-230-015
Location	North side of San Pablo Avenue
Property Type	Vacant Land
Site and Building Information	
Approximate Site Acreage/Source	7.37/Assessor
Number of Buildings	N/A
Building Construction Date(s)/Source	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	None identified
On-site Occupant(s)	None identified
Current On-site Operations/Use	Vacant land
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	CPS-SLIC (x2), DEED, SWEEPS UST, HIST UST, LUST, CORTESE, ENF, HIST CORTESE, CONTRA COSTA CO. SITE LIST, CIWQS, CERS

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1939-1950	Undeveloped land	Aerial photographs
1958-1992	Vacant land utilized for vehicle storage/parking associated with a larger auto wrecking facility (850 San Pablo Avenue)	Aerial photographs, city directories, agency records
1998-Present	Vacant land (graded circa 2009) (830 San Pablo Avenue)	Aerial photographs, city directories, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Railroad tracks, followed by: Residence (648 Carlotta Circle)	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	Vacant land	
East	Residence (937 Scanlan Way) Bayside Apartment Homes (530 Sunnyview Drive) Apartments (560-580 Sunnyview Drive)	Yes; refer to Section 5.1
South	Multi-tenant commercial building (818-828 San Pablo Avenue)	None identified
West	Westside Concrete Materials (800 San Pablo Avenue)	Yes; refer to Section 5.1

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

FINDINGS

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- Based on a review of historical sources and agency records, the subject property and adjoining site to the south formerly operated as an auto wrecking facility between circa 1958 and 1992. Based on regulatory agency records and aerial photographs, the western portion of the subject property was utilized for vehicle storage and parking and was not developed with structures during this period of use; the western portion appears to have been largely unused and unimproved. The auto wrecking facility was formerly equipped with two 1,000-gallon gasoline USTs, one used to store new fuel and one used to store fuel removed from vehicles in preparation for wrecking. The former USTs were located on the south portion of the auto wrecking facility, approximately 500 feet south of the subject property (currently addressed as 812

San Pablo Avenue). A RAP was implemented in 2002 and consisted of the removal of approximately 1,000 cubic yards of impacted soil, purging of approximately 6,000 gallons of groundwater, and the addition of 500 lbs of Oxygen Release Compounds (ORCs) in the area of the former USTs. The site was granted closure with respect to the former USTs on June 25, 2002. A CPS-SLIC cleanup case was opened in 2002 for RWQCB oversight of the remediation of motor oil and lead-impacted soil remediation of a portion of the subject property and south surrounding sites resulting from historical auto wrecking/vehicle storage operations. This included an area of lead-impacted soil on the north portion of the subject property (see Figure 2). In 2002, a total of 2,800 tons of lead-impacted soil were removed to 2 feet bgs from an area of the subject property and an area on the south adjoining property. A No Further Action letter issued on December 23, 2002 notes that although confirmation soil samples indicated concentrations of lead below commercial/industrial ESLs, residual concentrations of lead above residential ESLs (255 mg/kg) remained in place. The CPS-SLIC cleanup case was granted closure by the RWQCB on December 23, 2002. The former auto wrecking facility site was subdivided into the three existing properties including the area of the subject property (830 San Pablo Avenue), the south adjoining property (818-828 San Pablo Avenue), and the southernmost portion of the site (812 San Pablo Avenue). A Covenant and Environmental Restriction was implemented at the site on December 13, 2002 restricting future use of the entire former auto wrecking facility to industrial, commercial, or office use, with no hospitals, schools, day care centers, or residences permitted. A Soil Management Plan was prepared on October 3, 2002 to present sampling and health and safety procedures to be implemented during site development or site modification that could disturb site soil. Based on the regulatory closure of the LUST and CPS-SLIC cases, remedial activities conducted to address lead-impacted soil at the subject property, and the presence of residual lead above 255 mg/kg (exceeding residential ESLs), the former auto wrecking operations represents a CREC.

As noted, residual lead impacts in the soil remain on the subject property. In the event that groundbreaking activities are pursued, construction personnel should be informed that the soil encountered could be contaminated. The contractor should employ appropriate worker safety and engineering controls to protect the health and safety of the construction crew and future occupants during any excavation activities. Furthermore, as may have been expressed during the issuance of regulatory closure and/or as a good faith practice, the User of this report should note that the applicable agency/agencies should be notified prior to commencing any future change in use and/or redevelopment of the subject property.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- AEI did not identify evidence of OECs during the course of this assessment.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21, of 830 San Pablo Avenue, Pinole, Contra Costa County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Adherence to the Covenant and Environmental Restriction and Soil Management Plan during redevelopment activities

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 830 San Pablo Avenue, Pinole, Contra Costa County, California ([Appendix A: Figures](#) and [Appendix B: Property Photographs](#)).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to [Section 6.3](#) for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- At the time of the site reconnaissance, the area of the subject property was covered with overgrown vegetation and therefore could not be directly observed. Based on the quality of information obtained from other sources and the nature of current property use, this limitation is not expected to significantly change the findings of this report.
- AEI requested an interview with the key site manager; however, the key site manager has not responded as of this report date. Based on the quality of information obtained from other sources, including a review of agency records, this limitation is not expected to alter the overall findings of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including a review of agency records, this limiting condition is not expected to alter the overall findings of this assessment.

1.6 DATA FAILURE AND DATA GAPS

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

AEI did not identify evidence of data failure during the course of this assessment.

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of GRP Shores, LLC . This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by GRP Shores, LLC on August 12, 2022. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

Property Information	
Site Address(es)	830 San Pablo Avenue, Pinole, Contra Costa County, California 94564
Property ID (APN or Block/Lot)	402-230-022, 402-230-020, 402-230-018, 402-230-017, 402-230-016, 402-230-015016, and 402-230-015
Location	North side of San Pablo Avenue
Property Type	Vacant Land
Site and Building Information	
Approximate Site Acreage/Source	7.37/Assessor
Number of Buildings	N/A
Building Construction Date(s)/Source	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	None identified
On-site Occupant(s)	None identified
Current On-site Operations/Use	Vacant land
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	CPS-SLIC (x2), DEED, SWEEPS UST, HIST UST, LUST, CORTESE, ENF, HIST CORTESE, CONTRA COSTA CO. SITE LIST, CIWQS, CERS

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	N/A The subject property is currently vacant land or lacks structures. Consequently, there are no on-site heating or cooling systems
Cooling System	N/A The subject property is currently vacant land or lacks structures. Consequently, there are no on-site heating or cooling systems
Potable Water	EBMUD (in the area of the subject property)
Sewage Disposal/Treatment	EBMUD (in the area of the subject property)

Utility source/system information listed in the table above was obtained during site reconnaissance and online, unless otherwise noted above.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial/residential area of Pinole, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Railroad tracks, followed by: Residence (648 Carlotta Circle) Vacant land	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	Residence (937 Scanlan Way) Bayside Apartment Homes (530 Sunnyview Drive) Apartments (560-580 Sunnyview Drive)	Yes; refer to Section 5.1
South	Multi-tenant commercial building (818-828 San Pablo Avenue)	None identified
West	Westside Concrete Materials (800 San Pablo Avenue)	Yes; refer to Section 5.1

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qoa: Dissected older alluvial gravel and sand, undeformed, age late Pleistocene/USGS and United States Department of the Interior
Soil Series: Description/Source	CoE—Cut and fill land-Millsholm complex: well drained, high runoff; and CkB—Cropley clay: moderately well drained, medium runoff/USDA Soil Survey
Groundwater Flow Direction/Source	North/Topographic map interpretation
Estimated Depth to Groundwater/Source	Between 9 and 26 feet bgs/Groundwater data on file for the subject property and south adjoining site (850 San Pablo Avenue), obtained from GeoTracker
Surface waters on the subject property or adjoining sites	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1939-1950	Undeveloped land	Aerial photographs
1958-1992	Vacant land utilized for vehicle storage/parking associated with a larger auto wrecking facility (850 San Pablo Avenue)	Aerial photographs, city directories, agency records
1998-Present	Vacant land (graded circa 2009) (830 San Pablo Avenue)	Aerial photographs, city directories, site observation

The following historical address was associated with the subject property: 850 San Pablo Avenue. This address was also researched as part of this assessment.

Based on a review of historical sources and agency records, the subject property and adjoining site to the south formerly operated as an auto wrecking facility between circa 1958 and 1992. Based on regulatory agency records and aerial photographs, the western portion of the subject property was utilized for vehicle storage and parking and was not developed with structures during this period of use; the western portion appears to have been largely unused and unimproved. The auto wrecking facility was formerly equipped with two 1,000-gallon gasoline USTs, one used to store new fuel and one used to store fuel removed from vehicles in preparation for wrecking. The former USTs were located on the south portion of the auto wrecking facility, approximately 500 feet south of the subject property (currently addressed as 812 San Pablo Avenue). A RAP was implemented in 2002 and consisted of the removal of approximately 1,000 cubic yards of impacted soil, purging of approximately 6,000 gallons of groundwater, and the addition of 500 lbs of Oxygen Release Compounds (ORCs) in the area of the former USTs. The site was granted closure with respect to the former USTs on June 25, 2002. A CPS-SLIC cleanup case was opened in 2002 for RWQCB oversight of the remediation of motor oil and lead-impacted soil remediation of a portion of the subject property and south surrounding sites resulting from historical auto wrecking/vehicle storage operations. This included an area of lead-impacted soil on the north portion of the subject property (see Figure 2). In 2002, a total of 2,800 tons of lead-impacted soil were removed to 2 feet bgs from an area of the subject property and an area on the south adjoining property. A No Further Action letter issued on December 23, 2002 notes that although confirmation soil samples indicated concentrations of lead below commercial/industrial ESLs, residual concentrations of lead above residential ESLs (255 mg/kg) remained in place. The CPS-SLIC cleanup case was granted closure by the RWQCB on December 23, 2002. The former auto wrecking facility site was subdivided into the three existing properties including the area of the subject property (830 San Pablo Avenue), the south adjoining property (818-828 San Pablo Avenue), and the southernmost portion of the site (812 San Pablo Avenue). A Covenant and Environmental Restriction was implemented at the site on December 13, 2002 restricting future use of the entire former auto wrecking facility to industrial, commercial, or office use, with no hospitals, schools, day care centers, or residences permitted. A Soil Management Plan was prepared on October 3, 2002 to present sampling and health and safety procedures to be implemented during site development or site modification that could disturb site soil. Based on

the regulatory closure of the LUST and CPS-SLIC cases, remedial activities conducted to address lead-impacted soil at the subject property, and the presence of residual lead above 255 mg/kg (exceeding residential ESLs), the former auto wrecking operations represents a CREC.

Refer to Section 7.0 for discussion of the northwest adjoining railroad tracks.

Refer to Section 5.0 for discussion of industrial operations at the west adjoining site.

If available, copies of historical sources are provided in [Appendix D](#).

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2016 (non-inclusive)):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	Undeveloped land with a roadway traversing the center of the subject property	NORTH: Railroad tracks, followed by vacant land EAST: Wooded/undeveloped land SOUTH: Vacant land and agricultural land WEST: Vacant land
1946, 1950	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Vacant land and a small structure WEST: Appears to be graded and used for commercial/industrial purposes
1958	Appears to be utilized for vehicle parking or storage on the west portion; vacant and wooded land on the east portion	NORTH: No significant changes EAST: No significant changes SOUTH: Several commercial buildings and vehicle parking/storage WEST: The existing industrial/building materials plant
1963, 1968	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes except several additional buildings are present WEST: No significant changes
1974, 1982	No significant changes	NORTH: No significant changes EAST: The existing residential buildings SOUTH: No significant changes WEST: No significant changes
1998	Vacant land	NORTH: No significant changes EAST: The existing residential buildings SOUTH: Commercial buildings; vehicles no longer present WEST: No significant changes
2005	No significant changes	NORTH: Railroad tracks, followed by the existing residential development and vacant land EAST: No significant changes SOUTH: Vacant land WEST: No significant changes

Year(s)	Subject Property Description	Adjoining Site Descriptions
2009, 2012, 2016	Vacant, graded land	NORTH: No significant changes EAST: No significant changes SOUTH: The existing commercial buildings WEST: No significant changes

Subject property:

- Historical auto-related use - Refer to Section 3.0

Adjoining Site(s):

- Historical auto-related use (south) and industrial use (west) - Refer to Sections 3.0 and 5.1

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1976-2017 (non-inclusive). The first listing for the subject property appeared in 1976. The following table summarizes the results of the city directory search.

Subject Property

Year(s)	Address - Occupant Listed
1976, 1983, 1987, 1992, 1995	850 San Pablo Avenue - Anthony Arley E, Anthony Auto Wrckrs
2000	850 San Pablo Avenue - Anthony Arley E, Sell Rite Auto Sales
2005	850 San Pablo Avenue - Cates, Jerry E

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

No listings were found under 830 San Pablo Avenue.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. Please refer to the appendices for a complete list of historical adjoining site tenants identified by EDR. The table below summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Direction	Address(es)
North	648 Carlotta Circle
East	937 Scanlan Way
	530 Sunnyview Drive

Direction	Address(es)
	560-580 Sunnyview Drive
South	818-828 San Pablo Avenue
West	800 San Pablo Avenue

Adjoining Properties

Year(s)	Address - Tenant/Use of Concern
NORTH	
N/A	No tenants of concern identified
EAST	
N/A	No tenants of concern identified
SOUTH	
N/A	No tenants of concern identified
WEST	
1976-2014	800 San Pablo Avenue - Sugar City Building Materials Co

Subject property:

- Historical auto wrecking and auto sales facility - Refer to Section 3.0 and 4.6

Adjoining Site:

- Industrial facility - Refer to Section 5.1

3.4 HISTORICAL TOPOGRAPHIC MAPS

A search of historical topographic maps was conducted for the subject property utilizing NETR Online (www.historicaerials.com). Historical topographic maps were reviewed for the years 1915-2018 (non-inclusive). Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1916, 1927, 1942, 1947	No features depicted	NORTH: Railroad tracks, followed by no features depicted EAST: No features depicted SOUTH: No features depicted WEST: No features depicted
1951, 1957	No features depicted	NORTH: Railroad tracks, followed by no features depicted EAST: No features depicted SOUTH: Two structures just above San Pablo Avenue WEST: No features depicted
1961	No features depicted	NORTH: Railroad tracks, followed by no features depicted EAST: No features depicted SOUTH: Four structures just above San Pablo Avenue WEST: No features depicted
1969	No features depicted	NORTH: Railroad tracks, followed by no features depicted EAST: No features depicted

Year(s)	Subject Property Description	Adjoining Site Descriptions
		SOUTH: Four small and one large structure just above San Pablo Avenue WEST: No features depicted
1981	No features depicted	NORTH: Railroad tracks, followed by no features depicted EAST: No features depicted SOUTH: Four small and two large structure just above San Pablo Avenue WEST: No features depicted
1985	No features depicted	NORTH: Railroad tracks, followed by no features depicted EAST: Shaded for urban development SOUTH: Four small and two large structure just above San Pablo Avenue WEST: No features depicted
2012, 2015, 2018	No features depicted	No features depicted

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Contra Costa County Department of Environmental Health (CCCDEH)	August 16, 2022	Email	Erika Amaya, Clerk Specialist	No records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Pinole Fire Department (-PFD)	August 16, 2022	Online	N/A	No records on file

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Pinole Building Department (PBD)	August 16, 2022	Online	N/A	No records on file

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Pinole Planning Department (PPD)	August 16, 2022	Online	N/A	No evidence indicating the existence of AULs on file for the subject property; however, please note that a Covenant and Environmental Restriction was implemented at the site on December 13, 2002. Please see discussions below for additional information.

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Contra Costa County Assessor's Office	August 16, 2022	Online	N/A	Information obtained is discussed below

SWRCB GeoTracker Database Summary

Anthony's Auto Wreckers Inc. (T0601300526) - 850 San Pablo Avenue

According to information obtained from the GeoTracker website, 850 San Pablo Avenue (which includes the subject property and surrounding area to the south) was identified as a closed LUST cleanup site in which a release of lead and TPHg was found to have affected soils beneath the site. The site was formerly equipped with two 1,000-gallon gasoline USTs, one used to store new fuel and one used to store fuel removed from vehicles in preparation for wrecking. The former USTs were located on the south portion of the auto wrecking facility, approximately 500 feet south of the subject property (currently addressed as 812 San Pablo Avenue). Over-excavation of 75 cubic yards of contaminated soil was removed from the tank pit in 1992, and the UST case was granted closure. In 2000, the case was reopened by the Regional Water Quality Control Board to evaluate the potential presence of MtBE in site groundwater. Subsurface investigations conducted between 2000 and 2001 indicated elevated concentrations of petroleum hydrocarbons in the vicinity of the former tank pit, and a Remedial Action Plan was developed for the site. The RAP was implemented in 2002 and consisted of the removal of approximately 1,000 cubic yards of impacted soil, purging of approximately 6,000 gallons of groundwater, and the addition of 500 lbs of Oxygen Release Compounds (ORCs). Following the implementation of the RAP, low levels of remedial contamination was found to remain in the former tank vicinity including groundwater containing up to 7.7 ppb benzene and 2.2 ppb MtBE; and soil containing up to 330 ppb benzene, up to 13 ppb toluene, up to 38 ppb xylene, up to 17 ppb ethylbenzene, and up to 1,800 ppb TPHg. The site was granted closure with respect to the former USTs on June 25, 2002. A Covenant and Environmental Restriction was implemented at the site on December 13, 2002 restricting future use of the site to commercial and/or industrial uses. The site was subdivided into the three existing parcels including the subject property (830 San Pablo Avenue), the south adjoining property (818-828 San Pablo Avenue),

and the southernmost portion of the site (812 San Pablo Avenue). In 2012, a variance to the deed restriction to allow daycare use of a portion of the building at 812 San Pablo Avenue was approved.

Refer to the discussion below for information regarding the CPS-SLIC investigation related to motor oil and lead-impacted soil remediation at the site.

Anthony's Auto Wrecking (SL601392684) - 850 San Pablo Avenue

According to information obtained from the GeoTracker website, 850 San Pablo Avenue (which includes the subject property and surrounding area to the south) was identified as a closed Cleanup Program Site. The CPS-SLIC cleanup case was opened in 2002 for oversight of the remediation of motor oil and lead-impacted soil remediation of the subject property and south surrounding sites resulting from historical auto wrecking operations. Four areas of concern were identified as requiring remediation including two areas with lead exceeding industrial ESLs (one of which was located on the northern portion of the subject property; see Figure 2), a third area with elevated TPHmo in soil in the vicinity of a former engine draining area (located off site approximately 500 feet south of the subject property), and the fourth area consisting of the former UST pit (located off site approximately 500 feet south of the subject property; see discussion above). In 2002, a total of 2,800 tons of lead-impacted soil were removed to 2 feet bgs from an area of the subject property and an area on the south adjoining property, and 742 tons of TPH-impacted soil were removed from the former engine draining area. A No Further Action letter issued on December 23, 2002 notes that although confirmation soil samples indicated concentrations of lead below commercial/industrial ESLs, residual concentrations of lead above residential ESLs (255 mg/kg). A deed restriction (discussed above) was implemented at the site and the CPS-SLIC cleanup case was granted closure by the RWQCB on December 23, 2002.

Refer to Section 3.0 for further discussion of the historical auto wrecking facility and deed restriction pertaining to the portion of the site comprising the subject property.

4.7 OIL AND GAS WELLS

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	August 16, 2022	CalGEM Map	No

4.8 OIL AND GAS PIPELINES

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	August 16, 2022	NPMS Public Map Viewer	Information obtained is discussed below

According to information obtained from the NPMS Public Map Viewer, an active underground natural gas pipeline operated by PG&E is located approximately 500 feet southeast of the subject property; see NPMS map in appendices. No stressed vegetation or olfactory indications of a release were observed in the vicinity of the pipeline and no records of past releases or violations associated with this pipeline were identified within the regulatory database or NPMS Public Map Viewer. Due to its contents, the natural gas pipeline is not

expected to represent a potential threat to soil or groundwater conditions at the subject property. Based on this information, the pipeline does not appear to represent a significant environmental concern to the subject property at this time.

4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in [Appendix C](#) of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	1.0			
Federal CERCLA removals/orders lists	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generator lists (LQG, SQG, VSQG)	SP/ADJ			
Federal RCRA NonGen/NLR list	SP/ADJ		✓	
Federal IC/EC registries	SP			
Federal ERNS list	SP			
State- and tribal "Superfund" equivalent sites	1.0			
State- and tribal hazardous waste facilities	1.0	✓

Facility Name	Anthony's Auto Wrecking/Anthony Auto Wreckers Inc.
Address	850 San Pablo Avenue
Distance & Direction	Subject Property and surrounding area to the south
Hydrologic Position	N/A
Databases Listed	CPS-SLIC (x2), DEED, SWEEPS UST, HIST UST, LUST, CORTESE, ENF, HIST CORTESE, CONTRA COSTA CO. SITE LIST, CIWQS, CERS
Comments	<p>According to the regulatory database, the subject property and surrounding area to the south formerly operated as an auto wrecking facility that is associated with a closed LUST cleanup investigation and a closed LUST cleanup investigation. The site formerly held a basic stormwater industrial discharge permit that was terminated in 1998.</p> <p>Refer to Section 3.0 and 4.6 for further discussion.</p>

Facility Name	Fairfield Properties LP/Bayside Apartments/Fairside Bayside LLC/Fairfield Residential Bayside 535-201
Address	520-530 Sunnyview Drive
Distance & Direction	Adjoining to the east
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NonGen/NLR (x7)
Comments	<p>According to the regulatory database, this site was listed as a RCRA NonGen for the generation of unspecified hazardous waste. No violations were noted. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.</p>

Facility Name	Sugar City Building Materials
Address	800 San Pablo Avenue
Distance & Direction	Adjoining to the west
Hydrologic Position	Cross-gradient
Databases Listed	LUST (x2), CERS HAZ WASTE, CERS TANKS, ENF, CONTRA COSTA CO. SITE LIST, CERS (x2), RCRA NonGen/NLR (x2), HIST UST, CORTESE, HWTS, AST, SWEEPS UST, FINDS, EMI, NPDES
Comments	<p>According to the regulatory database, historical sources, and information obtained from the GeoTracker website, this site has historically operated as a building materials/concrete plant that was identified as a closed LUST cleanup site. The site was listed as being equipped with a total of 10,000 gallons of aboveground petroleum storage and holds an active basic industrial stormwater discharge permit. The site was formerly equipped with one 4,000-gallon gasoline UST and one 12,000-gallon diesel UST that were removed from the site in 1999 and replaced with ASTs. A total of 11 groundwater monitoring wells were installed at the site, which indicated elevated concentrations of TPHg, TPHd, and BTEX; MtBE was not detected in soil or groundwater. Groundwater monitoring was conducted periodically between 2002 and 2012, and sampling</p>

	<p>following remediation indicated residual concentrations of TPHg up to 350 ppb, TPHd up to 79 ppb, and BTEX up to 83 ppb. The site was granted closure by the RWQCB on June 13, 2017.</p> <p>Several wells were advanced to the west of the subject property, between 100 feet west and 200 feet southwest. As of 2009, non detect levels of contaminants were detected in the well located 100 feet west of the subject property. The two remaining wells located approximately 200 feet southwest revealed low levels of contaminants of concern.</p> <p>Based on the regulatory closure of the release listing and review of available groundwater data, this site is not expected to represent a significant environmental concern.</p>
--	---

Facility Name	Pinole Bait and Tackle/Time Oil Company
Address	825 San Pablo Avenue
Distance & Direction	Approximately 800 feet south
Hydrologic Position	Up-gradient
Databases Listed	SWEEPS UST, HIST UST, LUST, CORTESE, ENF, HIST CORTESE, CONTRA COSTA CO. SITE LIST, CERS
Comments	<p>According to the regulatory database and information obtained from GeoTracker, this site was listed as a closed LUST cleanup site in which a release of gasoline was found to have affected soil and groundwater beneath the site. The site was formerly equipped with one 500-gallon used oil UST, one 4,000-gallon used oil UST, one 4,000-gallon gasoline UST, one 8,000-gallon gasoline UST, and one 10,000-gallon gasoline UST that were removed from the site in 1986. Site investigations conducted between 1998 and 2000 indicate a plume of residual contaminants remains in the vicinity of the former USTs and have not migrated off-site. The case was granted closure on March 27, 2008. Based on the regulatory closure of the release listing and review of available groundwater data, this site is not expected to represent a significant environmental concern.</p> <p>Additional listings: This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the current ASTM Standard E1527 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	City of Pinole	N/A	N/A	Unknown	Not interviewed; refer to Section 1.5
Key Site Manager	John Diemer, Vice President of Construction, OneCorp Global	August 30, 2022		Unknown	Interview pending; refer to Section 1.5

INTERVIEW SUMMARY

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	N/A
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	N/A
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	N/A
Are you aware of any known plans for site redevelopment or change in site use?	N/A	N/A
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	N/A
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	N/A
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	N/A
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	N/A

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
<p>1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)</p> <p>Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?</p>	Information not provided
<p>2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).</p> <p>Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?</p>	Information not provided
<p>3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</p> <p>Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	Information not provided
<p>4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).</p> <p>Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?</p>	Information not provided
<p>5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</p> <p>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:</p> <p>(a) Do you know the past uses of the property?</p> <p>(b) Do you know of specific chemicals that are present or once were present at the</p>	Information not provided

Question	Response/ Comment
property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	August 30, 2022
AEI Site Assessor(s)	Lea Palumbo
Property Escort(s)/ Relationship(s) to Property	N/A - no property escort provided
Units/Areas Observed	An overview of the subject property from the perimeter
Area(s) not accessed and reason(s)	Refer to Section 1.5 for discussion of limiting condition(s)
Other Physical Constraints	Overgrown vegetation Refer to Section 1.5 for discussion of limiting condition(s)

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✓
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✓	✓
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other		✓

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed on the northeast portion of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformer(s)

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Several pole-mounted and pad-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.3 OTHER

Railroad Tracks

Railroad tracks are located adjoining to the northwest of the subject property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. Concentrations of these constituents of concern resulting from the railroad right-of-way would likely be confined to the near subsurface sediments and would not present a significant environmental health and safety concern to the occupants of the subject property or the underlying groundwater.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

The subject property is currently vacant land and lacks structures. Consequently, no building components containing suspect asbestos containing materials were identified during the site inspection.

8.2 LEAD-BASED PAINT

The subject property is currently vacant land and lacks structures. Consequently, AEI did not observe building components likely to contain suspect LBP during the site reconnaissance.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 12 tests were conducted for radon levels in the subject property zip code (94564) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the United States EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 MOLD

The subject property is currently vacant land and lacks structures. Consequently, mold was not addressed as part of this assessment.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

FINDINGS

Recognized Environmental Conditions (RECs):

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Conditions (CRECs):

- Based on a review of historical sources and agency records, the subject property and adjoining site to the south formerly operated as an auto wrecking facility between circa 1958 and 1992. Based on regulatory agency records and aerial photographs, the western portion of the subject property was utilized for vehicle storage and parking and was not developed with structures during this period of use; the western portion appears to have been largely unused and unimproved. The auto wrecking facility was formerly equipped with two 1,000-gallon gasoline USTs, one used to store new fuel and one used to store fuel removed from vehicles in preparation for wrecking. The former USTs were located on the south portion of the auto wrecking facility, approximately 500 feet south of the subject property (currently addressed as 812 San Pablo Avenue). A RAP was implemented in 2002 and consisted of the removal of approximately 1,000 cubic yards of impacted soil, purging of approximately 6,000 gallons of groundwater, and the addition of 500 lbs of Oxygen Release Compounds (ORCs) in the area of the former USTs. The site was granted closure with respect to the former USTs on June 25, 2002. A CPS-SLIC cleanup case was opened in 2002 for RWQCB oversight of the remediation of motor oil and lead-impacted soil remediation of a portion of the subject property and south surrounding sites resulting from historical auto wrecking/vehicle storage operations. This included an area of lead-impacted soil on the north portion of the subject property (see Figure 2). In 2002, a total of 2,800 tons of lead-impacted soil were removed to 2 feet bgs from an area of the subject property and an area on the south adjoining property. A No Further Action letter issued on December 23, 2002 notes that although confirmation soil samples indicated concentrations of lead below commercial/industrial ESLs, residual concentrations of lead above residential ESLs (255 mg/kg) remained in place. The CPS-SLIC cleanup case was granted closure by the RWQCB on December 23, 2002. The former auto wrecking facility site was subdivided into the three existing properties including the area of the subject property (830 San Pablo Avenue), the south adjoining property (818-828 San Pablo Avenue), and the southernmost portion of the site (812 San Pablo Avenue). A Covenant and Environmental Restriction was implemented at the site on December 13, 2002 restricting future use of the entire former auto wrecking facility to industrial, commercial, or office use, with no hospitals, schools, day care centers, or residences permitted. A Soil Management Plan was prepared on October 3, 2002 to present sampling and health and safety procedures to be implemented during site development or site modification that could disturb site soil. Based on the regulatory closure of the LUST and CPS-SLIC cases, remedial activities conducted to address lead-impacted soil at the subject property, and the presence of residual lead above 255 mg/kg (exceeding residential ESLs), the former auto wrecking operations represents a CREC.

As noted, residual lead impacts in the soil remain on the subject property. In the event that groundbreaking activities are pursued, construction personnel should be informed that the soil encountered could be contaminated. The contractor should employ appropriate worker safety and engineering controls to protect the health and safety of the construction crew and future occupants during any excavation activities. Furthermore, as may have been expressed during the issuance of regulatory closure

and/or as a good faith practice, the User of this report should note that the applicable agency/agencies should be notified prior to commencing any future change in use and/or redevelopment of the subject property.

Historical Recognized Environmental Conditions (HRECs):

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OECs):

- AEI did not identify evidence of OECs during the course of this assessment.

OPINIONS, CONCLUSIONS, AND RECOMMENDATIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 830 San Pablo Avenue, Pinole, Contra Costa County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Adherence to the Covenant and Environmental Restriction and Soil Management Plan during redevelopment activities

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

HERCULES PROPERTIES Database: RESPONSE, Date of Government Version: 04/25/2022 Status: Certified / Operation & Maintenance Facility Id: 07280016	560 RAILROAD AVE	ENE 1/2 - 1 (0.687 mi.)	M75	438

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 36 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Name: SUGAR CITY BUILDING MATERIALS COMPANY
Address: 800 SAN PABLO AVE
City,State,Zip: PINOLE, CA 94564
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0601392760
Global Id: T0601392760
Latitude: 38.0067942333181
Longitude: -122.308707619713
Status: Completed - Case Closed
Status Date: 06/12/2017
Case Worker: MYM
RB Case Number: 07-0804
Local Agency: CONTRA COSTA COUNTY
File Location: Not reported
Local Case Number: 00636
Potential Media Affect: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern:

Site History:

Gasoline
The Site is located in an area of mixed commercial, light industrial and residential development in the west-central part of Pinole. Pinole is in northwestern Contra Costa County, north of the City of Richmond. Union Pacific railroad tracks run along the north side of the property, and San Pablo Avenue borders the south side. Sugar City Building Materials is engaged in the production and sale of building materials, primarily ready-mix concrete. Other materials stored and sold on-Site include bulk sand and rock, plastering supplies, reinforcing steel, stepping stones, building blocks, bricks, landscaping rock, fireplace materials, and concrete and masonry tools. The Site investigation area has a surface elevation ranging from approximately 90 to 94 feet above mean sea level (msl). The Site is relatively flat in the southern and central parts, and is terraced on the north to accommodate a topography that slopes down steeply to the north. The southern edge of San Pablo Bay is located down slope about 1,500 feet to the north. No surface water drainages are in proximity to the Site. There is no surface runoff from the site. All surface water runoff is collected in containment basins located at the north end of the site. The contaminant source area is a former UST located in the vicinity of the maintenance garage. The contaminant source area is a former UST located in the vicinity of the maintenance garage. The extent of the hydrocarbon plume is delineated by well MW-3 on the south (upgradient) and well MW-4 to the north (downgradient).

small quantity generator and failed to send hazardous waste (used oil and waste antifreeze) offsite for disposal within 180 days. CORRECTIVE ACTION: Dispose of hazardous waste (used oil and waste antifreeze) that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Violation Division: Contra Costa County Health Services Department
Violation Program: HW
Violation Source: CERS,

Site ID: 72005
Site Name: SUGAR CITY BUILDING MATERIALS CO
Violation Date: 02-13-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/26/2018. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. The business has reportable quantities of concrete colorant and Portland Cement that must be added to the chemical inventory. If fly ash quantity exceeds 5,000 lbs, add fly ash to chemical inventory. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Division: Contra Costa County Health Services Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 72005
Site Name: SUGAR CITY BUILDING MATERIALS CO
Violation Date: 01-31-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 02/09/2018. OBSERVATION: Uniform Hazardous Waste Manifests for used oil disposed of in 2017 were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all used oil manifests for 2017 and submit copies to the CUPA.

Violation Date: 02-09-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 02/13/2018. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste (used oil and waste antifreeze) offsite for disposal within 180 days. CORRECTIVE ACTION: Dispose of hazardous waste (used oil and waste antifreeze) that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

STATE MASTER

Registry ID: 110070444591

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Contaminants of Concern: Benzene, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Other Petroleum

Site History: The site includes a right of way associated with the former Standard Oil of California pipeline. The pipeline was used between early 1900s through the 1930s to transport crude oil from the San Joaquin Valley to refineries in the San Francisco Bay area. A soil and groundwater investigation was performed in August 2007. A comparison of site data to ESLs concluded that total petroleum hydrocarbons as diesel, benzene, toluene, ethylbenzene, and total xylenes and polynuclear aromatic hydrocarbons at the site do not pose a threat to human health and the environment for a residential land use scenario.

Violation Notes: Returned to compliance on 08/09/2018. OBSERVATION: The used outgoing spray booth filters were observed without a proper disposal means and a proper waste determination has not been made. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the used spray booth filters has been properly characterized to determine if it is a hazardous waste or dispose of them as hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future. In lieu of testing, you may dispose of them as hazardous waste locally at the HHW facility off of Pittsburg Ave in Richmond. (888) 412-9277. You must get an account with them and keep disposal receipts and records for no less than 3 years.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 68505
Site Name: SMART STOP
Violation Date: 02-28-2020
Citation: 23 CCR 16 2638(d) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(d)
Violation Description: Failure to submit the Monitoring System Certification Form to the UPA within 30 days of completion of the test.
Violation Notes: Returned to compliance on 02/08/2021. OBSERVATION: Owner/Operator did not submit the Monitoring System Certification Form to the CUPA within 30 days of completion of the test. CORRECTIVE ACTION: Submit copy of the Monitoring System Certification to the CUPA.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 68505
Site Name: SMART STOP
Violation Date: 12-31-2018
Citation: 23 CCR 16 2715(c)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(4)
Violation Description: Failure to maintain a list of employees trained by the designated operator on-site or off-site at a readily available location, if approved by the UPA. For training that occurs on or after October 1, 2018, failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if approved by the UPA.
Violation Notes: Returned to compliance on 05/30/2019. OBSERVATION: Documented D.O. employee training within the last 12 months unavailable at time of inspection. The last D.O. training logs located on site at time of inspection were documented in 2017. CORRECTIVE ACTION: Conduct D.O. employee training, and provide CCHS-HMP documentation of the training.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 68505
Site Name: SMART STOP
Violation Date: 01-26-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/28/2018. OBSERVATION: The business failed to complete and electronically submit all chemical inventory information for the listed 'Gasoline' inventory. The 'Gasoline' inventory was found missing the following required information: Chemical Location, Average Daily Amount, Largest Container (10,000 gallons), Storage Pressure (ambient), Storage Temperature (ambient) and Federal Hazardous Categories under 'Chemical Hazard Classification'. CCHS-HMP provided the facility contact an email detailing the needed chemical inventory changes. CORRECTIVE ACTION: Correct and electronically resubmit the 'Gasoline' chemical inventory information in CERS.

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 02/03/2019. OBSERVATION: Owner/Operator failed to have an overfill prevention equipment inspection conducted on or before 10/1/18. A test of the automatic tank gauges for Audible/Visual alarm at 90% were conducted at time of inspection. CORRECTIVE ACTION: Submit a completed 'Overfill Prevention Equipment Inspection Report Form' verifying the proper functioning of the overfill prevention equipment to CCHS-HMP.

Violation Date: 05-09-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 08/09/2018. OBSERVATION: The used antifreeze is reported to have a maximum daily amount of only 12 gallons stored at any one time. There was a 55 gallon drum of antifreeze on-site. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for used antifreeze with a new amount.
Violation Division: Contra Costa County Health Services Department

Baseline Flow: 0
 Reclamation: Not reported
 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 02/17/2021. OBSERVATION: The business failed to electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. CORRECTIVE ACTION: Electronically submit a site map with all required content.

Violation Source: CERS,

Site ID: 85467
Site Name: WESTERN CONTRA COSTA TRANSIT AUTHORITY
Violation Date: 02-02-2022
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct

Violation Notes: the designated UST operator visual inspection at least once every 30 days.
Returned to compliance on 02/02/2022. OBSERVATION: Facility did not comply with the following DO inspection requirement: The owner/operator signed and dated the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. Facility has not been regularly signing a copy of their D.O. report within 72 hours of being provided a signed copy. CORRECTIVE ACTION: Ensure that DO is complying with all the requirements noted above. Facility had signed and dated a copy of the most recent inspection when CCHSHMP arrived, and signed the older copies while CCHSHMP was on site.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 02/27/2018. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. During the 2016 inspection facility provided CCHSHMP a site map that includes evacuation staging areas and fire extinguishers, first aid kits etc. This site map was not included with the 2018 CERS submittal, so the site map currently provided in CERS is inadequate. CORRECTIVE ACTION: Complete and electronically submit a site map with all required content. CCHSHMP recommends adding a copy of the evacuation map in the hall way to the map in the current CERS submittal.

Shut-off valve (This was installed with the 2019 permit)
71284-1/Gasoline->UST Tank Information->Product/Waste Piping
Construction->Product/Turbine Containment Sump->Single-Walled
CORRECTIVE ACTION: Immediately update the required information in CERS
and submit for review by the CUPA.

Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 85467
Site Name: WESTERN CONTRA COSTA TRANSIT AUTHORITY
Violation Date: 02-15-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23,
Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overflow
prevention equipment requirements: Alert the transfer operator when
the tank is 90 percent full by restricting the flow into the tank or
triggering an audible and visual alarm; or Restrict delivery of flow
to the tank at least 30 minutes before the tank overfills, provided
the restriction occurs when the tank is filled to no more than 95
percent of capacity; and activate an audible alarm at least five
minutes before the tank overfills; or Provide positive shut-off of
flow to the tank when the tank is filled to no more than 95 percent of
capacity; or Provide positive shut-off of flow to the tank so that
none of the fittings located on the top of the tank are exposed to
product due to overfilling. Install/retrofit overflow prevention
equipment that does not use flow restrictors on vent piping to meet
overflow prevention equipment requirements when the overflow
prevention equipment is installed, repaired, or replaced on and after
October 1, 2018. For USTs installed before October 1, 2018, perform an
inspection by October 13, 2018 and every 36 months thereafter. For
USTs installed on and after October 1, 2018, perform an inspection at
installation and every 36 months thereafter. Inspected within 30 days
after a repair to the overflow prevention equipment. Inspected using
an applicable manufacturer guidelines, industry codes, engineering
standards, or a method approved by a professional engineer. Inspected
by a certified UST service technician. Maintain records of overflow
prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 08/12/2019. OBSERVATION: Owner/Operator
failed to meet one or more of the requirements applicable to overflow
prevention equipment. Facility has indicated they are using Audible
visual alarm for overflow however this is not an acceptable method of
overflow because the system has single wall vent and vapor pipe.
CORRECTIVE ACTION: Maintain overflow prevention system to comply with
the deficiencies noted above. Submit verification.

Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.

Violation Notes: Returned to compliance on 05/26/2019. OBSERVATION: ON APRIL 1, 2019, CCHSHMP ISSUED A NOTICE OF VIOLATION (ATTACHED) TO THE SUBJECT FACILITY FOR FAILURE TO SUBMIT A COMPLETE AND CORRECT CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) UNDERGROUND STORAGE TANK (UST) SUBMITTAL ELEMENT. AS OF MAY 24, 2019, THE VIOLATION REMAINS OUTSTANDING. CORRECTIVE ACTION: IMMEDIATELY LOG ONTO CERS (<https://cers.calepa.ca.gov/>) AND SUBMIT A COMPLETE/CORRECT UST SUBMITTAL ELEMENT.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 04/26/2021. OBSERVATION: The business did not provide one or more of the following: initial employee training, adequate employee training, annual employee training and/or maintain records of employee training. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Maintain records of training available for 3 years.

Section(s) 25293
Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes: Returned to compliance on 09/03/2020. OBSERVATION: Owner/Operator did not maintain UST records in sufficient detail to enable the UPA to determine if UST systems are in compliance. CORRECTIVE ACTION: Maintain UST records in sufficient detail to enable the UPA to determine if UST systems are in compliance.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,
Site ID: 40873
Site Name: Grand Gas Pinole
Violation Date: 09-03-2020
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: Returned to compliance on 01/29/2021. OBSERVATION: Line leak detector failed to meet one or more of the following requirements: Monitor at least hourly; Capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g.; Restricting or shutting off the flow of product through the piping when a leak is detected. Diesel MLLD observed to fail testing. CORRECTIVE ACTION: Repair or replace diesel line leak detector so that it is capable of monitoring at least hourly, detecting a release of 3.0 gallons per hour at 10 p.s.i.g., and restricting or shutting off the flow of product through the piping when a leak is detected.
Violation Division: Contra Costa County Health Services Department

Violation Source: CERS,
Site ID: 40873
Site Name: Grand Gas Pinole
Violation Date: 08-06-2020
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months."
Violation Notes: Returned to compliance on 09/03/2020. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill

Site Name: Grand Gas Pinole
Violation Date: 04-20-2021
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 04/20/2021. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. 87 and diesel UST overfill prevention equipment (drop tube shut off valves set at more than 95% tank capacity. Valves replaced and the new valves were reported to meet requirements. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above.

Site ID: 40873
Site Name: Grand Gas Pinole
Violation Date: 08-06-2020
Citation: 23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)

Violation Description: "Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."

Violation Notes: Returned to compliance on 10/12/2020. **OBSERVATION:** Secondary containment testing was last performed on 5/22/2017 and was due by 5/2020. Testing has not been completed and is 3 months past due. Secondary containment testing is required once every 36 months. **CORRECTIVE ACTION:** Immediately schedule this test and provide 48 hours notification to the CUPA.

Site ID: 40873
Site Name: Grand Gas Pinole
Violation Date: 05-13-2021
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 05/13/2021. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. 87 Unleaded spill container failed liquid tightness requirement. Spill container fill cap was replaced with a new cap and the drain valve was cleaned up to tighten the seal. The spill container was retested and observed to pass. CORRECTIVE ACTION: Ensure spill containers continue to meet all of the listed [Truncated]

activities. DHS will seek cost recovery of 100 percent of direct costs plus staff costs and overhead related to the project. The RPs will pay all costs associated with investigation and remediation.

Site Description: This site is an inoperative nitroform fertilizer plant. The site is located on a portion of land used by the Hercules Powder Company where explosives were manufactured.

Hazardous Waste Desc: Concentrated acids, caustics, heavy metals and absestos have been identified onsite.

Threat To Public Health & Env: The site is located on San Pablo Bay adjacent to a residential area. Direct contact with the contaminants is possible. Ground water migration is possible, although it has not yet been detected. The site extends to San Pablo Bay and those using the shoreline for recreational purposes might gain access to the site.

Site Activity Status: Several phases of remedial investigation have been completed; more investigation may be required if background levels of contaminants are not established by results of recently completed work.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 12/08/2016
Comments: DTSC personnel performed an annual site inspection at Operable Unit 3 (OU-3) of the Site on November 16, 2016 to verify compliance with the Land Use Covenant. The Land Use Covenant was recorded with Contra Costa County because soil contaminated with arsenic, lead, mercury and total petroleum hydrocarbons above levels that would allow for unrestricted land use remain on OU-3. The Land Use Covenant restricts OU-3 to commercial/industrial land use. OU-3 was observed to be vacant during the site inspection. The conditions at OU-3 during the time of the site inspection were determined to be consistent with the restrictions and requirements of the Land Use Covenant.

Completed Area Name: OU-3
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 12/19/2018
Comments: DTSC personnel conducted a site inspection on December 7, 2018. OU-3 is vacant and overgrown with vegetation. No evidence of activities prohibited by the Land Use Covenant was observed at the OU-3.

Completed Document Type: Remedial Action Plan
Completed Date: 06/24/1994
Comments: Approved RAP for OU-A requiring the excavation and Off-site disposal of metal contaminated soil and the demolition of the nitric acid plant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/21/1993
Comments: Completed RI/FS. The site was split into two major Operable Units (OUs) for investigation purposes. OU-A consisted of the site soils and was further subdivided into 6 sub-OUs (OU-1 through OU-6). OU-B combines Refugio Creek, Bay sediments and groundwater. Metals were detected in soil and groundwater.

Completed Date: 01/12/2021
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/26/2014
Comments: Letter hand delivered at Scoping Meeting on March 26,2014. Letter informs DTSC that a Federal lawsuit has been filed- Case Number C-11-06610 EDL on 02/14/2011 for former owners and operators of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Consultation
Completed Date: 03/26/2014
Comments: Meeting was held from 1:30 PM to 4:30 PM. Discussion covered the next steps for the site. A VCA amendment will be needed to cover the scope of work and new cost estimate. The next step will be a Pilot test workplan for a DPE system with additional wells for at least 2 months.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/11/2015
Comments: Schedule and cost estimate of DTSC oversight activities at the site for the 2015/2016 fiscal year (July 1, 2015-June 30, 2016).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 09/24/2014
Comments: Amendment to VCA to expand scope of work to include interim removal action workplan, CEQA, public participation and implementation of the interim removal action workplan. The advance payment was also increased to accommodate the increased scope of work.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/23/2014
Comments: DTSC estimate of DTSC's oversight costs for the 2014/2015 fiscal year from July 1, 2014 to June 30, 2015. Estimate is based on schedule of expected activities, estimates of DTSC staff hours for each activity and DTSC's contract estimation rates for the fiscal year.

Completed Document Type: Well Installation Workplan
Completed Date: 11/22/2013
Comments: GSU approved the plan and letter was signed by Dan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 10/31/2013
Comments: VCA signed on October 31, 2013. It included reviewing existing documentation, and a well installation workplan besides the VCA. A check is being sent to Sacramento for the deposit of \$ 12,000.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/13/2013
Comments: Letter sent to RP about the approved SVE system by the BAAQMD and DTSC's no objection to the system. The system is NOT a final remedy for the site. The proposed SVE system was not reviewed by DTSC. The purpose is to have the City of Pinole to approve permits for SVE installation. DTSC did not object to the occupancy of the four tenant spaces. More work may be needed. Changes and modifications may be required as DTSC's process continues to evaluate the contaminants of concern at the site.

Completed Date: 03/18/2016
Comments: RP completed further delineation of VOC plume beneath dry cleaner that may extend beneath neighboring unit. Investigation findings will be presented in report for DTSC review.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Treatability Study Report
Completed Date: 08/31/2015
Comments: Soil and groundwater sampling was conducted to delineate the source of soil contamination of tetrachloroethene. Investigation identified an area east of the site along the back wall containing the highest concentrations, up to 1,660 milligrams per kilogram in soil. After consultations between DTSC and consultant, it was agreed that further characterization of contamination at the source area was needed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 01/30/2015
Comments: Interim workplan to conduct soil excavation to remove source of volatile organic compound (VOC) and installation of a soil vapor extraction system to prevent intrusion of VOC gases into indoor air. Further characterization of the contamination will be completed after the interim activities and a final cleanup plan will be developed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 03/02/2015
Comments: Fact sheet to inform the community about the upcoming interim fieldwork scheduled from March 5. The fieldwork will take place according to the approved workplan, which was developed as a result of investigations that found tetrachloroethene in soil and groundwater beneath the site. Activities that are taking place include excavation of contaminated soil, installation of a soil vapor extraction system, and installation of groundwater monitoring wells.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

Next Scheduled EDR Contact: 10/10/2022
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895

Number of Days to Update: 7	Next Scheduled EDR Contact: 10/03/2022
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895

Number of Days to Update: 66	Next Scheduled EDR Contact: 09/05/2022
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/16/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/24/2022	Telephone: 703-603-0695

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

South Map:	5640624 RICHMOND, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
MARE ISLAND	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
12	1/4 - 1/2 Mile SW	SW
48	1/2 - 1 Mile WSW	W
C49	1/2 - 1 Mile SSE	Not Reported
1G	1/4 - 1/2 Mile SW	SW
2G	1/2 - 1 Mile WSW	W
3G	1/2 - 1 Mile SSE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Miocene
Code: Tm (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CUT AND FILL LAND (fill part)

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 30 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	silty clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: CROPLEY

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	24 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
2	24 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: CUT AND FILL LAND (fill part)

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1

Soil Map ID: 5

Soil Component Name: JOICE

Soil Surface Texture: muck

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	muck	A-8	Highly organic soils, Peat.	Max: 141 Min: 42	Max: Min:
2	14 inches	59 inches	muck	A-8	Highly organic soils, Peat.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 6

Soil Component Name: TIERRA

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	25 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
3	59 inches	70 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 956D-4438-BC7C
PO # 316427
Project 467803

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 956D-4438-BC7C

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Public Records Request Form

SR# _____
(office use only)

Date: _____

Name: _____ Business Name: _____

Address: _____ Phone #: _____

E-mail: _____

I am requesting the following public record(s) from Contra Costa Health Services Hazardous Materials Programs.

RECORD(S) REQUESTED: (Use additional form (s) if more space is needed)

Our records are available electronically. We will send the requested records via email. If PDF files are too large to send via email, we will place the files on a disc or thumbdrive and ask you to choose one of the following methods below.

Please copy the record(s) and send FedEx to the above mailing address.
The cost is \$15.00 and is payable by check or credit card (Visa, Discover or M/C).

Please copy the record(s) and notify me when ready for pick up.
The cost is \$3.00 and is payable by check or cash (**MUST BE EXACT**).

You may email the completed form to ccchazmat@cchealth.org, or mail or hand deliver to Contra Costa Health Services Hazardous Materials Programs at 4585 Pacheco Blvd., Suite 100, Martinez, CA 94553; or FAX to (925) 646-2073.

Office Use Only:

Date Received _____ Completed _____ No records exist responsive to this request.

Re: (AEI #467803) Public Records Request

ccchazmat <ccchazmat@cchealth.org>

Thu 8/18/2022 7:58 AM

To: Lea Palumbo <lpalumbo@aeiconsultants.com>

Good morning,

We have no records for 830 San Pablo Ave, Pinole.

Our records go back to 1986, anything prior to this would be the jurisdiction of the local fire department.

Let me know if you have any questions.

Best Regards,

Erika Amaya, Clerk Specialist

RE: Public Records Request of August 17, 2022, Reference # R000360-081722

Dear Lea Palumbo,

The City of Pinole received a public records request from you on August 17, 2022. Your request mentioned:

Hello, I am looking to obtain electronic copies of all building permits on file for the property located at:

830 San Pablo Avenue,

Pinole, CA 94564

(APNs: 4402230022, 4402230020, 4402230018, 4402230017, 4402230016, and 4402230015)

Thank you.

The City of Pinole has reviewed its files and has determined there are no responsive record(s) to your request.

For questions or additional information, please reply to this email.

Sincerely,

Connie Kim

**COVENANT AND ENVIRONMENTAL RESTRICTION
ON PROPERTY**

Anthony Auto Wreckers
850 San Pablo Avenue
Pinole, CA 94564

This Covenant and Environmental Restriction on Property (this "Covenant") is made as of the 13 day of Dec, 2002 by Arley E. Anthony ("Covenantor") who is the Owner of record of that certain property situated at 850 San Pablo Avenue, in the City of Pinole, County of Contra Costa, State of California, which is more particularly described in Exhibit A attached hereto and incorporated herein by this reference (such portion hereinafter referred to as the "Burdened Property"), for the benefit of the California Regional Water Quality Control Board for the San Francisco Bay Region (the "Board"), with reference to the following facts:

A. The Burdened Property contains hazardous materials.

B. Contamination of the Burdened Property. Soil at the Burdened Property was contaminated by the previous site use as an auto wrecking facility. These operations resulted in contamination of soil with inorganic chemicals including lead and organic chemicals including petroleum hydrocarbons (TPH), which constitute hazardous materials as that term is defined in Health & Safety Code Section 25260. In June and July 2002, about 2,800 tons of lead-affected soil and about 742 tons of TPH-affected soil were excavated from the site and disposed of at an off-site landfill. Results of the post-excavation confirmation sampling indicate residual lead concentrations at levels below 750 mg/kg, the threshold maximum concentration for a commercial/industrial use, and therefore, the residual levels of lead in site soils do not pose a health concern for commercial/industrial use of the property. However, residual lead concentrations in soil are above 255 mg/kg, the levels permissible for a potential residential use. Therefore, the soils must be properly managed should they ever be exposed in the future or

12/17/02

should the property be redeveloped for more sensitive land uses.

C. Exposure Pathways. Lead and TPH are present in soil on the Burdened Property. Exposure to these contaminants could take place via in-place contact, surface-water runoff, and wind dispersal, resulting in dermal contact, inhalation, or ingestion by humans etc. Risk to TPH exposure from site soils has been mitigated by the excavation in the TPH-impacted areas and confirmation sampling indicating residual levels less than the approved screening levels for TPHd (500 mg/kg) and TPHmo (1,000 mg/kg). The risk of public exposure to TPH in soils has been substantially lessened by the remediation and controls described herein. Exposure to lead will be mitigated through the controls described in this deed restriction.

D. Adjacent Land Uses and Population Potentially Affected. The Burdened Property is currently zoned for commercial/industrial use and is adjacent to industrial land uses.

E. Full and voluntary disclosure to the Board of the presence of hazardous materials on the Burdened Property has been made and extensive sampling of the Burdened Property has been conducted.

F. Covenantor desires and intends that in order to benefit the Board, and to protect the present and future public health and safety, the Burdened Property shall be used in such a manner as to avoid potential harm to persons or property that may result from hazardous materials that may have been deposited on portions of the Burdened Property.

ARTICLE I GENERAL PROVISIONS

1.1 Provisions to Run with the Land. This Covenant sets forth protective provisions, covenants, conditions and restrictions (collectively referred to as "Restrictions") upon and subject to which the Burdened Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. The restrictions set forth in Article III are reasonably necessary to protect present and future human health and safety or the environment as a result of the presence on the land of hazardous materials. Each and all of the Restrictions shall run with the land, and pass with each and every portion of the Burdened Property, and shall apply to, inure to the benefit of, and bind the respective successors in interest thereof, for the benefit of the Board and all Owners and Occupants. Each and all of the Restrictions are imposed upon the entire Burdened Property unless expressly stated as applicable to a specific portion of the Burdened Property. Each and all of the Restrictions run with the land pursuant to section 1471 of the Civil Code. Each and all of the Restrictions are enforceable by the Board.

1.2 Concurrence of Owners and Lessees Presumed. All purchasers, lessees, or possessors of any portion of the Burdened Property shall be deemed by their purchase, leasing, or possession of such Burdened Property, to be in accord with the foregoing and to agree for and among themselves, their heirs, successors, and assignees, and the agents, employees, and lessees of such owners, heirs, successors, and assignees, that the Restrictions as herein established must be

adhered to for the benefit of the Board and the Owners and Occupants of the Burdened Property and that the interest of the Owners and Occupants of the Burdened Property shall be subject to the Restrictions contained herein.

1.3 Incorporation into Deeds and Leases. Covenantor desires and covenants that the Restrictions set out herein shall be incorporated in and attached to each and all deeds and leases of any portion of the Burdened Property. Recordation of this Covenant shall be deemed binding on all successors, assigns, and lessees, regardless of whether a copy of this Covenant and Agreement has been attached to or incorporated into any given deed or lease.

1.4 Purpose. It is the purpose of this instrument to convey to the Board real property rights, which will run with the land, to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

ARTICLE II DEFINITIONS

2.1 Board. "Board" shall mean the California Regional Water Quality Control Board for the San Francisco Bay Region and shall include its successor agencies, if any.

2.2 Improvements. "Improvements" shall mean all buildings, roads, driveways, regradings, and paved parking areas, constructed or placed upon any portion of the Burdened Property.

2.3 Occupants. "Occupants" shall mean Owners and those persons entitled by ownership, leasehold, or other legal relationship to the exclusive right to use and/or occupy all or any portion of the Burdened Property.

2.4 Owner or Owners. "Owner" or "Owners" shall mean the Covenantor and/or its successors in interest, who hold title to all or any portion of the Burdened Property.

2.5 SMP. "SMP" shall mean the Soil Management Plan, dated October 3, 2002, and prepared by LFR Levine-Fricke for the Burdened Property and approved by the Board, a copy of which is attached to this Covenant as Exhibit B and incorporated into this Covenant by this reference, as such plan may be amended from time to time with approval of the Board.

ARTICLE III DEVELOPMENT, USE AND CONVEYANCE OF THE BURDENED PROPERTY

3.1 Restrictions on Development and Use. Covenantor promises to restrict the use of the Burdened Property as follows:

- a. Development of the Burdened Property shall be restricted to industrial, commercial and/or office space;

- b. All Owners and Occupants shall comply with the SMP. Any contaminated soils brought to the surface by grading, excavation, trenching, or backfilling shall be managed in accordance with the SMP and all applicable provisions of local, state and federal law;
- c. No residence for human habitation shall be permitted on the Burdened Property;
- d. No hospitals shall be permitted on the Burdened Property;
- e. No schools for persons under 21 years of age shall be permitted on the Burdened Property;
- f. No day care centers for children or day care centers for Senior Citizens shall be permitted on the Burdened Property;
- g. All uses and development of the Burdened Property shall be consistent with any applicable Board Order or the SMP, each of which is hereby incorporated by reference including future amendments thereto. All uses and development shall preserve, any remedial measures taken on the Burdened Property pursuant to the requirements of the Board, unless otherwise expressly permitted in writing by the Board.
- h. No Owners or Occupants of the Property or any portion thereof shall drill, bore, otherwise construct, or use a well for the purpose of extracting water for any use, including but not limited to, domestic, potable, or industrial uses, unless expressly permitted in writing by the Board.
- i. The Owner shall notify the Board of each of the following: The type, cause, location and date of any disturbance that is not in compliance with the SMP. Notification to the Board shall be made by registered mail within ten (10) working days of both the discovery of such disturbance and the completion of repairs;
- j. The Covenantor agrees that the Board, and/or any persons acting pursuant to Board orders, shall have reasonable access to the Burdened Property for the purposes of inspection, surveillance, maintenance, or monitoring, as provided for in Division 7 of the Water Code.
- k. No Owner or Occupant of the Burdened Property shall act in any manner that will aggravate or contribute to the existing environmental conditions of the Burdened Property. All use and development of the Burdened Property shall preserve the integrity of the remedial measures taken, and shall comply with the SMP.

3.2 Enforcement. Failure of an Owner or Occupant to comply with any of the restrictions, as set forth in paragraph 3.1, shall be grounds for the Board, by reason of this Covenant, to have the authority to require that the Owner modify or remove any Improvements constructed in violation of that paragraph. Violation of the Covenant shall be grounds for the Board to file civil actions against the Owner as provided by law.

3.3 Notice in Agreements. After the date of recordation hereof, all Owners and Occupants shall execute a written instrument which shall accompany all purchase agreements or leases relating to the property. Any such instrument shall contain the following statement:

The land described herein contains hazardous materials in the soil, and is subject to a deed restriction dated as of 13 day of Dec., 2002, and recorded on 12-17-02, 2002, in the Official Records of Contra Costa County, California, as Document No. 482270, which

Covenant and Restriction imposes certain covenants, conditions, and restrictions on usage of the property described herein. This statement is not a declaration that a hazard exists.

ARTICLE IV VARIANCE AND TERMINATION

4.1 Variance. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or any portion thereof may apply to the Board for a written variance from the provisions of this Covenant.

4.2 Termination. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or a portion thereof may apply to the Board for a termination of the Restrictions as they apply to all or any portion of the Burdened Property.

4.3 Term. Unless terminated in accordance with paragraph 4.2 above, by law or otherwise, this Covenant shall continue in effect in perpetuity.

ARTICLE V MISCELLANEOUS

5.1 No Dedication Intended. Nothing set forth herein shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Burdened Property or any portion thereof to the general public.

5.2 Notices. Whenever any person gives or serves any notice, demand, or other communication with respect to this Covenant, each such notice, demand, or other communication shall be in writing and shall be deemed effective (1) when delivered, if personally delivered to the person being served or official of a government agency being served, or (2) three (3) business days after deposit in the mail if mailed by United States mail, postage paid certified, return receipt requested:

If To: "Board"

Regional Water Quality Control Board
San Francisco Bay Region
Attention: Executive Officer
1515 Clay Street, Suite 1400
Oakland, California 94612

5.3 Partial Invalidity. If any portion of the Restrictions or terms set forth herein is determined to be invalid for any reason, the remaining portion shall remain in full force and effect as if such portion had not been included herein.

5.4 Article Headings. Headings at the beginning of each numbered article of this Covenant are solely for the convenience of the parties and are not a part of the Covenant.

5.5 Recordation. This instrument shall be executed by the Covenantor and by the Executive Officer of the Board. This instrument shall be recorded by the Covenantor in the County of Contra Costa within ten (10) days of the date of execution.

5.6 References. All references to Code sections include successor provisions.

5.7 Construction. Any general rule of construction to the contrary notwithstanding, this instrument shall be liberally construed in favor of the Covenant to effect the purpose of this instrument and the policy and purpose of the Water Code. If any provision of this instrument is found to be ambiguous, an interpretation consistent with the purpose of this instrument that would render the provision valid shall be favored over any interpretation that would render it invalid.

IN WITNESS WHEREOF, the parties execute this Covenant as of the date set forth above.

LEGAL DESCRIPTION OF PROPERTY

EXHIBIT A

Portion of Lot C as shown on the map of Dohrman Ranch, filed December 21, 1895, in Map Book E, page 115, in the office of the County Recorder of Contra Costa County, being the tract of land described as parcel One in the deed from Leslie Edwin Manning, et ux, to J. H. Wood, et ux, recorded January 16, 1951, in book 1702 of Official Records, page 546, as follows:

"Beginning at the point of intersection of the western line of said Lot C with the northern line of State Highway IV C. C. 14 A said point of intersection being North $18^{\circ} 47' 30''$

East, 25.64 feet from the southwest corner of the parcel of land described in the Deed from Albert F. Castro, et al, to Antonio Coppa, dated April 15, 1927, recorded June 28, 1927, in book 90 of Official Records, page 135, thence from said point of beginning, easterly along the northern line of said State Highway and along the arc of a curve to the right, the center of which bears South $2^{\circ} 05' 20''$ East, 3050 feet through a central angle of $5^{\circ} 24'$ an arc distance of 287.65 feet; thence leaving the northern line of said highway, North $9^{\circ} 24' 30''$ East, 669.19 feet to a 2" x 2" hub, thence north $1^{\circ} 44'$ East, 595.64 feet to a 8" x 8" post on the southeastern line of the Atcheson, Topeka and Santa Fe Railway right of way; thence along the southeastern line of said right of way, the following courses and distances; South $55^{\circ} 18'$ West, 8.37 feet, South $54^{\circ} 50'$ West, 30.60 feet, South $54^{\circ} 20'$ West, 28.82 feet, South $54^{\circ} 11'$ West, 30.35 feet and South $53^{\circ} 53'$ West, 361.56 feet, to an iron pipe on the western line of said Lot C; thence leaving said right of way and along the western line of said Lot C, South $0^{\circ} 08' 30''$ east, 849.94 feet to a 1/2" iron pipe; thence continuing along the western line of said Lot C, South $18^{\circ} 47' 30''$ West, 139.91 feet to the point of beginning.

EXCEPTING THEREFROM: The parcel of land described in the Deed from Antonio Coppa to East Bay Municipal Utility District, a corporation dated December 18, 1935, recorded January 2, 1936, in book 390 of Official Records, page 222, but not excepting however, the rights reserved unto the grantor and his successors in said Deed.

ALSO EXCEPTING THEREFROM: the parcel of land described in the Deed from J. H. Wood, et ux, to Carl Adam Roy, et ux, recorded June 1, 1954, in book 2335 of Official Records, page 216.

ALSO EXCEPTING THEREFROM: That portion thereof described as follows:

PARCEL ONE: Beginning on the East line of the parcel of land originally described above at the North line of the strip of land described above at the North line of the strip of land described in said East Bay Municipal Utility District deed (390 OR 222); thence North $9^{\circ} 24' 30''$ East, along said East line, 100 feet; thence North $86^{\circ} 32'$ West, 160 feet; thence South $9^{\circ} 24' 30''$ West 125.95 feet to a north line of said East Bay Municipal Utility District parcel (390 OR 222); thence along said North line North $81^{\circ} 09' 27''$ East, 120.89 feet and South $86^{\circ} 32'$ East, 44.57 feet to the point of beginning.

PARCEL TWO: A non exclusive right of way as an appurtenance to Parcel one above for use as a roadway for vehicles of all kinds, pedestrians and animals, for water, gas, oil and sewer pipe lines and for telephone, electric light and power lines together with the necessary poles or conduits to carry said lines, over, under and across a strip of land 20 feet in width the west line of which is 20 feet westerly, measured at right angles from the east line thereof and which east line is described as follows:

Beginning at the Southeast corner of Parcel One above; thence South $9^{\circ} 24' 30''$ west, along the East line of the parcel of land originally described above, 334.06 feet to the North line of the State Highway.

Said West line to extend from the South line of Parcel One above to the North line of said State Highway.

Subject: Soil Management Plan for the Former Anthony's Auto Wrecking Property, 850 San Pablo Avenue, Pinole, California

Dear Sampath:

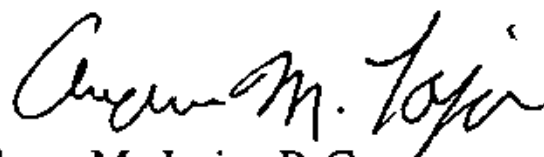

LFR Levine·Fricke (LFR) has prepared the attached Soil Management Plan (SMP) on behalf of the City of Pinole ("the City") for the former Anthony's Auto Wrecking Property, located at 850 San Pablo Avenue, Pinole, California ("the Site"). LFR understands that the City is considering acquiring the Site for industrial redevelopment. The Regional Water Quality Control Board (RWQCB) recommended the preparation of an SMP for use during redevelopment of the Site. The SMP addresses the management of naturally occurring soil and existing fill material at the Site.

The SMP presents sampling and health and safety procedures to be implemented during site development or future site modification that could disturb site soil, such as the repair of a subsurface utility. The SMP will facilitate regulatory site closure by providing a framework to manage residual concentrations of lead and petroleum hydrocarbons in soil at the Site in a manner that is protective of human health and the environment, including water quality.

The SMP will remain in effect unless future site development plans necessitate changes in land use. At such time, the RWQCB may require a re-evaluation of the soil and groundwater conditions at the Site and implementation of further remedial measures to address residual metals and petroleum-hydrocarbon-affected soil if warranted by the proposed changed land use.

If you have questions or comments, please call me at (510) 652-4500.

Sincerely,

Andrew M. Lojo, R.G.
Senior Associate Geologist

1.0 INTRODUCTION

LFR Levine-Fricke (LFR) has prepared this draft Soil Management Plan (SMP) on behalf of the City of Pinole ("the City") for the former Anthony's Auto Wrecking Property, located at 850 San Pablo Avenue, Pinole, California ("the Site"; Figure 1). LFR understands that the City is considering acquiring the Site for redevelopment. The portion of the Site previously used for auto wrecking activities (approximately 7 acres) is slated for industrial reuse. The remaining 7 acres, which has remained unused until now, is slated for residential redevelopment. This SMP is intended to provide protocols for managing residual soil remaining on the auto wrecking portion of the Site containing lead and total petroleum hydrocarbon (TPH) concentrations that are acceptable for industrial site reuse, although above natural background levels. The protocols are intended for use during site redevelopment and future maintenance that may require the disturbance of subsurface soil at the Site.

This SMP is intended to facilitate regulatory site closure by providing a framework to manage residual concentrations of lead and TPH in soil at the Site in a manner that is protective of human health and the environment, including water quality. The SMP identifies the general measures that must be implemented before, during, and after redevelopment of the Site. The SMP was prepared based on the results of field investigations and remedial activities conducted by LFR and on previous site investigative work conducted by Terrasearch, Inc. ("Terrasearch") and Geocon Geotechnical and Environmental Consultants ("Geocon").

This SMP will remain in effect unless future site development plans necessitate changes in land use. At such time, the California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) may require a re-evaluation of the soil and groundwater conditions at the Site and implementation of further remedial measures to address residual concentrations of lead- and TPH-affected soil.

2.0 SITE DESCRIPTION

The Site, located at 850 San Pablo Avenue, Pinole, California, covers an area of approximately 14 acres, the western half of which was formerly used for auto wrecking activities. A site vicinity map is presented as Figure 1. The Site is bounded to the east by hilly undeveloped land with residential housing beyond, to the south by San Pablo Avenue and various businesses, to the west by industrial property, and to the north by the Atchison, Topeka, and Santa Fe Railroad and residences beyond. The northern two-thirds of the Site slopes gently downhill toward the railroad tracks and San Francisco Bay. The southern third of the Site forms a hill, which slopes to the south toward San Pablo Avenue after peaking on the Site. A site plan is presented as Figure 2.

Several scenarios for the industrial redevelopment of the Site have been proposed. The current redevelopment plan for the former auto wrecking parcel (approximately 7 acres)

includes the construction of an access road along the eastern boundary of the parcel. Five level building pads to be constructed along the western side of the access road are proposed for later industrial development.

3.0 BACKGROUND

3.1 Previous Environmental Investigations

In 2000, the City retained Terrasearch to provide preliminary environmental and geotechnical investigation services at the Site and to propose a remediation plan to address identified contaminants in soil. In March 2001, the City requested that LFR evaluate the remedial activities that Terrasearch recommended for the Site. Specifically, LFR reviewed the following Terrasearch documents:

- "Geotechnical Site Evaluation and Preliminary Grading Recommendations," dated January 24, 2001
- "Limited Phase I and II Environmental Site Assessment," dated January 25, 2001
- "Preliminary Cost Estimate for Removal of Contaminated Soil," dated February 8, 2001

Based on review of these reports, LFR recommended that more data be collected to assess whether soil at the Site needed to be removed to protect human health and the environment. LFR therefore conducted a further soil and limited groundwater investigation at areas of concern and reviewed the regulatory files from neighboring properties to evaluate the potential for migration of off-site contamination to the Site.

The results of LFR's investigation indicated that the potential for migration of contaminants onto the Site from off-site sources is low, including fuel conveyed in pipelines present in a Chevron Pipeline easement located in the southern portion of the Site (Figure 2).

Based on the results of the analytical data and information collected during LFR's investigation and on the previous investigation work conducted by Terrasearch and Geocon, LFR found that four areas of the Site had been affected by past site uses. Two of these areas (in the vicinity of boring LF-30 and test pit TP-6 and in the vicinity of boring LF-13; Figure 2) had elevated concentrations of lead in soil. A third area, in the vicinity of the former engine draining area (borings LF-5 and LF-6; Figure 2) had soil affected with TPH and low levels of volatile organic compounds (VOCs). The fourth area was the former underground storage tank (UST) area, which has already been closed by the RWQCB.

Because oil/water separators in the engine draining area were reported to have drained into the soil rather than the sewer system, groundwater sampling was conducted by LFR

in September 2001. During the groundwater investigation, LFR collected six grab groundwater samples from borings GW-1 through GW-6. Analytical results from these samples indicated that previous oil drainage from the oil/water separators has not significantly affected shallow groundwater in the area.

Based on the analytical results of these and previous groundwater samples collected during these investigations, LFR concluded that no additional investigations or remedial actions were needed for groundwater at the Site (with the exception of the UST area).

3.2 Remedial Goals Established for Soil

The results of previous investigations indicated that soil and existing fill material at the Site had been affected by lead and TPH quantified in the motor oil (TPHmo) and diesel (TPHd) ranges. A total of three areas were identified where these constituents exceeded the remediation goals developed for the industrial reuse planned by the City of Pinole for the Site (LFR 2002). The remediation goals developed for these constituents in soil were:

- TPHmo: 1,000 milligrams per kilogram (mg/kg)
- TPHd: 500 mg/kg
- benzene: 0.39 mg/kg
- toluene: 8.4 mg/kg
- ethylbenzene: 24 mg/kg
- total xylenes: 1.0 mg/kg
- total lead: 750 mg/kg

These residual goals were chosen using a combination of U.S. Environmental Protection Agency (EPA) preliminary remediation goals (PRGs) and RWQCB risk-based screening levels (RBSLs).

The TPHmo and TPHd remedial goals were based on the values provided in the RWQCB RBSLs for the industrial/commercial land-use scenario in which groundwater is not considered a potential source of drinking water. LFR has used information in this document as an informative tool in the process of evaluating whether a release of chemicals may or may not be considered significant.

The RWQCB has prepared a technical document entitled "Application of Risk-Based Screening Levels and Decision Making to Sites With Impacted Soil and Groundwater" (Interim Final, August 2000). The document presents lookup tables of conservative RBSLs for over 100 chemicals commonly found in affected soil and groundwater at sites where releases of hazardous substances have occurred. The report describes how the RBSLs were developed and provides detailed tables and appendices in support of the summary lookup tables. The document is intended to help expedite the preparation of

environmental risk assessments at sites where affected soil and groundwater have been identified.

As an alternative to preparing a formal risk assessment, soil and groundwater data collected at a site can be directly compared to the RBSLs and the need for additional work evaluated. It is anticipated that this document will be especially beneficial for use at small- to medium-size sites (similar to this Site) where the preparation of a more formal risk assessment may not be warranted or feasible because of time and/or cost constraints.

The total lead remedial goal of 750 mg/kg was based on the value provided in the EPA PRGs for industrial sites. For comparison purposes, the RBSL for lead at industrial sites in which groundwater is not considered a potential source of drinking water is 1,000 mg/kg.

4.0 SOIL REMEDIATION

Based on previous investigations, two areas were identified as containing lead-affected soil at concentrations exceeding the industrial PRG. These areas are located in the northern (lower) and central (upper) portions of the Site. A further area in the southern portion of the Site was identified as containing TPH-affected soil at concentrations exceeding RBSLs. In June and July of 2002, LFR supervised the excavation and off-site disposal of the affected soil in the following areas (Figure 2):

- The lower lead excavation area, located near former soil boring LF-30, was excavated to approximately 2 feet below ground surface (bgs)
- The upper lead excavation area, located near former soil boring LF-13, was excavated to approximately 2 feet bgs
- The TPH-affected excavation area, located near former soil borings LF-4 and LF-5, was excavated to a depth of approximately 5 to 8 feet bgs

As the excavations progressed, confirmation samples were collected from the base and the sidewalls of each excavation after the removal of affected soil. Excavation continued until the analysis of confirmation sample results indicated that the remedial goals for affected soil in the areas had been met. Results of the remediation activities are presented in LFR's "Report of Soil Remediation Activities," dated September 26, 2002.

Approximately 2,800 tons of lead-affected soil were removed from the lower and upper lead excavations. The excavated soil was stabilized to below soluble threshold limit concentration (STLC) levels by mixing the soil with approximately 10 percent cement to fixate the lead. The treated soil was then transported to Allied Waste's Forward Landfill, a Class 2 nonhazardous waste landfill located in Stockton, California. A total of approximately 742 tons of TPH-affected soil was excavated and transported to Allied Waste's Forward Landfill for off-site disposal.

The analytical results of the confirmation samples collected from the base and sidewalls of the excavations indicated that the remedial goals established for lead- and fuel-affected soil had been successfully achieved at the Site. LFR therefore recommended in its Report of Soil Remediation Activities that the Site be granted no-further-action status and that additional soil removal and handling activities be conducted under the guidance of this SMP.

5.0 SOIL MANAGEMENT PROTOCOLS DURING SITE DEVELOPMENT

The following sections present the management protocols for handling, moving, stockpiling, and reusing native soil during the development at the Site. Contingency protocols to be followed when unknown contamination or underground structures are identified are also presented.

5.1 Soil Management Strategy

Throughout the grading activities associated with the redevelopment of the Site, native soil and existing fill material will be handled and moved from one portion of the Site to another.

As described above, the analysis of confirmation samples collected from the areas of excavations indicated that the remedial goals for lead- and fuel-affected soil at the Site have been met. An objective of this SMP is to further minimize the potential for exposure to residual concentrations of lead and fuel in soil by developing a strategy for the management of reuse-soil at the Site. In addition, this SMP addresses the concern that soils meeting the remedial goals may be classified as hazardous waste if they are removed from the Site due to the relatively high solubility of the lead.

Many of the projected construction activities at the Site will require limited excavation of native soil. Other construction activities proposed will require soil to be added for grading. The net balance of soil from cut and fill grading will probably not require removal of soil from the Site. LFR recommends that the shallow soil, which contains residual levels of lead and TPH, be stripped off to a depth of approximately 1 to 2 feet bgs and placed in deeper fills as part of the normal site grading activities, to minimize the potential of future exposure of this soil to site occupants. Although off-site disposal of soil is not anticipated, any soil to be disposed of off site will be tested and disposed of at an appropriately licensed landfill following applicable federal and state laws and regulations.

In addition, fill material, which is present in portions of the Site, may include construction debris, concrete, rock, glass, wood, bricks, and other debris such as pieces of metal. It may be necessary to remove soil containing this material, which will also be tested and disposed of in accordance with all applicable laws and regulations.

5.2 Measures to Minimize Dust from Soil Movement and Handling

Soil handling activities can result in exposure to dust. Dust control measures will be implemented during the construction at the Site. In general, the most effective dust control measure is to water all active construction areas at least twice per day or as necessary to prevent visible dust plumes from migrating off site. Also, tarpaulins or other effective covers may be used for trucks carrying soils on and off site.

5.3 Reuse of Excavated Soil

Soil that is excavated within the Site may need to be stockpiled before it is reused. There are three potential concerns associated with the stockpiling of soils: dust generation, erosion, and unauthorized access to the stockpiles. The risk management measures that will be implemented to control dust from the stockpiles are described below.

Water will be used to mitigate dust generated during the creation, movement, or use of the soil stockpiles. Overwatering, which could result in excessive runoff, will be avoided. Dust palliatives or other methods of dust control may be used if water proves to be inadequate.

While stockpiles are in place, dust will be controlled using a cover or an alternative method that provides equivalent protection. If the stockpiles are covered, the cover will consist of anchored plastic sheeting or equivalent cover. The method of covering will be determined based on the anticipated time the stockpiles will be in place, weather conditions, and other practical factors such as the size of the stockpiles.

5.4 Soil for Landscaped Areas

This section applies to landscaped areas that will be accessible for human use. Materials used for landscaped areas will consist of imported materials composed of sand, topsoil, or fill that meets the prevailing commercial standards for use in commercial developments or on-site material (such as native soil) that has been specifically approved for reuse and meets the prevailing commercial standards.

5.5 Contingency Protocols for Identifying Affected Media or Underground Structures

The protocols to be followed in the event that unknown areas of contamination and/or underground structures are identified during site development are described in this section. These protocols will be conducted by the owner, lessee, or other entity, such as a contractor or qualified consultant, designated or certified by the owner or lessee.

Unknown conditions that may trigger contingency monitoring procedures during site development include but are not limited to those listed below. Discovery of any of these conditions could require either alternative or additional measures to protect human health and the environment.

- oily, shiny, or saturated soil or free product in previously undocumented areas
- discovery of a UST
- discovery of debris associated with former wrecking yard activities
- other conditions that vary materially from those documented during previous investigations

If free product is encountered, the areal extent and thickness will be characterized and excavated. The excavated soil will be stockpiled and disposed of off site.

During the course of excavation and construction activities within the Site, it is possible that USTs, sumps, or other underground structures that were not identified during previous site investigations will be discovered. For example, USTs may be identified during grading and site excavation activities by the presence of vent pipes that extend above the ground surface, product distribution piping that leads to the UST, fill pipes, backfill materials, or the UST itself. Other structures might not have features that extend above the surface and could be unearthed when construction equipment comes into contact with them. The following section outlines the measures that govern identification and removal of USTs and appropriate measures for addressing other underground structures identified during development.

Chapter 6.7 of the California Health and Safety Code contains the specific requirements for removing and remediating contamination associated with a leaking UST. The Contra Costa County Hazardous Materials Program (CCCHMP) is responsible for local oversight and overseeing the removal of any UST; however, the RWQCB maintains responsibility for overseeing environmental investigations and responses arising from releases from any UST at the Site. Accordingly, the RWQCB and the CCCHMP will be notified in the event that a UST or appurtenant piping is discovered during construction and development of the Site.

Environmental investigations and responses required following removal of the UST will be conducted under the direction of the RWQCB and in accordance with the specific provisions delineated in Chapter 6.7 of the California Health and Safety Code.

For other subsurface structures that may have been related to former use and storage of chemicals, such as underground vaults and sumps, the following procedures should be implemented to determine the proper disposition of the encountered structure.

The structure should be inspected to assess whether it contains any indication of chemical residuals or free liquids other than water. The owner or lessee's designated environmental engineer will make this assessment using field observations. If there is no

indication, based on visual observation, odor, or field air monitoring equipment, that chemicals are or were present within the vault or sump, then removal of the structure is not necessary for environmental reasons.

If a sump or vault contains liquids that appear to contain chemicals, based on visual observations, odor, or field air monitoring equipment, then the following steps shall be taken:

- Characterize the chemical and determine appropriate response action.
- Sample potentially chemical-containing liquids for profiling purposes.
- Properly remove and dispose of liquids under the direction of the owner or lessee's designated environmental engineer.
- Notify the RWQCB and/or CCCHMP before the selection of an appropriate response.

5.6 Access Control During Construction

The potential for trespassers or visitors to gain access to construction areas and come into direct contact with potentially contaminated soils or groundwater will be controlled through the implementation of the access and perimeter security measures.

5.7 Construction Worker Management Measures

During construction activities, workers that may directly contact the native soil will conduct the work in accordance with California Occupational Safety and Health Administration (Cal/OSHA) training and worker protection rules and regulations. The types of hazards that construction workers or other workers involved in soil disruptive activities are most likely to encounter include the following:

- identifying previously unknown structures or areas of contamination
- having direct contact with fill materials that contain inorganic constituents including lead or petroleum compounds

Cal/OSHA is the state agency that is responsible for monitoring compliance with worker health and safety laws and requirements. Compliance with standard Cal/OSHA regulations, particularly Title 8, Chapter 4, "Division of Industrial Safety," will minimize the potential effects associated with excavation activities, as the intent of these standards is to prepare workers for the types of hazards that are likely to be encountered during such activities. All activities conducted within the Site must be in compliance with current Cal/OSHA rules and regulations, even if not expressly noted in this SMP. Further, all workers involved in subsurface activities must conduct the work in compliance with an environmental health and safety plan (HSP). The HSP will be an additional mechanism that will protect workers engaging in intrusive work. To achieve

that goal, the HSP will delineate the specific potential hazards associated with contact with native soils at the Site and will inform workers that the subsurface material may contain lead or petroleum compounds. The HSP will also define the methods to be employed to minimize the hazards associated with such activities.

The minimum health and safety guidelines for all workers engaging in intrusive work at the Site are provided below. Preparation of and compliance with all aspects of the HSP is the responsibility of the individuals engaged in the intrusive activities. HSPs prepared for any construction projects will be kept on site during the project. This SMP does not require that construction workers working at the Site comply with Cal/OSHA standards for Hazardous Waste Operations and Emergency Response, unless the companies conducting intrusive work at the Site conclude it is required after thoroughly evaluating the residual soil analytical data in relation to the potential exposure to those chemicals necessitated by the type of work being conducted.

5.8 Environmental Health and Safety Guidelines

Although this SMP establishes the minimum requirements for an HSP, the HSP is a stand-alone document developed by the owner or lessee's designated contractor or qualified environmental consultant before the initiation of any construction activities that would disrupt the native soils. It is the responsibility of the individual preparing the HSP to verify that the components of the HSP are consistent with current worker health and safety rules and regulations. All workers, including utility repair workers or other workers who may directly contact native soil or groundwater, would perform all activities in accordance with an HSP. Consistent with Cal/OSHA standards, an HSP would not be required for workers such as carpenters, painters, or others who would not be performing activities that disrupt native soils.

The HSP will be designed to identify, evaluate, and control safety and health with respect to the chemicals present in the soil and groundwater. The HSP will require that the on-site Health and Safety Officer conduct periodic briefing meetings (tailgate meetings) with construction personnel on the reporting requirements to be undertaken when underground structures are identified. Compliance with all aspects of the HSP is the responsibility of the party conducting the construction activities.

Notes:

All samples collected 4/27/01

L = Lighter hydrocarbons contributed to the quantitation

H = Heavier hydrocarbons contributed to the quantitation

Y = Sample exhibits fuel pattern which does not resemble laboratory standard

NA = Not analyzed

ND = Not detected

TPH = Total petroleum hydrocarbons

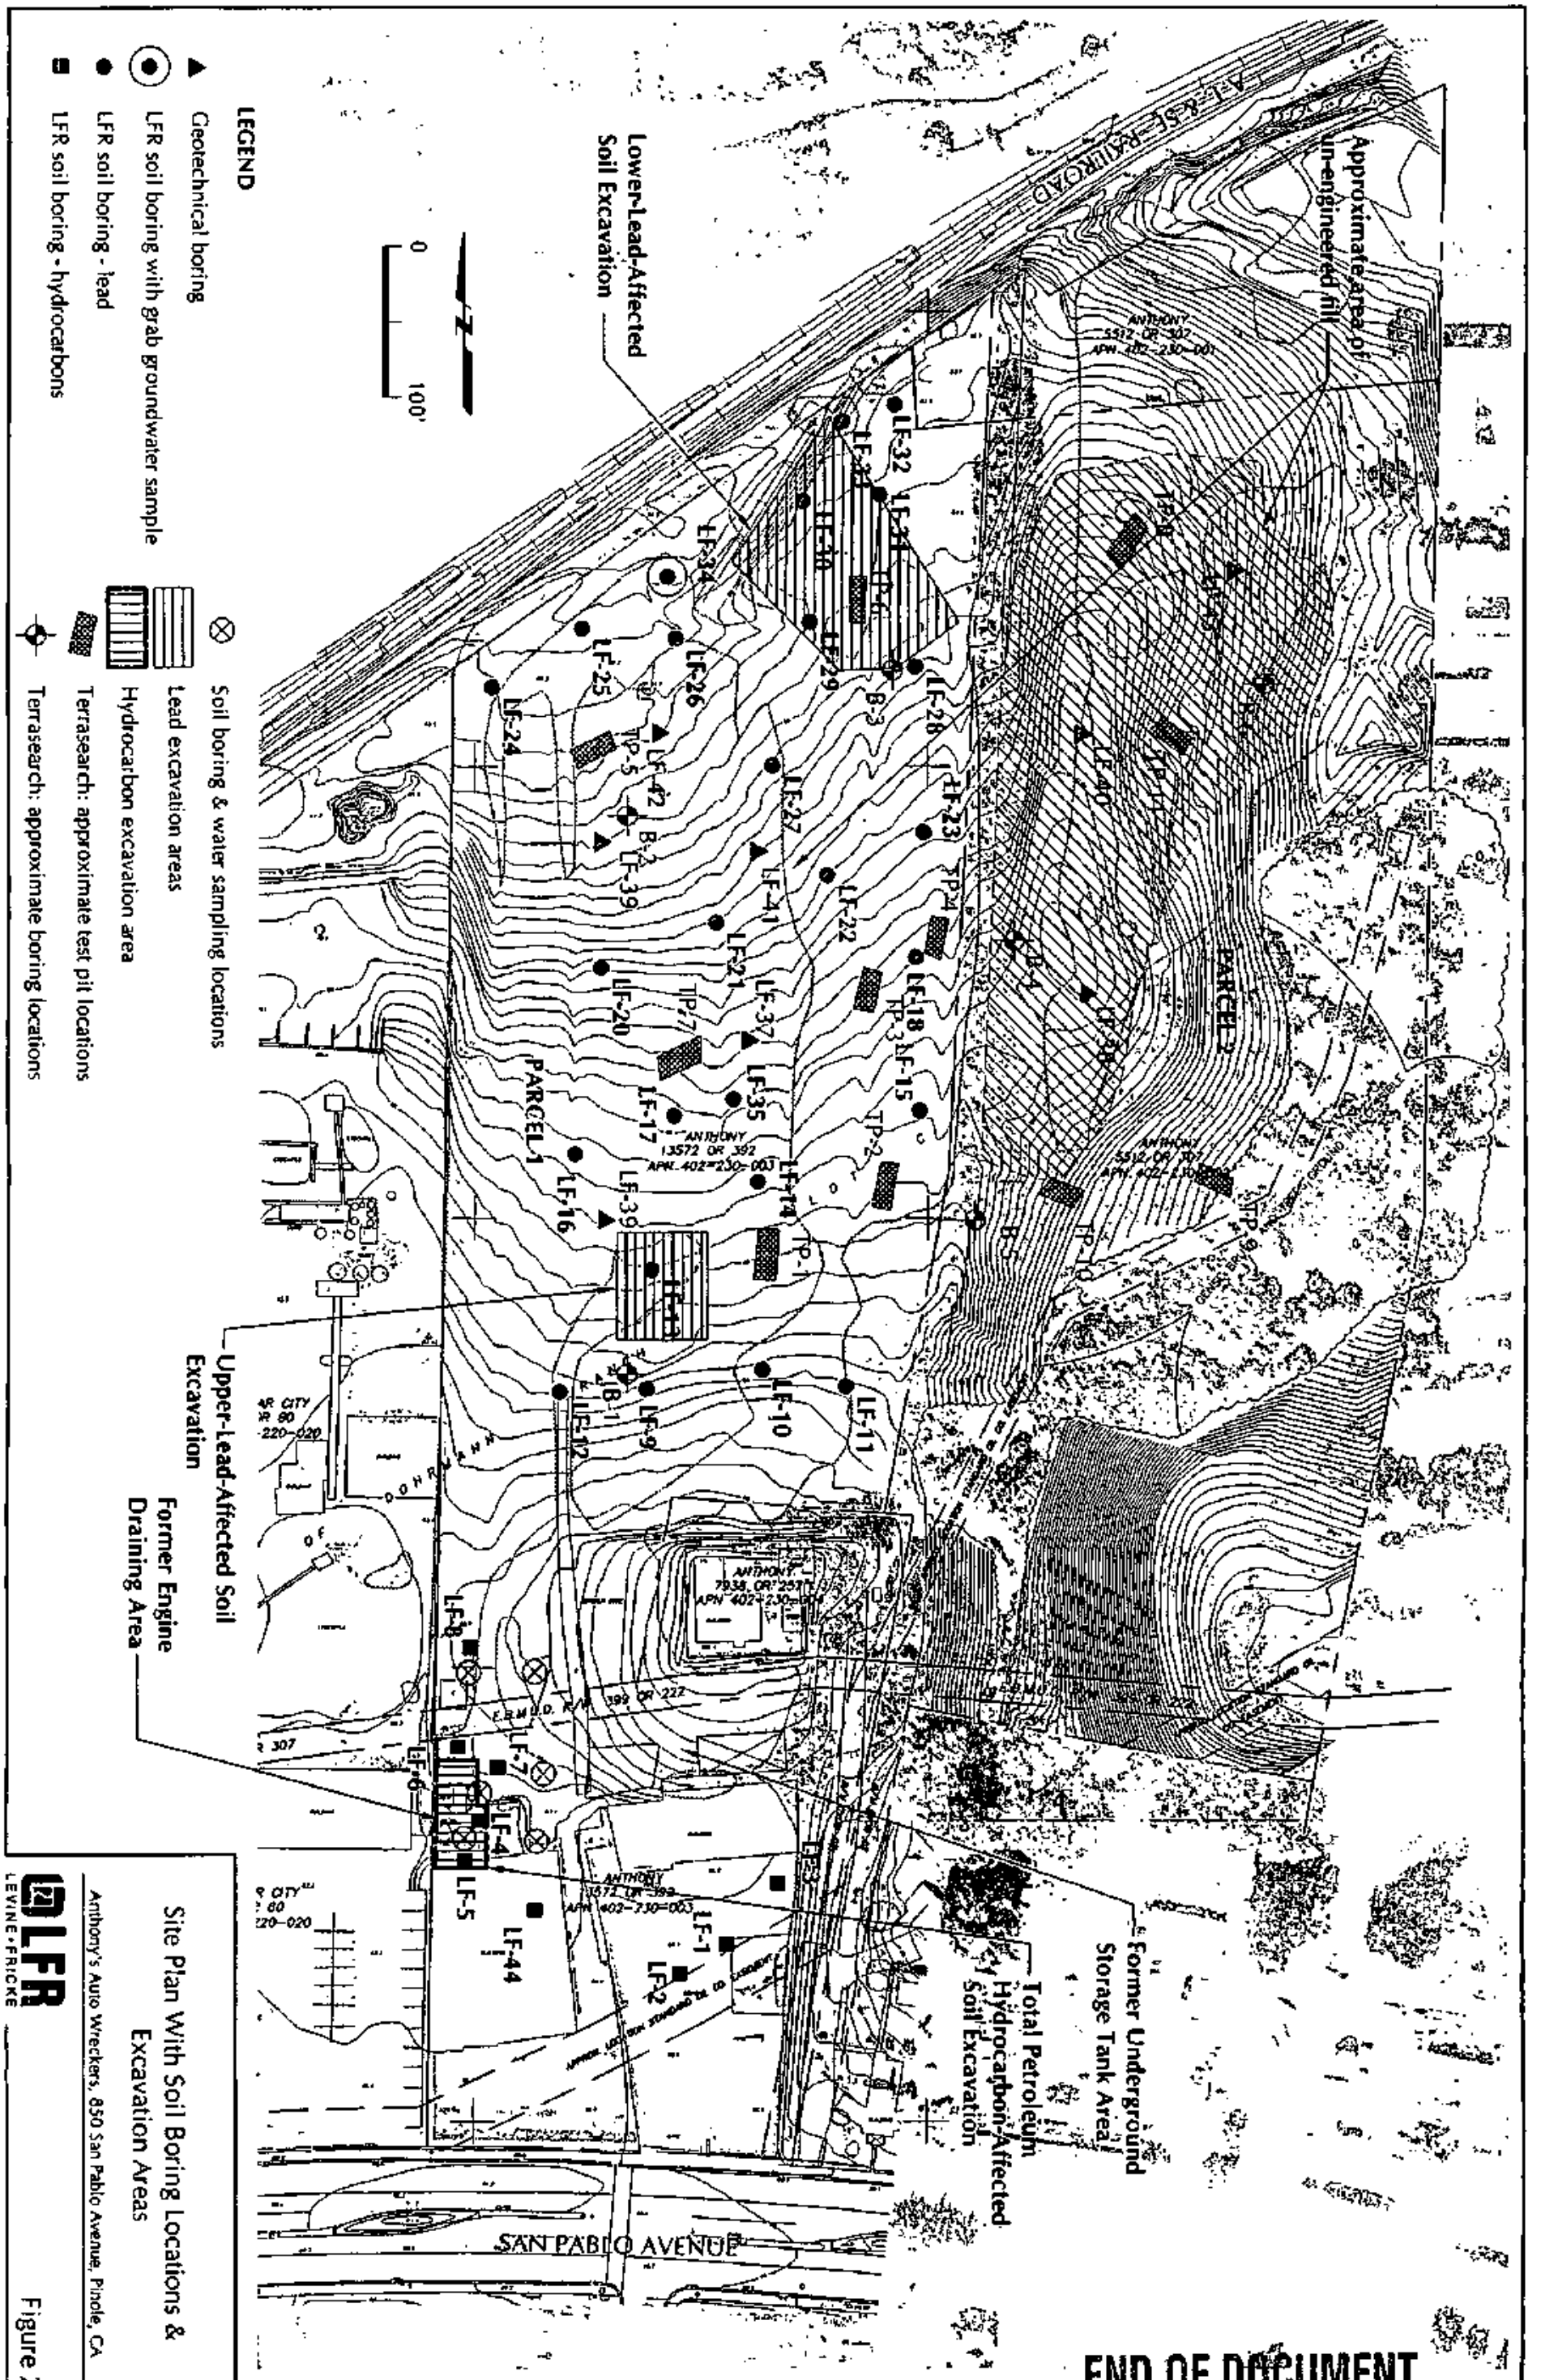

VOCs = Volatile organic compounds

VOCs were analyzed by EPA method 8260. Only those compounds that were detected in one or more sample are listed on this table.

QUALITY CONTROL BOARD

Dear Mr. Rangarajan:

On behalf of our client, Mr. Arley Anthony, Geocon has performed environmental engineering services at the former automobile wrecking yard located at 850 San Pablo Avenue in Pinole, California. The accompanying report summarizes the services performed including excavation of impacted soil material, removal of impacted groundwater, the advancement of borings, limited soil and groundwater sampling, and laboratory analyses. This report also serves as the workplan for recommended remedial activities in pursuit of site closure.

The contents of this report reflect the views of Geocon Consultants, Inc., who is responsible for the facts and accuracy of the data presented herein. This report does not constitute a standard, specification, or regulation.

If there are any questions concerning the contents of this report, or if Geocon may be of further service, please contact the undersigned at your convenience.

Sincerely,

GEOCON CONSULTANTS, INC.

Matthew W. Hanco, REA
Senior Project Scientist

SITE INVESTIGATION REPORT

1.0 INTRODUCTION

This site investigation report for the former Anthony Auto Wreckers site was prepared to document remedial actions performed at the site relative to the former underground storage tanks (USTs) and is being submitted to the California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) on behalf of Mr. Arley Anthony.

1.1 Site Location

The project site consists of a former automobile wrecking yard located at 850 San Pablo Avenue in Pinole, California. The site is vacant with no current uses. The City of Pinole is in the process of purchasing the property for commercial development. The approximate location of the site is depicted on the Vicinity Map presented as Figure 1.

1.2 Background

The following site background information is based on Geocon's review of site reports provided by Mr. Arley Anthony and Malicoat, Becks and Associates, Inc.

Two 1,000-gallon gasoline USTs were removed from the project site on January 30, 1992 under the supervision of Contra Costa County Health Services Department (CCCHSD). Prior to their removal, one gasoline UST was used to store gasoline that was removed from wrecked vehicles and the other UST was used to store purchased gasoline. Product from both USTs was used to fuel yard vehicles and other business-related automobiles.

Upon UST removal, 2,200 milligrams per kilogram (mg/kg) of Total Petroleum Hydrocarbons as gasoline (TPHg) were detected in a soil sample collected at 8 feet below ground surface (bgs). Additional soil sampling from a depth of 11 feet bgs was performed in March 1992. While TPHg was detected in the March 1992 soil samples, the detected concentrations at 11 feet bgs were lower than those concentrations detected at 8 feet bgs.

In April 1992, approximately 75 cubic yards of soil was over-excavated from the UST pit, to a depth of 14 feet bgs. Confirmation samples collected from 14 feet bgs did not contain detectable concentrations of petroleum hydrocarbons.

Based on the results of the over-excavation confirmation sampling, the CCCHSD issued case closure in a letter entitled Underground Storage Tank (UST) Soil Case Closure, 850 San Pablo Avenue, Pinole, CA 94564, dated March 1, 1996. The letter confirmed the completion of site investigation and remedial action for the USTs formerly located at the site. A copy of the CCCHSD letter is attached.

On May 1, 2000, the RWQCB issued a letter to the property owner entitled Requirement for MTBE Information Pertaining to the Leaking Underground Storage Tank Site Located at 850 San Pablo Avenue, Pinole, Contra Costa County. The letter requires the property owner to provide MTBE analysis results to the RWQCB.

On July 31, 2000, Geocon submitted the MTBE Investigation Workplan to the RWQCB. The workplan proposed the advancement of one soil boring in the location of the former USTs and the analysis of soil and grab-groundwater for MTBE. The RWQCB approved the workplan on August 10, 2000 with the requirement that samples be also analyzed for Total Petroleum Hydrocarbons as diesel (TPHd), TPHg, and Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX).

A single soil boring (SB1) was advanced on October 5, 2000 in the location of the former USTs. The results of the grab-groundwater sample analysis indicated that concentrations of BTEX compounds and MTBE in groundwater were above applicable regulatory thresholds. In a December 6, 2000 letter, the RWQCB requested a Workplan to delineate the lateral and vertical extent of soil and groundwater impacts.

In July 2001, an additional eight soil borings (SB2 through SB9) were advanced at the site to define the extent of impacts to soil and groundwater. Concentrations of TPHg, BTEX, and MTBE were present in soil samples from one boring (SB4 near the former UST pit) that were indicative of a source. The extent of impacts to groundwater was delineated to the north, east, and west (in the assumed downgradient and crossgradient groundwater flow directions), and appears to be restricted to the immediate vicinity of the former UST pit.

The RWQCB reviewed the *Site Investigation Report* dated August 9, 2001 and concurred with Geocon in recommending the following:

- Over-excavate the former tank pit, and
- Submit confirmation groundwater sample from excavation for lab analysis.

The RWQCB requested that Geocon prepare a workplan for the proposed remedial activities. The RWQCB also requested that the workplan include collecting soil and grab groundwater samples in the area of boring SB4 after remedial activities to confirm the effectiveness of the remedial efforts.

Geocon prepared the December 7, 2001 *Site Remediation Workplan* in response to the RWQCB requests and further recommended that water be purged from the over-excavation and that oxygen release compounds (ORCs) be added to the saturated zone prior to backfilling the excavation. The RWQCB approved the workplan in their December 14, 2001 letter.

1.3 Purpose

The purpose of the work performed was to remove impacted soil and groundwater and add amendments to groundwater (i.e., ORCs) that will continue to reduce contaminant concentrations in groundwater.

2.0 SCOPE OF SERVICES

The following scope of services was performed.

2.1 Pre-Field Activities

- A Workplan, dated December 7, 2001, was prepared to summarize the scope of services to be performed by Geocon. The Workplan was submitted to the RWQCB for approval.
- The Health and Safety Plan prepared for the initial scope of work was updated to reflect the scope of the proposed work. The Health and Safety Plan provides guidelines on the use of personal protective equipment and the health and safety procedures to be implemented during the field activities.
- Geocon performed a site reconnaissance to inspect the work area for accessibility, traffic control and to review the proposed boring locations.
- Geocon obtained boring permits from CCCHSD (Appendix A).
- Geocon retained the services of Advanced Technology Laboratories (ATL) and Curtis & Tompkins, Ltd. to provide the laboratory analyses and V&W Drilling and Gregg Drilling to provide drilling and sampling services.

2.2 Field Activities

Soil Borings

A total of four borings (SB10 through SB13) were advanced utilizing a truck-mounted hollow-stem auger drill rig. It is noted that five borings were proposed in the Workplan, however, the proposed boring southeast of the former USTs could not be advanced due to access limitations. The approximate boring locations are depicted on the Site Plan, Figure 2.

Soil boring SB10 was advanced on January 30, 2002 (prior to excavation activities) to define the southern extent of impacted groundwater. Soil samples were collected from boring SB10 at 10 and 15 feet below ground surface (bgs) and submitted for laboratory analysis.

Soil borings SB11 through SB13 were advanced on March 29, 2002 (after excavation activities) to confirm the effectiveness of the remediation efforts. The Workplan did not specify that soil samples were to be collected from the confirmation borings (SB11 through SB13); however, due to residual impacts left in place once the over-excavation was complete Geocon deemed it necessary to characterize the impacted soil left in place. Soil samples were collected continuously from borings SB11 and SB13 beginning at 12 feet bgs (depth to impacted soil measured in excavation sidewalls) to the termination of the borehole. Soil samples were selected from these borings for laboratory

analysis based on photoionization device (PID) readings and evidence of impacts to soil. Soil samples were collected from these borings to determine the extent and concentration of contaminants remaining in place. No soil samples were collected from boring SB12 due to the lack of contaminant impacts in the west wall of the over-excavation.

After advancing each boring to the target depth of approximately 30 feet bgs, the augers were removed and each boring was left open to allow groundwater to enter the annular space. While saturated soil was not encountered in the borings, the material encountered was a fractured siltstone and water appeared to enter the boring through fractures between 25 and 30 feet bgs. After enough groundwater had accumulated in the open boreholes, groundwater samples were collected from each boring.

During the collection of the soil samples, each boring was logged utilizing the Unified Soil Classification System. While not present on-site during the field activities, a California-registered geologist provided office and field supervision for the drilling and logging operations. Copies of the boring logs are included in Appendix B.

Soil Excavation and Groundwater Removal

Over-excavation of the former tank pit was performed during the week beginning February 18, 2002. The excavation was advanced to a total depth of 30 feet bgs and covered an area of approximately 30 feet by 30 feet. An approximate in-place volume of 1,000 cubic yards of soil was removed. A total of 47 truckloads of excavated soil were transported offsite (equivalent to approximately 848 tons of soil). An additional approximately 55 cubic yards of material were excavated to construct a ramp into the excavation to enable the excavator to reach the 30-foot total depth. Perched groundwater was encountered at approximately 10 feet bgs on the south side of the excavation. All perched water was removed during the excavation effort. A saturated zone was encountered at approximately 30 feet bgs and static water was measured at approximately 26 feet bgs the day after the excavation was completed. A 12-inch inside diameter Schedule 40 PVC well casing was placed into the excavation to serve as a temporary groundwater extraction point. The excavation was backfilled around the casing to grade. Oxygen release compounds (ORCs) were added to the backfill in the saturated zone. Approximately 6,000 gallons of groundwater was purged from the subsurface through the casing and stored temporarily onsite in a 6,500-gallon polyethylene tank staged adjacent to the excavation.

All excavation activities were performed by Geocon. Transportation of impacted material to the offsite facility and imported material to backfill the excavation was provided by Northern Truck & Equipment. All impacted soil material was disposed of at the Keller Canyon Landfill in Pittsburg, California. Photographs of the over-excavation are included in Appendix C.

3.0 INVESTIGATIVE METHODS

3.1 Soil Sampling Procedures

Soil borings were advanced using hollow-stem auger drilling methods and soil samples were obtained by driving a split-spoon sampler lined with three 6-inch-long stainless steel liners into soil at the top desired sampling depth and for borings SB11, SB12 and SB13 sampling was performed on a continuous basis to the termination of the suspected impacted zone (approx. 25' bgs). The split-spoon sampler was then removed and the bottom liner was capped, labeled, recorded on a chain-of-custody, and placed in a cooler with ice for transportation to ATL.

Auger flights and drilling rods used during the advancement of the borings were steam cleaned prior to use. In addition, sampling equipment was cleansed between each sampling effort by washing the equipment with an Alconox solution followed by two successive rinses with distilled water.

Subsequent to the collection of groundwater samples, completed borings were backfilled to surface grade with cement grout under the supervision of a CCCHSD grout inspector. The soil samples were transported to ATL, a California-certified environmental laboratory, utilizing standard chain-of-custody documentation. The soil cuttings and decontamination fluids from drilling operations were retained in 55-gallon drums stored at the site pending the results of the laboratory analyses and subsequent disposal.

3.2 Groundwater Sampling Procedures

Groundwater samples were collected utilizing disposable polyethylene bailers lowered into the annular space of each boring. Due to the very dense nature of the siltstone, casing was not needed to maintain open boreholes. Groundwater samples were placed in laboratory-provided containers, labeled, recorded on a chain-of-custody, and placed in a cooler with ice for transport to the analytical laboratory. The groundwater samples were transported to ATL utilizing standard chain-of-custody documentation.

3.3 Over-excavation and Backfilling

The location of the UST pit vicinity was identified by the property owner, Arley Anthony. The lithology adjacent to the former UST pit consisted of an approximate 0.5-foot layer of engineered quarry fill material over approximately three feet of a native fill immediately over a consolidated, highly fractured siltstone. The designated stockpile area was grubbed and graded with the loader prior to the beginning of the excavation effort. Once the stockpile area was prepared an excavator with a 25-foot reach equipped with a 36-inch bucket was used to execute the over-excavation of the

former UST pit. Upon breaking of ground, the boundaries of the former UST pit were visible based on the difference between the unconsolidated fill material and the native fractured siltstone. A plan view of the excavation boundary is presented as Figure 3a.

A zone of stained rock material was encountered at approximately 12 feet bgs in each of the four walls of the excavation. The presence of VOCs in the stained rock material was confirmed by olfactory senses and PID readings. The impacted material was a gray stained highly fractured siltstone. All impacted material was removed in the westward direction; thus, no visibly impacted rock remained in the west wall of the final excavation boundary. Only pockets of visibly impacted rock material remained in the south wall of the final excavation boundary, adjacent to the existing fence. Areas of impacted rock remained in the north and east wall of the final excavation boundary. Cross-sections of each wall of the excavation are presented as Figures 3b through 3e.

It was apparent that the residual impacted rock visible in the sidewalls did not extend more than a few feet beyond the final excavation boundary. There was approximately 12 feet of clean material over the impacted zone. Excavation was attempted to remove impacted areas but resulted in sidewall collapse because the excavation sidewalls did not have the integrity to withstand undermining to remove the impacted material. Therefore, excavation efforts were stopped with RWQCB concurrence.

Confirmation soil samples (NW1, NW2, SW1, SW2, EW1, EW2, and WW1) were collected from each wall of the excavation. On the walls where two confirmation soil samples were collected, one sample was collected from non-stained rock material and the other sample was collected from stained rock material. Each sample was collected by utilizing a manually operated slide hammer equipped with a 6-inch sample spoon with a brass liner. The sample spoon was driven into the sidewall and extracted. The brass liner was removed from the sample spoon, covered at each end with Teflon tape secured with plastic end caps, labeled, listed on the chain-of-custody, and placed into a cooler for temporary storage and transport to the laboratory.

A perched water zone was encountered at approximately 10 feet bgs near the center of the south wall of the excavation. Ultimately the perched water was removed with the excavated material. A saturated zone was encountered at approximately 30 feet bgs in the west half of the excavation. After an approximate 12-hour period, static water level in the excavation was approximately 26 feet bgs.

All soil excavated from the former UST pit over-excavation was stockpiled onsite and covered with plastic each day. A ramp was constructed on the west side of the excavation to enable the excavator to reach a 30-foot final depth. The total 30-foot depth could only be reached on the west half of the excavation. Due to the limitations of the equipment, the full depth could not be accomplished on the east half of the excavation. The soil material excavated from the ramp was stockpiled separate from

the soil removed from the over-excavation. The ramp graduated in depth from the west to the east with a total depth of 6.5 feet bgs at the east end of the ramp at the west wall of the excavation.

Once the excavation was complete, a 12-inch diameter schedule 40 PVC casing with 0.010-inch slots was lowered into the southwest corner of the excavation approximately two feet north of the south wall. Ultimately the casing was left in place and backfill material was placed and compacted around the well casing. A grab groundwater sample was collected from the well casing on February 21, 2002.

Four four-part composite samples (1A-D through 4A-D) were collected from the stockpiled soil and rock material to be analyzed by the laboratory for disposal characterization purposes. The samples were collected in brass sleeves, labeled, listed on a chain-of-custody document, and placed into a chilled cooler for temporary storage and transport to Curtis and Tompkins laboratory for analysis.

The excavation was backfilled beginning on February 20, 2002 with approximately four feet of ½-inch crushed rock (to approximately one to two feet above static groundwater level). A geotextile fabric was laid over the ½-inch crushed rock and seven feet of quarter bi-dust (quarry fines) were placed and compacted on top of the geotextile fabric. Approximately 16 feet of screened soil were placed and compacted immediately above the quarter bi-dust. The excavation was capped with approximately 2 feet of the native soil material excavated out of the ramp. Backfilling was completed on February 25, 2002.

A total of 500 pounds of ORCs were mixed into slurry and placed into the excavation with the ½-inch crushed rock. ORCs were placed throughout the entire excavation and in direct contact with the groundwater.

The soil and rock material removed from the UST pit over-excavation was loaded out beginning February 21 and completed by February 28, 2002. A total of 47 truck loads (approximately 848 tons) of soil and rock material were transported offsite to Keller Canyon Landfill in Pittsburg. Copies of the manifests are included in Appendix D.

On February 25, 2002, a submersible pump was used to remove approximately 6,000 gallons of purge water from the 12-inch casing. The purge water was staged in a 6,500-gallon polyethylene storage tank. Once purging was complete, a grab groundwater sample was collected through the well casing and one collected from the 6,500-gallon tank.

3.4 Laboratory Analyses

The soil and grab-groundwater samples collected from borings SB10 through SB13, the excavation, the temporary extraction well, and the 6,500-gallon tank were analyzed for the presence of TPHg and Fuel Oxygenate Compounds (FOCs) following EPA Test Method 8015M, and BTEX following EPA Test Method 8020. If FOCs were detected by EPA Test Method 8015, the samples were analyzed for FOC confirmation following EPA Test Method 8260B. The composite characterization soil samples and grab groundwater sample collected from the perched zone were analyzed for TPHg, BTEX, and MTBE by EPA Method 8015/8020, for TPH as diesel and motor oil (TPHd and TPHmo, respectively) by EPA Method 8015 Modified, and total lead (soil only). One composite sample total lead concentration exceeded 50 mg/kg and was further analyzed for soluble lead via WET analysis. The laboratory analyses were performed under expedited turn-around-time for the composite characterization soil samples and on a standard turn-around-time for the remaining samples. Reproductions of the laboratory reports and chain-of-custody documentation are presented in Appendix D.

3.5 Laboratory QA/QC Procedures

QA/QC procedures were performed for each method of analysis with specificity for each analyte listed in the test method's QA/QC. The laboratory QA/QC procedures included the following:

- One method blank for every ten samples, batch of samples or type of matrix, whichever was more frequent.
- One sample analyzed in duplicate for every ten samples, batch of samples or type of matrix, whichever was more frequent.
- One spiked sample for every ten samples, batch of samples or type of matrix, whichever was more frequent, with spike made at ten times the detection limit or at the analyte level.

Prior to submitting the samples to the laboratory, the chain-of-custody documentation was reviewed for accuracy and completeness.

4.0 FIELD OBSERVATIONS AND INVESTIGATIVE RESULTS

4.1 Site Geology and Hydrogeology

Geologic material encountered during the field activities generally consisted of a thin layer (less than one foot) of clayey silt over a very dense, fractured siltstone to the maximum depth of exploration, approximately 30 feet bgs. Groundwater entered the annular space of the borings and the excavation between 25 and 30 feet bgs. A small cavity of perched groundwater was encountered at approximately 10 feet bgs in the vicinity of the middle of the south wall of the over-excavation.

4.2 Soil Analytical Results

A summary of the analytical laboratory test results for soil samples is presented as Table 1. The laboratory results are summarized in the text below.

Pre-Remediation Soil Investigation

Two soil samples were collected from boring SB10 at 10 and 15 feet bgs. The laboratory analytical data indicated that all constituents analyzed were not detected above the laboratory reporting limit.

Stockpile Characterization Soil Samples

A total of four four-part composite soil samples were analyzed for TPHg, TPHd, TPHmo, BTEX, and lead. TPHg, TPHd, and TPHmo were all detected in each of the samples. The TPHg concentrations ranged from 25 mg/kg to 45 mg/kg and are summarized in Table 1. TPHd and TPHmo concentrations were similar and ranged from 19 mg/kg to 99 mg/kg. BTEX and MTBE concentrations are summarized in Table 1. Total lead concentrations ranged from 15 to 59 mg/kg. One composite soil sample with a total lead concentration of 59 mg/kg was re-analyzed for soluble lead by the WET method. The soluble lead concentration was 0.49 ug/l.

Over-excavation Soil Confirmation Samples

A total of seven confirmation soil samples were collected from the over-excavation sidewalls. TPHg was present in two of the samples at concentrations less than 2 mg/kg. BTEX compounds were present in four of the seven samples, with a maximum benzene concentration of 330 ug/kg. MTBE was not detected above the laboratory reporting limit in any sample.

Post-Remediation Soil Investigation

A total of four soil samples were collected two each from two boreholes. The shallowest sample in each borehole was collected in stained and odoriferous soil. The second sample in each borehole was collected below the extent of stained soil to confirm the vertical extent in soil. Contaminants were present in one sample only from stained soil material at 21 feet bgs. The contaminants detected were benzene (46 ug/kg), ethylbenzene (39 ug/kg), and total xylenes (6.5 ug/kg).

4.3 Groundwater Analytical Results

A summary of the analytical laboratory test results for groundwater samples is presented as Table 2. The distributions of TPHg, benzene, and MTBE in groundwater are depicted on Figure 4. The laboratory results are summarized in the text below.

Pre-Remediation Groundwater Investigation

Boring SB10 was advanced to the south of the former USTs to define the southern extent of groundwater impacts. The laboratory analytical data indicated that no contaminants were present in groundwater at concentrations above the respective laboratory reporting limits.

During the over-excavation, a perched groundwater zone was encountered. One grab groundwater sample was collected from the perched zone (GW1). The laboratory analytical data indicated that TPHg, BTEX, and MTBE were not present above the laboratory reporting limit.

Grab Samples From 12-inch Diameter Temporary Well Point

A total of three grab samples were collected from the 12-inch casing placed in the backfilled over-excavation. The first sample (collected on February 21, 2002 before purging) had detectable concentrations of TPHg (0.69 mg/l), benzene (19 ug/l), and MTBE (7.0 ug/l). The second sample (collected on February 25, 2002 after purging 6,000 gallons) had detectable concentrations of TPHg (0.57 ug/l), benzene (6.9 ug/l), and MTBE (33 ug/l). The third sample was collected approximately one month after the backfilling and placement of the ORCs and had no detectable concentrations of TPHg, BTEX, FOCs, or MTBE above the laboratory reporting limits.

Post Remediation Groundwater Investigation

A total of three grab groundwater samples were collected from soil borings SB11 through SB13. Contaminants were present in only one of the grab samples (SB11). The contaminants present were TPHg (0.12 mg/l), benzene (7.7 ug/l), and xylenes (1.1 ug/l).

5.0 CONCLUSIONS AND RECOMMENDATIONS

- The southern extent of groundwater impact was defined by the non-detectable contaminant concentrations in the grab groundwater sample collected from boring SB10, located approximately 70 feet south of the former UST pit.
- The over-excavation of the former UST pit resulted in removing 90 percent of the impacted soil mass. The contaminant concentrations in the impacted soil left in place are at concentrations less than the respective Preliminary Remediation Goals (PRGs).
- Post remediation groundwater concentrations demonstrated a significant reduction from the groundwater concentrations reported for grab groundwater samples collected in July 2001 and grab groundwater samples collected (pre-groundwater treatment) from the 12-inch temporary well located in the over-excavation. Post remediation grab groundwater samples demonstrated that residual groundwater contaminants (benzene at 7.7 ug/l and MTBE at 2.2 ug/l) are near or below the respective Maximum Contaminant Limit for benzene at 1 ug/l, and for MTBE at 13 ug/l.
- The soil removal and in-situ groundwater treatment were effective at reducing residual contaminant mass in soil and reducing contaminant concentrations in groundwater.

Geocon recommends that Anthony Auto Wreckers be granted closure for the two former 1,000-gallon USTs based on:

1) Removal of contaminant mass from soil and groundwater.

Approximately 848 tons of impacted soil and 6,000 gallons of impacted groundwater were removed from the site.

2) Observed reduction in contaminant concentrations in groundwater.

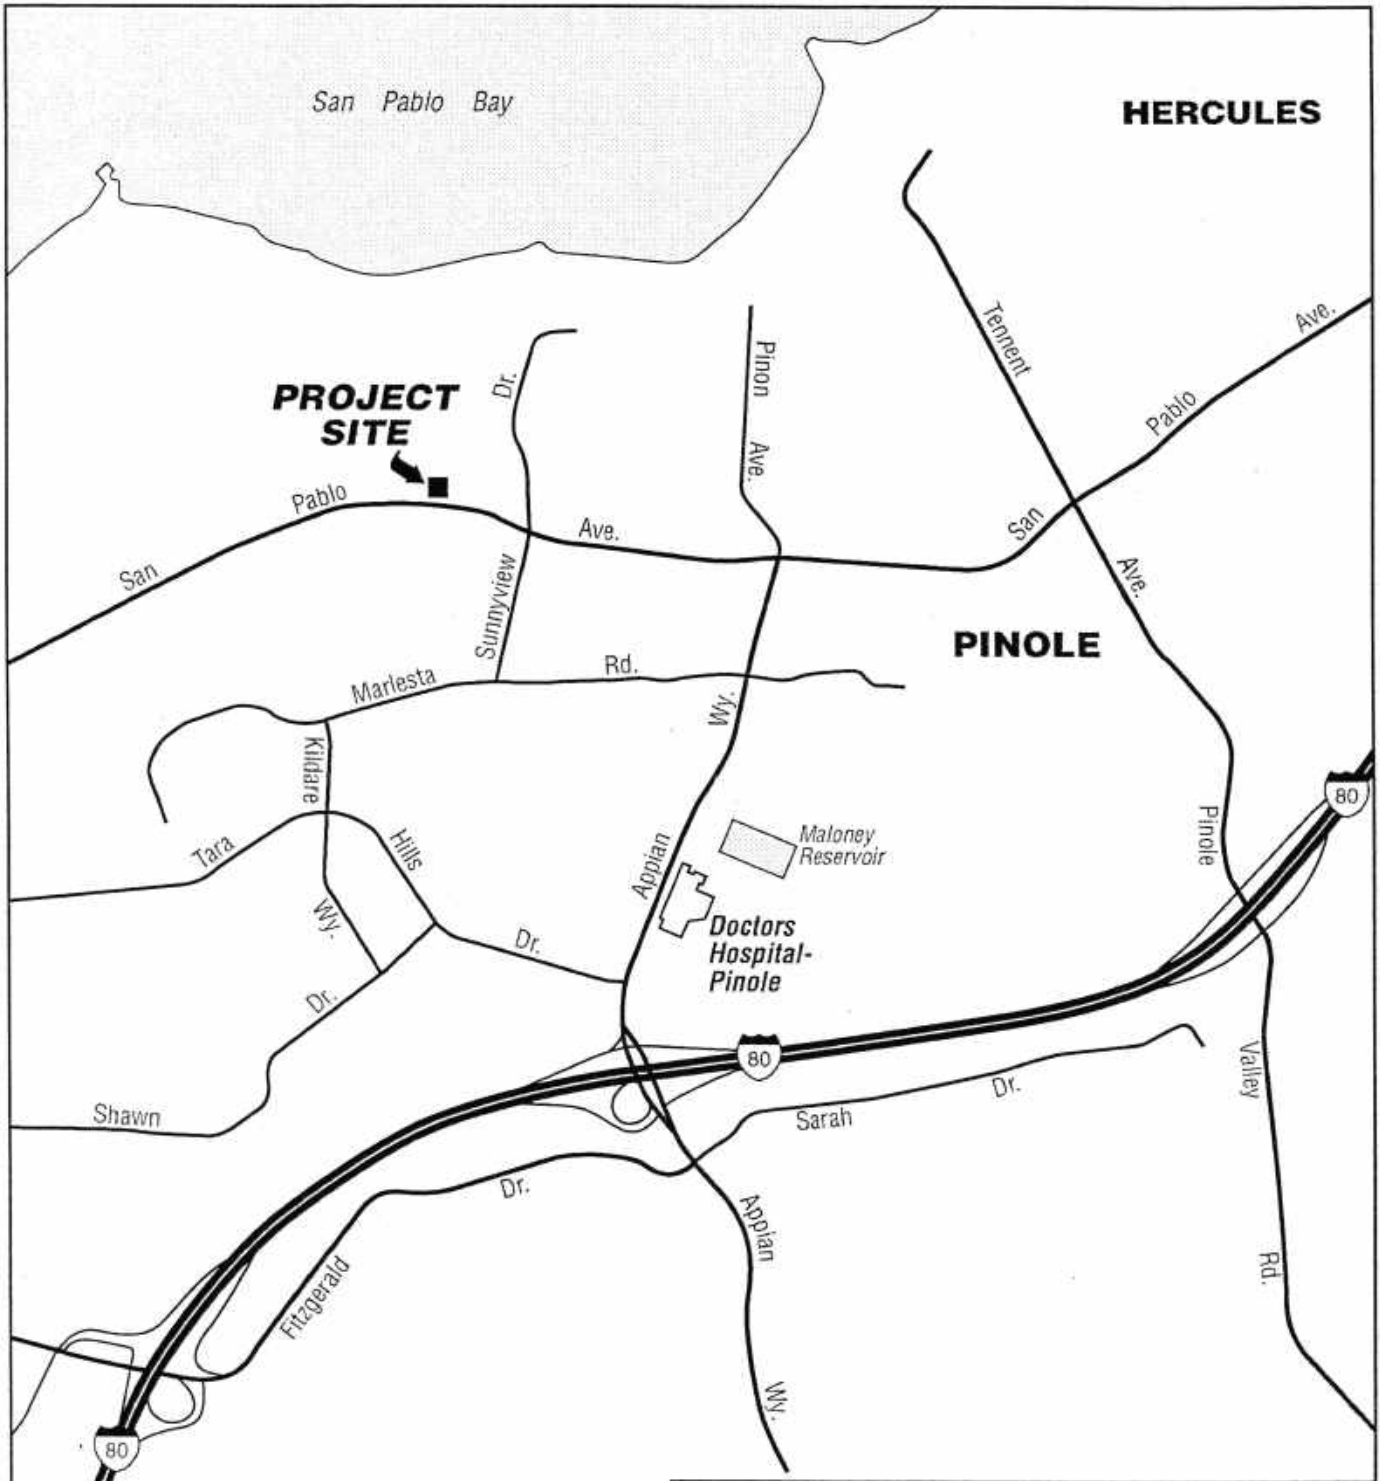

Groundwater samples collected from the 12-inch casing (i.e., from former UST pit) approximately one month after the placement of ORCs and backfilling did not contain detectable concentrations of TPHg, BTEX, or FOCs.

Geocon further recommends that the 12-inch casing be abandoned in accordance with Contra Costa County guidelines for destroying wells.

6.0 REPORT LIMITATIONS

This report has been prepared exclusively for Mr. Arley Anthony. The information contained herein is only valid as of the date of the report, and will require an update to reflect additional information obtained.

This report is not a comprehensive site characterization and should not be construed as such. The findings as presented in this report are predicated on the results of the limited sampling and laboratory testing performed. In addition, the information obtained is not intended to address potential impacts related to sources other than those specified herein. Therefore, the report should be deemed conclusive with respect to only the information obtained. We make no warranty, express or implied, with respect to the content of this report or any subsequent reports, correspondence or consultation. Geocon strived to perform the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

TERMS OF PERMIT

I hereby certify that the above information and submitted plans are true and correct and that the proposed work will comply with all permit conditions and applicable laws and regulations. I agree to obtain all required inspections, maintain a copy of the approved permit and plans at the job site until final approval, and obtain written authorization prior to deviating from the approved permit or plans, or placing the well in service. It is understood that the issuance of a permit in no way indicates that a guarantee of perfect and indefinite operation of this well is made by the Contra Costa County Environmental Health Division.

Signature of Contractor (C-57 Licensee) _____ Date _____

DO NOT WRITE BELOW THIS LINE

Permit Approved/Issued:	By: _____	Date: _____
Permit Denied:	By: _____	Date: _____
Final Approval:	By: _____	Date: _____

PERMIT CONDITIONS:

- Contact the Environmental Health Division at least 24 hours prior to sealing the annular space or well destruction to schedule an inspection appointment at a mutually agreeable time. Voicemail messages are not acceptable; confirmation must be made directly with the inspector or supervisor. Appointments shall be arranged for County business hours.
- A proper annular seal and surface construction features are to be installed, and required water analyses completed within 30 days of commencing drilling.
- Monitoring well/soil boring shall be destroyed pursuant to County regulations within 30 days of completing monitoring activities.

PERMIT EXPIRES 180 DAYS FROM DATE OF APPROVAL (permits are non-transferrable, revocable and suspendable)

RE: Anthony Auto Body - E8022-06-03

Work Order No.: 055186

Attention: Matt Hanko

Enclosed are the results for sample(s) received on January 31, 2002 by Advanced Technology Laboratories and tested for the parameters indicated in the enclosed chain of custody.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562)989-4045 if I can be of further assistance to your company.

Sincerely,

for Edgar Caballero
Laboratory Director

This cover letter is an integral part of this analytical report.

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures. The results contained in this report meet all requirements of NELAC and pertain only to those samples which were submitted for analysis.

CASE NARRATIVE

This hardcopy data package contains sample results and batch QC results for one water and seven soil samples received from the above referenced project. The samples were received cold and intact.

Total Volatile Hydrocarbons/BTXE: The soil matrix spike recoveries for gasoline were not meaningful. The concentration of analyte in the spiked sample rendered the spike amount insignificant. The associated laboratory control sample (LCS) recovery was acceptable, therefore, there is no affect on the quality of the sample results. No other analytical problems were encountered.

Gasox: No analytical problems were encountered.

Pinole, CA 94565

Subject: Case Closure -- 850 San Pablo Avenue, Pinole, Contra Costa County

Dear Mr. Anthony :

This letter confirms the completion of site investigation and remedial action for the underground storage tank formerly located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tanks are greatly appreciated.

Based upon the available information, including the land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Titles 23, California Water Code of Regulations, Division 3, Chapter 16, Section 2721(e). If change in land use is proposed, the owner must promptly notify this agency.

Please contact our office, if you have any questions regarding this matter.

Sincerely,

for **Loretta K. Barsamian**
Executive Officer

Site Summary Form

25-Jun-02

Site: ANTHONY AUTO WRECKER
850 SAN PABLO AVE, PINOLE, CA

RB File No.: 07-0570

SR

Yes

County: 07

Nearest Surface Water: San Pablo Bay

.5 miles

Pit Samples Submitted?: No

Highest GW Depth: 9

Potential Ecological Risk: Low to none

No. Borings: 12

Lowest GW Depth: 26

Distance to Wells: none <.5 **Affected?:** No

No. Wells: 0

Direction of GW Flow: N

Human Health Risk: none

Ground Elev.:

Staff Notes:

On 2/21/97, a 13267 letter was sent requesting an initial groundwater investigation to determine whether the groundwater has been impacted by the petroleum release. In addition, the request also included documentation on the nearest wells and creeks. I was contacted by the responsible party when he received the letter by telephone and he agreed to do the work. Since the source soils have been removed and treated, we agreed that one monitoring well downgradient or a hydro-punch would be adequate. If the groundwater is clean and the receptors documented, site closure would be appropriate. The workplan is due 5/21/97. Sent approval of workplan 8/10/00, response due 10/29/00; Request for add'l info sent 12/6/00, due 1/16/01. Workplan approval sent 3/27/01, report due 6/27/01. The UST component of this site (which is this case number) can be closed as remedial action has been implemented and post-remedial confirmation sampling indicated low levels of hydrocarbons in soil and grab GW at the site.

Geology:

Silty Clay to sandy silt; Highly fractured siltstone.

Comments:

Two-1,000 gal. USTs removed 1/30/92. Soil samples from 8' bgs at time of tank removal contained 2,200 ppm TPHg. 75 cubic yards of soil over excavated from UST pit to a depth of 14' bgs in 4/92. Soil samples taken did not contain detectable concentrations of petroleum hydrocarbons. Case closed by county. Board request MtBE info 5/00. Single soil boring advanced 10/5/00 in location of former USTs. Grab water samples contained up to 2,200 ppb benzene, 3,700 ppb toluene, 1,000 ppb ethylbenzene, 4,400 ppb xylene, and 200 ppb MtBE. Subsurface investigation in July 2001 indicated hydrocarbon presence in SB-4, located immediately south of the former USTs. Based on this round of data collected, proposal by RP, consultant and the prospective buyer (City of Pinole) was to implement a remedial action plan consisting of soil excavation, ORC addition and purging of groundwater using a temporary well casing in the UST pit. Remedial action plan approved by RWQCB. Remedial action implemented in Feb 2002 and consisted of excavating soil to about 30 ft (1,000 cu yds), purge about 6K gals of GW and addition of 500 lbs of ORCs. Sidewall samples and post remedial samples indicate low levels of hydrocarbons. Data collected pre and post remediation indicates clean-up to the extent possible. Very low residuals (excavation south sidewall sample at 25' - 330 ppb benzene in soil, close to the office bldg on site). Downgradient boring SB-11 - 7.7 ppb benzene and 2.2 ppb MtBE in GW and 46 ppb benzene in soil in this boring at 21 ft bgs. Lateral and vertical extent defined and remediated. Site is a low-risk case and closure can be granted. Note: Closure granted for UST component only. There is a SLIC component for the site (07S0139) - motor oil and lead-impacted soil remediation pending.

Management Rqmts:

GLD sent a case closure summary form to consultant on 6/12/97. Ground water not encountered even in third overexcavation

to 14 ft. Initial concentrations of TPH and depth to gw do not require ground water testing. Site already closed by county. Only low concentrations of residuals left in soil and GW. ORCs added to GW will further remediate GW and hence, RWQCB grants case closure for this site's UST component. Existing 12-inch dia well in the former UST pit must be abandoned properly per CCHSD guidelines and the 6,000-gallons of purge water on site must be disposed of after necessary testing is complete.

Reports: Site Closure Summary, Mtbe investigation workplan, limited groundwater investigation results (Geocon) 11/3/00. Site Investigation Workplan 1/01. Site investigation report (August 2002) by GeoCon. Site Remediation report (May 2002) by GeoCon.

Remedial Activity

<u>Action Taken</u>	<u>Amount</u>
<u>Free Product:</u>	
<u>Soil:</u> Over-excavated (twice) -off-site landfill disposal	75 + 1,000 cy
<u>Ground Water:</u> Stored on site, pending disposal	6,000 gallons
<u>Vapor:</u>	0

5 Salmon Lane
Pinole, CA 94565

Subject: No Further Action – Anthony Auto Wreckers Property, 850 San Pablo Avenue, Pinole, Contra Costa County

This letter confirms the completion of site investigation and remedial action for lead and petroleum-impacted soils at the subject site. Thank you for your cooperation throughout this investigation.

Based on previous investigations at the site, two areas were identified as containing lead-impacted soil at concentrations exceeding the commercial/industrial preliminary remediation goal of 750 mg/kg. These areas were located in the northern (lower) and central (upper) portions of the site, as shown in the attached site plan. A further area in the southern portion of the site was identified as containing TPH-affected soil at concentrations exceeding the Risk-Based Screening Levels (*Application of Risk-Based Screening Levels and Decision Making to Sites with Impacted Soil and Groundwater*, RWQCB, SF Bay Region, Interim Final, December 2001).

Remedial activities at the site included

1. Excavating about 2,800 tons of lead-affected soil from the lower and upper lead-impacted areas, stabilizing the soils and disposing off-site, and
2. Excavating about 742 tons of TPH-affected soil from the site and disposing at an off-site facility.

Analytical results of the confirmation sampling collected from the base and sidewalls of the excavations indicated that the remedial goals established for lead and fuel-affected soil has been successfully achieved, considering a commercial/industrial scenario.

Although soils at the site that were impacted with lead have been adequately remediated for a commercial/industrial use scenario, residual lead concentrations still remain in soil that exceed the acceptable standard adopted for a direct exposure pathway in an unrestricted/ residential land use scenario, which is set at 255 mg/kg (Table K-1, *Application of Risk-Based Screening Levels and Decision Making to Sites with Impacted Soil and Groundwater*, RWQCB, SF Bay Region, Interim Final, December 2001). The risk-based screening level for this pathway was adopted from the DTSC, 2001, *Interim Guidance for Evaluating Lead-Based Paint and Asbestos Containing Materials at Proposed School Sites*: California Environmental Protection Agency, DTSC, July 23, 2001 (<http://www.dtsc.ca.gov/schools/schools.html>).

Of particular concern is the area designated as "the lower lead area" in LFR-Levine-Fricke's *Soil Remediation Activities Report* of September 2002, where lead concentrations above 255 mg/kg were detected in three of the confirmation samples.

Therefore, to ensure that the residual risk is appropriately managed, a deed restriction has been recorded with the Contra Costa County stating that residual pollution remains in soil beneath the subject site, and in the event of construction or demolition, polluted materials should be disposed of appropriately. The restriction also states that the property use shall be limited to industrial, commercial or office space, and no hospitals, schools for persons under 21 years of age, day care centers for children or senior citizens, or residences for human habitation shall be permitted at the site.

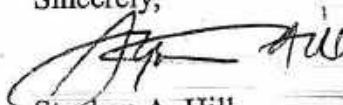

Based on the reports and the details submitted to this office, it is our understanding that the City of Pinole Redevelopment Agency is in the process of purchasing the property to redevelop it for industrial and commercial use. During any site redevelopment, any soil that is excavated or disturbed must be properly managed, as per the guidelines indicated in the *Soil Management Plan*, dated October 3, 2002, and prepared for the site by LFR-Levine-Fricke. This is also one of the conditions laid out in the deed restriction.

A correspondence dated October 24, 2002, to our office by the project manager of the City of Pinole Redevelopment Agency (City) indicates a proposal to create a water retention basin in the southeast portion of the subject site. The City shall seek the approval of this office prior to proceeding with any such construction to ensure the proper management of any runoff from the lead-impacted surface soils at the site.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the pollutant release at the subject site is required.

If you have any questions regarding this matter, please contact Sampath Rangarajan of my staff at (510) 622-2381 [e-mail sr@rb2.swrcb.ca.gov].

Sincerely,

Stephen A. Hill
Chief, Toxics Cleanup Division

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes
Does corrective action protect public health for current land use? Yes
Site Management Requirements: Residual contamination in soil remains at the site that could pose an unacceptable risk under certain development activities such as site grading, excavation, or installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of a water well near the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. Alameda County Environmental Health Department, and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The concentrations of residual contamination and any associated site risks are expected to reduce with time.
Should corrective action be reviewed if land use changes: Yes

Monitoring Wells Decommissioned: Yes	Number Decommissioned: 11	Number Retained: 0
List Enforcement Actions Taken: None	List Enforcement Actions Rescinded: None	

V. ADDITIONAL COMMENTS, DATA, ETC.

This case does meet all the criteria of the State Water Resources Control Board *Low-Threat Underground Storage Tank Case Closure Policy*¹. Regional Board staff determined the case meets the Site closure criteria of the 1996 Regional Water Board's Supplemental Instructions to the Interim Guidance on required Cleanup at Low Risk Fuel Sites². According to this Interim Guidance, Water Board staff finds that:

1. The leak has been stopped and ongoing sources, including petroleum free product, removed or remediated.
2. Site characterization for soil and groundwater has been completed.
3. The dissolved hydrocarbon plume is not migrating.
4. No water wells, deeper drinking water aquifers, surface water, or other sensitive receptors are likely to be impacted.
5. The Site presents no significant threat to human health.
6. The Site presents no significant threat to the environment.

VI. TECHNICAL REPORTS, CORRESPONDENCE, ETC. THAT THIS CLOSURE RECOMMENDATION WAS BASED UPON

Report	Issuance Date
Well Destruction Report, Tim Cook,	5/4/2017
Request for Closure, Tim Cook	8/31/2016
Sub-slab Soil Gas and Ambient Air Samples, Tim Cook	4/14/2016

**SUBJECT: Underground Storage Tank (UST) Case Closure for Time Oil Company
825 San Pablo Avenue, Pinole, Contra Costa County - UST Case No. 07-0329**

Dear Mr. Chandler:

This letter confirms the completion of a site investigation and corrective action for the underground storage tanks formerly located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tanks are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tanks site is in compliance with requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective actions regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

for Bruce H. Wolfe
Executive Officer

Tank No.	Size in Gallons	Contents	Closed In Place/Removed?	Date
1	500	Used Oil	Removed	7/1986
2	4,000	Gasoline	Removed	7/1986
3	8,000	Gasoline	Removed	7/1986
4	10,000	Gasoline	Removed	7/1986

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Tank System		
Site characterization complete? Yes		Date Approved By Oversight Agency: March 6, 2000
Monitoring wells installed? No		Number: Proper screened interval?
Highest GW Depth Below Ground Surface: 4'		Lowest Depth: 24' Flow Direction: North
Most Sensitive Current Use: Potential drinking water source		
Most Sensitive Potential Use and Probability of Use: Irrigation water well, probability extremely low		
Are drinking water wells affected? No		Aquifer Name: NA
Is surface water affected? No		Nearest/Affected SW Name:

Off-Site Beneficial Use Impacts (Addresses/Locations): None							
Report(s) on file? Yes				Where is report(s) filed? California Regional Water Quality Control Board San Francisco Bay Region

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Yes		
<p>Site Management Requirements: Residual contamination in both soil and groundwater remains at the site that could pose an unacceptable risk under certain development activities such as site grading, excavation, or installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of a water well near the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. The County of Contra Costa Health Services Department, and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risks are expected to reduce with time.</p>		
Monitoring Wells Decommissioned: NA	Number Decommissioned: NA	Number Retained: NA
List Enforcement Actions Taken; None		
List Enforcement Actions Rescinded: N/A		

V. ADDITIONAL COMMENTS, DATA, ETC.

Based on the results of the additional site investigation dated March 6, 2000, it is apparent that residual petroleum hydrocarbons detected in the soil and groundwater are limited onsite as previously concluded in the Preliminary Site Investigation Report dated December 9, 1999. The dissolved hydrocarbon plume appears to be in a "steady-state" condition with intrinsic biodegradation as the predominant attenuation mechanisms for hydrocarbon. As shown on Figure 4, the correlation between the lower concentrations of DO and nitrate and higher concentrations of total alkalinity in the grab groundwater samples with the relatively higher TPH-G concentrations are indicative of anaerobic biodegradation of petroleum hydrocarbons destruction. Results of this additional investigation confirmed that the hydrocarbon plume has not migrated beyond the vicinity of the former underground fuel storage tanks.

It is apparent that no further investigation, including groundwater monitoring is warranted for this former TOC site based on the following:

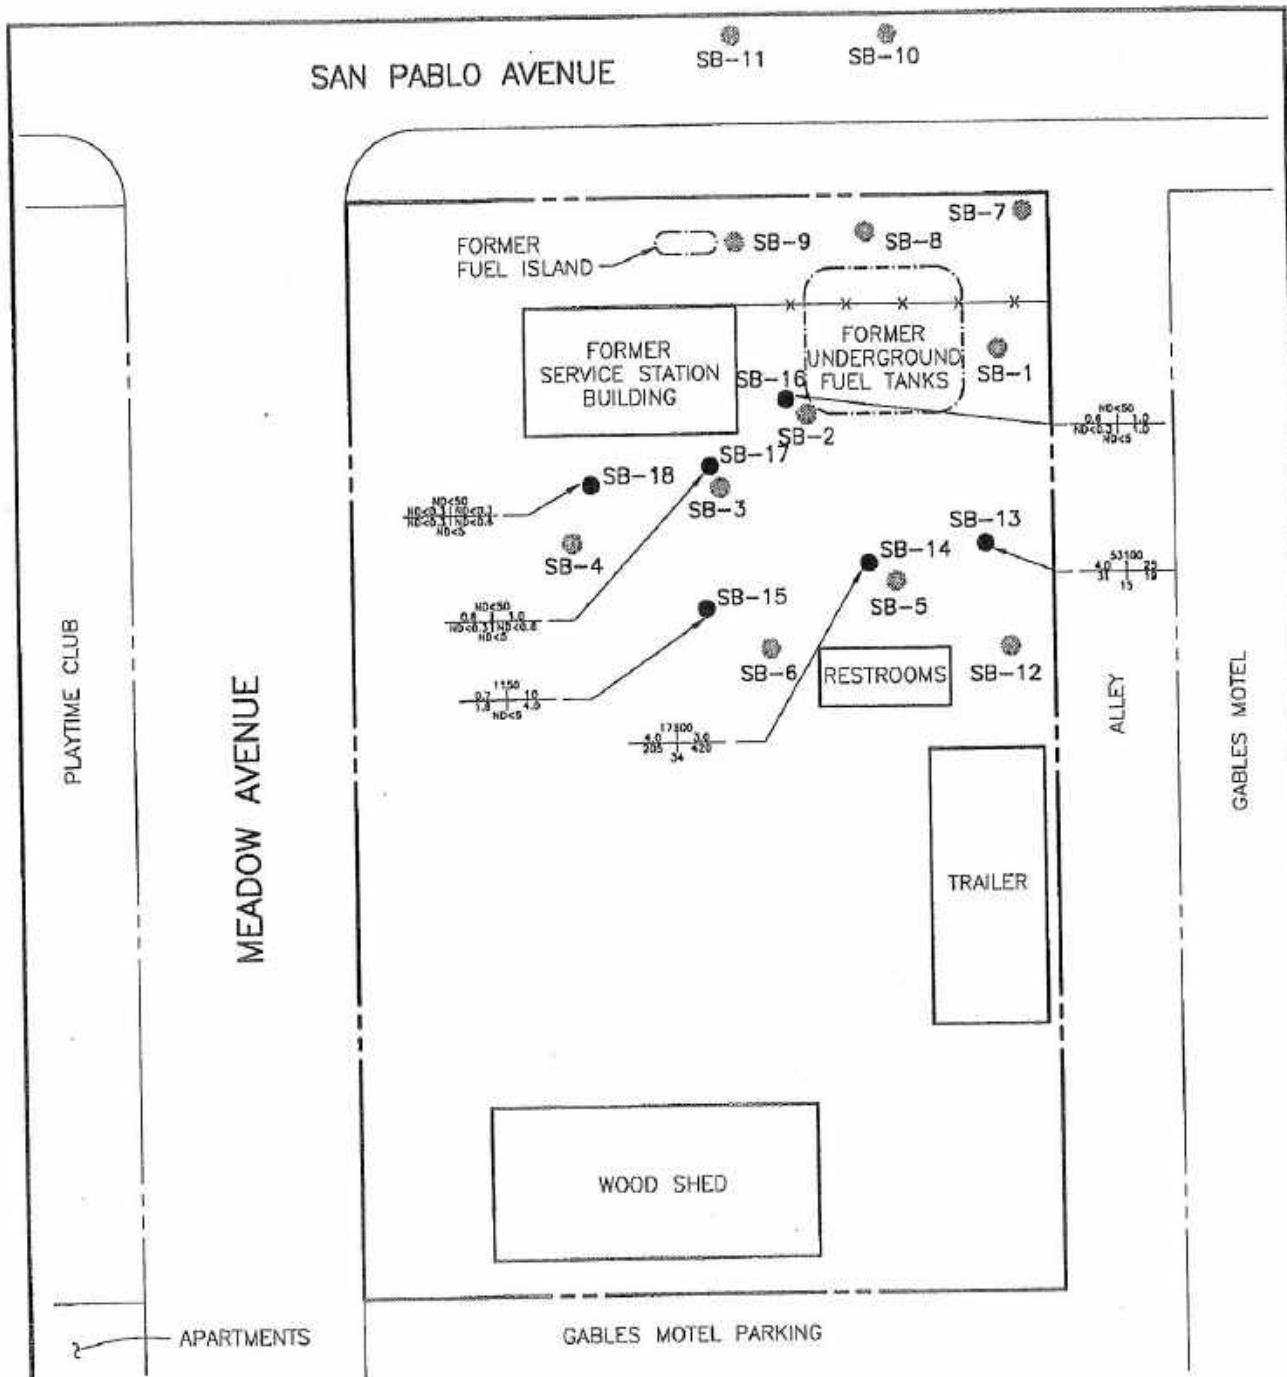

- All the underground storage tanks, which were the primary source of petroleum hydrocarbons in the shallow aquifer, were removed in 1987.
- The extent of the residual hydrocarbons in the subsurface has been defined and is limited onsite
- Analysis of indicator parameters indicates the presence of natural attenuation of intrinsic biodegradation at the site
- The residual petroleum hydrocarbon plume in the groundwater appears to be in a "steady-state" condition and is not migrating in the subsurface. With intrinsic bioattenuation, the residual hydrocarbon plume can be expected to recede or decrease over time.
- The concentrations of residual petroleum hydrocarbons detected in the subsurface during this investigation were all below the corresponding Tier 1 Risk-Based Screen Levels (RBSL's) and Tier 2 Site-Specific Target Levels (SSTL's) that were calculated as part of the preliminary site investigation in December, 1998.
- The shallow groundwater is not currently used nor is expected to be used in the future as a drinking water supply.
- There are no sensitive receptors, such as drinking water wells, in the immediate vicinity of the site.

At this time, we recommend no further action and that regulatory case closure be approved for this site.

	SITE PLAN GENERAL NOTES 1. THE SITE PLAN SHALL MEET ALL ENGINEERING & NPDES REQUIREMENTS. 2. GENERAL CONTRACTOR TO REVIEW THE SOILS REPORT AND ALL AMENDMENTS LISTED ON THE TITLE SHEET AND FOLLOW ALL RECOMMENDATIONS. 3. U.O.N. ALL DIMENSIONS TO CONCRETE WALLS AND CURBS ARE EITHER TO THE CENTER (SHOWN WITH A CENTERLINE) OR FACE OF THE WALL OR CURB. ALL DIMENSIONS TO FRAMED WALLS ARE EITHER TO THE CENTER LINE OF THE WALL FRAMING (SHOWN WITH A CENTERLINE) OR THE FACE OF THE WALL FINISH. 4. REFER TO CIVIL AND MEP PLANS TO CONFIRM UTILITY INFORMATION SHOWN ON THE ARCHITECT'S SITE PLAN AND FOR ADDITIONAL UTILITY INFORMATION. GENERAL CONTRACTOR TO COORDINATE ALL POINTS OF CONNECTION. 5. REFER TO CIVIL DRAWINGS FOR ALL FINISHED GRADES AND SLOPES. ALL FINISHED GRADES TO PROVIDE POSITIVE DRAINAGE AWAY FROM THE BUILDING. GENERAL CONTRACTOR TO FIELD VERIFY. 6. ALL ACCESSIBLE ROUTES IDENTIFIED ON THE SITE PLAN DRAWINGS CONFORM TO THE FOLLOWING: a) SLOPES IN THE DIRECTION OF TRAVEL DO NOT EXCEED 5%. CROSS SLOPES DO NOT EXCEED 2%. b) THE CLEAR WIDTH OF ALL WALKWAYS IS 4'-0" MIN. c) CHANGES IN LEVEL UP TO 1/2" COMPLY WITH 11/10.2.1. CHANGES IN LEVEL GREATER THAN 1/2" IF THEY OCCUR ARE RAMPED. SEE PLANS. d) THE VERTICAL CLEARANCE ALONG THE ACCESSIBLE ROUTE IS 8'-0" MIN. 7. ALL PAVED AND LANDSCAPED AREAS TO BE BOUND BY A MIN. 6" HIGH, 6" WIDE CONCRETE CURB U.O.N. 8. A CONCRETE MOW STRIP EXTENDING 12" BEYOND EA END OF THE OPENING SHALL BE PROVIDED @ ALL EXTERIOR GLAZING WHERE THE SILL IS WITHIN 3' VERTICAL OF THE FINISH GRADE. 9. A CONCRETE SPLASH BLOCK SHALL BE PROVIDED AT THE BASE OF ALL EXTERIOR DOWNSPOUTS THAT DISCHARGE ON SURFACES OTHER THAN CONCRETE. 10. PROVIDE PIPE BOLLARD PROTECTION POSTS AS REQUIRED BY UTILITY COMPANIES AND OR FIRE AUTHORITIES AT ALL EXTERIOR ELECTRICAL EQUIPMENT AND FIRE PREVENTION DEVICES. IF PIPE BOLLARD PROTECTION POST DETAILS ARE NOT PROVIDED BY UTILITY COMPANIES AND OR FIRE AUTHORITY 11. ALL EXPOSED BIOTENSION DEVICE COVERINGS SHALL BE PAINTED FORREST GREEN. 12. WHERE OCCURS, GENERAL CONTRACTOR TO PROVIDE FLUID APPLIED DAMP PROOFING AT ALL RETAINING AND PLANTER WALLS WHERE THE SIDE OF THE WALL OPPOSITE THE SOIL SIDE IS EXPOSED TO VIEW AND ALL EXTERIOR WALLS WHERE THE ADJACENT FLOOR SLAB IS BELOW GRADE.

GENERAL NOTES

1. THE LOCATIONS OF UNDERGROUND UTILITIES AS SHOWN HEREON ARE BASED ON ABOVE GROUND STRUCTURES AND RECORD DRAWINGS PROVIDED THE SURVEYOR. LOCATIONS OF UNDERGROUND UTILITIES/STRUCTURES MAY VARY FROM LOCATIONS SHOWN HEREON. ADDITIONAL BURIED UTILITIES/STRUCTURES MAY BE ENCOUNTERED. NO EXCAVATIONS WERE MADE DURING THIS SURVEY TO LOCATE BURIED UTILITIES/STRUCTURES.
2. CONTRACTORS AND OTHERS PERFORMING WORK SHALL VERIFY THE EXACT LOCATION AND DEPTH OF ALL UNDERGROUND UTILITIES.
3. CONTOUR INTERVAL = 1'
4. BASIS OF BEARINGS: THE BEARING N87°49'24"E BETWEEN TWO FOUND MONUMENTS AS SHOWN ON SHEET 3 OF 12 OF THE RECORD OF SURVEY, FILED JULY 2, 1993, IN BOOK 102 OF L.S.M. AT PAGE 49, CONTRA COSTA COUNTY RECORDS.
5. ELEVATIONS ARE BASED ON CITY OF PINOLE IMPROVEMENT PLANS FOR SAN PABLO AVE., DATED 3/14/86.
6. BOUNDARY AND EASEMENTS ARE PER SUBDIVISION 8758, RECORDED DECEMBER 17, 2007, IN BOOK 506 OF MAPS PAGE 13, CONTRA COSTA COUNTY RECORDS.

APPENDIX G

QUALIFICATIONS

Lea Palumbo

Project Manager, Due Diligence

EDUCATION

- BS - Environmental Policy Analysis and Planning, University of California, Davis

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Palumbo provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Assessments, Environmental Transaction Screens, Regulatory Database Review, and Historical Records Review.

PROJECT EXPERIENCE

Project experience for Ms. Palumbo includes:

- Phase I Environmental Site Assessments (PHI ESA)
- Environmental Transaction Screens (ETS)
- Limited Environmental Site Assessments
- Records Research with Risk Assessments
- Regulatory Database Review
- Historical Records Review

In addition, prior to joining the environmental consulting industry, Ms. Palumbo spent four years studying a diverse range of environmental disciplines including: environmental policy analysis, environmental law, geology, Geographic Information Systems (GIS), sustainable development, and environmental planning.

Marsha Thompson

National Client Manager

EDUCATION

- B.S. - Bachelor of Science, Environmental Science, Barry University

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Thompson has been in the environmental service and due diligence industry since 2007. Her AEI project management experience includes Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, Historical Records Reviews, and Limited Environmental Site Assessments. Ms. Thompson has successfully completed assessments on a variety of properties including: industrial, commercial, agricultural, residential, and vacant sites and has managed multi-site portfolios of properties spread across various states. Ms. Thompson is accustomed to the needs and requirements of a variety of reporting standards including Freddie Mac, Fannie Mae, and customized client formats.

PROJECT EXPERIENCE

Project experience for Ms. Thompson includes:

- Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Regulatory Database Reviews
- Historical Records Reviews
- Limited Environmental Site Assessments
- Project coordination and setup

As a National Client Manager, Ms. Thompson provides in-house technical guidance and review to ensure all projects meet client's goals and scope expectations and develops an understanding of client's goals to facilitate the delivery of consulting to meet those needs.
